Topic 9: Space and Astrophysical Plasmas

Poster-No.
Title,
Author(s)

Volume/Page

9-1
Modulational instability of lower hybrid wave in a cylindrical plasma,
Sharma S.K., Sudarshan A.

III-1567

Poster-No. Title, Author(s)	Volume/Page
9-5 Interaction of a magnetized plasma stream with an immobile ion cloud, <i>Baumgärtel K., Sauer K.</i>	III-1571
9-7 Rayleigh-Taylor instability favoured drift turbulence in a spread F simulation experiment, <i>Prasad G., Bora D., Saxena Y.C.</i>	III-1575
9-9 Simulation of electron beam-driven instabilities by a 3-D electromagnetic particle code, <i>Nishikawa K.-I., Buneman O., Neubert T.</i>	III-1579
9-13 Night time equatorial spread F simulation in a laboratory plasma, <i>Prasad G., Bora D., Saxena Y.C.</i>	III-1583
9-14 Stimulated attachment instability of electromagnetic waves in the ionosphere, <i>Shukla P.K., Stenflo L., Borisov N.D.</i>	III-1587
9-17 Radar collective backscattering and the high latitude plasma turbulence, <i>Gresillon D., Cabrit B., Hanuise C., Villain J.P., Greenwald R.A., Baker K.B.</i>	III-1591
9-19 Stimulated scattering of EM wave by ICW in a two electron temperature plasma, <i>Sudarshan A., Sharma S.K.</i>	III-1595
9-20 Binding energy and triplet-splitting of the hydrogen molecule in ultrahigh magnetic fields, <i>Korolev A., Liberman M.A.</i>	III-1599
9-21 Behaviour of two-dimensional ion-acoustic soliton in relativistic plasmas of radiation belts, <i>Singh S., Honzawa T.</i>	III-1603
9-23 The Rayleigh-Taylor instability in a super-dense igniting plasma, <i>Garcia D., Serichol N., Bravo E., Diaz-Pinto A.</i>	III-1607
9-26 New electrostatic instabilities in nonuniform partially ionized magnetoplasmas, <i>Shukla P.K., Dwivedi C.B., Das A.C.</i>	III-1611
9-27 Spontaneous formation of intermediate shocks, <i>Chao J.K., Chiu C.Y., Chiueh T.H.</i>	III-1615
9-33 Spectrum of MHD waves in cometary tails, <i>Matsuura O.T., Azevedo C.A., Assis A.S., Shigueoka H., Sakanaka P.H.</i>	III-1619
9-34 Low-frequency resonant ion-beam turbulence in cometary plasmas, <i>Verheest F., Lakhina G.S.</i>	III-1623
9-35 Lower hybrid resonance acceleration of electrons and ions in the aurora and solar flares, <i>Bingham R., Bryant D.A., Hall D.S., Su J.J., Dawson J.M.</i>	III-1627
9-38 Solar flare mechanism based on MHD relaxation model, <i>Kusano K., Kubo H., Tamano T., Sato T.</i>	III-1631

Poster-No. Title, Author(s)	Volume/Page
9-39 Nonlinear MHD surface waves on plasma interfaces and their evolution equation in solar and magnetospheric conditions, <i>Nenovski P., Zhelyazkov I., Murawski K.</i>	III-1635
9-42 Generation of large amplitude plasma waves in space phenomena, <i>Dudnikova G.I., Vshivkov V.A.</i>	III-1639
9-43 Parametric instabilities of Langmuir waves in dusty plasmas, <i>Shukla P.K., Feix G., Rao N.N.</i>	III-1643
9-44 Magnetic reconnection in the plasma within clusters of galaxies, <i>Jafelice L.C., Friaca A.C.S.</i>	III-1647
9-46 Quantitative analysis of cosmic noise coming from plasma jets of quasar, <i>Tanizuka N., Kawaguchi N., Mikoshiba H., Inoue M.</i>	III-1651
9-47 A theory on the evolution process of the fine structure in space, <i>Nejoh Y.</i>	III-1655
9-48 The effects of slightly oblique propagation on nonlinear Alfvén waves, <i>Spangler S.R., Plapp B.B.</i>	III-1659
9-50 Mathematical theories of resonant absorption of Alfvén waves in space plasmas: time dependent solution, <i>Überei C.</i>	III-1663
9-51 Runaway electrons in the presence of kinetic Alfvén waves, <i>Assis A.S., Leubner C.</i>	III-1667
9-52 Polarization changes through stimulated Raman scattering, <i>Krishan V., Gangadhara R.T.</i>	III-1671

Topic 10: Basic Collisionless Plasma Physics

Poster-No. Title, Author(s)	Volume/Page
10-1 Transition to chaos in periodically driven thermionic diodes at low pressure, <i>Klinger T., Timm R., Piel A.</i>	III-1677
10-3 Equilibrium double layers in extended Pierce diodes, <i>Ciobotariu-Jassy C.I.</i>	III-1681
10-4 New results on weakly nonlinear driven oscillations in the Pierce diode, <i>Hörhager M., Kuhn S.</i>	III-1685
10-7 Laboratory study of collisionless interaction processes between supernova-like ejectas and magnetized background under conditions of a laser-produced-plasma experiments, <i>Zakharov Yu.P., Orishich A.M., Ponomarenko A.G., Snytnikov V.N.</i>	III-1689

Poster-No. Title, Author(s)	Volume/Page
10-8 Total energy conservation, Manley-Rowe relations for plasma-maser interaction, <i>Nambu M.</i>	III-1693
10-9 Phase-space topology in the dynamics of cyclotron-masers, <i>Pakter R., Schneider R.S., Rizzato F.B.</i>	III-1697
10-10 RF production of long, dense plasma columns, <i>Chen F.F., Chevlaier G.</i>	III-1701
10-11 Plasma potential formation in the presence of localized radio-frequency electric fields, <i>Sato N.Y., Hatakeyama R., Sato N.</i>	III-1705
10-12 Inward and outward plasma motion induced by axisymmetric electromagnetic fields around the ion cyclotron frequency, <i>Hatakeyama R., Miyakuni S., Sato N.Y., Sato N.</i>	III-1709
10-13 The exact and drift Hamiltonian, <i>Yao Q., Boozer A.H.</i>	III-1713
10-14 Collisionless driftwaves in anisotropic cylindrical plasmas, <i>Korn J., Schamel H.</i>	III-1717
10-15 Instabilities of gyro-kinetic plasmas with a guiding center density gradient, finite Larmor radius and polarization drift, <i>Knorr G., Shoucri M.</i>	III-1721
10-16 The launching and propagation of drift waves in a steady-state plasma, <i>Sandeman J., Elliott J.A., Sutcliffe M., Rusbridge M.G.</i>	III-1725
10-17 Studies of non-linear interactions of drift waves in the UMIST quadrupole "GOLUX", <i>Duncan P.J., Chekroud D., Rusbridge M.G.</i>	III-1729
10-18 Excitation of electron cyclotron waves and related physics experiments, <i>Tanaka M., Tamaoki M., Shoyama H., Nagao K., Komori A., Kawai Y.</i>	III-1733
10-19 An Eulerian Vlasov plasma simulation code for ion phase space phenonema, <i>Cherkhani R., Bonhomme G., Ghizzo A., Bertrand P.</i>	III-1737
10-20 An Eulerian code for the study of the gyro-averaged kinetic Vlasov equation, <i>Ghizzo A., Bertrand P., Shoucri M., Fijalkow E., Feix M.</i>	III-1741
10-21 Relativistic Vlasov-Maxwell equilibria of anisotropic charge-separation-free plasmas, <i>Kamp L.P.J., Van Bruggen-Kerkhof M.J., Sluiter F.W.</i>	III-1745
10-22 A new action principle for the Vlasov-Maxwell system, <i>Larsson J.</i>	III-1749
10-23 Negative-energy waves in an inhomogeneous force-free Vlasov plasma with sheared magnetic field, <i>Correa-Restrepo D., Pfirsch D.</i>	III-1753

Poster-No. Title, Author(s)	Volume/Page
10-24 Electrons passing through a negatively biased grid due to collective trapping, <i>Popa G., Schrittwieser R.</i>	III-1757
10-26 Experimental analysis of a low frequency instability in a magnetized discharge plasma, <i>Gyergyek T., Cercek M., Jelic N., Stanojevic M.</i>	III-1761
10-27 Ion cyclotron oscillations induced by an emissive electrode floating in a magnetized collisionless plasma column, <i>Sato N., Hatakeyama R., Aoyama K., Ding W.X.</i>	III-1765
10-28 On the double layer phenomenology, <i>Sanduloviciu M., Lozneanu E.</i>	III-1769
10-29 A probe sheath instability in a double plasma device, <i>Dempers C.A., Krumm P., Schrittwieser R.</i>	III-1773
10-30 Progress in the kinetic modeling of collisionless two-dimensional bounded plasma systems, <i>Pedüt H., Kuhn S.</i>	III-1777
10-31 Anisotropic conductivity of the collisionless magnetized plasma, its application to the cylindrical plasma column, <i>Kiyama S.</i>	III-1781
10-32 Analytic solution to longitudinal eigenmodes in a collisionless bounded plasma, <i>Kuhn S., Schupfer N., Assis A.S., Santiago M.A.M.</i>	III-1785
10-36 A collisionless ExB instability with large ion orbits, <i>Chen F.F.</i>	III-1789
10-37 Influence of the thermoionic emission on the current-driven ion-acoustic instability, <i>Donoso G., Martin P.</i>	III-1795
10-38 Modulational instability of relativistic ion acoustic waves in a plasma with trapped electrons, <i>Nejoh Y.</i>	III-1799
10-39 Cross-field ion acoustic instability and turbulence in a weakly magnetized plasma, <i>Barrett P.J., Popov G.H.</i>	III-1803
10-40 Numerical study of potential formation and negative resistance in a current-carrying ion sheath, <i>Ohno N., Komori A., Takamura S., Kawai Y.</i>	III-1807
10-41 Asymmetric ExB equilibria and diocotron adiabatic invariants, <i>Chu R., Wurtele J.S., Notte J., Fajans J.</i>	III-1811
10-43 Compression of multiple ion acoustic solitons at the plasma sheath edge, <i>Nagasawa T., Nishida Y.</i>	III-1815
10-44 The effects of finite electron mass on ion-acoustic solitons, <i>Rice W.K.M., Hellberg M.A., Mace R.L., Baboolal S.</i>	III-1819

Poster-No. Title, Author(s)	Volume/Page
10-45 Effect of second ion species on ion-acoustic rarefactive soliton in two-electron temperature plasma, <i>Sayal V.K., Yadav L.L., Sharma S.R.</i>	III-1823
10-46 Transport of time-varying currents by whistler waves, <i>Urrutia J.M., Stenzel R.L., Rousculp C.</i>	III-1827
10-47 Excitation of low-frequency whistlers by magnetic loops, <i>Stenzel R.L., Urrutia J.M., Rousculp C., Golubyatnikov G.Yu.</i>	III-1831
10-49 Non-stationary propagation of nonlinear ion acoustic waves in a plasma with negative ions, <i>Uehara M., Maciel H.S.</i>	III-1835
10-52 Relaxation and self-organization of a nonneutral plasma, <i>Ramachandran H., Morales G.J., Decyk V.K.</i>	III-1839
10-53 Low-dimensional attractors arising from the interaction of drift waves with low frequency instabilities, <i>Klinger T., Piel A.</i>	III-1843
10-54 Ion-holes associated with rarefactive ion acoustic pulse, <i>Singh A.K., Saxena Y.C.</i>	III-1847
10-55 Cascading bifurcations to chaos in a current carrying ion sheath, <i>Kono M., Komori A.</i>	III-1851
10-56 Experimental measurements of cascading bifurcations to chaos in an ion sheath, <i>Komori A., Kono M., Norimine T., Tanaka M., Kawai Y.</i>	III-1855
10-57 Nonlinear evolution and localized structure of unstable waves in an electron-beam plasma, <i>Yamagiwa K., Mieno T., Tanaka M.</i>	III-1859
10-58 Observation of two wave induced chaos in a magnetized plasma, <i>Fasoli A., Paris P.J., Tran M.Q., Skiff F.</i>	III-1863
10-59 Observations of intermittent structures in association with low frequency turbulence in toroidal magnetized plasma, <i>Singh A.K., Saxena Y.C.</i>	III-1867
10-60 Lower hybrid turbulence excited by electron diamagnetic drifts, <i>Stenzel R.L.</i>	III-1871
10-61 Experimental studies of anomalous potential drops due to ion density inhomogeneities, <i>Axnäs I., Bohm M., Torvén S.</i>	III-1875
10-62 Ion resonance cones and intrinsic diffraction, <i>Pierre T., Bonhomme G.</i>	III-1879
10-63 Reflection of a divergent resonance cone near the plasma layer in a magnetized inhomogeneous plasma, <i>Boucher I., Pierre T., Leclert G.</i>	III-1883

Poster-No. Title, Author(s)	Volume/Page
10-64 Production of a high density plasma by helicon waves, <i>Komori A., Sugimoto M., Kono M., Tanaka M., Kawai Y.</i>	III-1887
10-65 Development of spiral structures on a rotating plasma column with large ion-gyroradius, <i>Ikehata T., Mase H.</i>	III-1891
10-66 Waves driven by strong transverse potential structures, <i>Koepe M.E., Alport M.J., Sheridan T.E., Amatucci W.E., Carroll III J.J.</i>	III-1895
10-67 Experimental dynamics of 2-D vorticity rings, <i>Peurrung A.J., Fajans J.</i>	III-1899
10-68 Dynamics of non-stationary dipole vortices in the Hasegawa-Mima equation, <i>Hesthaven J.S., Lynov J.-P., Nycander J.</i>	III-1903
10-69 Localized vortices in η_j -modes, <i>Nycander J., Lynov J.-P., Rasmussen J.J.</i>	III-1907
10-72 Breaking of waves into wave packets observed in a beam-plasma system, <i>Honzawa T., Singh S.</i>	III-1911
10-74 Experimental measurement of the deflection of an electron beam due to the ponderomotive force of a HF wave in a waveguide, <i>Hadjoudj Y., Heuraux S., Pierre T., Leclert G.</i>	III-1915
10-76 Generation of ion cyclotron wave in an ion beam by a periodic magnetic field, <i>Mieno T., Hatakeyama R., Sato N.</i>	III-1919
10-77 Non-linear ion acceleration in electrostatic wave fields, <i>Alava M.J., Heikkinen J.A.</i>	III-1923
10-78 Electron acceleration by $\mathbf{v}_p \times \mathbf{B}$ mechanism in vacuum, <i>Yugami N., Nishida Y.</i>	III-1927
10-79 Plasma wave wake field excited by short pulse microwave, <i>Nishida Y., Kusaka S., Yugami N.</i>	III-1931
10-82 Direct measurements of velocity space transport in a fully ionized plasma, <i>Rynn N., Bowles J., McWilliams R.</i>	III-1935
10-83 Phase conjugation via Brillouin enhanced four-wave mixing in a plasma, <i>Domier D.W., Luhmann Jr. N.C., Peebles W.A.</i>	III-1939
10-84 High frequency modes of a plasma column loaded in a sheath helix, <i>Ganguli A., Appala N.P., Umesh G.</i>	III-1943
10-85 Estimation of electron temperature and density by deconvolving the absorption part of the plasma dispersion function, <i>Jimenez-Dominguez H., Cabral-Prieto A., Melendez-Lugo L., Lopez-Callejas R., Colunga-Sanchez S., Valencia-Alvarado R., Cruz-Jimenez S., Gaytan-Gallardo E., Chavez-Alarcon E.</i>	III-1947

Poster-No. Title, Author(s)	Volume/Page
10-86 Kinetic description of modulated electromagnetic wave in relativistic plasma, <i>Ekiel-Jezewska M., Flå T., Kaufman A.N.</i>	III-1951

Topic 11: Partially Ionized Plasmas

Poster-No. Title, Author(s)	Volume/Page
11-2 Experimental evidence of self-organization and chaos in some plasma devices, <i>Sanduloviciu M., Alexandroaei D., Talasman S.J. and Ianopol B.</i>	III-1957
11-5 Tomographic time-resolved reconstruction of the three dimensional electron velocity distribution in a partially ionized RF plasma, <i>Matsumoto K., Iwama N., Ishii S.</i>	III-1961
11-6 Large amplitude striations in an RF discharge, <i>Sato T., Shoji T., Sakawa Y., Hori M.</i>	III-1965
11-9 Ionization front structure in the lateral spreading of a DC discharge along cylindrical coaxial electrodes, <i>Gavrilescu C., Popa G.</i>	III-1969
11-10 Plasma heating in low pressure RF discharges, <i>Skorik M.A., Braithwaite N.St.J., Allen J.E.</i>	III-1973
11-11 Ion energy distribution in an RF Argon plasma, <i>Anaratone B.M., Skorik M.A., Goruppa A.A., Allen J.E.</i>	III-1977
11-12 Observation of coherent drift structures in the turbulence of a DC discharge, <i>Kauschke U., Schlüter H.</i>	III-1981
11-13 Effects of magnetic field on a magnetron discharge, <i>Mase H., Tanabe T., Ikehata T., Sato N.Y.</i>	III-1985
11-17 The Langmuir probe study of the electron energy distribution function in the flowing afterglow plasma, <i>Glosik J., Cermak I., Sicha M., Tichy M., Zakouril P.</i>	III-1989
11-18 Computer simulation of RF discharges and comparison with laboratory results, <i>Vahedi V., Surendra M., DiPeso G., Mirrashidi P., Birdsall C.K.</i>	III-1993
11-19 On modelling of steady states in toroidal machines for basic plasma physics, <i>Øien A.H.</i>	III-1997
11-23 A one-dimensional q-machine model taking into account charge-exchange collisions, <i>Maier H., Kuhn S.</i>	III-2001
11-24 Determination of composition and physical properties of partially ionized plasmas in the function of temperature, <i>Zaporowski B.</i>	III-2005

Poster-No. Title, Author(s)	Volume/Page
11-25 Thermodynamic functions for partially ionized plasmas in the mean spherical approximation, <i>Kahlbaum T., Schneidenbach H.</i>	III-2009
11-26 Dielectric constant of weakly-ionized magnetized plasmas, <i>Kiss'ovski Zh., Pironkova A., Shivarova A.</i>	III-2013
11-28 Ion Bernstein waves in a toroidal steady-state device, <i>Batani D., Fontanesi M., Galassi A., Riccardi C., Sindoni E.</i>	III-2017
11-33 Study of low frequency flute type oscillations, their nonlinear interaction in toroidal plasma, <i>Prasad G., Bora D., Saxena Y.C., Sethia G.C.</i>	III-2021
11-39 Behaviour of charged particle motion along an inhomogeneous magnetic field and a retarding electric field - evidence for the existence of discrete energy states, <i>Varma R.K., Punithavelu A.M.</i>	III-2025
11-40 Unstable behaviour of globular anode structures, <i>Biborosch L., Toma M., Sanduloviciu M.</i>	III-2029
11-41 On the electrodynamic explanation of the retrograde motion of the electric arc, <i>Hong J.S., Allen J.E.</i>	III-2033
11-42 Nonequilibrium transport phenomena of a plasma in a nonuniform electric field, <i>Cicconi G., Molinari V., Sumini M.</i>	III-2037
11-43 Experimental study of the axial structure of an argon plasma column sustained by an electromagnetic wave in the presence of an external magnetic field, <i>Staikov P., Grozev D., Zhelyazkov I., Benova E.</i>	III-2041
11-46 Electromagnetic surface waves for large-area RF plasma productions between large-area planar electrodes, <i>Nonaka S.</i>	III-2045
11-49 CO ₂ -TE-laser-produced cadmium plasma in vacuum experiment, kinetics, <i>Apostol I., Bahrim B., Bahrim C., Vasilescu C.</i>	III-2049

Topic 12: Elementary Processes in Plasmas

Poster-No. Title, Author(s)	Volume/Page
12-1 Measured and calculated charge density in Ce, Cu vapor produced by an electron gun, <i>Blumenfeld L., Gonella C., Morin M.</i>	III-2055
12-5 Stokes parameters for Compton scattering in a strong magnetic field, <i>Chou C.K., Chen H.H.</i>	III-2059

Poster-No. Title, Author(s)	Volume/Page
12-6 CTMC study of collisions of Carbon ions with H and He, relevant to magnetically confined fusion plasmas, <i>Katsonis K., Maynard G.</i>	III-2063
12-8 Investigation on the metastable fragmentation of mixed argon-oxygen, argon-krypton cluster ions: the observation of two new fragmentation decay channels - evidence for the existence of metastable excited dimer ions ArO^{+*} , ArKr^{+*} , <i>Foltin M., Lukac P., Märk T.D.</i>	III-2067
12-12 Ion attachment to van der Waals clusters: reactions of NO^{+} with Ar_m , <i>Lezius M., Scheier P., Märk T.D.</i>	III-2071
12-13 On the interaction of low energy electrons with vdW-Clusters: electron attachment reactions, auto-scavenging, <i>Rauth T., Lezius M., Foltin M., Grill V., Märk T.D.</i>	III-2075
12-16 Particle exchange reactions at low kinetic energies, <i>Praxmarer C., Freysinger W., Hansel A., Lindinger W.</i>	III-2079
12-17 Collisional induced dissociation of Kr_2^{+} , $(\text{CO})_2^{+}$, N_4^{+} , N_2Ar^{+} , <i>Praxmarer C., Glosik J., Smith D., Freysinger W., Lindinger W.</i>	III-2083
12-18 Theoretical studies of the vibrational relaxation of $\text{N}_2^{+}(v=1)$ in collisions with He using the semiclassical method, <i>Zenevich V.A., Freysinger W., Lindinger W.</i>	III-2087
12-20 Ionization, recombination processes in dense nonideal plasmas, <i>Bornath Th., Schlanges M., Kremp D., Bonitz M.</i>	III-2091
12-23 Experimental, theoretical determination of electron impact ionization cross sections of atoms and molecules, <i>Grill V., Margreiter D., Walder G., Scheier P., Winkler C., Kurdel M., Poll H.U., Deutsch H., Stephan K., Märk T.D.</i>	III-2095
12-26 Microwave determination of the coefficient of dissociative recombination of molecular ions of argon, <i>Okada T., Sugawara M.</i>	III-2099
12-27 On the laser cooling of ions in oscillating traps, <i>Reyna L.G., Sobehart J.</i>	III-2103

Topic 13: Plasma Applications

Poster-No. Title, Author(s)	Volume/Page
13-2 One-dimensional modeling for magneto-microwave plasma using the Monte Carlo method, <i>Ikegawa M., Kakehi Y., Kobayashi J.</i>	III-2109
13-3 ECR plasma source in ICR separation device, <i>Meis C., Compant La Fontaine A., Louvet P., Meyer R.L.</i>	III-2113

Poster-No. Title, Author(s)	Volume/Page
13-6 Current and geometry dependence of mass and energy fluxes in capillary, ablative critical flows, <i>Cuperman S., Zoler D., Ashkenazy J., Caner M., Kaplan Z.</i>	III-2117
13-7 New method of ion extraction from plasma by using radio-frequency electric field, <i>Matsui T., Tsuchida K., Nishio R., Suzuki K., Shoji T.</i>	III-2121
13-8 Density and temperature measurements by laser absorption diagnostic on a magnetized plasma, <i>Compant La Fontaine A., Le Gourrierec P., Louvet P.</i>	III-2125
13-9 The plasmachemical reactions in negative corona discharges, <i>Skalny J.D., Lukac P., Gabris R.</i>	III-2129
13-12 Plasma parameter profiles and fluctuation properties of an ECR process plasma source for Si etching at LN ₂ temperatures, <i>Kim S.K., Park C.W., Cho S., Choi E.H., Kwak J.K., Park J.K., Rhee C.</i>	III-2133
13-14 Magnet plasma dynamic accelerator with ultra high frequency resonator, <i>Kubarev Y.V., Tashaeu Y.N., Safronov V.P., Kholin N.N.</i>	III-2137
13-16 Ion irradiation studies from dense plasma focus for change of phase for thin film of CdS, <i>Sagar R., Srivastava M.P., Rawat R.S.</i>	III-2141
13-17 Influence of metastable atoms on the characteristics of surface wave produced plasmas, <i>Kortshagen U., Schlüter H.</i>	III-2145
13-19 Use of cold plasmas in film deposition and structuring, <i>Edlinger J., Pulker H.K., Rille E., Vogl G.</i>	III-2149
13-22 Experimental study of plasma effect on oxidation of solid surface, <i>Kitajima M., Kuroki H., Shinno H., Kawabe T.</i>	III-2155

Topic 8: General Plasma Theory
(Contribution added in print)

8-116 Langevin-equation for charged particles in microturbulent plasma, <i>Meister C.-V.</i>	III-2159
--	----------
