

## C O N T E N T S

PREFACE . . . . .	
ORGANIZING COMMITTEE . . . . .	
1. COLLISION PROCESSES	
1.1	<u>Collision processes in swarms</u>
1.1.1	<u>Recombination, attachment, and ion mobilities</u>
1.1.1.1	Recombination measurements in helium plasmas at pressures 100-760 torr. . . . . 1 J.Stevelfelt
1.1.1.2	Collisional-radiative ionization and recombination coefficients for helium plasmas . . . . . 2 H.W.Drawin, F.Emard and H.O.Tittel
1.1.1.3	Argon recombination in the afterglow of a glow discharge in dependence on gas purification . . . . . 3 P.Lukáč
1.1.1.4	Photodetachment and attachment cross-sections of F, Cl, and Br near threshold . . . . . 4 H.Frank, G.Mück, M.Neiger and H.P.Popp
1.1.1.5	The influence of processes dependent on the square of the gas number density on the spatial growth of ionization in air . . . . . 5 T.N.Daniel J.Dutton and F.M.Harris
1.1.1.6	Motion of gaseous ions in electrostatic fields. A computer simulation study . . . . . 6 H.R.Skullerud
1.1.1.7	The mobility of negative ions in their parent gases . . . . . 7 S.S.Pešić, R.K.Janev and D.M.Davidović
1.1.1.8	Mobility of caesium ions in low electric fields . . . . . 8 A.Popescu and N.D.Niculescu
1.1.1.9	Electron recombination in the noble gases . . . . . 9 G.G.Dolgov-Savel'ev, B.A.Knyazev, Yu.L.Kozminikh and V.V.Kuznetsov
1.1.1.10	Determination of Cs <sup>+</sup> ions mobility in cesium vapours using a reference noble gas . . . . . 10 G.Musa, A.Baltog, L.Năstase and I.Mustață
1.1.2	<u>Reactions, neutral and ion - molecules</u>
1.1.2.1	Measurements of thermal-energy charge-exchange rate coefficients for rare gas ions . . . . . 11 R.C.Bolden, R.S.Hemsworth, M.J.Shaw and N.D.Twiddy
1.1.2.2	Molecular cesium ion nature and formation in discharge cesium plasma . . . . . 12 N.D.Morgulis, Yu.P.Korchevoi and D.Ya.Dudko
1.1.2.3	Studies of plasma components in CO <sub>2</sub> -laser gas discharge . . . . . 13 E.S.Gasilevich, E.N.Lotkova, V.N.Ochkin, N.N.Sobolev and N.G.Yaroslavsky
1.1.3	<u>Afterglows</u>
1.1.3.1	Early afterglow of the high ionized helium plasma . . . . . 14 G.F.Gippius, V.N.Kolesnikov and L.I.Shumskaya
1.1.3.2	The decay of neutral gas temperature in a helium afterglow . . . . . 15 T.P.Sorensen and M.C.Sexton
1.1.3.3	A spectroscopic measurement of the electron temperature decay in an argon afterglow . . . . . 16 B.V.Donovan and M.C.Sexton

1.1.3.4	Time-resolved optical absorption measurements of excited atom concentrations in the argon afterglow . . . . .	17
	E.Ellis and N.D.Twiddy	
1.1.3.5	Experimental studies of small electron currents following rare-gas glowing discharge . . . . .	18
	A.A.Lukashev and P.N.Chistyakov	
1.1.3.6	Electron-ion recombination in the flowing afterglow . . . . .	19
	M.R.Mahdavi, M.M.Nakshbandi, and J.B.Hasted	
1.1.4	<u>Ionization, excitation - deexcitation, dissociation</u>	
1.1.4.1	Complete local thermodynamic equilibrium in a hydrogen plasma . . . . .	20
	C.Deutsch and L.Herman	
1.1.4.2	Relation for ionization of hydrogen in nonthermal equilibrium . . . . .	21
	S.Suckewer	
1.1.4.3	Stepwise excitation and ionization in cesium vapour . . . . .	22
	D.Popescu, I.Popescu and J.Richter	
1.1.4.4	Mechanisms of ionization and population of energy levels of K and Rb atoms in low pressure discharge . . . . .	23
	A.M.Devyatov, T.N.Solov'ev and L.M.Volkova	
1.1.4.5	Stepwise excitation and ionization of gases in gas-discharge plasma . . . . .	24
	A.N.Klucharev, Yu.A.Tolmachev and S.E.Frisch	
1.1.4.6	Experimental investigation of ionization processes in argon-cesium plasma . . . . .	25
	D.Novichkov	
1.1.4.7	Ionization and dissociation of ytterbium chloride in the low voltage low pressure arc discharge . . . . .	26
	H.Wetke	
1.1.4.8	The measurement of Penning ionization cross-sections for helium $2^3S$ metastables . . . . .	27
	R.C.Bolden, R.S.Hemsworth, M.J.Shaw and N.D.Twiddy	
1.1.4.9	Measurements of collisional excitation rates for lithium-like Ne VIII ions in a plasma . . . . .	28
	H.J.Kunze and W.D.Johnston III	
1.1.4.10	On the calculation of the excitation cross-sections for neon atom by electron collisions using atomic screening parameters . . . . .	29
	L.Brandus	
1.1.4.11	Study of intensities of OI $3s\ ^3S_1 - 3p\ ^3P_{021}$ line complex for the different excitation conditions . . . . .	30
	I.Siara and C.Ungureanu	
1.1.4.12	Population processes during the rise time of a powerful current pulse in $N_2$ . . . . .	32
	I.N.Knyazev	
1.1.4.13	On Penning excitation of nitrogen molecules by argon metastables . . . . .	33
	W.K.McGregor	
1.1.4.14	Pulse electron impact of vibrational levels in polyatomic molecules . . . . .	34
	A.S.Biryukov, B.F.Gordietz and L.A.Shelepin	
1.1.4.15	Collecting and counting the first electrons produced in a gas by a non-focused laser radiation . . . . .	35
	A.Blanc and D.Guyot	
1.1.4.16	Multy-photon ionization of a molecule by the field of an electromagnetic wave (on the influence of the vibrational motion) . . . . .	36
	O.V.Kudrevatova	

1.1.4.17	The multiphoton excitation and processes of double-stage ionization in gases . . . . .	38
	V.A.Kovarsky	
1.1.4.18	Method of calculation of multiphoton processes in atoms . . . . .	39
	L.P.Rapoport, B.A.Zon and N.L.Manakov	
1.1.4.19	The strong optical field action on the hydrogen molecule . . . . .	40
	N.K.Berejetskaya, G.S.Voronov, G.A.Delone, N.B.Delone and G.K.Piskova	
1.1.4.20	Statistical aspect of the theory multiphoton processes . . . . .	41
	V.A.Kovarsky	
1.1.4.21	On the role of the atomic levels in the multiphoton ionization . . . . .	42
	G.A.Delone, N.B.Delone, M.P.Douskaya and K.B.Petrosian	
1.1.4.22	Multiphoton dissociation and ionization of molecules . . . . .	43
	N.K.Berejetskaya, G.S.Voronov and N.P.Donskaya	
1.1.5	<u>Avalanches</u>	
1.1.5.1	Effect of attachment and multiple ionization on Townsend's $\alpha$ . . . . .	44
	M.Narayana Swamy and J.A.Harrison	
1.1.5.2	Measurement of the first Townsend coefficient in mixtures of neon and argon and in pure helium by the radiation method . . . . .	45
	F.J. de Hoog	
1.1.5.3	Ionization growth in carbon monoxide . . . . .	46
	G.H.L.Davies and A.W.Williams	
1.1.5.4	Ionization coefficients of MHD working gases . . . . .	47
	Th.Bohn	
1.2	<u>Physical chemistry of plasma</u>	
1.2.1	Exchange reaction and dissociation in low-temperature plasma under non-isothermic conditions . . . . .	48
	J.Preis	
1.2.2	A method of calculation of interaction mechanisms in discharge plasma . . . . .	49
	Yu.G.Basov	
1.2.3	Chemi-ionization and chemi-excitation in the plasma of low-pressure acetylene-air flame . . . . .	50
	L.N.Glushko, V.I.Tverdokhlebov and N.N.Chirkin	
1.2.4	Chemistry of the low pressure helium afterglow . . . . .	51
	C.B.Collins	
1.2.5	A study of chemical reactions in a sealed-off CO <sub>2</sub> -laser discharge tube . . . . .	52
	E.N.Lotkova and V.I.Makarov	
1.3	<u>Shock waves</u>	
1.3.1	<u>Ionization and relaxation in shock waves</u>	
1.3.1.1	Shock tube measurements of ionization relaxation times in air . . . . .	53
	J.H.Schäffer and A.Frohn	
1.3.1.2	Ionization study in shock wave front in gas-discharge plasma . . . . .	54
	Yu.I.Chutov	
1.3.1.3	Structure of a shock wave in a weakly ionized plasma . . . . .	55
	A.D.Pataraya and V.I.Svimonishvili	
1.3.1.4	Studies of electron relaxation in shock heated plasma by microwave radiation . . . . .	56
	V.G.Testov	

1.3.1.5	Nonequilibrium zone radiation behind strong shock waves in air . . . . .	57
	M.B.Zheleznyak and A.Kh.Mnatsakanian	
1.3.1.6	Laser beam interferometric and spectroscopic measurement of the electronic density of a rare gas plasma created in a shock tube . . . . .	58
	A.Lesage and J.Richou	
1.3.1.7	Study of the propagation of a discharge plasma and the associate shock wave in an electromagnetically driven shock tube . . . . .	59
	J.Renneboog and L.Rybowski	
1.3.1.8	A spark pre-ionization of an electrodeless discharge . . . . .	60
	F.Panarella	
1.3.1.9	Some characteristics of hydromagnetic ionizing shock waves propagating into gaseous mixtures . . . . .	61
	R.M.May, J.D.Crawford, B.W.James and C.N.Watson-Munro	
1.3.1.10	Measurements of plasma dielectric permittivity in a shock tube . . . . .	62
	Yu.I.Tusnov	
1.3.1.11	Kinetics of excitation and ionization of mercury atoms in a shock tube . . . . .	63
	T.V.Zhikhareva and G.K.Tumakayev	
1.3.1.12	Thermochemical relaxation studies in shock - heated plasmas. . . . .	64
	K.Willeke and D.Bershafer	
1.3.1.13	Ionization relaxation time in argon behind the reflected shock wave . . . . .	65
	F.Slepička	
1.3.1.14	Vorticity in the current sheath of the plasma coaxial accelerator . . . . .	66
	W.H.Bostick, L.Grunberger, V.Nardi and W.Prior	
1.3.2	<u>Shock waves in magnetic fields</u>	
1.3.2.1	Study of shock structure formed in the flow of plasma into a converging magnetic field . . . . .	67
	B.A.Dean and M.Eisner	
1.3.2.2	Experimental studies on shock waves propagated through a longitudinal magnetic field . . . . .	68
	T.A.El-Khalafawy, Ya.F.Volkov, M.F.El-Menshawy, M.M.Masoud, M.A.El-Masry and M.S.El-Gwaily	
1.3.2.3	Shock wave interaction with a magnetic field . . . . .	69
	B.Holzhauser and H.Schmidt	
1.3.2.4	Magneto-Gasdynamic shock in a plasma flow with axial current . . . . .	70
	H.Hügel	
1.3.2.5	Numerical calculation of shock wave propagation in a plasma . . . . .	71
	P.Michelsen	
1.3.2.6	Ionization front in magnetic field . . . . .	72
	V.T.Karpukhin and A.V.Nedospasov	
1.3.2.7	Reflection of a strong shock wave between parallel electrodes . . . . .	73
	Z.Mucha	
1.3.2.8	Microfluctuations in collisionless shock front . . . . .	74
	F.M.Dubinin, G.G.Managadze and I.M.Podgorny	
1.3.2.9	Kinetics of ionization of an ionized gas flow in magnetic field . . . . .	75
	R.V.Vasilieva, K.V.Donskoi, N.M.Lobasheva, V.A.Shingarkina	
2.	<u>SURFACE PHENOMENA</u>	
2.1	<u>Emission from solids</u>	
2.1.1	<u>Thermionic and secondary emission</u>	

2.1.1.1	Investigation of thermionic emission of metalfilm cathode in Cs-diode . . . . .	76
	U.A.Dunaev, L.M.Dmitrieva, V.M.Sokolov and Z.A.Stepanova	
2.1.1.2	Investigation of cesium diode with ZrC cathode . . . . .	77
	T.L.Matskevich and T.V.Krachino	
2.1.1.3	On the Schottky effect for the rough surfaces . . . . .	78
	T.L.Matskevich and T.V.Krachino	
2.1.1.4	Observations of reactions between gases and solids with the emission electron microscope . . . . .	79
	Ch.Zaminer	
2.1.1.5	Electron emission from polycrystalline surface of Mo and Ir in cesium va- pour at pressure up to 3 torr . . . . .	80
	V.L.Borzenko, S.V.Drobjazko and V.N.Knizhnikov	
2.1.2	<u>Work function and field emission</u>	
2.1.2.1	The influence of molybdenum cathode treatment method upon the work func- tion value . . . . .	81
	P.N.Chistyakov and R.A.Milovanova	
2.1.2.2	A linear relationship between the current flowing across a potential barrier and the applied field . . . . .	82
	C.S.Bull	
2.1.2.3	Electron avalanches in field-enhanced secondary electron emission of porous dielectric films . . . . .	83
	S.A.Fridrikhov	
2.1.2.4	Surface potential barrier and field lowering of work function for metal cathodes covered with dielectric layers . . . . .	84
	H.T.Miles and I.R.Rawlings	
2.1.2.5	Kinetics of capture of Co on molybdenum (111) (Surface potential measurements) . . . . .	85
	J.Lecante	
2.1.2.6	Adsorption and desorption studies of oxygen and indium on tungsten based on surface ionization measurements . . . . .	86
	H.W.Wassmuth	
2.1.2.7	Vacuum breakdown in small gaps . . . . .	87
	D.W.Williams and W.T.Williams	
2.1.2.8	Field emission initiated vacuum arc in an extremely strong field at high current densities . . . . .	88
	G.N.Fursey, G.K.Kartsev, G.A.Mesyats, D.I.Proskurovsky and V.P.Rotstein	
2.2	<u>Interaction of heavy ions with solids</u>	
2.2.1	<u>Sputtering, secondary emission and radiation damage</u>	
2.2.1.1	Mass and energy analysis of negative ions emitted from Al, Mn, Co, Ta and Au targets bombarded by 40 keV Ar <sup>+</sup> ions . . . . .	89
	Z.Jurela	
2.2.1.2	Cathode sputtering and secondary electron emission from gold bombarded by Xe <sup>+</sup> ions . . . . .	90
	T.Nenadović and Z.Jurela	
2.2.1.3	Bombardment of pyrolytic carbon with noble gas ions in the energy range of 10-45 keV . . . . .	91
	G.Betz, R.Dobrozemsky, F.P.Viehböck and H.Wotke	
2.2.1.4	On the cathode sputtering of polycrystals . . . . .	92
	V.K.Koshkin, J.A.Rysov, I.I.Shkarban and B.M.Gourmin	

2.2.1.5	On sputtering of semiconductors . . . . .	93
	H.Sommerfeldt, E.S.Mashkova and V.A.Molchanov	
2.2.1.6	A mechanism for sputtering of nonmetals by slow multiple charged ions . .	94
	E.S.Parilis	
2.2.1.7	Structural investigations of metal surfaces bombarded by Ar <sup>+</sup> -ions . . . .	95
	T.Nenadović, Z.Rundić and T.Dimitrijević	
2.2.1.8	Ranges of 20-80 keV xenon ions in copper crystals . . . . .	96
	T.Jokić	
2.2.1.9	Thermal release of argon ionically entrapped in molybdenum . . . . .	97
	D.A.Degras, J.Marks and J.Roussel	
2.2.1.10	Crystallization of borosilicate glass by prolonged bombardment with 60 keV argon ions . . . . .	99
	L.Narodný	
2.2.1.11	The influence of defects on gas release from ion-bombarded solids . . . .	100
	G.Sørensen	
2.2.2	<u>Scattering and quantum effects</u>	
2.2.2.1	Spatial and energy distributions of ions scattered by crystal . . . . .	101
	E.S.Mashkova, V.A.Molchanov and Yu.G.Skripka	
2.2.2.2	Effect of the deep-lying crystal atomic layers on the spatial distribution of scattering ions . . . . .	102
	V.A.Molchanov, V.A.Snisar and W.Soszka	
2.2.2.3	Some peculiarities of ion reflection from a single crystal . . . . .	103
	D.S.Karpuzov, V.I.Shulga and V.E.Yurasova	
2.2.2.4	Angular and energy distribution of ions scattered by a single crystal . .	104
	U.A.Arifov and A.A.Aliev	
2.2.2.5	Simulation of ion scattering by surface semichannels of a single crystal	105
	E.S.Parilis, N.Yu.Turaev and V.M.Kivilis	
2.2.2.6	Photon emission from ion-bombarded metal surfaces . . . . .	106
	D.J.Bierman, F.W.Saris and J.Kistemaker	
2.2.2.7	On the electron transport theory . . . . .	107
	R.A.Volkova and A.Kh.Rakhmatulina	
2.3	<u>Interaction of plasma with surfaces</u>	
2.3.1	Some peculiarities of the interaction between alkali plasma and heated metals . . . . .	108
	A.V.Potapov and G.V.Babkin	
2.3.2	Auger-neutralization in interactions of plasma with metal . . . . .	109
	N.Martinov and N.Nikolov	
2.3.3	About physical processes on electrodes during electrical breakdown in high vacuum . . . . .	110
	L.Pranevychius	
2.3.4	Studies of the modification of glass surfaces under the influence of an H <sub>2</sub> pulse plasma . . . . .	111
	H.J.Tiller	
2.3.5	The role of positive ions in low pressure discharges in neon . . . . .	112
	B.A.Willis	
2.3.6	The influence of cathode surface state on Townsend discharge in argon . .	113
	Y.Morokuma, Y.Nakamura, K.Hane and T.Mori	
2.3.7	Interaction of a ZnO surface with the ions of a glow discharge . . . . .	114
	E.Demessemaeckers, H.Van Hove and A.Neyens	

2.3.8	Metal-impregnated cathodes in a self-sustained medium-pressure arc . . .	115
	D.Morawski	
2.3.9	Electric phenomena in boundary layers between ionized gas and graphitic electrodes . . . . .	116
	Z.Jasicki and F.Mitkowski	
2.3.10	Dependence of cathode sputtering rate on the current in glow discharge .	117
	V.Orlinov and G.Mladenov	
2.3.11	Dependence of cathode sputtering rate on the pressure in glow discharge.	118
	V.Orlinov and G.Mladenov	
2.3.12	Selfabsorption and cathode sputtering in a hollow cathode discharge in magnetic field . . . . .	119
	M.Someşan	
2.3.13	Energy transfer and surface cleaning with a D.C. arc plasma generator. .	120
	D.J.Dobbs	
2.3.14	Gas discharge cleaning of vacuum surfaces . . . . .	121
	R.P.Govier and G.M.McCracken	
2.3.15	Experimental studies of plasma surface interaction in a magnetically driven shock tube . . . . .	122
	C.T.Chang, M.Popović and U.Korsbech	
2.3.16	Investigation on the interaction of shock compressed plasma volumes formed in impulse discharge of great power with some solids . . . . .	123
	M.A.Sultanov and B.N.Narzullaev	
2.3.17	The cathode-plasma interaction of low-pressure arc discharges with oxide cathodes . . . . .	124
	J.F.Bitó	
2.3.18	Resonances in the ultraviolet transmission spectrum of thin silver films.	125
	M.Iannuzzi	

### 3. ELECTRICAL DISCHARGES

#### 3.1 Low pressure discharges

##### 3.1.1 Breakdown and pulsed discharges

3.1.1.1	On statistical fluctuations of ionization in series of avalanches . . . .	126
	J.Maurel and G.Vidal	
3.1.1.2	Total secondary coefficients in hydrogen filled positive corona discharge tubes . . . . .	127
	D.J.Mellor and J.A.Olley	
3.1.1.3	A mass-spectrometric study of the negative ions in a Townsend discharge in oxygen . . . . .	128
	P.Kinsman and J.A.Rees	
3.1.1.4	Diagnostics of a parallel plate Townsend discharge by small signal high frequency admittance measurements . . . . .	129
	R.S.Sigmond	
3.1.1.5	On statistical fluctuations of electronic avalanche amplification in non uniform electric field . . . . .	130
	J.Maurel and M.Bayle	
3.1.1.6	On statistical fluctuations of electronic avalanche amplification for high values of E/P . . . . .	131
	G.Vidal, J.Maurel and P.Segur	
3.1.1.7	Pre-breakdown phenomena in a cap with a highly rarefied gas . . . . .	132
	A.S.Pokrovskaja-Soboleva and B.N.Klarfeld	

3.1.1.8	Left-hand sections of the Paschen curves for inert gases up to voltages of 100 kV . . . . .	133
	L.G.Guseva	
3.1.1.9	Breakdown processes in gas mixtures containing electronegative gases : Ne-Br <sub>2</sub> mixture . . . . .	134
	D.Srdoc	
3.1.1.10	Measurements of primary ionization coefficients . . . . .	135
	G.H.Jones and C.Grey Morgan	
3.1.1.11	Time required for development of magnetic pinch in mercury plasma . . . . .	136
	B.Kuffel and M.S.Metwally	
3.1.1.12	Metallic arc formation in a FXR discharge . . . . .	137
	A.Dejke and S.K.Händel	
3.1.1.13	Intense electric discharges at low gas pressures . . . . .	138
	K.Chandraker	
3.1.1.14	Pulsed, electrodeless discharge in hydrogen . . . . .	139
	W.H.Bloss, S.Metz and W.F.Fagen	
3.1.1.15	Time delay of vacuum sparks in the subnanosecond region . . . . .	140
	B.Jüttner, W.Rohrbeck and H.Wolff	
3.1.2	<u>Glow discharges</u>	
3.1.2.1	Cold cathode phenomena in iodine . . . . .	141
	G.A.Woolsey and K.G.Emeleus	
3.1.2.2	On the maximum current carrying capacity of a low pressure discharge. . . . .	142
	D.Andersson, M.Babić, S.Sandahl and S.Torvén	
3.1.2.3	Dependence of normal current density on the pressure at glow discharge in Penning mixture Ne-Ar . . . . .	143
	V.Orlinov and R.Dimitrova	
3.1.2.4	A stationary plasma in the "steady state flow" regime . . . . .	144
	E.F.Gippius, V.N.Kolesnikov and L.I.Shumskaya	
3.1.2.5	Calculated electron temperature in a recombination controlled negative glow . . . . .	145
	W.B.Hurt	
3.1.2.6	The negative glow (NG) and Faraday-dark space (FDS) . . . . .	146
	K.G.Emeleus	
3.1.2.7	On the surface phenomena in the glow discharge . . . . .	147
	M.Sanduloviciu, Gh.Popa and L.Biborosch	
3.1.2.8	The examination of the anode-fall in different discharge regions . . . . .	148
	G.Schaal and R.Zahn	
3.1.2.9	Impedance of the glow discharges . . . . .	149
	M.Sanduloviciu, Gh.Popa and L.Biborosch	
3.1.2.10	Durations of glow-to-arc transients in hot-cathode discharges . . . . .	150
	T.Z.Szelényi	
3.1.2.11	On the time dependence of the parameters on the cathode side . . . . .	151
	J.F.Bitó	
3.1.2.12	Contributions to the study of electrical discharges in a glow discharge . . . . .	152
	D.Grosu	
3.1.2.13	Low pressure gas discharges in axial magnetic fields Pt.I Phenomenological description . . . . .	153
	L.Rothhardt and G.Popov	
3.1.2.14	Low pressure gas discharges in axial magnetic fields Pt.II Detailed experiments in argon . . . . .	154
	G.Popov and L.Rothhardt	
3.1.2.15	Experimental studies of constricted and diffuse discharges in krypton . . . . .	155
	R.P.Edwin and R.Turner	

3.1.2.16	Microwave diagnostics of constricted discharges . . . . .	157
	P.Heymann	
3.1.2.17	Theory of a double sheath between two plasmas . . . . .	158
	J.G.Andrews and J.E.Allen	
3.1.3	<u>Arcs (cathode and sheath phenomena)</u>	
3.1.3.1	The discharges at low pressure . . . . .	159
	B.P.Vaulin, V.V.Ivanov and M.F.Shirokov	
3.1.3.2	Anode region in a low pressure mercury discharge at a pinch-effect . . .	160
	N.A.Neretina, N.N.Druzhinina and B.N.Klarfeld	
3.1.3.3	About Mackeown equation employment for the estimation of the electric field in the near-cathode part of arc . . . . .	161
	I.I.Beilis, G.A.Lubimov and W.I.Rakhovsky	
3.1.3.4	The correlation between the cathode spot behaviour and the cathode mate- rial evaporation in dynamics . . . . .	162

3.2.5.3	Determination of the transverse momentum exchange per unit arc length . . . . .	316
	H.O.Schrade and S.F.Giannotta	
3.2.5.4	The radial distribution of the axial electric field in a hydrogen arc burning in a strong axial magnetic field . . . . .	317
	J.Raeder, R.Schwenn, S.Wirtz and G.Zankl	
3.2.5.5	Experimental and theoretical investigations on the mass flow field in a wall-stabilized, magnetically deflected arc . . . . .	318
	W.Kollmar, H.Rosenbauer and G.Seeger	

3.2.5.6	Rayleigh-Taylor instabilities of a rotating hydrogen arc in an axial magnetic field . . . . .	319
	H.F.Döbele	
3.2.5.7	An investigation of the intensification of some spectral lines of O and N in pulse discharge in magnetic field . . . . .	320
	A.Petrakiev and R.Milanova	
3.2.5.8	Splitting of DC arc plasma in unhomogeneous magnetic field . . . . .	321
	M.S.Todorović, V.M.Vukanović, V.M.Georgijević, T.A.Mihailidi and P.S.Todorović	
3.2.6	<u>Laser induced discharges</u>	
3.2.6.1	Annular discharge tube for folded gas lasers and optical amplifiers . . .	322
	L.Blănaru, A.Chetroiu and V.Vasiliu	
3.2.6.2	A quasi-continuous argon ion laser for Raman spectroscopy . . . . .	323
	C.Berenyi and M.Bîrllogeanu	
3.2.6.3	Investigation of frequency dependence of the threshold of optical breakdown in the mercury vapour . . . . .	324
	R.M.Minikaeva, V.E.Mitsuk and V.A.Chernikov	
3.2.6.4	Laser beam initiated ionization in gases . . . . .	325
	L.R.Evans and C.Grey Morgan	
3.2.6.5	Ionization growth in laser triggered switches. . . . .	326
	F.Morgan and C.Grey Morgan	
3.2.6.6	Characteristics of sparks produced by a single-mode ruby laser . . . . .	327
	A.J.Alcock, G.De Michelis and M.C.Richardson	
3.2.6.7	Obtaining and investigation of homogeneous plasmoids at focussing of one-mode radiation of ruby laser . . . . .	328
	N.E.Korneev and Ju.I.Pavlov	
3.2.6.8	The cascade ionization of the matter in the optical breakdown . . . . .	329
	Yu.V.Afanasiev, E.M.Belenov, O.N.Krokhin and I.A.Poluectov	
3.2.6.9	High speed studies of ultrashort laser produced plasma . . . . .	330
	N.G.Basov, O.N.Krokhin, P.G.Kriukov, M.Ya.Schelev, Yu.V.Senatsky, E.L.Tiurin, S.V.Tchekalin and S.D.Zakharov	
3.2.6.10	Space-charge injection : - A new technique for studying non uniform field breakdown phenomena . . . . .	331
	R.C.Klewe, M.B.C.Quigley and B.A.Tozer	
3.2.6.11	LiH laser produced plasmas . . . . .	332
	M.Mattioli and D.Véron	
3.2.6.12	Kinetics of heating and "freezing" of ionization state of hot plasma formed at interaction of laser radiation and solid target . . . . .	333
	N.G.Basov, V.A.Boiko, V.A.Gribkov, S.M.Zakharov, O.N.Krokhin and G.V.Sklizkov	
3.2.6.13	Energy transfer in laser induced shocks near a solid target . . . . .	334
	D.C.Emmony and J.Irving	
3.2.6.14	Time resolved temperature in solid deuterium laser produced plasmas . . .	335
	F.Floux, D.Cognard and G.de Giovanni	
3.3	<u>Plasma propulsion and jets</u>	
3.3.1	Deionization of plasma in heterogeneous medium . . . . .	336
	A.K.Musin	
3.3.2	Distribution of charged particles in heterogeneous medium . . . . .	337
	O.R.Konenko and A.K.Musin	
3.3.3	Polarization of the accelerated plasma cluster . . . . .	338
	J.Kracik and J.Maloch	

3.3.4	A D.C. arc in forced convection . . . . .	339
	A.M.Howatson and R.D.Rowe	
3.3.5	Experimental conditions for the acceleration of plasma clusters . . . . .	340
	K.Šobra and J.Maloch	
3.3.6	Widths of spectral lines in a MPD arc-jet . . . . .	341
	M.Kling and M.U.Beth	
3.3.7	First approximation to the distribution of current and electromagnetic forces in an MPD thruster . . . . .	342
	G.Krülle	
3.3.8	The flow field in and around an MPD arc-jet and conclusions on "entrainment" . . . . .	343
	S.Krause	
3.3.9	Measurement of radial velocity profiles in plasma-jets . . . . .	344
	F.Maisenhälder and W.Schock	
3.3.10	The interaction between an argon plasma and a cool concentric hydrogen gas stream . . . . .	345
	P.H.Dundas	
3.4	<u>Exploding wires</u>	
3.4.1	The resistance of thin exploding wires . . . . .	346
	A.E.Vlastós	
3.4.2	The resistance of an electrically exploded conductor surrounded by air, which is part of an LC-circuit . . . . .	347
	L.Vermij	
3.4.3	Numerical calculations of the heavy current discharge in lithium plasma . . . . .	348
	P.P.Volosevitch, V.Ya.Goldin, N.N.Kalitkin, S.P.Popov, V.B.Rosanov, A.A.Samarsky and B.N.Chetverushkin	
3.4.4	A heat wave created by a high current discharge in the air . . . . .	349
	N.G.Basov, B.L.Borovitch, V.S.Zuev, V.B.Rosanov and Yu.Stoilov	
3.4.5	High current pulse lithium discharge . . . . .	350
	A.D.Klementov, G.V.Mikhailov, F.A.Nikolaev, V.B.Rozanov and Yu.F.Sviridenko	
3.4.6	Mechanism of fast ions appearance in metallic arcs and sparks . . . . .	351
	M.A.Tyulina and A.K.Musin	
3.5	<u>Torches</u>	
3.5.1	Arc source of high-temperature air flow . . . . .	352
	M.F.Zhukov, G.Yu.Dautov, Yu.S.Dudnikov and G.M.Mustafin	
3.5.2	Interaction of electrical arc with turbulent boundary layer and distribution of potential gradients along its length . . . . .	353
	L.I.Kolonina and B.A.Urukov	
3.5.3	Effects of superimposed D.C.field on temperature of torch discharge . . . . .	354
	V.Truneček	
3.5.4	Effects of superimposed direct field on H.F. unipolar discharges . . . . .	355
	V.Truneček and A.Tálský	
3.5.5	Certain characteristic properties of arc discharge with superimposed gas flow . . . . .	356
	J.Šmigielski	
3.5.6	Parameters of the unipolar HF high-pressure discharges at LTE . . . . .	357
	J.Janča, V.Kapička and A.Tálský	
3.5.7	Effect of the changes of working parameters upon vibrations of electrical quantities of DC plasma torch . . . . .	358
	C.Królikowski, R.Niewiedzial and J.Siwiec	

## 4. PLASMA PHYSICS

4.1	<u>Kinetic and hydrodynamic theory</u>	
4.1.1	<u>Distribution functions and statistical mechanics</u>	
4.1.1.1	On distribution function of electrons in a gas discharge low density plasma . . . . .	359
	A.N.Dukalov and Yu.F.Kuznetsov	
4.1.1.2	On the possible anisotropy of the electron temperature in collision ionospheric plasma . . . . .	360
	I.A.Krinberg and N.N.Klimov	
4.1.1.3	Development of a modified Chapman-Enskog solution of the Lenard-Balescu equation for two-temperature plasmas . . . . .	361
	W.F.Walters and W.L.Everett	
4.1.1.4	Kinetic theory of deviations from thermodynamic equilibrium in atomic hydrogen . . . . .	362
	N.Peyraud	
4.1.1.5	Kinetic theory of a weakly coupled and weakly inhomogeneous plasma in a magnetic field . . . . .	363
	J.Naze Tjøtta and A.H.Øien	
4.1.1.6	Kinetic theory of a weakly coupled and weakly inhomogeneous gas . . . . .	364
	A.H.Øien and J.Naze Tjøtta	
4.1.1.7	Energy distribution function for inert gases in medium and low pressure discharges . . . . .	365
	S.S.Pešić	
4.1.1.8	Correlation radius of the field fluctuations in plasma . . . . .	366
	A.N.Starostin	
4.1.1.9	Energy loss of fast test ions in a plasma . . . . .	367
	R.M.May	
4.1.1.10	On statistical theory of strongly imperfect plasmas . . . . .	368
	V.S.Filinov, G.E.Norman, V.S.Vorobjev and B.V.Zelener	
4.1.1.11	Electrostatic interaction influence on plasma composition . . . . .	369
	G.A.Kovalskaya, V.G.Sevastyanenko and I.A.Sokolova	
4.1.1.12	Relations for ionization of atoms and ions in nonthermal equilibrium . . . . .	370
	S.Suckewer	
4.1.1.13	Ionization transfer due to radiation and diffusion . . . . .	371
	A.N.Lagar'kov and N.A.Medvedeva	
4.1.1.14	Compatibility and special type disturbances of detailed balance in non-equilibrium conditions . . . . .	372
	A.A.Filiukov	
4.1.2	<u>Microfields and Vlasov-equation</u>	
4.1.2.1	Theory of plasma turbulence . . . . .	373
	J.Weinstock	
4.1.2.2	A standing wave in a Vlasov plasma . . . . .	374
	R.W.B.Best	
4.1.2.3	Summary of Bhatnagar, Gross and Krook's collision integral . . . . .	375
	N.K.Martinov	
4.1.2.4	Quantum mechanical operator techniques applied to the Vlasov equation . . . . .	376
	C.T.Case	
4.1.2.5	On the decomposition of the microfield in a low - and a high frequency component . . . . .	377
	G.Ecker and W.Kröll	

4.1.2.6	Collective aspects of the microfield distribution . . . . .	378
	G.Ecker and K.G.Fischer	
4.1.3	<u>Equilibrium and confinement problems</u>	
4.1.3.1	The theory of equilibrium and stability of powerfull discharge in a dense plasma . . . . .	379
	A.F.Aleksandrov, A.A.Rukhadse and S.A.Trigger	
4.1.3.2	Plasma dragging by the rotating quadrupols magnetic field in a toroidal system	380
	R.A.Demirkhanov, A.A.Kirov and T.R.Soldatenkov	
4.1.3.3	On the macroscopical description of a collisionless plasma in a strong magnetic field . . . . .	381
	V.P.Milantiev	
4.1.3.4	Electrostatic marginal stability of an inhomogeneous finite plasma . . .	382
	F.Santini	
4.1.3.5	Dynamical stabilization of a confined plasma . . . . .	383
	A.Samain	
4.1.3.6	On the reversibility of the gyroresonance in mirror machines . . . . .	384
	E.Canobbio and G.Ichtchenko	
4.1.3.7	Nonadiabatic particle behaviour in nonuniform E.M. fields . . . . .	385
	E.Canobbio	
4.1.4	<u>Hydrodynamics and magnetoplasmadynamics</u>	
4.1.4.1	Radial pressure profile in an MPD - arc: 5-moment approximation . . . . .	386
	W.L.Bohn	
4.1.4.2	Radial pressure profile in an MPD arc: 8-moment approximation . . . . .	387
	T.McCann	
4.1.4.3	On the interaction of a dense plasma beam with a magnetic wall . . . . .	388
	O.K.Mawardi	
4.1.4.4	Guiding of electronic currents by magnetic fields . . . . .	389
	O.Klüber	
4.1.4.5	Hydrodynamic inestability in plasma boundary layer . . . . .	390
	F.Cocho and N.Grijalva	
4.1.4.6	On one-dimensional MHD turbulence . . . . .	391
	W.P.M.Malfliet	
4.1.4.7	Kinetic model of collisionless bipolar flow in strong electric fields. . .	392
	W.A.Janos and R.W.Waniek	
4.1.4.8	The space structure of a bicomponent Coulomb gas . . . . .	393
	N.Martinov, A.Nikolov and N.Nikolov	
4.1.4.9	The T-layer effect in the magnetic hydrodynamics . . . . .	394
	A.N.Tikhonov, A.A.Samarsky, L.A.Zakliazminsky, P.P.Volosevitch, L.M.Deg-tiarev, S.P.Kurdiumov, U.P.Popov, V.S.Sokolov and A.P.Favorsky	
4.1.4.10	Stability of uniform current fields in conducting-radiating gases . . . . .	395
	K.R.Cramer	
4.1.4.11	Particle distribution phenomena in ionized gases . . . . .	396
	D.Schieber and M.S.Erlicki	
4.2	<u>Transport processes</u>	
4.2.1	<u>General transport equations</u>	
4.2.1.1	Matrix elements of the linearized Boltzmann operator in Grad's base of tensorial hermite polynomials . . . . .	397
	K.Suchy	

4.2.1.2	Frequency dependent transport equation for a magnetoplasma . . . . .	398
	G.Joyce and A.Salat	
4.2.1.3	Radiation reaction in a relativistic two-fluid plasma . . . . .	399
	P.Koch and R.T.Taussig	
4.2.1.4	On the radiation magnetohydrodynamics equations . . . . .	401
	O.Petrus	
4.2.1.5	Macroscopic equations for the electrons in a plasma dominated by binary collision . . . . .	402
	J.Dorey	
4.2.1.6	On the closure of the moment equations for a collisionless plasma . . . . .	403
	M.S.Espedal	
4.2.1.7	Particle velocities in periodic time dependent magnetic and electric fields	404
	S.Kelm	
4.2.1.8	Theoretical investigation of momentum and energy transfer frequencies in two temperature plasmas . . . . .	405
	W.F.Walters and W.L.Everett	
4.2.2	<u>Transport coefficients</u>	
4.2.2.1	Transport-coefficients for an anisotropic plasma . . . . .	406
	R.Chodura, V.Oraevskii and F.Pohl	
4.2.2.2	Measurement of the viscosity in a laminar nitrogen plasma jet . . . . .	407
	W.Rother	
4.2.3	<u>Electrical and thermal conductivity</u>	
4.2.3.1	Electrical conductivity of partially ionized mercury plasma . . . . .	408
	V.A.Ovcharenko	
4.2.3.2	Nonlinear conductivity in non-relativistic quantum electron plasmas . . . . .	409
	M.B.Silevitch and K.I.Golden	
4.2.3.3	Electrical conductivity of cesium plasma in the pressure range $10^{-4} \leq P \leq 10^4$ atm . . . . .	410
	N.V.Jermokhin, B.M.Kovaliov, P.P.Kulik, V.A.Riabii and I.S.Sokolovskii	
4.2.3.4	Kinetic consideration of electrical conductivity of low-temperature plasma in a magnetic field . . . . .	411
	V.A.Brzhesitsky and K.I.Kim	
4.2.3.5	Ionization instabilities and the effective electrical conductivity of a plasma in a strong transversal magnetic field in three dimensional treatment . . . . .	412
	N.B.Valentini	
4.2.3.6	Electrical conductivity of combustion plasma in magnetic field . . . . .	413
	A.Kordus	
4.2.3.7	Transport coefficient determination of rare gases under normal pressure from arc measurements . . . . .	414
	E.Fischer, J.Hackmann and J.Uhlenbusch	
4.2.3.8	Production of a vapour mixture of dense plasma and its electrical conductivity . . . . .	415
	W.A.Aleksejev	
4.2.3.9	An exact solution for the thermal conductivity coefficient of Lorentzian gas in a magnetic field . . . . .	416
	B.Stefanov and D.Oliver	
4.2.3.10	Theoretical and experimental study of the thermal conductivity in a partially ionized gas . . . . .	417
	J.F.Delpech and J.C.Gauthier	

4.2.3.11	The measurement of thermal conductivity in a decaying argon plasma . . . . .	418
	F.Becker and W.Bez	
4.2.3.12	Determination of stationary heat transfer in a laminar nitrogen plasma jet . . . . .	419
	E.Kranz	
4.2.3.13	Magnetic field measurement of electron thermal conductivity in cesium plasma . . . . .	420
	N.Gerasimov, D.Oliver, B.Stefanov and L.Zarkova	
4.2.3.14	Transport properties of the $N_2$ -plasma up to $13000^\circ K$ . . . . .	421
	U.Plantikow	
4.2.4	<u>Normal, ambipolar and anomalous diffusion</u>	
4.2.4.1	The correlation study of turbulent diffusion in magnetic plasma . . . . .	422
	A.B.Berezin, D.G.Buliginisky and M.I.Vildjunas	
4.2.4.2	Plasma transport and fluctuations in a toroidal quadrupole . . . . .	423
	M.Yoshikawa and T.Ohkawa	
4.2.4.3	Investigation of the transverse diffusion of a decaying plasma by means of the pulsed probe method . . . . .	424
	K.Nobata	
4.2.4.4	Normal and anomalous electron diffusion in a low density magneto plasma. . . . .	425
	K.R.Schreitmüller	
4.2.4.5	The use of the method of retarding potential for the analysis of energy spectra and ion lifetime in the multipole magnetic trap . . . . .	426
	I.I.Demidenko, N.S.Lomino and V.G.Podalka	
4.2.4.6	Transition from free to ambipolar diffusion . . . . .	427
	A.D.MacDonald and H.W.Bandel	
4.2.4.7	The influence of ambipolar diffusion and excitation losses on the current-voltage characteristic of an argon-cesium plasma . . . . .	428
	Chr.Holzapfel	
4.2.4.8	Velocity space diffusion due to violation of second adiabatic invariant in toroidal magnetic fields . . . . .	429
	H.D.Middendorf	
4.2.4.9	Diffusion and ionic heating due to a current instability . . . . .	430
	N.S.Buchelnikova and R.A.Salimov	
4.3	<u>Waves in plasma</u>	
4.3.1	<u>General theory of plasma waves</u>	
4.3.1.1	The frequency cusp, a new means for discriminating between growing waves and instabilities in hot plasmas . . . . .	431
	H.Derfler	
4.3.1.2	Amplification of low frequency waves in a partially ionized plasma . . . . .	432
	R.Leven and J.Wisliceny	
4.3.1.3	On the study of the potential surface waves in magnetoactive plasma . . . . .	433
	N.Z.Abdel-Shahid, A.M.Hussein and V.I.Pakhomov	
4.3.1.4	Doppler effect in isotropic plasma with spatial dispersion . . . . .	434
	K.A.Barsoukov and V.N.Nechayev	
4.3.1.5	Phase and group velocity in an anisotropic plasma . . . . .	435
	R.W.Gould and R.K.Fisher	
4.3.1.6	Transverse wave instabilities in anisotropic plasmas containing negative ions . . . . .	436
	Nguyen The Hung and G.Paquette	

4.3.1.7	Surface waves on a metal grating in gyrotropic plasma . . . . .	437
	L.G.Naryshkina	
4.3.1.8	An asymptotic analysis of a transient signal in a nonhomogeneous ionized medium . . . . .	438
	A.Brahmer-Kacprzyńska	
4.3.1.9	On the study of adjacent plasma streams . . . . .	439
	I.A.El-Naggar, V.I.Pakhomov and K.E.Zayed	
4.3.2	<u>Waves in cylindrical columns</u>	
4.3.2.1	Surface waves on fluctuating plasmas . . . . .	440
	B.A.Anićin and D.B.Ilić	
4.3.2.2	An experiment with surface waves on inhomogeneous plasma . . . . .	441
	D.B.Ilić and B.A.Anićin	
4.3.2.3	Influence of alternating electric field on low frequency oscillations in plasma . . . . .	442
	E.M.Barkhudarov, N.A.Kervalishvili, V.P.Kortkhonjia, N.L.Tsintsadze and D.D.Tskhakaya	
4.3.2.4	Fast magnetoacoustic waves in cylindrical plasma column . . . . .	443
	R.V.Deutsch and I.Grosu	
4.3.2.5	Electric field measurements of dipole modes in a resonating cylindrical plasma . . . . .	444
	B.C.Gregory and K.J.Parbhakar	
4.3.2.6	New thoughts on Tonks-Dattner resonances . . . . .	446
	S.Aksornkitti, H.C.S.Hsuan and K.E.Lonngren	
4.3.2.7	Results for longitudinally-magnetized plasma-filled waveguides . . . . .	447
	M.L.G.Oldfield and R.N.Franklin	
4.3.2.8	Resonant attenuation of an electromagnetic wave in a hot cylindrical plasma . . . . .	448
	H.A.Blevin, J.A.Reynolds and P.C.Thonemann	
4.3.2.9	Bernstein waves in inhomogeneous plasma columns . . . . .	449
	F.Leuterer	
4.3.2.10	Excitation of Bernstein modes in an inhomogeneous magnetized plasma . . .	450
	S.Hiroe and H.Ikegami	
4.3.3	<u>Ionization waves</u>	
4.3.3.1	Dispersion and stability of ionization waves . . . . .	451
	A.Garscadden, P.Bletzinger and T.C.Simonen	
4.3.3.2	Running strata in lasers on CO <sub>2</sub> and its mixtures with N <sub>2</sub> and He . . . . .	452
	V.P.Belyaev and B.I.Moskalev	
4.3.3.3	Ionization and drift waves in a discharge plasma . . . . .	453
	A.J.Duncan and J.R.Forrest	
4.3.3.4	Low density electron gas in space-periodic electric field . . . . .	454
	T.Ruzicka	
4.3.3.5	Time-resolved measurements of electron energy distributions in externally excited ionization waves . . . . .	455
	S.W.Rayment and N.D.Twiddy	
4.3.3.6	The influence of the electron distribution function variation on the parameters of the ionization waves . . . . .	456
	M.Šícha and V.Řezáčová	
4.3.3.7	Oscilloscopic plane frequency display method (P.F.D.M.) for measurement of dispersion properties of ionization waves in plasma . . . . .	457
	O.Štirand	

4.3.3.8	The influence of moving striations on electromagnetic wave propagation through the waveguide containing positive column . . . . .	458
	A.A.Zaitsev and G.S.Leonov	
4.3.3.9	The effect of moving striations on Tonks-Dattner resonances in rare gas plasmas . . . . .	459
	D.A.Hart and N.L.Oleson	
4.3.3.10	Measurements on random ionization waves (irregular striations) using space-time oscillograms . . . . .	460
	L.Pekárek, V.Krejčí, I.Grabec and V.Peřina	
4.3.3.11	Correlation functions of light fluctuations in the positive column of a neon discharge . . . . .	461
	I.Grabec and S.Poberaj	
4.3.3.12	Correlation functions of randomly excited ionization waves . . . . .	462
	I.Grabec and S.Poberaj	
4.3.3.13	Heterodyne and harmonic generation of ionization waves . . . . .	463
	S.Poberaj and I.Grabec	
4.3.3.14	A theory of moving striations based on the continuity-equation plasma oscillation . . . . .	464
	J.Reece Roth	
4.3.3.15	Stability analysis of plasma striations . . . . .	465
	L.Gold	
4.3.3.16	On the mechanism of the movable striations in a glow discharge . . . . .	466
	M.Sanduloviciu	
4.3.3.17	Development of the ionization (electrothermal) instability with boundary effects . . . . .	467
	A.H.Nelson	
4.3.4	<u>Damping and propagation of various waves</u>	
4.3.4.1	Waves in cold rarefied plasma . . . . .	468
	L.A.Latishev and G.G.Shishkin	
4.3.4.2	Unstable pulse propagation in an inhomogeneous plasma . . . . .	469
	L.S.Hall	
4.3.4.3	Annihilation of collision damping in the Ramsauer gases . . . . .	470
	H.Derfler and R.Wilensky	
4.3.4.4	Wave propagation in a warm Q - plasma . . . . .	471
	T.Matitti, F.Barbian, A.Goede and H.J.Hopman	
4.3.4.5	The solution of the kinetic dispersion relation for wave propagation along a static magnetic field . . . . .	472
	K.Baumgärtel and G.Wallis	
4.3.4.6	Correlation damping of longitudinal plasma waves in a hot, dilute magnetoplasma . . . . .	473
	H.Kastelewicz	
4.3.4.7	Landau damping in Hermite - Mittag - Leffler representation . . . . .	474
	V.N.Gheorghe	
4.3.5	<u>Plasma waves, echoes and whistlers</u>	
4.3.5.1	Studies of whistler dispersion characteristics . . . . .	475
	J.C.Lee, T.J.Fessenden and F.W.Crawford	
4.3.5.2	Effects of electron-ion collision on electron plasma wave echoes . . . . .	476
	Y.H.Ichikawa, T.Suzuki and H.Sanuki	
4.3.5.3	Whistler instability characteristics in a hot plasma . . . . .	477
	J.C.Lee and F.W.Crawford	

4.3.5.4	Collisional whistler instabilities . . . . .	478
	H.Derfler and J.Q.Howell	
4.3.5.5	Saturation and damping of collisionless plasma wave echoes . . . . .	479
	J.Coste and J.Peyraud	
4.3.5.6	Observation of spatial ion-wave echoes in low pressure discharges . . . . .	480
	G.Hinzpeter	
4.3.5.7	Higher order plasma wave echoes in single particle and kinetic theory. . . . .	481
	K.Sauer and G.Wallis	
4.3.6	<u>Drift waves</u>	
4.3.6.1	An experimental study of low-frequency helical waves in a discharge plasma . . . . .	482
	A.J.Duncan, J.R.Forrest, F.W.Crawford and S.A.Self	
4.3.6.2	On the theory of drift dissipative and resistive oscillations in a weakly ionized plasma . . . . .	483
	B.Milić	
4.3.6.3	A low frequency instability in a rotating inhomogeneous magneto plasma . . . . .	484
	R.V.Aldridge and B.E.Keen	
4.3.6.4	Low frequency drift waves in cylindrical geometry : effect of an electric field and importance of the Debye length . . . . .	485
	H.Luc	
4.3.6.5	To the theory of stability of shear plasma flows in magnetic field . . . . .	486
	I.S.Baikov	
4.3.6.6	Potential distributions associated with trapped particle instabilities in multipoles . . . . .	487
	J.G.Siambis	
4.3.6.7	Wavelength conditions on the collisionless drift instabilities . . . . .	488
	A.Nocentini	
4.3.6.8	Low frequency electron modes in a plasma slab with weakly modulated magnetic field . . . . .	489
	K.Rohlens	
4.3.6.9	R.F. stabilization of the drift dissipative instability . . . . .	490
	D.Lepéchinisky and P.Rolland	
4.3.6.10	Drift instability studies by correlation techniques . . . . .	491
	M.Bernard, G.Briffod, R.Frank, M.Grégoire, A.Haefner and J.Weisse	
4.3.6.11	Experimental drift wave dispersion curves for a helium magneto-plasma. . . . .	493
	B.E.Keen and R.V.Aldridge	
4.3.6.12	The suppression of a "drift-type" instability in a magneto-plasma by a feedback technique . . . . .	494
	B.E.Keen and R.V.Aldridge	
4.3.7	<u>Acoustic waves and ion - acoustic waves</u>	
4.3.7.1	Modified ion-acoustic oscillations of a bounded plasma . . . . .	495
	R.Rosa and J.E.Allen	
4.3.7.2	The properties of ion-acoustic waves in a collision-dominated plasma . . . . .	496
	S.Aksornkitti, H.C.S.Hsuan and K.F.Lonngren	
4.3.7.3	Propagation of acoustic waves in a positive column of discharge. . . . .	497
	L.Aubrecht	
4.3.7.4	Nonlinear ion acoustic waves in a Vlasov plasma . . . . .	498
	S.P.Gary	
4.3.7.5	Sound waves in afterglow plasmas . . . . .	499
	G.Meltz and K.J.Nygaard	

4.3.7.6	Ion waves in Langmuir's double sheath . . . . .	500
	S.T.Patel	
4.3.7.7	Acoustic waves in D.C. glow molecular discharge . . . . .	501
	S.Šubertová and P.Slovák	
4.3.7.8	The propagation of ion acoustic waves and electron plasma waves in a low pressure mercury arc discharge . . . . .	502
	H.G.Jones, J.W.Sturgess and P.J.Barrett	
4.3.7.9	Ionic modulation observed in a resonant R.F. self-sustained plasma . . .	503
	Ph.Leprince and M.Moisan	
4.3.7.10	Ion-acoustic wave noise in a low-pressure positive column . . . . .	504
	R.Rosa and J.E.Allen	
4.3.7.11	Investigation of ion-sound resonance in plasma layer . . . . .	505
	A.F.Alexandrov, A.A.Kuzovnikov, V.S.Swiridkina and V.V.Tarasova . . . . .	
4.3.7.12	Acoustic wave amplification in a plasma . . . . .	506
	M.Fitaire and T.Mantei	
4.3.8	<u>Cyclotron waves and cyclotron and hybrid resonance</u>	
4.3.8.1	Parametric effects of electron cyclotron harmonic waves in plasmas . . .	507
	R.Sugaya, K.Mizuno and S.Tanaka	
4.3.8.2	Parametric interaction of microwave with magnetoplasma . . . . .	508
	Y.Sakamoto, M.Tamba and K.Okamoto	
4.3.8.3	Energetic particle accumulation in the pleiade mirror device . . . . .	509
	R.Geller, B.Jacquot and C.Jacquot	
4.3.8.4	Selective cyclotron absorption by a plasma-beam discharge . . . . .	510
	A.E.Basharinov and I.N.Lukinov	
4.3.8.5	An experiment of negative absorption of UHF energy by the plasma in the system with a stationary wave in the range of cyclotron resonance . .	511
	K.S.Golovanivsky, A.D.Gousseynova and G.N.Mechtchaninov	
4.3.8.6	Ions' acceleration in plasma subjected to non-homogeneous magnetic field in the vicinity of electron cyclotron resonance . . . . .	512
	K.S.Golovanivsky and V.D.Dougar-Jabon	
4.3.8.7	Splitting effect of electron cyclotron harmonic waves into double modes due to transverse temperature . . . . .	513
	J.Olivain, F.Perceval and M.Perulli	
4.3.8.8	Ion-cyclotron oscillations in cesium-plasma . . . . .	514
	B.Milić	
4.3.8.9	Contribution to non-linear theory of low-frequency hybrid resonances . .	515
	V.L.Sizonenko and K.N.Stepanov	
4.3.8.10	Absorption of HF waves by plasma near the low-hybrid frequency . . . . .	516
	B.V.Galaktionov, V.E.Golant and O.N.Shcherbinin	
4.3.8.11	Experimental verification of electron cyclotron damping in a plasma with collisional losses . . . . .	517
	K.Minami and S.Takeda	
4.3.8.12	Cyclotron wave propagation along the magnetic field in a transient plasma	518
	A.K.Moy and J.E.Scharer	
4.3.8.13	R.F. power absorption near the lower hybrid resonance . . . . .	519
	V.Agnello, P.Fieffé-Prévot, G.Ichtchenko; S.Kulinski and P.Lallia	
4.3.8.14	The electron cyclotron instability . . . . .	520
	J.A.Tataronis	
4.3.8.15	Admittance of a thin antenna in a plasma at cyclotron harmonics . . . . .	521
	J.G.Downward and R.S.Harp	

4.3.9	<u>Nonlinear effects, linear and nonlinear transformations</u>	
4.3.9.1	Nonlinear waves in multicomponent collisionless plasma . . . . .	522
	J.G.Lominadze and A.D.Pataraya	
4.3.9.2	The closure condition in weak turbulence . . . . .	523
	K.Elsässer	
4.3.9.3	Investigation of non-linear oscillations of rarefied magnetical plasma by numerical methods . . . . .	524
	Y.N.Dnestrovskii, D.P.Kostomarov and V.I.Telegin . . . . .	
4.3.9.4	Spectra of quasi-stationary Langmuir plasma turbulence . . . . .	525
	E.P.Jidkov, V.A.Liperovsky, V.G.Makhankov, S.B.Pikelner, Che ze Hen and V.N.Tsytovich	
4.3.9.5	Transformation and filtration effects occuring when a magnetohydrodynamic wave passes through an inhomogeneous layer . . . . .	526
	R.V.Deutsch and D.Goldenberg	
4.3.9.6	Transformation of waves in a magnetoplasma generated by a strong micro-wave signal . . . . .	527
	J.Musil and F.Žáček	
4.3.9.7	Comparison between viscothermal theory for plasma waves and experiment . . . . .	528
	R.L.Moore and Y.Hiroshige	
4.3.9.8	Non-linear damping of a large amplitude monochromatic wave . . . . .	529
	G.Laval, R.Pellat and A.Roux	
4.3.9.9	Non-linear electrostatic waves in a warm plasma . . . . .	530
	L.K.Chi and L.Kraus	
4.3.9.10	Nonlinear transverse wave interactions in a cold magnetoplasma: I. Parametric amplification analysis . . . . .	531
	K.J.Harker and F.W.Crawford	
4.3.9.11	Nonlinear transverse wave interactions in a cold magnetoplasma : II.Synchronism and growth characteristics . . . . .	532
	F.W.Crawford and K.J.Harker	
4.3.9.12	Wave-wave interaction in a one-dimensional Vlasov plasma calculated using a truncated Fourier-Hermite expansion . . . . .	533
	F.R.Crownfield, Jr.	
4.3.9.13	Non-linear oscillations of a Maxwellian plasma . . . . .	534
	H.K.Sen and P.M.Bakshi	
4.3.10	<u>Interaction of electromagnetic waves with plasma and anomalous heating</u>	
4.3.10.1	Forward and backward Bernstein waves . . . . .	535
	F.Leuterer	
4.3.10.2	Excitation of longitudinal waves in a magnetized slab . . . . .	536
	H.H.Kuehl, B.B.O'Brien and G.E.Stewart	
4.3.10.3	Low frequency oscillations excited in a plasma subjected to an R.F. electric field . . . . .	537
	M.Fitaire and A.M.Pointu	
4.3.10.4	Penetration of electromagnetic waves into non-homogeneous plasma . . . . .	538
	A.Legatowicz	
4.3.10.5	Scattering of electromagnetic waves on fluctuations in bounded plasma . . . . .	539
	I.P.Yakimenko	
4.3.10.6	Decay of a collisionless plasma flow near a critical density in UHF-field . . . . .	540
	K.F.Sergeichev	
4.3.10.7	An anomalous heating of plasma electrons in a strong SHF field . . . . .	541
	G.M.Batanov, K.A.Sarksian and V.A.Silin	

4.3.10.8	Investigations of the anomalous absorption of a high power $H_{II}$ -wave in a circular wave-guids by a dense collisionless plasma . . . . .	542
	I.R.Gekker and O.V.Sizukhin	
4.3.10.9	Parametric plasma instability close to the threshold . . . . .	543
	N.E.Andreev, A.Yu.Kyrie and V.P.Silin	
4.3.10.10	Collisional plasma heating by electric fields . . . . .	544
	B.J.Green	
4.3.10.11	Properties of a magnetoactive plasma generated by a strong microwave power with a variable polarization . . . . .	545
	J.Musil and F.Žáček	
4.3.10.12	Interaction of a high amplitude travelling RF wave with a plasma . . . . .	546
	A.Stampa, K.H.Finken, H.Tuczek and W.Bieger . . . . .	
4.3.10.13	About non-linear absorption in the propagation of intensive laser beam in the plasma . . . . .	547
	S.S.Ambaryan, V.F.Mitsuk and V.A.Pogosyan	
4.4	<u>Beam - plasma interaction</u>	
4.4.1	<u>General theory of beam-plasma waves and synthesized plasmas</u>	
4.4.1.1	Interaction in bounded beam-plasma systems . . . . .	548
	S.A.Self and F.W.Crawford	
4.4.1.2	Boundary problems for plasma in Q-machine-type systems . . . . .	549
	A.V.Gurevich, Y.N.Dnestrovskii and D.P.Kostomarov	
4.4.1.3	Collective interactions and plasma heating in a high-current gas discharge . . . . .	550
	V.A.Suprunenko, E.A.Sukhomlin and V.T.Tolok . . . . .	
4.4.1.4	Production of dense plasma by electron beam in magnetic trap . . . . .	551
	M.Yu.Bredikhin, A.M.Ilchenko, A.I.Maslov, A.I.Skibenko, E.I.Skibenko and V.B.Yuferov	
4.4.1.5	Electron temperature of a synthetic ion beam plasma . . . . .	552
	I.L.Freeston	
4.4.1.6	Non-linear interaction between a monoenergetic electron beam and a plasma wave in a beam-plasma system of finite length . . . . .	553
	J.A.Cabral, H.J.Hopman and F.Vitalis	
4.4.1.7	Excitation of electromagnetic surface waves by charged particle beams . . . . .	554
	N.M.El-Siragy, V.I.Pakhomov and H.M.Rizk	
4.4.1.8	Calculation of the motion of an idealized plasma ring in inductive plasma accelerators with arbitrary distribution of the magnetic field . . . . .	555
	A.Meert	
4.4.1.9	High-frequency beam-plasma interaction at finite temperatures . . . . .	556
	T.D.Rognlien and M.Seidl	
4.4.1.10	Stability for a fast ion beam neutralized by thermal electrons . . . . .	557
	P.Chenevier, J.M.Dolique, J.B.Nugeyre, C.Pomot and P.Sermet	
4.4.2	<u>High frequency fields and nonlinear effects in plasma beam-systems</u>	
4.4.2.1	The interaction of a modulated electron beam with a magnetoactive plasma . . . . .	558
	J.Allison and R.Holmes	
4.4.2.2	Influence of the magnetic field on the interaction between a monoenergetic electron beam and its own created plasma . . . . .	559
	J.A.Cabral, H.J.Hopman and J.H.A.van Wakeren	
4.4.2.3	The interaction of a modulated electron beam with a plasma . . . . .	560
	G.M.Haas and M.Eisner	
4.4.2.4	Long wavelength electrostatic modes in runaway electron stream experiments . . . . .	561
	J.Rubinstein, H.M.Skarsgard, A.R.Strilchuk and D.W.A.Whitfield	

4.4.2.5	Electrostatic ion cyclotron waves in an ion beam-plasma system . . . . .	562
	G.J.Brakenhoff and J.M.Houtkooper	
4.4.2.6	Enhanced heating effects of pre-ionization and auxiliary electron cyclotron wave in a beam plasma system . . . . .	563
	S.Miyoshi, S.Ishii, K.Okamoto and Y.Sakamoto	
4.4.2.7	Increasing of an ion beam phase volume . . . . .	564
	V.M.Kulygin and N.N.Semasko	
4.4.2.8	Observation of effect of electron transversal oscillation excitation in beam-plasma discharge . . . . .	565
	E.G.Schustin, V.P.Popovich and I.F.Kharchenko	
4.4.2.9	Some features of electron beam relaxation at its interaction with plasma .	566
	S.M.Levitskii and I.P.Shashurin	
4.4.2.10	Excitation of the plasma resonator by electron beam . . . . .	567
	V.P.Popovich, E.G.Schustin and I.F.Kharchenko	
4.4.2.11	Statistical analysis of self-excited oscillations in plasma-beam system. .	568
	V.A.Gashevski and R.I.Kovtun	
4.4.2.12	Cyclotron harmonic instabilities in a beam-plasma experiment . . . . .	569
	H.J.Hopman, T.Matitti and J.H.A.van Wakeren	
4.4.3	<u>Instabilities, turbulence and miscellaneous nonlinear effects</u>	
4.4.3.1	Experimental studies of current driven electrostatic instabilities . . . .	570
	S.M.Hamberger, J.Jancarik and L.E.Sharp	
4.4.3.2	Time correlation between instabilities in a beam-plasma experiment . . . .	571
	J.H.A.van Wakeren, H.J.Hopman and J.Cabral	
4.4.3.3	Influence of collisions on the growth rate of the electron beam-plasma instability . . . . .	572
	H.Böhmer and M.Raether	
4.4.3.4	Propagation of high-current relativistic electron beams in gases and plasma . . . . .	573
	M.Andrews, H.Davitian, D.Hammer, H.Fleischmann, M.Ury, L.S.Levine and I.M.Vitkovitsky	
4.4.3.5	Propagation behaviour of self-focused relativistic electron streams near the Lawson limit . . . . .	574
	J.R.Uglum, W.H.McNeill, S.E.Graybill and S.V.Nablo	
4.4.3.6	Wave correlation and spectroscopic studies of beam plasma heating at Oak Ridge National Laboratory . . . . .	575
	I.Alexeff, G.E.Guest, W.D.Jones, J.R.McNally Jr., R.V.Neidigh and F.R.Scott	
4.4.3.7	Experimental investigations of the oscillations in the powerful electron beam . . . . .	577
	S.S.Krivulja, A.K.Berezin, Ja.B.Fainberg, L.I.Bolotin and N.M.Zemljansky	
4.4.3.8	Numerical study of the collisionless electrostatic shocks in counter-streaming plasmas . . . . .	578
	Yu.S.Sigov	
4.4.3.9	High-energy ions and low-frequency instabilities in plasma-beam discharge .	579
	W.A.Sayenko, I.A.Deryugin and E.T.Kucherenko	
4.4.3.10	Phase variations of beam-excited oscillations in plasma . . . . .	580
	Yu.G.Yaremenko, V.M.Deev, S.M.Eremin, R.I.Kovtun and I.F.Kharchenko	

4.4.3.11	Influence of plasma-beam instability on particle dynamic in synthesized plasma . . . . .	581
	K.S.Golovanivsky and A.I.Luschik	
4.5	<u>Plasma radiation</u>	
4.5.1	<u>Continuum emission</u>	
4.5.1.1	Continuous emission of argon and krypton . . . . .	582
	D.Meiners, H.Roders and W.Weber	
4.5.1.2	Intensity distribution of emission from a Maxwellian plasma . . . . .	583
	K.Mitani and N.Shimomura	
4.5.1.3	Relativistic and magnetic field corrections to the plasma bremsstrahlung spectrum . . . . .	585
	A.Pytte and J.B.McBride	
4.5.1.4	Continuum radiation of positive column of rare gas discharges . . . . .	586
	S.Pfau and A.Rutscher	
4.5.2	<u>Broadening and shift of spectral lines</u>	
4.5.2.1	Stark-broadening of hydrogenic HeI lines in the presence of strong magnetic fields in plasmas . . . . .	587
	C.Deutsch, H.W.Drawin, E.Herman and H.Tittel	
4.5.2.2	Spectroscopic investigation of nickel thermic plasma in the near ultraviolet region . . . . .	588
	J.Laurent and S.Weniger	
4.5.2.3	Spectral line profile measurements in the constricted positive column . .	589
	C.A.M.Mouwen	
4.5.2.4	A non-Markovian impact theory . . . . .	590
	D.Voslamber	
4.5.2.5	An unified classical path treatment of Stark broadening in plasmas . . . .	591
	E.W.Smith, J.Cooper and C.R.Vidal	
4.5.2.6	New classical path calculations of the Stark broadening of hydrogen . . . .	592
	C.R.Vidal, J.Cooper and E.W.Smith	
4.5.2.7	Measurements of the Stark broadening of several ArII lines . . . . .	593
	N.Konjević, J.Labat, Lj.Ćirković and J.Purić	
4.5.2.8	On the theory of Stark line broadening in plasmas . . . . .	594
	V.I.Kogan and V.S.Lisitzia	
4.5.3	<u>Line emission</u>	
4.5.3.1	Continuous emission from hydrogen plasmas I. The theoretical hydrogen emission coefficients . . . . .	595
	J.R.Roberts, P.A.Voigt and J.J.Nagy	
4.5.3.2	Continuous emission from hydrogen plasmas II. Experimental studies with a wall-stabilized arc . . . . .	596
	W.L.Wiese, J.F.McClellana, D.E.Kelleher and D.R.Paquette . . .	
4.5.3.3	Radiation of plasma in the weak magnetic field . . . . .	597
	H.Kallas and M.Chaika	
4.5.3.4	Time analysis of the line spectrum in a xenon gas discharge . . . . .	598
	M.Cerineo, A.Milojević, D.Mioč, M.Popović and V.Urošević	
4.5.3.5	On the inversion of hydrogen-like ion levels population densities in a pinched plasma . . . . .	599
	Yu.K.Zemtsov	

4.5.4	<u>Miscellaneous studies of spectra and radiation</u>	
4.5.4.1	Effects of non-linear light absorption by plasma under the action of laser impulses . . . . .	600
	N.A.Generalov, G.I.Kozlov and Yu.P.Raizer	
4.5.4.2	Effect of the plasma microfield upon the lifetime of the hydrogen 2s - state . . . . .	601
	V.I.Kogan and A.D.Selidovkin	
4.5.4.3	Some plasmadynamic and radiant properties of pinch discharge . . . . .	602
	A.Ya.Balagurov, V.F.Krivolapov, V.S.Prokudin and B.V.Skvortzov .	
4.5.4.4	Thermal radiation in an optical resonator . . . . .	603
	A.Bauer	
4.5.4.5	Non LTE in low current metal arcs . . . . .	604
	J.Richter and P.Wulff	
5.	GENERAL EXPERIMENTAL TECHNIQUES	
5.1	<u>Probe techniques</u>	
5.1.1	On the "Rounding of the knee" of probe curves in the collisionless theory	605
	G.Medicus	
5.1.2	Boundary condition for the collision dominated sheath . . . . .	606
	P.Wahle and K.G.Müller	
5.1.3	The comparison of the probe and spectroscopic diagnostic methods on the H <sub>2</sub> -O <sub>2</sub> flame plasma . . . . .	607
	J.Ferdinand	
5.1.4	Correlation between the electron temperature and the spectral emission from a sheath . . . . .	608
	M.Kajzer, Z.Stare and Z.Šternberg	
5.1.5	Langmuir probe : collisional increase of the current . . . . .	609
	J.Virmont	
5.1.6	Ion resonance probe . . . . .	610
	J.Virmont	
5.1.7	A method for measuring the plasma potential by an RF probe . . . . .	611
	T.Dote	
5.1.8	Theoretical determination of the collisionless plasma sheath potential distribution and experimental comparison . . . . .	612
	H.Yamada and D.L.Murphree	
5.1.9	Probe diagnostic in the wide pressure diapason . . . . .	613
	B.Ya.Moizhes and V.A.Nemchinskii	
5.1.10	Probe measurements in a recombination plasma . . . . .	614
	N.I.Korobova, K.P.Novikova and K.N.Ul'janov	
5.1.11	On the measurement of the derivatives of probe characteristics using operational amplifiers . . . . .	615
	K.Wiesemann	
5.1.12	Theory of electric probes in dense plasma . . . . .	616

5.1.13	Characteristic of the orifice probe . . . . .	617
	H.Amemiya and T.Dote	
5.1.14	On a probe with directional characteristic . . . . .	618
	H.C.Herbert and K.Wiesemann	
5.1.15	Continuum theory of spherical electrostatic probes including ion production	619
	D.Lyddon Thomas	

5.1.16	Probe measurements in plasma in a magnetic field . . . . .	620
	N.A.Vorobjeva, V.M.Zaharova and Yu.M.Kagan	
5.1.17	Langmuir probe characteristic and ion temperature measurement in a magnetic field . . . . .	621
	M.Sato	
5.1.18	Determination of plasma potential using an emissive probe in a magnetic field. . . . .	622
	P.Deschamps	
5.1.19	The measurement of magnetized plasma parameters with an electrostatic emitting probe . . . . .	623
	M.S.Berezhetsky, S.F.Grebentchicov and I.A.Kossy	
5.1.20	Double probe studies of a wall stabilized D.A. arc . . . . .	624
	J.Al-Hussaini, K.Mahmood and M.Rasul	
5.1.21	Measurement of potential distribution between electrodes by the electro- static probe method. . . . .	625
	Y.Gosho	
5.1.22	The theory of the collisionless Langmuir sheath between a magnetized plasma and a plane electrode in the case of a monotonic electrostatic potential variation . . . . .	626
	V.Bundschuh and H.A.Classen	
5.2	<u>Spectral line techniques</u>	
5.2.1	An Ar + H <sub>2</sub> plasma diagnostic using ArII spectral lines . . . . .	627
	I.Iova	
5.2.2	Determination of the axis temperature as a function of discharge time . .	628
	A.P.Petkov, T.Vörös, J.Visnyovszky, F.Genczwein and M.Hegedüs	
5.2.3	Spectroscopic determination of temperature and electron concentration in a low-current arc . . . . .	629
	A.Mejaški-Tonejc and V.Vujnović	
5.2.4	Electron temperature measurements for a low pressure magnetically confined arc . . . . .	630
	B.van der Sijde	
5.2.5	Diagnostic of a plasma jet . . . . .	631
	R.Holmes and I.L.Freeston	
5.2.6	The influence of statistical errors on the Abel inversion . . . . .	632
	M.Kock and J.Richter	
5.2.7	The influence of thermal boundary layer in plasma on spectral line pro- file and optical temperature . . . . .	633
	I.A.Vasilieva, L.V.Deputatova, V.V.Kirillov and A.P.Nefedov	
5.2.8	Self-absorption in an argon arc . . . . .	634
	W.G.Braun and J.P.Oss	
5.2.9	Measurement of population of excited atom levels in non-equilibrium plasma	635
	A.I.Kirjuschenko, M.A.Lebedev, S.A.Majev, G.G.Morosova, I.N.Privalov and I.I.Smirenkina	
5.2.10	Spectroscopic diagnostics of argon arcs at reduced pressure . . . . .	636
	L.Klein	
5.3	<u>Laser techniques</u>	
5.3.1	Density profile determination in a laser created plasma by a holographic method . . . . .	638
	J.L.Bobin, J.C.Buges, P.Rouzaud and A.Terneaud	

5.3.2	Plasma diagnostics through optical interferometry and holographic techniques . . . . .	639
	O.M.Friedrich, Jr., F.Weigl and A.A.Dougal	
5.3.3	Electron density determinations from double slit interference patterns . .	640
	J.D.German and P.W.Schreiber	
5.3.4	Two-wavelength holography of a laser spark . . . . .	641
	I.I.Komisarova, G.V.Ostrovskaya, L.L.Schapiro and A.N.Zaidel	
5.3.5	Time-resolved diagnostics of a pulsed low-pressure discharge . . . . .	642
	S.Metz, W.H.Bloss and J.A.Satkowski	
5.3.6	Ionic temperature measurements by $90^\circ$ cooperative scattering on a plasma focus . . . . .	643
	J.P.Baconnet, G.Cesari, A.Coudeville and J.P.Watteau	
5.3.7	Theoretical and experimental study of a scattered beam by a plasma given by a Q switched ruby laser . . . . .	644
	J.Millet, J.Gervais and G.Jarry	
5.3.8	A study of the co-operative ion feature in electron density fluctuation spectrum of a hot dense theta-pinch plasma by laser light scattering . . .	646
	D.E.Evans and M.J.Forrest	
5.4	<u>Electromagnetic wave scattering</u>	
5.4.1	Experimental study of the scattering of E.M.wave by a plasma . . . . .	648
	J.J.Capitain, R.Nakach and T.K.Nguyen	
5.4.2	Turbulent heating studied by microwave scattering . . . . .	649
	C.B.Wharton, D.S.Prono and F.Sandel	
5.4.3	Estimation of turbulent collision frequency from scattering of laser light	650
	J.W.M.Paul, C.C.Daughney and L.S.Holmes	
5.4.4	A light scattering method to determine electron density distributions and accurate peak densities . . . . .	651
	B.Kronast and R.Benesch	
5.5	<u>Microwave and radio frequency propagation techniques</u>	
5.5.1	Microwave diagnostics for a plasma column in rectangular waveguide . . . .	652
	V.Molinari and C.Rosatelli	
5.5.2	The modification of waveguide method of the plasma diagnostics . . . . .	654
	P.S.Bulkin, A.Maripov, G.S.Solntzev and W.M.Ginzburg	
5.5.3	Comparison of two microwave diagnostics . . . . .	655
	H.M.J.Kinderdijk and J.van Eck	
5.5.4	Density measurements by nonlinear interaction of electromagnetic waves in a magnetized plasma . . . . .	656
	R.Ceno, C.Etiévant, I.Fidone and B.Zanfagna	
5.5.5	A density profile measurement with the propagation of an extraordinary wave .	657
	P.A.Tulle	
5.5.6	Theory of interaction between a non-uniform plasma column in a glass container and the $TM_{010}$ mode microwave field of a cylindrical cavity . . .	658
	Z.Rozkwitalski	
5.5.7	The Fresnel dragging effect on $\lambda$ cm microwaves by electron drift in a low pressure discharge . . . . .	659
	O.Gehre, H.M.Mayer and M.Tutter	
5.5.8	On the determination of the electric susceptibility of an ionized gas . .	660
	O.C.Gheorghiu	
5.5.9	Microwave measurement of plasma density above the cut-off value . . . . .	661
	D.Raicu	

5.6	<u>Other diagnostic methods</u>	
5.6.1	A method for measuring power in arc discharge . . . . .	662
	A.K.Halder and G.Karady	
5.6.2	A trochoidal E x B analyser for hot electron plasma . . . . .	663
	S.Kawasaki	
5.6.3	An improved thin-film heat gauge for thermal transport studies in plasmas	664
	K.Willeke	
5.6.4	Plasma focus structure from one nanosecond schlieren and shadow pictures	665
	J.P.Baconnet, G.Cesari, A.Coudeville and J.P.Watteau	
5.6.5	A new transformer for induction measuring of the magnetic field . . . . .	666
	M.P.Andreev	
5.6.6	Investigation of gas density distribution in discharge . . . . .	667
	A.J.Barskaja and L.A.Sena	
5.6.7	Determination of the electron velocity distribution from bremsstrahlung emitted by a target in a plasma . . . . .	668
	F.Abgrall, R.Bardet and C.Gormezano	
5.6.8	Effects of collision of supersonic plasma jets . . . . .	669
	M.A.Sultanov	
5.6.9	Resonantly sustained H.F. plasma in a spherical cavity . . . . .	670
	A.M.Messiaen and P.F.Vadenplas	
5.6.10	On measuring the electron temperature of plasma by a differential energy analyser of electrons . . . . .	671
	N.I.Alinovsky, Yu.Ye.Nesterikhir and A.I.Rogozin
