

## I N D E X

P. STOTT: Macroscopic measurements . . . . .	pag. 1
G. LISITANO: Density distribution measurements in large C.T.R. devices . . . . .	» 17
C. WHARTON: A review of experiments on microwave scattering from plasmas . . . . .	» 70
R. CANO: Plasma diagnostics from electron cyclotron emission . . . . .	» 101
R. CANO: Enhanced microwave scattering at the upper hybrid frequency . . . . .	» 108
D. AKULINA: The use of microwave resonators for determination of plasma density . . . . .	» 120
C. WHARTON: A review of energetic neutral particle plasma diagnostics . . . . .	» 139
H. EUBANK: Fast neutral measurements of Ion Temperature in Large Tokamaks . . . . .	» 152
F. JOBES: Heavy ion beam probing . . . . .	» 158
R. MC WHIRTER: The spectroscopy of laboratory and astronomical plasmas . . . . .	» 178
F. DE MARCO: Spectroscopy of impurities in Tokamak plasmas . . . . .	» 245
S. SEGRE: Thomson scattering from a plasma . . . . .	» 265
O. GEHRE: Determination of Plasma Parameters by Infrared Laser scattering . . . . .	» 302
G. VORONOV: New possibilities of laser applications to plasma diagnostics . . . . .	» 313
W. WING: Soft x-ray measurements . . . . .	» 324
S. SESNIC: Electron Runaway in Tokamak devices . . . . .	» 357
H. EUBANK: Neutrons . . . . .	» 377
F. BENNETT: Data acquisition systems . . . . .	» 393
H. KNOEPFEL: Hard x-ray diagnostics for fusion Experiment . . . . .	» 430
