

## NONLINEAR PHENOMENA IN VLASOV PLASMAS

## Table of Contents

	Page
Note from the Editor	11
Workshop' s picture	12
<b>CHAPTER I : KINETIC THEORY, SELF-ORGANIZATION, STRONG TURBULENCE.</b>	<b>15</b>
<b>Yu. L. Klimontovich</b> Some Problems of Statistical Theory of Nonlinear Phenomena in Plasmas. (Invited paper)	17
<b>H. Wilhelmsson</b> Self-Formation and Evolution of Solutions for Reaction-Diffusion Equations.	53
<b>V. Yu. Bychenkov, V.P. Silin and V.T. Tikhonchuk</b> Nonlinear Self-consistent Vortex Structures in the Hydrodynamical Model of Anisotropic Vlasov Plasmas.	57
<b>J.A. Sellwood</b> Instabilities of Stellar Discs. (invited paper)	87
<b>P. Bertrand, A. Ghizzo, M.R. Feix, E. Fijaikow, P. Mineau, N.D. Suh and M. Shoucri</b> Computer Simulation of Phase Space Holes Dynamics. (invited paper)	109
<b>W.Y. Zhang</b> Incoherent Fluctuations in Toroidal Geometry.	127
<b>N.E. Kosmatov, V.F. Shvets and V.E. Zakharov</b> The Stability of a Weak Collapse in Nonlinear Schrödinger Equation. (abstract of invited talk)	133
<b>N.E. Kosmatov, V.F. Shvets and V.E. Zakharov</b> On the Wave Collapse in the Critical Case.	135

<b>A.N. Pushkarev, A.M. Rubenchik, R.Z. Sagdeev, V.F. Shvets, and V.E. Zakharov</b> The Final Stage of Three-Dimensional Langmuir Collapse.	139
<b>CHAPTER II : WAVE PARTICLE INTERACTION, QUASILINEAR THEORY.</b>	143
<b>E. Marsch</b> Wave-Particle Interactions in the Solar Wind. (invited paper)	145
<b>A.S. Bakal, O.V. Batishchev and Yu.S. Sigov</b> Numerical Simulation of the Beam-Plasma Interactions in Open Systems. (invited paper)	163
<b>L. Muschietti and C.T. Dum</b> A Numerical Simulation of Inhomogeneous Ion Cyclotron Turbulence.	193
<b>S.I. Tsunoda, F. Dovell and J.H. Malmberg</b> Experimental Test of Quasilinear Theory.	197
<b>M. Trocheris</b> Departure from Quasilinear Theory due to Mode Coupling.	203
<b>A.S. Lipatov</b> Numerical Simulation of the Cometary Shock Waves.	207
<b>CHAPTER III : CHAOTIC DYNAMICS.</b>	219
<b>R.A. Stern</b> Strong Field-Particle Interactions: Experimental Aspects. (invited paper)	221
<b>F. Anderreg, F. Skiff, P.J. Paris, T.N. Good, M.Q. Tran, N. Rynn and R. Stern</b> Nonlinear Response of Plasma Ions in Linear Electrostatic Waves. (invited paper)	237
<b>T.N. Good, F. Skiff, F. Anderreg, P.J. Paris, M.Q. Tran, N. Rynn and R. Stern</b> Optical Diagnosis of Plasma Waves via the Ion Dielectric Response.	255
<b>N. Rynn</b> Some Experiments on Nonlinear Effects, Turbulence, and the Transition to Stochasticity in a Low Temperature Vlasov Plasma. (invited paper)	259

<b>D.R. Shklyar</b> Nonlinear Effects in Particle Resonant Interaction with a Monochromatic Wave in an Inhomogeneous Plasma.	275
<b>B. Weysow</b> Single Particle in Cyclotron Resonance.	279
<b>L. Gaigani</b> Classical Electrodynamics of Point Particles and Nonlinear Dynamical Systems.	283
<b>CHAPTER IV : WAVE BEATING, MODE COUPLING, LOW FREQUENCY OSCILLATIONS.</b>	289
<b>T. Lehner</b> Excitation of Longitudinal Plasma Resonances by Optical Mixing Detected by Spatial Phase Conjugation.	291
<b>F.F. Chen</b> Laser Driven Mode Coupling of Ion and Electron Waves.	297
<b>E. Fijaikow, P. Bertrand, M.R. Feix, A. Ghizzo and M. Shoucri</b> Laser Plasma Simulation.	299
<b>P.P. Sosenko</b> Low-Frequency Oscillations in Vlasov Plasmas: The Quadratic Polarization Approximation.	305
<b>T. Huld, S. Iizuka, H.L. Péceeli and J. Juul Rasmussen</b> Experimental Investigations of Flute Type Electrostatic Turbulence.	323
<b>F.J. Crossley, M.G. Rusbridge and P. Uddholm</b> Nonlinear Interactions of Drift Waves: An Experimental Study.	327
<b>CHAPTER V : PLASMA HEATING, PARTICLE ACCELERATION, NONLINEAR TEARING.</b>	333
<b>R.H. Cohen, B.I. Cohen, W.M. Nevins, T.D. Rognlien, P.T. Bonoli and M. Porkolab</b> Current Drive by Intense Microwave Pulses. (invited paper)	335
<b>M.R. O'Brien</b> The Limits of the Diffusive Theory of Electron Cyclotron Heating.	347

<b>F.F. Chen</b> Status of Laser Accelerator Work. (abstract of invited talk)	351
<b>A. Roux, G. Chanteur, H. de Feraudy, D. Le Quéau and P. Louarn</b> Electron Parallel Acceleration and Coherent Radiation in the High Altitude Auroral Region. (invited paper)	355
<b>J. Berchem and Hideo Okuda</b> Numerical Simulations of Plasma Turbulence and Anomalous Diffusion at the Magnetopause Current Layer.	373
<b>P.C.H. Martens and A. Young</b> Proton Acceleration in Solar Flares and in the Geomagnetic Tail: A Comparison.	381
<b>W. Zwingmann</b> Particle Simulation: Tearing Instability and Plasmoid Formation of a Magnetotail-like Equilibrium.	389
<b>M.A. Dubois and B. Pégourié</b> Magnetic Surfaces and Striations during Pellet Ablation.	393
List of the participants to the 1988 Cargèse workshop	397
Authors' index	403
