

CONTENTS

PART 1: BASIC COURSE

Macroscopic plasma properties and stability theory (IAEA-SMR-61/3)	3
<i>P.H. Sakanaka</i>	
Plasma kinetic equations (IAEA-SMR-61/8)	47
<i>M.H.A. Hassan</i>	
Microinstabilities in homogeneous warm magnetized plasmas (IAEA-SMR-61/101)	85
<i>S. Cuperman</i>	
Plasma equilibrium in magnetic confinement devices and stability of mirror machine plasmas (IAEA-SMR-61/105)	147
<i>R.K. Varma</i>	
Linear waves and instabilities in fluid plasmas (IAEA-SMR-61/11)	187
<i>A.A. Skorupski</i>	
Nonlinear effects in wave propagation (IAEA-SMR-61/104)	249
<i>A. Sen</i>	
Low-frequency microscopic stability analysis in fusion devices (IAEA-SMR-61/102)	275
<i>A.M. El Nadi</i>	

PART 2: SELECTED LECTURES ON ADVANCED TOPICS IN FUSION RESEARCH

Field-reversed mirrors (IAEA-SMR-61/106)	307
<i>H.L. Berk</i>	
Physics of electron cyclotron absorption (IAEA-SMR-61/107)	319
<i>M. Bornatici</i>	
Internal kink modes in toroidal plasmas with circular or non-circular cross-section (IAEA-SMR-61/108)	343
<i>M.N. Bussac, R. Pellat, D. Edery, J.L. Soule</i>	
Transport in toroidal magnetoplasmas (IAEA-SMR-61/109)	371
<i>F. Engelmann</i>	

A Fokker-Planck/Transport model for neutral-beam-driven tokamaks (IAEA-SMR-61/110)	395
<i>J. Killeen, A.A. Mirin, M.G. McCoy</i>	
Physics of wave-particle interactions (IAEA-SMR-61/112)	417
<i>K. Nishikawa</i>	
High-intensity CO ₂ laser-plasma interaction experiments (IAEA-SMR-61/113)	437
<i>A.A. Offenberger</i>	
Stability of plasma vortices (IAEA-SMR-61/114)	477
<i>R.N. Sudan</i>	
 PART 3: REVIEWS	
Small-scale experiments in poloidal field systems (IAEA-SMR-61/111)	491
<i>B. Lehnert</i>	
Interaction of high-current relativistic electron beams with plasma: physical nature of the phenomenon and its application in microwave electronics (IAEA-SMR-61/103)	537
<i>A.A. Rukhadze</i>	
Appendix: Programme of the College	593
Faculty	595
List of Participants	601
