

CONTENTS

Volume I

A. TOKAMAKS.

1. Turbulence During Minor Disruptions in Tokamak Plasmas.
*Andreoletti, J., Laviron, C., Olivain, J. Pecquet, A.L.,
Gervais, F., Gresillon, D. Hennequin, P., Quemeneur, A.,
Truc, A.* ... 1
2. Computer Simulation of Current Penetration and Plasma
Column Compression in a High Field Tokamak.
*Azizov, E.A., Vedenov, A.A., Gladush, G.G. Dokuka, V.N.,
Khairutdinov, R.R., Chuyanov, V.A.* ... 5
3. Study of the Lower Hybrid Waves in FT-2 Tokamak by the
Enhanced Scattering Technique.
Budnikov, V. N., Irzak, M. A. ... 9
4. Electron Density Measurement by Emission Line Intensity Ratio
of Neutral Hydrogen in SINP Tokamak.
*Chatterjee, P., Pal, R., Kundu, M., Iyenger, S., Paul, R.K.,
Hui, A.K., Roychowdhuri, S., Basu, J., Majumdar, S.K.* ... 13
5. Energy Flows in a Quasi-Isobaric Fusion/Fission Hybrid
Reactor.
Chaturvedi, S., Mills, R.G., Cecchi, J.L. ... 17
6. Density Fluctuations Level During Sawtooth Relaxation in
Tokamak Plasma.
*Gervais, F., Gresillon, D., Hennequin, P., Quemeneur, A.,
Truc, A., Andreoletti, J., Laviron, C., Olivain, J., Pecquet,
A.L.* ... 21
7. Tight Aspect Ratio Tokamaks.
*Haynes, P.S., Hender, T.C., Robinson, D.C., Sykes, A.,
Todd, T.N.* ... 25
8. Very Low-qa Discharge Experiments on the SINP Tokamak.
*Iyenger, A. N. S., Chowdhury, S., Basu, J., Hui, A.K.,
Majumdar, S.K., Munshi, S., Pal, R., Paul, R.K.,
Ranjan, P.* ... 29

9.	A Simple Figure of Merit for the Analysis of Ignition Tokamaks. <i>Ludwig, G.O., Montes, A.</i>	...	33
10.	The Study of MHD Activities in SINP Tokamak Using Visible Light Detector Arrays. <i>Paul, R. K., Hui, A.K., Banik, D., Ranjan, P., Iyenger, A.N.S., Choudhury, S., Munshi, S.</i>	...	37
11.	Lyapunov Stability of the Tokamak Plasma. <i>Petviashvili, V.I.</i>	...	41
12.	A Model For Breakdown Phase in a Tokamak Discharge. <i>Prabhakara, H.R., Sethia, G.C., Kaw, P.K.</i>	...	45
13.	A New Universal Line in Hugill Diagram. <i>Rai, V.N., Mattoo, S.K.</i>	...	49
14.	An Explanation for Formation of MARFES and Detached Plasmas. <i>Rai, V.N., Mattoo, S.K.</i>	...	53
15.	Kinetic Ray Tracing in Toroidal Geometry With Application to Mode Converted Ion-Bernstein Waves. <i>Ram A.K., Bers, A.</i>	...	57
16.	A Method of Detection and Analysis of Neutral and Charged Particles in SINP Tokamak. <i>Ray, N.R., Majumdar, S.K., Munshi, S., Chowdhury, S. Sengupta, S.N.</i>	...	61
17.	A Possibility of Alpha-Particle Diagnostics by Using Spatial-Temporal Echo. <i>Revenchuck, S.M., Cheremnykh, O.K.</i>	...	65
18.	Electron Beam Driven Tokamak Equilibria. <i>Rypdal, K.</i>	...	69
19.	Studies on Particle Transport by Pellet Injection in JIPP-TIIU Tokamak. <i>Sato, K.N., Sakamoto, M., Ogawa, Y., Kawahata, K., Kawasumi, Y., Ida, K., Hirokura, S.</i>	...	73
20.	Drift Magnetic Islands in Tokamak. <i>Smolyakov, A.I.</i>	...	77
21.	Absorption of Lower Hybrid Waves by Fusion Alpha Particles. <i>Spada, M., Bornatici, M., Engelmann, F.</i>	...	81
22.	A Critical Analysis of Fusion Power-Reactor Designs. <i>Vijayan, T., Rohatgi, V.K.</i>	...	85

23.	Equilibration Effects for Density and Temperature Profiles in Toroidal Plasmas. <i>Weiland, J., Jarmen, A., Nordman, H.</i>	...	89
-----	--	-----	----

B. TOKAMAK EDGE PLASMA STUDIES.

24.	Transport Parameters in the Plasma Edge Region of a Small Tokamak. <i>Da Silva, R.P., Nascimento, I.C.</i>	...	93
25.	Response of a Tokamak Plasma to Toroidal Electric Field Pulse and Determination of the Plasma Current Profile. <i>Fukao, M., Tanihara, T., Mori, K.</i>	...	97
26.	Model for MARFE-Detached Plasma Transition in Tokamaks. <i>Kaw, P.K., Deshpande, S., Rath, S., Avinash, K.</i>	...	101
27.	Charge Transfer Cross-Sections for Multiply Charged Ions and Hydrogen Atom - An Empirical Study. <i>Midha, J.M., Gupta, S.C.</i>	...	105
28.	Boundary Plasma of RF Current Driven Plasma in the WT-3 Tokamak. <i>Nakamura, M., Minami, T., Yoshida, M., Sakakibara, H., Hanada, K., Ide, S., Iida, M., Tanaka, H., Maekawa, T., Terumichi, Y., Tanaka, S.</i>	...	109
29.	Study of Edge Plasma in Tokamak with Langmuir Probe. <i>Raychaudhuri, S., Munshi, S., Chowdhury, S., Sengupta, S.N.</i>	...	113
30.	Fluctuations in the DITE Boundary Layer. <i>Vayakis, G., Robinson, D.C.</i>	...	117

C. CURRENT DRIVE.

31.	High Frequency Surface Helicity Injection in Axisymmetric Toroids with Moving Plasma Boundaries. <i>Avinash, K., Kaw, P.K.</i>	...	121
32.	On Electron Helicity and Current Drive. <i>Avinash, K.</i>	...	125
33.	Evolution of Plasma Current in Presence of Large Amplitude Alfvén Wave. <i>Beklemishev, A.D.</i>	...	129

34. Kinetic Theory of Current Drive Run Away Electrons - An Exact Analytic Solution. <i>Khan, T.P.</i> ...	133	45. Parametric Effects on Low Frequency Ion Modes in Low Altitude Ionosphere Induced by High Power Radio Waves. <i>Chaturvedi, P.K., Ossakow, S.L.</i> ...	177
35. Quasistationary Current Induced by High Frequency Electromagnetic Wave in Relativistic Magnetized Plasma. <i>Malek, G. F., Berro, M.</i> ...	137	46. Generation of VLF Waves at the Inner Edge of the Ring Current. <i>Das A.C.</i> ...	181
D. FIELD REVERSED CONFIGURATIONS.		47. Effect of Geomagnetic Field Distortions and Parallel Electric Fields on Charge Particle Precipitation. <i>Das, I.M.L.</i> ...	185
36. Energy and Particle Fluxes at the Boundary of a Reversed Field Pinch Configuration. <i>Antoni, V., Bagatin, M., Desideri, D.</i> ...	141	48. Magnetospheric Phenomena in a Neutron Star Binary System with Strong Magnetic Field. <i>Duorah, H.L., Duorah, K.</i> ...	189
37. Helicity Balance and Transport Analysis in a Steady-State Reversed Field Pinch. <i>Giubbilei, M., Ortolani, S.</i> ...	145	49. Wave Propagation in a Plasma Embedded in a Strong Magnetic Field. <i>Duorah, K., Chakravarti, S.</i> ...	193
38. Relaxation Phenomena and Plasma Heating in RFP Plasmas. <i>Martin, P., Ortolani, S.</i> ...	149	50. High Frequency Waves Due to Velocity Shear in the Electron Flow. <i>Ganguli, G., Palmadesso, P.J., Lee, Y.C., Huba, J.D.</i> ...	197
39. Flux Loss During Reversal in a Field Reversed Configuration with Bias Field Comparable to Green-Newton Field. <i>Rodrigo, A.B., Sobehart, J.R.</i> ...	153	51. Simulations of Large Scale Plasma Outflow Processes in High Latitude Ionosphere Considering the Effects of Plasma Microprocesses. <i>Ganguli, S.B., Palmadesso, P.J.</i> ...	201
40. Evaluation of SK/CG-1 Machine in Accordance with the Spherical Torus. <i>Sinman A., Sinman, S.</i> ...	157	52. Theory of Paired Electrostatic Shocks in the Polar Magnetosphere. <i>Goswami, K.S., Bujarbarua, S.</i> ...	205
E. ASTROPHYSICAL AND SPACE PLASMAS.		53. Interaction of VLF Waves with Hot Electron-Beam in the Magnetosphere. <i>Gwal, A.K., Singh, M.</i> ...	209
41. Streaming Instabilities Associated with the AMPTE Plasma Releases in the Solar Wind. <i>Bingham, R., Nairn, C.M.C.</i> ...	161	54. The Magnetization of the Intergalactic Medium. <i>Jafelice, L.C., Opher, R.</i> ...	213
42. Wave Excitation Downstream of Marginally Supercritical Bow Shocks. <i>Brinca, A.L., Sekopke, N., Pashmann, G.</i> ...	165	55. The Action of Kinetic Alfvén Waves on the Thermal Population of Extragalactic Jets. <i>Jafelice, L.C., Opher, R.</i> ...	217
43. Radio Beacon Observations of Sub km Scale Size Irregularities Associated with Equatorial Spread-F. <i>Chandra, H., Vyas, G.D., Sinha, H.S.S.</i> ...	169	56. Lower Hybrid Drift Instability as a Possible Mechanism of the Magnetic Noise Bursts in the Magneto Tail Neutral Sheet. <i>Kuznetsova, M.M., Nikutowski, B.</i> ...	221
44. Waves in a Plasma Containing Drifting Hydrogen and Electrons. <i>Chandu, V., Devarajan, S., Renuka, G.</i> ...	173		

57.	Stochastic Percolations of Magnetic Field Lines Through the Transition Layers with Magnetic Shear. <i>Kuznetsova, M.M., Zelenyi, L.M.</i>	... 225
58.	Excitation of Ballooning Modes at the Plasmopause. <i>Lakhina, G.S., Mond, M., Hameiri, E.</i>	... 229
59.	Solitons in Pulsar Magnetosphere and Microstructures in Radio Emissions. <i>Mofiz, U.A.</i>	... 233
60.	Global Structure of Galactic Magnetic Fields. <i>Pandey, B.P., Varma, R.K.</i>	... 237
61.	Spectral Characteristics of the Electron Density Irregularities Associated with Equatorial Spread F - Transitional Wave Lengths. <i>Prakash, S., Pal, S., Chandra, H.</i>	... 241
62.	Nonlinear Evolution of the Kelvin-Helmholtz Instability in the Near-Earth Plasma. <i>Satyanarayana, P., Keskinen, M.J., Mitcheli, H.G., Fedder, J.A., Zalesak, S.T., Huba, J.D.</i>	... 245
63.	Evolution of Plasma-Line Power-Spectrum in HF-Heating Experiments at Arecibo. <i>Tanikawa, T., Cheung, P.Y., Nakamura, Y., Fukuchi, T., Wong, A.Y.</i>	... 249
64.	Accreting Magneto-Fluid Around a Compact Object: A Newtonian Analysis. <i>Tripathi, S.C., Prasanna, A.R., Das, A.C.</i>	... 253
65.	The Generation of Cosmic Rays in Plasma Pinches. <i>Trubnikov, B.A., Vlasov, V.P., Zhdanov, S.K.</i>	... 257
66.	Magnetic Reconnection and Resonant Absorption of Alfvén Waves : Alfvén's Wave Equation Revisited. <i>Uberoi, C.</i>	... 261
67.	Gravitational Instability of a Two Component Rotating Viscous Plasma Through Porous Medium. <i>Vaghela, D.S., Chhajlani, R.K.</i>	... 265
68.	Electron Cyclotron Damping Effect of the Line Emission for Magnetron Stars. <i>Xu, M.J., Wang, D.Y., Tsai, S.T.</i>	... 269

69.	On the Fine Structure of the Apparent Sources of Solar Radio Bursts. <i>Zimbardo, G., Veltri, P., Mangeney, A.</i>	... 273
-----	---	---------

F. Z-PINCH AND PLASMA FOCUS.

70.	Gyrokinetic Stability Analysis of Z-Pinches. <i>Akerstedt, H.O.</i>	... 277
71.	A Numerical Study of Strongly Nonlinear Plasma Motion in a Magnetic Octupole Field. <i>Erikson, H.G., Wahlberg, C.</i>	... 281
72.	Temporal and Dynamic Characteristics of a Small Gas-Puff Z-Pinch. <i>Krejci, A.</i>	... 285
73.	Observation of High Temperature Regions in the Post Pinch Phase of a Plasma Focus Device. <i>Rout, R.K., Shyam, A.</i>	... 289
74.	Surface Discharge as a Method for Generation of Shock Waves with Complicated Configuration and Simulation of Hydrodynamic Phenomena in Plasma Focus. <i>Sokolov, I. V., Terekhin, V. E.</i>	... 293
75.	Theory of Plasma Pinches. <i>Trubnikov, B.A., Vlasov, V.P., Zhvanov, S.K.</i>	... 297
76.	Development of Sausage Instability of Z-Pinch. <i>Vikhrev, V. V., Rosanova, G., Ivanov, V.V.</i>	... 301
77.	Rotating Kink Modes in a Noncircular Z-Pinch. <i>Wahlberg, C.</i>	... 305

G. MIRROR AND LINEAR DEVICES.

78.	Stability of ICRF-Heated Central-Cell Plasmas in the Gamma 10 Tandem Mirror. <i>Inutake, M., Ishimura, M., Kimura, Y., Katsusata, R., Hojo, H., Katanusa, I., Nakashima, Y., Mase, A. Miyoshi, S.</i>	... 309
79.	Effect of Drift Cyclotron Loss Cone Mode on Confinement of Plasma in a Mirror Magnetic Field. <i>Kawabe, T., Sato, S., Harada, M.</i>	... 313

80. Ordinary Wave Propagation Near Electron Cyclotron Frequency in Weakly Relativistic Mirror-confined Plasmas.
Saxena, A.C., Rohatgi, V.K. ... 317
81. Model Electron Velocity Distribution for Relativistic Mirror-Confined Plasmas.
Saxena, A.C., Rohatgi, V.K. ... 321

Volume II

H. GENERAL THEORY.

82. Nonlinear Theory of Negative-Energy and Positive-Energy Space-Charge Waves.
Abraham, C.L.C. ... 325
83. Quadratic Invariant for Magneto-Fluids.
Avinash, K. ... 329
84. Minimum Energy Equilibria of Non-Neutral and Neutral Plasmas.
Avinash, K. ... 333
85. Colour Electric Field Screening in Quark-Gluon Plasma.
Bhatt J., Kaw, P.K., Parikh, J.C. ... 337
86. Propagation Along a Dielectric-Coated Cylinder Immersed in a Magneto Plasma.
Biswas, S., Basu, J. ... 341
87. The Breaking of the First Adiabatic Invariant of a Charged Particle in Time Dependent Magnetic Fields.
Borovsky, J. E., Hansen, P. J. ... 345
88. The Effect of Fluctuations on the Instability Rate of a Plasma.
Butz, V. A., Shavva, I. I., Moiseev, S.S. ... 349
89. 3D-MHD Modes in a Toroidal Warm Inhomogeneous Plasma of Arbitrary Cross Section and Arbitrary Aspect Ratio.
Cap, F.F., Dum, R. ... 353
90. Induced Magnetization of Alfvén Waves.
Chakravarty, B., Sarkar, S., Khan, M., Bhattacharyya, B., Krishan, V. ... 357

91. Kinetic and Statistical Derivations of Particle Velocity Distribution Functions for Nonuniform Plasmas.
Cuperman, S., Zoler, D. ... 361
92. Impedance Characteristics of a Moving Plasma.
Danaraddi, S.C., Marihal, B.N., Jyoti, B.G. ... 365
93. Relativistic Theory of Half-Integer Cyclotron Resonances in a Collisionless Plasma.
Gontcharov, A.V., Milantiev, V.P. ... 369
94. Surface Tension in Plasmas for Stabilization Against Rayleigh-Taylor Instabilities and Successful Application to Calculate Surface Tension in Metals and Nuclei.
Hora, H., Eliezer, S., Pease, R.S. ... 373
95. Weakly Nonlinear Driven Oscillations in the Pierce Diode.
Horhager, M., Kuhn, S. ... 377
96. 3-D MHD-Type Equations of Collisionless Plasmas with Finite Ion Gyroradius Effects.
Ilgisonis, V. I. ... 381
97. Effect of Collisions on Cyclotron Resonance in Magnetic Traps.
Kasilov, S.V., Pyatak, A.I., Stepanov, K.N. ... 385
98. Waves in an Inhomogeneous Relativistic Magnetoplasma.
Kerkhof, M.J., Kamp, L.P.J., Sluiter, F.W. ... 389
99. Inverse Plasma Maser Theory.
Krivitsky, V.S., Vladimirov, S.V. ... 393
100. Toroidal Magnetic Fields in Terms of Field-Line Invariants.
Lewis, H. R. ... 397
101. Second Order Gyroinvariant Drift Velocities and Guiding Center Position for Non-uniform Magnetic Fields.
Martin, P., Haines, M. ... 401
102. Density of Untrapped Electrons Near a Particle of a Plasma.
Psimopoulos, M., Rogister, A. ... 405
103. Reflection of a Charged Particle in Cusped Magnetic Fields.
Rajendran, K., Selvarajan, V. ... 409
104. The Bohm Criterion and Sheath Formation.
Riemann, K.-U. ... 413
