Section 1: ATOMIC COLLISION PROCESSES	
M.Ya. AMUSIA (Leningrad, USSR)	1
<i>The effect of outer atomic shell rearrangement on the generalized strength of the inner shells</i>	
☉ I. ČADEŽ (Belgrade, Yugoslavia)	15
<i>Investigation of 4 eV resonance in CO₂ by electron impact</i>	
A.M. DUMONT (Meudon, France)	33
<i>Atomic lifetime measurements by the method of correlation photons in a cascade</i>	
P. ERMAN (Stockholm, Sweden)	49
<i>Time resolved optical precision spectroscopy with applications</i>	
☉ R.J. HALL (Paris, France)	59
a) <i>Excitation of molecules by low electrons</i>	
b) <i>Dissociative electron attachment</i>	
H. KLEINPOPPEN (Stirling, U.K.)	71
<i>Direct observation of coherence effects and quantum mechanical excitation amplitudes in electron atom excitations</i>	
VO KY LAN (Meudon, France)	87
<i>Correlation effects in photoabsorption and in low energy electron atom scattering processes</i>	
B.L. MOISEIWITSCH (Belfast, U.K.)	123
<i>Variational methods in electron scattering theory</i>	
A. NIEHAUS (Freiburg, Germany)	143
<i>Electron spectroscopy in heavy particle collisions</i>	
M.N. PANOV (Leningrad, USSR)	165
<i>Processes of electron capture by multiply charged ions in collisions with atoms and molecules of gases</i>	
A.R. TANČIĆ (Belgrade, Yugoslavia)	183
<i>Slow electron scattering on atoms – the role of many–electron correlations</i>	
☉ S. TRAJMAR and W. WILLIAMS (Pasadena, USA)	199
<i>Electron–metal collision cross sections</i>	
J. WILLIAMS (Belfast, U.K.)	217
a) <i>The measurement of absolute cross sections for electron–atom scattering</i>	
b) <i>Coincidence investigations of electron atom collisions</i>	

	Page
Section 2: PARTICLE INTERACTION WITH SOLIDS	
G. CARTER, D.G. ARMOUR, C. BRAGANZA, S.E. DONNELLY and G. FARRELL (Salford, U.K.)	261
<i>The use of low energy light ions for probing radiation damage in solids</i>	
G. CARTER (Salford, U.K.)	281
<i>Technological applications of sputtering and ion trapping</i>	
S.K. ERENTS (Abingdon, U.K.)	299
a) <i>Ion trapping and gas release phenomena</i> b) <i>Direct observation of blisters</i>	
W.A. GRANT (Salford, U.K.)	329
<i>Some current applications of ion implantation</i>	
W.A. GRANT, J.S. WILLIAMS and C.E. CHRISTODOULIDES (Salford, U.K.)	340
<i>Some current applications of Rutherford backscattering</i>	
C.B. KERKDIJK, J. KISTEMAKER and F.W. SARIS (Amsterdam, The Netherlands)	357
<i>Photon emission induced by ion-bombardment of solids</i>	
K.H. KREBS (Berlin, GDR)	379
<i>Ion-induced kinetic electron ejection from semiconductors and insulators</i>	
G.M. McCracken (Abingdon, U.K.)	395
a) <i>Interaction of plasma with surfaces in fusion devices</i> b) <i>Chemical sputtering of surfaces by hydrogen ions</i>	
R.S. NELSON (Harwell, U.K.)	421
<i>Radiation damage effects in metals</i>	
H. OECHSNER (Clausthal, Germany)	461
a) <i>Sputtered neutral particles</i> b) <i>Sputtering of non-elemental surfaces</i>	
V.E. YURASOVA (Moscow, USSR)	493
<i>Surface and bulk phenomena in single crystal sputtering</i> a) <i>Differential sputtering yield</i> b) <i>Surface structure of single crystal at various angles of ion bombardment</i>	
SUMMARY OF THE PANEL DISCUSSION ON	555
<i>Surfaces, blistering phenomena and changes in surface topography induced by ion bombardment</i>	
Chairman:	
J.L. WHITTON (H.C. Ørsted Institute, University of Copenhagen, Copenhagen, Denmark)	

	Page
Section 3: PHENOMENA IN IONIZED GASES	
U.H. BAUDER (Munich, Germany)	559
<i>a) The determination of transport coefficients from high pressure arc measurements</i>	
<i>b) High pressure plasma diagnostics</i>	
T. CONSOLI (Grenoble, France)	585
<i>RF heating studies at the Grenoble laboratory</i>	
H.W. DRAWIN (Fontenay-aux-Roses, France)	601
<i>a) Reactions between radiation and matter through multiphoton processes in a closed cavity at equilibrium</i>	
<i>b) Interaction of nonthermally excited plasma particles with laser photons</i>	
D. EVANS (Abingdon, U.K.)	641
<i>a) Resonant scattering as a plasma diagnostics</i>	
<i>b) Laser produced plasma from a solid target</i>	
V.N. FEDOROV, (Leningrad, USSR)	667
<i>Parametric phenomena in inhomogeneous plasma</i>	
R.N. FRANKLIN (Oxford, U.K.)	679
<i>a) The sideband instability – a case study</i>	
<i>b) Wave-wave interactions—theory and experiment</i>	
H.R. GRIEM (College Park, Maryland, USA)	699
<i>a) Stark broadening in thermal plasmas</i>	
<i>b) Stark broadening in turbulent plasmas</i>	
N. KONJEVIĆ (Belgrade, Yugoslavia)	719
<i>The importance of light refraction in plasma spectroscopy</i>	
J.A. PHILLIPS (Vienna, Austria)	737
<i>The status of effort on the international fusion research</i>	
G. PICHLER (Zagreb, Yugoslavia)	749
<i>Self-broadening of cesium principal series lines</i>	
S. POPOVIĆ (Belgrade, Yugoslavia)	763
<i>Determination of electron transport properties of dense plasmas from pulsed arc measurements</i>	
H. SUHR, (Tübingen, Germany)	783
<i>Plasma chemistry</i>	
<i>a) Principles and problems</i>	
<i>b) Applications and present trends of research</i>	
C.R. VIDAL (Garching, Germany)	807
<i>Laser spectroscopy of diatomic molecules; Determination of molecular constants</i>
