

Contents

v	Foreword
ix	Preface
1	Introduction to plasma physics <i>C J H Watson</i>
21	Plasma theory <i>J P Dougherty</i>
55	Plasma waves <i>J J Sanderson</i>
93	Plasma stability theory <i>J A Wesson</i>
131	Probe measurements <i>J E Allen</i>
145	Optical methods of plasma diagnostics <i>D E Evans</i>
177	Transport theory of plasma <i>M G Haines</i>
197	Introductory nonlinear plasma physics <i>R N Franklin</i>
225	Advanced nonlinear theory of plasmas <i>I Cook</i>
243	Plasma production, heating and confinement in fusion devices <i>R J Bickerton and B E Keen</i>
279	Computational plasma physics <i>E W Laing</i>
295	Industrial applications of plasmas <i>D T Swift-Hook</i>
311	Laser compression of matter <i>K V Roberts</i>
323	Astrophysical plasmas <i>R J Tayler</i>
