High Temperature Plasmas

A. Theory:	1
L. Krln, P. Pavlo: Diffusion of alpha particles induced by LHW	1
R. Klma, L. Krln, P. Pavlo: On the role of short wave-length part of the spectrum in the LHW absorption by alpha particles	8
J. Preinhaelter, O. Huftak: Interaction of the slow lower hybrid waves radiated from a waveguide structure and the ponderomotive effects	14
J. Ullschmied, M. Clupek: Modelling of macroscopic plasma motions in the REBEX machine	27
P. Vrba: Relativistic electron beam scattering induced by magnetic field discontinuity	41
L. Drška, J. Limpouch, R. Liska, M. Sinor, J. Vondrasek, A.A. Andreev: Theory and simulations of ultrashort-pulse laser-plasma interaction	52
L. Drška, M. Sinor, J. Vondrasek: Charged particle relaxation and radiation processes in hot dense matter	57
B. Diagnostics:	62
V. Piff, J. Rauš, A. Krejčí, A.V. Golubev, Yu.Yu. Platonov: Ultrasoft X-ray spectrometer for light impurities research in tokamak plasmas	62
J. Stöckel, L. Kryška, F. Žáček: Oscillatory technique for T_e - measurements by Langmuir probe on the CASTOR tokamak	70
G. Veres, S. Zoletnik, S. Kalvin, J. Bakos, P.N. Ignác, B. Kardos: Laser blow-off accelerated micropellets for plasma diagnostics.	73
M. Bielik: A new acquisition system for fusion experiment (Slow variable transients)	77
M. Řípa, K. Koláček: The apparatus for registration of spectral line wings by means of intracavity dye laser spectroscopy	82
L. Juha, M. Pietriková, J. Krása, K. Mašek, M. Králíková, J. Skála: Application of thermoluminescent dosimeters in laser-produced plasma diagnostics	88
O. Renner, M. Kopecký, E. Krouský, M. Chvojka, B. Králíková, K. Mašek, J. Skála, E. Förster, G. Hölzer: On the use of an elliptical analyzer spectrograph for characterization of LPP X-ray emission	93
M. Káfal: Possible role of the inverse Faraday effect in plasmas	100
I. Ahmad, V. Kapička, A. Petrakiev: Optical diagnostics of inductively coupled plasma	103
A. Brabec, F. Šťastný: Modern Fabry-Perot interferometer	106
C. Experiments:	114
J. Badalec, P. Kletečka, L. Kryška: Dependence of particle confinement on plasma density and plasma position in LHCD discharges in CASTOR tokamak	114
F. Žáček, K. Jakubka, J. Badalec, J. Stöckel, P. Kletečka, L. Kryška, V. Kříha: Study of electron density profile in the CASTOR tokamak using a lithium beam	121
J. Stöckel, I. Voitsechovich, F. Žáček: Role of runaway electrons in LHCD regimes with improved confinement on CASTOR tokamak	127

V. Dhynani, V. Svoboda, A.N. Sekar Iyengar, J. Stöckel, F. Žáček: Mapping of the edge plasma in CASTOR tokamak	132
V. Piffli: REB energy deposition in modified REBEX experiment	137
E. Woryna, B. Králíková, J. Krása, L. Láška, K. Mašek, K. Rohlena, J. Skála: Ion emission from Al-laser-produced plasma	146
L. Láška, J. Krása, L. Juha, V. Hamplová, L. Soukup: Iodine laser production of carbon clusters	151
J. Brčka: In situ probe diagnostics of laser produced plasma	158
P. Kubeš, J. Kravárik, J. Hakr, J. Píchal, P. Kulhánek: Interrupted z-pinch in argon	170
<u>Low Temperature Plasmas</u>	
A. Low pressure plasma:	173
B. Kułakowska-Pawlak, W. Zyrnicki: Study of radiation of plasma used for steel nitriding in dc and rf discharges	173
J. Glosík, D. Smith, P. Španěl, W. Lindinger: Kinetic energy dependence of ion-molecule reaction recent experimental results	181
F. Jirůtka, M. Šícha, M. Tichý, L. Jastrabík, L. Soukup: Langmuir probe measurement in the rf low pressure jet plasma-chemical reactor	189
A. Tálský, J. Janča, F. Krčma, A. Ricard, L. Hochard: CN emission in nitrogen afterglow at low temperatures (detection of trace hydrocarbons in gas flows)	199
J. Bosmanová, J. Ferdinand: Computational evaluation of the double probe characteristic	203
T. Šíkola, L. Dittrichová, R. Dlabaja, A. Nebojsa: Plasma characteristics of ion Kaufman source measured by Langmuir probe	205
F. Hanitz, J. Lego, S. Pekárck, J. Rosenkranz: The magnetron plasma optical diagnostics	213
H. Herman: The state of art of plasma spray processing	218
B. High pressure plasma:	225
D. Trunec: Macroscopic model of streamer	225
V. Sember, P. Svoboda: Spectroscopic measurements of glidarc plasmachemical reactor	230
M. Hrabovský, V. Kopecký: Application of electric probes for study of structure of thermal plasma jet	236
M. Hrabovský, V. Kopecký, V. Sember: Investigation of thermal plasma jet generated by plasma torch with water stabilized arc	243
V. Aubrecht, J. Bartl, B. Gross, L. Peška: Prediction of radiative heat transfer in the arc plasma	252
C. Plasma technology:	259
J. Janča, C. Tesař, J. Spousta, L. Ranno: Unipolar rf plasma deposition of superconductive YBa ₂ O _{7-x} films at atmospheric pressure and RBS characterization of deposited films	259
V. Peřina, J. Janča: RBS characterization of rf plasma deposited diamond-like thin films	262
J. Dubský, B. Kolman, V. Brožek: The chemical inhomogeneity of AL ₂ O ₃ - Cr ₂ O ₃ powders for plasma spraying	267
O. Coufal et al.: Investigation of the arcdischarge for toluene dissociation	274

J. Huran, F. Szulenyi, L. Hrubčín: Physical properties of silicon nitride and silicon oxynitride thin films prepared by electron cyclotron resonance (ECR) plasma deposition	283
L. Hrubčín, A. Horniaková, J. Huran: Electrical characterization of reactive ion etched GaAs Schottky structures	292
I. Thurzo, I. Ferencz, S. Vasilkovskij, M. Kučera, E. Pinčík, V. L. Gromaševskij Investigation of GaAs surface damage after Ar plasma and Ar ⁺ ion beam exposure	298
I. Thurzo, E. Pinčík, F.V. Mocnyj, M. Kučera, I. Ferencz: Influence of inductively coupled H ₂ plasma on photoluminescence properties of Ga As	310
Š. Haščík: Characterization of multi-frequency discharges in CCl ₂ F ₂ by optical emission actinometry	320
M. Mišina, J. Musil: Characterization of microwave plasma generated in inhomogeneous magnetic field	324
P. Špatenka, H. Suhr: Plasma enhanced CVD of HfC films using organometallic precursor	330
T. Šikola, L. Dittrichová, R. Dlabaja, J. Matějka: Application of the equipment based on the Kaufman ion source for etching and modification of surfaces and deposition of thin films	339
A. Grudsky, Yu. Platonov, L. Shmaenok: New possibilities of multilayer X-ray optics application to plasma diagnostics	348
V. Truneček: The classical dimensions of a photon	353
