

C O N T E N T S

Preface	vii
ATOMIC COLLISIONS PROCESSES	
<i>M. Inokuti and M.A. Dillon</i>	
What formulas are good for representing dipole and generalized oscillator-strength spectra ?	3
<i>H.S. Taylor</i>	
A new approach to studying quasiperiodicity and the onset of chaos in nonlinear systems	23
<i>F. Linder</i>	
Crossed-beam electron scattering experiments at thermal energies	49
<i>L. Andrić and R.I. Hall</i>	
Vibrational excitation of simple polyatomic molecules by electron impact via resonant processes	71
<i>R.W. Crompton</i>	
The measurement, interpretation and application of electron transport coefficients	87
<i>A.A. Radtsig and B.M. Smirnov</i>	
Diffusion and mobility of gaseous ions in external electrostatic field	113
<i>F. Linder</i>	
Vibrational excitation and charge transfer in ion-molecule collisions	145
<i>R.I. Hall and V.A. Esaulov</i>	
Electron detachment in negative ion-molecule collisions	169

<i>R.K. Janev and D.E. Post</i>	
Atomic physics aspects of particle transport in fusion plasmas.....	201
<i>B.H. Bransden</i>	
Recent advances in the theory of charge exchange	227
<i>E.A. Solov'ev</i>	
Analytic properties of molecular potential energy curves and their relation to nonadiabatic transitions	251
<i>A.M. Ermolaev</i>	
Theoretical studies of heavy particle collisions in the intermediate energy range using atomic orbital expansions and effective potentials	275
<i>M.A. Mazing</i>	
The elementary processes for multicharged ions in laser produced plasmas (experiment)	307
<i>R. Dören</i>	
Scattering of laser-excited alkali-atoms from rare gas atoms: left/right asymmetry in the differential cross section	325
<i>B.M. Smirnov</i>	
Parameters of excimer molecules	345
<i>G. Ferrante</i>	
Free-free transitions in strong laser fields.....	379
PARTICLE INTERACTION WITH SOLIDS	
<i>W. Heiland and K.J. Snowden</i>	
Surface analysis by low energy ion beam techniques	415
<i>R.P. Webb and D.E. Harrison Jr.</i>	
Recent results of molecular dynamics simulation of the effects of ion impact on solids	435

<i>I.H. Wilson</i>	
Synthesis of silicon dioxide by ion implantation	451
<i>I.H. Wilson</i>	
The topography of ion bombarded surfaces	491
<i>M. Milosavljević</i>	
RBS analysis of implanted epitaxial silicon films	507
<i>A. Barbu, G. Martin and Y. Limoge</i>	
Phase stability under irradiation	527
<i>T. Mihač and T. Nenadović</i>	
Laser beam damaging effects on sputtered thin films	553
<i>H. Oechsner</i>	
Formation of sputtered molecules	571
<i>N. Popović and T. Nenadović</i>	
Diffusion processes in sputtered TiPdAu thin films	599
ELECTRICAL DISCHARGES	
<i>W.L. Wiese</i>	
Experimental methods for determining atomic transition probabilities	621
<i>N.N. Ljepojević</i>	
Calculation of the population densities of the excited atomic levels in stationary and transient helium glow discharge plasmas	647
<i>W. Kraeft and M. Luft</i>	
Progress in the theory of dense plasmas	681
<i>V.M. Atrazhev and I.T. Iakubov</i>	
Prebreakdown ionization phenomena in dense gases and liquids	705

<i>G.A. Kobzev</i>	
Radiation processes in low-temperature plasma	725
<i>B.T. Vujičić</i>	
Experimental investigation of broadening parameters of helium lines with forbidden components in laser-produced plasma	747
PLASMA PHYSICS	
<i>G. Kalman</i>	
Plasmon dispersion in strongly coupled plasmas	773
<i>H. Wilhelmsson</i>	
Nonlinear effects in plasmas	793
<i>H.L. Pécseli</i>	
Convective cells in plasmas and their relation to anomalous transport	815
<i>D. ter Haar</i>	
Strong plasma turbulence	839
<i>A. M. Rubenchik</i>	
Fast electrons in laser plasma	855
<i>M. Kono</i>	
A route to turbulence in nonlinear development of an ion beam-plasma instability	875
<i>D.S. Jovanović</i>	
Effect of nonlinear currents in the interaction of H.F. electromagnetic waves with plasmas	909
<i>F.F. Chen</i>	
Laser driven particle accelerators	937
<i>E.R. Wooding</i>	
Laser plasma interaction	983

<i>P. Michelsen, J.P. Lynov and E.R. Hansen</i>	
Electron cyclotron resonance heating of a high density plasma	1005
<i>J. Elazar</i>	
Experimental investigation of harmonics and subharmonics in laser produced plasmas	1023
Author index	1043
