

VOLUME I

Wednesday, June 27

page

Morning:	1.	High Frequency Wave Emission	1- 13
	2.	Theory of Laser-Plasma Interaction	14- 24
	3.	Low Frequency Waves and Turbulence	25- 36
Afternoon:	4.	Soliton Theory	37- 54
	5.	ICRF	55- 68

Thursday, June 28

Morning:	6.	Low Frequency Turbulence in Tokamaks	69- 78
	7.	Theory of Plasma Instabilities	79- 93
	8.	General Theory I	94-106
Afternoon:	9.	Equilibrium Theory	107-119
	10.	Tearing Modes	120-128
	11.	Ionosphere and Magnetosphere	129-146

Friday, June 29

Morning:	12.	Alternative Concepts	147-170
	13.	Drift Waves	171-178
	14.	Double Layers	179-185
Afternoon:	15.	Nonlinear Wave-Particle Interaction	186-195
	16.	Stability	196-215
	17.	Lower Hybrid and Current Drive	216-225
