Preface [ <i>in English</i> ] . . . . .	v
Préface [ <i>en Français</i> ] . . . . .	vii
Contributing authors . . . . .	ix
List of courses . . . . .	xi
Acknowledgments . . . . .	xiii
Remerciements . . . . .	xiv

### PAPERS

<b>A minimum energy principle in plasma physics and stellar dynamics</b> (M. Feix, F. Hohl, and L. Staton) . . . . .	3
<b>Experiments and theory on turbulence in a high current discharge</b> (D. C. Robinson) . . . . .	21
<b>Strong turbulence</b> (S. F. Edwards) . . . . .	57
<b>On a derivation of the “quasi-linear” equations</b> (M. Trocheris) . . . . .	85
<b>Van Allen belt plasma physics</b> (C. F. Kennel and H. E. Petschek) . . . . .	95
<b>Mathematical models of plasma</b> (M. Feix) . . . . .	151
<b>Cascade mechanisms in the wave mixing processes of turbulence</b> (C. M. Tchen) . . . . .	197
<b>Nonlinear scattering of radiation from a plasma</b> (C. M. Tchen) . . . . .	215
<b>Spectrum of turbulence in a plasma with a strong magnetic field</b> (C. M. Tchen) . . . . .	233
<b>Action d’un champ électrique alternatif sur un gaz faiblement ionisé— Production d’harmoniques</b> (J. L. Delcroix et A. M. Pointu) . . . . .	251

<b>A collective approach to the kinetic theory of plasmas</b> (Y. H. Ichikawa) . . . . .	287
<b>Strong turbulence in collisionless plasmas</b> (D. Pfirsch) . . . . .	309
<b>Parametric and Raman instabilities of a plasma in an electromagnetic field</b> (M. V. Goldman) . . . . .	335
<b>Nonlinear interaction of electromagnetic radiation in plasmas</b> (N. Tzoar) . . . . .	363
<b>Nonlinear dielectric function and fluctuations of a plasma submitted to an electric field</b> (J. Coste) . . . . .	377
<b>Finite amplitude instabilities in weakly ionized gases and solids</b> (R. R. Johnson) . . . . .	387
<b>Mathematical models for nonlinear mode interactions in bounded plasmas</b> (H. Lashinsky) . . . . .	451
<b>SEMINARS</b>	
<b>Nonlinear dielectric response function and parametric instabilities in a magnetoplasma</b> (Y. Pomeau) . . . . .	479
<b>Experiments on the interaction of a strong electron beam with a plasma</b> (H. Böhmer and M. Raether) . . . . .	489
<b>Experimental observation of mode coupling near the electron cyclotron frequency</b> (H. J. Hopman and J. Cabral) . . . . .	503
