

CONTENTS

Preface	v
Volume 1	
A Theory of Minority Absorption <i>by C. N. Lashmore-Davies et al.</i>	1
Anomalous Heat Transport in Ohmic and Auxiliary Heated Tokamaks <i>by F. Romanelli</i>	22
Anomalous Heating, Transport, Self-Organization and Instability in the Plasma with Ion-Acoustic Turbulence <i>by V. Yu. Bychenkov et al.</i>	62
Aspects of Strong Langmuir Turbulence <i>by D. R. Nicholson et al.</i>	136
Charged Particle Acceleration in the Interaction of a Strong Electromagnetic Wave with an Inhomogeneous Nonmagnetized Plasma <i>by S. V. Bulanov et al.</i>	138
Collapse Stability and Multiple Splitting of Wave Structures in Nonlinear Media <i>by A. G. Litvak et al.</i>	161
Collective Phenomena in Plasma Interaction with Metal Surface <i>by V. V. Vladimirov</i>	169
Comments on Density Fluctuations and Confinement in Tokamak <i>by J. Olivain et al.</i>	207
Aspects of Combined ICRF and Neutral Beam Heating and Current Drive <i>by M. Cox et al.</i>	232
Computer Models for Kinetic Equations of Magnetically Confined Plasma <i>by J. Killeen et al.</i>	250
Conditional Eddies in Plasma Turbulence <i>by H. Pécseli</i>	278

Double Layers Acting as Plasma Instability Stimulators <i>by M. Sanduloviciu</i>	293
Echo in Weakly Turbulent Plasmas and its Possible Application for Diagnostic Purposes <i>by J. Nycander et al.</i>	329
Electron Heat Transport During Electron Cyclotron Heating on TFR <i>by J. A. Hoekzema et al.</i>	354
Enhanced Noise and Raman Scattering in Plasma <i>by A. Simon et al.</i>	374
Evolution of Plasma Systems Described by Reaction Diffusion-Equations <i>by H. Wilhelmsson</i>	383
Heat Pulse Propagation in JET <i>by N. J. Lopes Cardozo et al.</i>	417
Heat Transport in Partially Stochastic Tokamak magnetic fields <i>by M. Hugon et al.</i>	432
Intrinsic Stochasticity of Plasma Ions in Electrostatic Waves <i>by F. Skiff et al.</i>	441
JET Latest Results and Implications for a Reactor <i>by P. H. Rebut et al.</i>	462
Kinetic Theory of Low-Frequency Nonlinear Structures in Magnetized Plasmas <i>by A. G. Sitenko et al.</i>	486
Lithium Beam-Activated Edge Plasma Diagnostics <i>by H. Winter et al.</i>	525
Low Frequency RF Heating on TCA using Alfvén Waves <i>by K. Appert et al.</i>	550
Magnetic Field Generation and Ponderomotive Force Effects <i>by V. I. Berezhiani et al.</i>	575
Magnetic Field Generation in Laser Produced Plasmas <i>by M. P. Srivastava</i>	606

Magnetically Insulated Inertially Confined Fusion <i>by A. Hasegawa et al.</i>	643
Microwave Simulation Experiments of Electron Heating and Heat Transport Relevant to Laser Fusion <i>by K. Mizumo et al.</i>	654
Volume 2	
Model Calculations on Plasma-Neutral Gas Interaction in Space <i>by K. Sauer et al.</i>	672
Nonlinear Wave Phenomena in Bounded Plasmas <i>by I. Zhelyazkov</i>	694
Nonlinear Dynamics of Nonequilibrium Medium Structures and Turbulence <i>by A. V. Gaponov-Grekhov et al.</i>	719
Nonlinear Interaction of Waves in Plasma-Molecular Systems <i>by G. F. Goryunova et al.</i>	735
Nonlocal Electron Heat Transport Due to Steep Temperature Gradients <i>by P. Mora et al.</i>	755
Numerical Study of a Many Particle Adiabatic Invariant <i>by T. M. O'Neil et al.</i>	764
On Magnetic Reconnection and its Consequences in Magnetic Tails <i>by K. Schindler</i>	772
Particle Acceleration by Plasma Waves <i>by F. F. Chen et al.</i>	797
Plasma Magnetic Confinement Physics in the Reversed Field Pinch <i>by S. Ortolani</i>	802
Plasma Turbulence and Anomalous Transport <i>by P. H. Diamond et al.</i>	842
Problems of Wave Barriers Translucence in Inhomogeneous Plasma <i>by A. A. Vodyanitskii et al.</i>	862
Propagation of a Neutralized Ion Beam in a Transverse Magnetic Field <i>by P. Y. Fan et al.</i>	889
