

CONTENTS

Subject Area 7 NON-IDEAL PLASMAS. CLUSTERS AND DUSTY PLASMAS

| | |
|--|----------------------|
| <i>Anisimov, S.I.; Inogamov, N.A.; Zhitenev, S.B.</i> Ion Formation upon Dust Particle Impact | F/1.0 pag. 861 |
| <i>Arndt, S.; Bornath, T.; Kraeft, W.D.; Seidel, J.</i> Two Particle States in Dense Plasmas | F/2.0 pag. 863 |
| <i>Berkovsky, M.A.; Djordjević, D.; Kurilenkov, Yu.K.; Popović, M.M.</i> Dynamic Electrical Conductivity of Strongly Coupled Plasma | F/3.0 pag. 865 |
| <i>Berkovsky, M.A.; Kurilenkov, Yu.K.; Milchberg, H.M.</i> On Ion Acoustic Oscillations in Multicharged Nonideal Plasmas | F/4.0 pag. 867 |
| <i>Bonitz, M.; Schlanges, M.; Bornath, Th.; Kremp, Ch.</i> Reaction and Diffusion in Nonideal Plasmas | F/5.0 pag. 869 |
| <i>Borzhievsky, A.A.; Sechenov, V.A.; Horunzhenko, V.I.</i> Cesium Plasma Conductivity Investigation in a Heated Shock Tube | F/6.0 pag. 871 |
| <i>Boufendi, L.; Plain, A.; Blondeau, J.Ph.; Bouchoule, A.; Laure, C.</i> Particles Dynamics in a Silane-Argon Low Pressure Discharge under Pulsed Radiofrequency Excitations | F/7.0 pag. 873 |
| <i>Boufendi, L.; Plain, A.; Blondeau, J.Ph.; Bouchoule, A.; Laure, C.</i> Particle Generation and Behaviour Study in a Silane-Argon Low Pressure Radio-Frequency Discharge | F/8.0 pag. 875 |
| <i>Chemek, M.; Skowronek, M.</i> Production of Dense Plasmas in Caesium-Doped Xenon Flashtubes | F/9.0 pag. 877 |
| <i>Ebeling, W.; Leike, I.</i> Kinetics of Level Occupation in Nonideal Plasmas | F/10.0 pag. 879 |
| <i>Iakubov, I.T.</i> On Electric Conductivity of Superdense Plasma | F/11.0 pag. 881 |
| <i>Likalter, A.A.</i> Critical Fluctuations and Electronic Properties of Mercury Vapors | F/12.0 pag. 883 |
| <i>Mihajlov, A.A.; Djurić, Z.; Ignjatović, Lj.; Ermolaev, A.M.</i> Structure of Coulomb Logarithm and Relation between Effective and Debye's Radius of Electrostatic Screening in Highly Ionized Plasma | F/13.0 pag. 885 |
| <i>Ortner, J.; Salitra, G.I.</i> Short-Range Correlations in Strongly-Coupled Hydrogen Plasmas | F/14.0 pag. 887 |
| <i>Phylimononova, E.A.; Zhelezniak, M.B.</i> Composition and Radiative Properties of Nonideal Nonequilibrium Plasma behind Strong Shock Wave in Ar | F/15.0 pag. 889 |
| <i>Reinholz, H.; Redmer, R.; Röpke, G.</i> Thermoelectric Power in Nonideal Plasmas and Expanded Liquid Metals | F/16.0 pag. 891 |
| <i>Ryluyk, V.M.; Tkachenko, I.M.</i> Dielectric Tensor of Strongly-Coupled Magnetized Plasmas | F/17.0 pag. 893 |
| <i>Schlüter, D.; Lange, R.</i> Density Dependence of the Free-Free Emission of Weakly Non-Ideal Argon Plasmas | F/18.0 pag. 895 |

| | | |
|--|---------------------|-----|
| <i>Skowronek, M.</i> Influence of the Plasma Waves on the Conductivity of Plasmas Having about One Particle in Debye Sphere | F/19.0 pag. | 897 |
| <i>Tsibin, O.</i> Polyatomic Aggregation Dynamic Effects in Ionized Active Medium of Vacuum Tubes | F/20.0 pag. | 899 |

Subject Area 11
CORONAS, SPARKS, SURFACE DISCHARGES
AND HIGH PRESSURE GLOWS

| | | |
|---|---------------------|-----|
| <i>Akishev, Yu.S.; Levkin, V.V.; Napartovich, A.P.; Trushkin, N.I.</i> New Form of DC Glow Discharge in Fast Gas Flow at the Atmospheric and Superatmospheric Pressure | F/21.0 pag. | 901 |
| <i>Aleksandrov, A.F.; Bulkin, P.S.; Ershov, A.P.; Solntzev, G.S.; Rachman, M.M.; Tsvetkova, L.I.</i> Energy Balance in UHF Surfatron at Low Pressures | F/22.0 pag. | 903 |
| <i>Amirov, R.H.; Asinovsky, E.I.; Samoilov, I.S.; Shepelin, A.V.</i> Time-Resolved Measurements of Energy Dissipated in Nanosecond Corona | F/23.0 pag. | 905 |
| <i>Andreev, S.I.; Ivanov, A.V.; Palchiz, A.A.</i> Ionization Processes in Microgaps and a Frequency Switch | F/24.0 pag. | 907 |
| <i>Babich, L.P.; Loiko, T.V.</i> Some Features Peculiar to the Breakdown of Highly Overvoltage Sulphur Hexafluoride Gaps | F/25.0 pag. | 909 |
| <i>Bokov, A.G.; Mironov, V.E.; Taraszkiewicz, R.</i> Generation of Plasma with High Radial Electron Density Gradients | F/26.0 pag. | 911 |
| <i>Bouziane, A.; Taplamacioglu, M.C.; Hidaka, K.; Rowlands, A.R.; Waters, R.T.</i> Application of a Direct-Current Corona Model for Point-Plane Configuration | F/27.0 pag. | 913 |
| <i>Bronin, S.Ya.; Kasparov, M.G.; Kolobov, V.M.; Mokhov, A.V.; Nefedov, A.P.; Vanin, A.A.</i> An Abnormally Big Cathode Layer in High-Pressure Molecular Plasma | F/28.0 pag. | 915 |
| <i>Černák, M.; Hosokawa, T.; Inoshima, M.</i> Positive-Streamer-Like Instabilities of the Cathode Sheath of Filamentary Glow Discharges | F/29.0 pag. | 917 |
| <i>Davies, A.J.; Dutton, J.; Matallah, M.; Waters, R.T.</i> Discharge Characteristics in Air at Very High Humidity Levels | F/30.0 pag. | 919 |
| <i>Femia, N.; Lupò, G.; Tucci, V.</i> Fractal Characterization of Lichtenberg Figures: a Numerical Approach | F/31.0 pag. | 921 |
| <i>Gordeenya, E.A.; Kostinsky, A.J.; Terekchin, V.E.; Trapeznikov, A.F.</i> Ozone Synthesis in High-Frequency Pulsed Discharges | F/32.0 pag. | 923 |
| <i>Jones, J.E.; Davies, M.; Goldman, A.; Goldman, M.</i> A Study of the Critical Field Strength for Ionization in Point-Plane DC Coronas in Air | F/33.0 pag. | 925 |
| <i>Kuroda, M.; Igarashi, H.; Honma, T.</i> An Analysis of Ion Flow Fields in the Corona Device on the Basis of BEM and MOC | F/34.0 pag. | 927 |
| <i>Laan, M.; Perehygin, V.</i> The Dependence of Negative Corona on Electrode Surface Properties | F/35.0 pag. | 929 |
| <i>Maezono, I.; Chang, J.S.</i> Morphology of Flow Stabilized Point-to-Point Electrode Corona Discharges | F/36.0 pag. | 931 |

| | |
|---|---------------------|
| <i>Nagahama, Y.; Satoh, K.; Kaneko, Y.; Shimozuma, M.; Tagashira, H.</i> Breakdown Voltage Measurement of the Fine Powder Dielectrics Suspended in the Atmospheric Air | F/37.0pag. 933 |
| <i>Naidis, G.V.</i> Ozone Generation in Corona Discharges in Air | F/38.0pag. 935 |
| <i>Niemeyer, L.</i> A Fractal Lichtenberg Figure | F/39.0pag. 937 |
| <i>Petrov, N.I.; Petrova, G.N.</i> Self-Influence Effects in Leader Discharge | F/40.0pag. 939 |
| <i>Punekar, G.S.; Naidu, M.S.</i> Lightning Impulse Breakdown Characteristics of D.C.-Pre-Stressed SF ₆ Gas Gaps | F/41.0pag. 941 |
| <i>Raghavender, D.; Naidu, M.S.</i> Estimation of Critical Field Strength of Ternary Gas Mixtures in Nonuniform Fields under Impulse Voltages | F/42.0pag. 943 |
| <i>Robledo-Martínez, A.</i> Effect of Source Ripple on the Warburg Distribution of a Positive Corona Discharge | F/43.0pag. 945 |
| <i>Rosenkranz, J.; Pekarek, S.</i> Breakdown Voltage of the Surface of the Surface Glow Discharge | F/44.0pag. 947 |
| <i>Serdjuk, Ju.V.; Bozhko, I.V.; Fal'kovskij, N.I.</i> Investigation into Spark Ignition Voltages in Nonisothermal Gap | F/45.0pag. 949 |
| <i>Sobek, V.; Lukáč, P.; Skalný, J.D.</i> The Negative Corona Discharge in Flowing Air + SF ₆ Mixtures | F/46.0pag. 951 |
| <i>Stockwald, K.; Schorpp, V.; Neiger, M.; Beneking, C.</i> Incoherent VUV-UV-Light Sources on the Basis of Dielectric Barrier Discharges | F/47.0pag. 953 |
| <i>Strobl, D.; Neiger, M.; Stockwald, K.; Schorpp, V.</i> Spatial and Polarity Resolved Xe-Cl* Excimer Emission from Dielectric Barrier Discharges | F/48.0pag. 955 |
| <i>Takaki, K.; Akiyama, H.; Maeda, S.</i> Characteristics of Discharges in Gas Flow | F/49.0pag. 957 |
| <i>Ulyanov, K.N.; Boushoujev, S.V.; Prozorov, J.F.</i> The Quasi-Stationary Pseudospark Discharge | F/50.0pag. 959 |
| <i>Vasilyak, L.M.; Doynikov, V.A.</i> Experimental Investigation of High Speed Ionizing Waves with Voltage of 150-200 KV | F/51.0pag. 961 |

Subject Area 17

GENERATION AND DYNAMICS OF PLASMA FLOWS

| | |
|--|---------------------|
| <i>Aitov, N.L.; Zeigarnik, V.A.; Novikov, V.A.</i> Research & Development of Low Temperature Plasma Generators Using Powder-Like Fuel for Pulsed Geophysical MHD Plants | F/52.0pag. 963 |
| <i>Alexandrov, A.F.; Bytskevich, S.P.; Ershov, A.P.; Ljagushin, B.E.; Timofeev, I.B.; Chuvashov, S.N.</i> Shape of Plasmoids Formed with Pulsed Plasma Jet Injection into Gas | F/53.0pag. 965 |
| <i>Anoshko, I.A.; Ermachenko, V.S.; Zhdanok, S.A.; Gusev, I.E.</i> Measurement of Electron Temperature and Density in the Plasma of the Powerful Hall Accelerator | F/54.0pag. 967 |

| | | |
|---|-----------------|-----|
| <i>Astashinsky, V.M.; Bakanovich, G.I.; Bukova, N.A.; Kostyukevich, E.A.; Kuzmitsky, A.M.; Man'kovsky, A.A.; Min'ko, L.Ya.; Morozov, A.I.</i> A Study of the Processes of Plasma Flow Formation in a Quasi-Stationary High-Current P-50M Type Plasma Accelerator | F/55.0pag. | 969 |
| <i>Bender, E.D.; Chupriyanov, V.E.; Kabantsev, A.A.; Sokolov, V.G.; Taskaev, S.Yu.</i> The Fast Atoms Cover Formation by Plasma Stream | F/56.0pag. | 971 |
| <i>Bollanti, S.; Letardi, T.; Zheng, C.E.</i> XeCl Laser Discharge Initiation with High Voltage Pulse | F/57.0pag. | 973 |
| <i>Chebotaryov, V.V.; Garkusha, I.E.; Marinin, V.V.; Mitina, N.I.; Morozov, A.I.; Solyakov, D.G.; Tereshin, V.I.; Tiarov, M.A.; Trubchaninov, S.A.; Tsupko, B.Yu.; Volkov, Ya.F.; Voloshko, A.Yu.</i> The Influence of Current Distribution in Cathode Elements on the Plasma Flow in the Quasistationary Plasma Accelerator QSPA P-50 | F/58.0pag. | 974 |
| <i>Chebotaryov, V.V.; Garkusha, I.E.; Morozov, A.I.; Solyakov, D.G.; Tereshin, V.I.; Trubchaninov, S.A.; Tsarenko, A.V.; Voloshko, A.Yu.</i> An Analysis of the Processes in the Accelerating Channel of the Quasi-stationary Plasma Accelerator QSPA P-50 | F/59.0pag. | 976 |
| <i>Desyatkov, G.A.; Engelsht, V.S.; Musin, N.U.; Saichenko, A.N.</i> Experimental Investigations and Application of High-Voltage Low-Current Arc in Gas Flow | F/60.0pag. | 978 |
| <i>Egorov, I.I.; Lesnevsky, L.N.; Pavlov, A.D.; Popov, G.A.; Turin, V.N.</i> Calculation of the Transportable Properties of the Plasma Flow from a Dielectric Chamber | F/61.0pag. | 980 |
| <i>Engelsht, V.S.; Lelioukin, V.M.; Semionov, V.F.</i> Calculation of Toroidal Plasmatron Characteristics | F/62.0pag. | 982 |
| <i>Giammanco, F.</i> A Two-Fluid Approach to Plasma Dynamics | F/63.0pag. | 984 |
| <i>Jones, Y.D.; Copeland, R.P.; Parman, M.A.; Baca, E.A.</i> Anode-Biased Inert Gas Mixing in a Cesium-Free Dudnikov-Type Hydrogen Ion Source | F/64.0pag. | 986 |
| <i>Kabantsev, A.A.; Taskaev, S.Yu.</i> The Source of Transversal Injection of Plasma into a Trap | F/65.0pag. | 988 |
| <i>Kawaguchi, M.; Tanaka, H.; Toho, M.; Shinomiya, M.</i> Profiles of Density and Electron Temperature of an Electromagnetically Excited Plasma Sphere | F/66.0pag. | 990 |
| <i>Krasnyak, Yu. V.; Sinkevich, O.A.</i> Generation of Negative Ions in the Process of Explosive Emission | F/67.0pag. | 992 |
| <i>McNeill, D.H.</i> Properties of the Ablation Cloud Surrounding Solid Hydrogen Pellets Injected into Tokamaks | F/68.0pag. | 994 |
| <i>Panin, A.M.</i> Spatially Resolved X-Ray Spectra of Micropinch | F/69.0pag. | 996 |
| <i>Skvortsov, V.V.; Uspensky, A.A.</i> Generating the 8-15 Km/s Neutral Gas Flow by Means of Ion Acceleration/Deceleration Effects in Zones with Closed Drift of Electrons in Plasma with Magnetic Fields | F/70.0pag. | 997 |
| <i>Soliman, H.M.; Beshara, A.B.; Mas'oud, M.M.</i> Empirical and Experimental Investigation of Focus and Defocus Phases | F/71.0pag. | 999 |

Sunako, K.; Nanri, K.; Yamauchi, K.; Takayama, K.
Production of Sheet Plasma with Good Uniformity

F/72.0 ... pag. 1001

Volkov, V.P.; Gavrilov, V.N.; Litvinov, E.A.
Explosive Expansion of a Plasma Containing Ultrafine Particles

F/73.0 ... pag. 1003
