

TABLE OF CONTENTS

SESSION 1A--LASER FABRICATION AND USE, LASER ISOTOPE SEPARATION	
1A1	Selective Pumping of Molecular Lasers Via Electronic-Vibrational Energy Transfer, A.B.Petersen, L.W.Braverman and C.Wittig..... 11
1A2	Transient Molecular Absorptions Induced by the Absorption of Laser Radiation, A. B. Petersen, J. Tiee, C.P. Christensen and C. Wittig..... 12
1A3	Laser Isotope Separation at LASL, Martin Piltch (Title Only) 12
1A4	COCO II - A High Power CO ₂ Laser System, M. C. Richardson, N.H. Burnett, G.D.Enright, P. Burtny and K. E. Leopold..... 13
1A5	Injection Mode-Locking of TEA CO ₂ Lasers, A. J. Alcock, P. B. Corkum, D. Rollin, K. J. Andrews and D. J. James..... 14
1A6	Gain Suppression in High-Gain CO ₂ Laser Amplifiers, S. Singer, J.V. Parker, M. J. Nutter, J. J. Hayden, J. P. Carpenter and I. Liberman..... 15
1A7	Two New Laser Fusion Facilities at Lawrence Livermore Laboratory, R. O. Godwin, T. J. Gilmartin, J. A. Glaze and W.W.Simmons..... 16
 SESSION 1B--PLASMA DIAGNOSTICS I	
1B1	Interpretation of X-Ray Line Spectra, E. J. Valeo, H. R. Griem, J.J. Thomson and D. S. Bailey..... 17
1B2	Multichannel Magnetic Probe Diagnostics for TTF, J. Jancarik and T. Kochanski..... 17
1B3	A Test of the CO ₂ Laser Scattering Technique for B-Field Measurements in Tokomaks, M.J. Herbst, J. J. Turecek and F. F. Chen..... 18
1B4	Electron Density Measurements Using Far Infrared Lasers, L. A. Newman, M.Schubert and T. A. DeTemple..... 18
1B5	New Developments in Laser Diagnostics for CTR Plasmas, F. F. Chen (Title Only) 19
1B6	High Power, Narrow-Line Methyl Fluoride 496 um Laser for Plasma Diagnostics, A. Semet and N. C. Luhmann, Jr..... 19
1B7	Thomson Scattering System for Use on a Relativistic Beam-Heated Plasma, J.D. Sethian, C. A. Ekdale and C. B. Wharton..... 20
 SESSION 1C--MAGNETOFLUIDDYNAMICS, AND GASEOUS ELECTRONICS AND ARC TECHNOLOGY	
1C1	A Computer Analysis of the MHD-Sheath Voltage Drop, R. C. Dolson and O.Biblarz.... 21
1C2	R.F.Preionization and DC Discharge Tests with High Velocity Flow Across a Magnetic Field, M. E. Talaat..... 22
1C3	A System Design Utilizing a Closed Cycle MHD Generator with Non-Equilibrium Ionization, R. E. Voshall, R. J. Wright and R. W. Liebermann..... 23
1C4	Nonsteady State Flow in a Large Magneto-hydrodynamic Generator for Electrical Power Generation, R. M. Johnson and T.C. Robles... 23
1C5	Transient Choking in an MHD Generator, R. M. Johnson and C. J. Dickey..... 24
1C6	Magnetohydrodynamic Poiseuille Flow of a Suspension, Vireshwar Sahai and Ampere A. Tseng..... 25
1C7	Electrical and Thermal Conductivity and Radiative Power of Air Plasma at High Pressures, A. V. Larson..... 26
1C8	Calculation of Cathode Fall in Electron Beam Sustained Discharges, W. T. Leland, J. T. Ganley and M. J. Kircher..... 27
1C9	Measurement of Potential Distribution and Cathode Fall in Electron Beam Sustained Discharges, J. T. Ganley, W. T. Leland, B. F. Bentley and A. J. Thomas..... 27
1C10	Gridded Crossed Field Tube, M. A. Lutz..... 28
1C11	Survey of Plasma Science Work in Australia, Leonard Huxley (Title Only)..... 28
 SESSION 1D--PLASMAS FOR CTR I	
1D1	Stellarator Research, J. L. Shohet (Title Only)..... 29
1D2	Low Frequency RF Heating in the Proto-Cleo Stellarator, J. O. Shohet..... 29
1D3	Construction of the Rensselaer Diagnostic Tokamak, J. F. Pipkins, W. C. Jennings and R. L. Hickok..... 30
1D4	The Effect of Magnetic Field Ripple on Energy Confinement and Energetic Particle Loss in Tokamaks, N. A. Uckan, K.T. Tsang and J. D. Callen..... 30

TABLE OF CONTENTS (Cont'd.)

1D5	Pooidal Field System Considerations for Future Tokamaks, Y-K. M. Peng, J. R. Moore, D. J. Strickler and F. B. Marcus.....	31	2A8	Analysis of Laser-Produced Plasma Experiments, D. Colombant, J. Davis, R. Goldman, G. Hain, N. Winsor, S. Bodner, and E. Goldman.....	40	
1D6	Sputtering and Impurity Control Effects on D-T Plasma Operation, S.E. Attenberger and D. G. McAlees.....	32	2A9	Super Pressure Gaseous Targets as an Alternative for Laser-Induced Micro-Fusion Explosions, S. H. Baek, G. Schürger, and A. A. Dougal.....	41	
1D7	Plasma Engineering Features in the ORNL-EPR, D. G. McAlees, S. E. Attenberger, G. D. Kerbel, F. B. Marcus, Y-K. M. Peng and N. A. Uckan.....	33	2A10	Impulse from CO ₂ and HF Laser-Produced Plasmas, W. E. Maher, D. B. Nichols and R. B. Hall.....	42	
1D8	Broadening of Cavity Resonance Mode Spacing for Fusion Plasmas in a Toroidal Cavity with Multiple Antennas, Y. S. Kwon and D. G. Swanson.....	34	2A11	Harmonic Emission Measurements During 1.06 μ m Illumination of Microshell Targets, T. Leonard and P. Hammerling.....	42	
1D9	Transport Model for a Tokamak Reactor with a Pooidal Divertor, A. T. Mense and G. A. Emmert.....	34	SESSION 2B--PLASMA DIAGNOSTICS II			
1D10	Density and Lifetime Measurements in the Kemp II Electromagnetic Trap, B. L. Stansfield, J.M. Larsen, B. Bergevin, P. Couture and B. C. Gregory.....	35	2B1	Electron Impact Double Ionization Cross Sections for Use in Beam-Probe Calibration, R. K. Feeney and W. E. Sayle.....	43	
1D11	Density Scaling Relations in the SUMMA Facility, A. Snyder, R. W. Patch, and J. J. Reinmann.....	35	2B2	Direct Magnetic Field Measurements with an Ion Beam Probe, K. A. Connor, G. Tonetti and W. C. Jennings.....	44	
SESSION 2A--LASER-PLASMA INTERACTIONS I				2B3	A Beam Probe Diagnostic System for EBT, F. Bieniosek, K. A. Connor and R. L. Hickok.....	44
2A1	Structure and Scaling Laws of Laser-Driven Ablative Implosions, R. L. Morse, S. J. Gitomer and B. S. Newberger.....	36	2B4	Plasma Ion Temperature Measurements by Charge Exchange Neutrals, H. P. Eubank. (Title Only).....	45	
2A2	Two Dimensional Studies of Turbulent Instabilities in High Aspect Ratio Laser Fusion Targets, K. A. Taggart, R. L. Morse, R. L. McCrory and R. N. Remund.....	37	2B5	Mass Filter Characteristics of a One-Meter Quadrupole Analyser for Energetic Ions, S. S. Medley.....	45	
2A3	Absorption of Focused Laser Beams by Spherical Targets, J. E. Tull and J. J. Thomson.....	38	2B6	A Multiple-Ion-Species Velocity Analyzer, Sangkoo F. Hahn and D. B. van Hulsteyn.....	46	
2A4	Computer Simulation of Laser Driven Implosion of DT-Filled Glass Microballoons, J. T. Larsen.....	38	2B7	Modulation of Line Emission by Electron Density Fluctuations, J. E. Walsh, A. Cavalli, J. B. Greenly and M. R. Mross.....	46	
2A5	Models of Electron Conductivity Which Lead to Ablation Stabilization of Fluid Instabilities in Laser Driven Implosions, J. D. Lindl and W. C. Mead.....	39	2B8	Application of Digital Spectral Analysis Techniques to the Diagnostic Problem of Fluctuation-Induced Transport, E.J. Powers and Y. C. Kim.....	47	
2A6	Angular Distribution of Scattered Laser Light from Laser-Produced Plasmas, B. H. Ripin.....	39	2B9	Microwave Instrumentation for Polarization Dplexing at 27 GHz, A. L. Gardner.....	47	
2A7	High-Energy Ions from a Nd-Laser Produced Plasma, R. Decoste and B.H. Ripin.....	40	2B10	Resonator Probe for Remote Localized Plasma Diagnostics in Weakly Magnetized Laboratory and Space Plasmas, R. L. Stenzel and R. W. Fredricks.....	48	
			2B11	Radial Distribution of Electron and Gas Temperatures in a Potassium-Seeded Argon Plasma, S.Y. Wang and D.M. Benenson.....	49	

TABLE OF CONTENTS (Cont'd.)

SESSION 2C--FUSION REACTOR TECHNOLOGY AND PLASMA CHEMISTRY	
2C1	Doublet Power Reactor Studies at General Atomic, Charles Baker and Paul Sager, Jr. (Title Only)..... 50
2C2	Fusion-Product Effects in Fusion Reactors, G. H. Miley, Meka Papa Rao, L. M. Hively, T. W. Petrie and M. Y. Wang..... 50
2C3	A Survey of Plasma and Engineering Parameters in EPR Operating Regimes, J. L. Usher and J. R. Powell..... 51
2C4	Preliminary Studies of a Catalyzed-D Fusion Reactor, G. H. Miley and F.H. Southworth.... 52
2C5	Start Up of a Catalyzed-D Tokamak Reactor Using Dynamic Programming, G. Gerdin, G. Miley, R. Stark, D. Driemeyer and H. Stimpson..... 53
2C6	A Neutral Beam Injector Using Negative Ions for a Mirror Fusion Reactor, J. H. Fink and W. L. Barr..... 53
2C7	Beam Direct Conversion for Neutral Beam Injectors, W. L. Barr and R. W. Moir..... 54
2C8	Venetian Blind Direct Energy Converter for the Mirror Fusion Reactor, R. W. Moir, W. L. Barr and R. W. Werner..... 55
2C9	Fusion Burn Effects in a Linear High-Beta Plasma of Narrow Cross-Section, Loren C. Steinhauer..... 56
2C10	Formation of a Low Density Plasma in a Tokamak: Comparison of a Chemical Model with Experiment, D. J. Kaplan, R. D. Bengtson, K. Gentle, P. Phillips and R. Stinnett..... 57
2C11	Low Temperature Oxide Reduction, J. R. Sagmuller and W. R. Stowell..... 57
SESSION 2D--PLASMAS FOR CTR II, AND PLASMA FOCUS	
2D1	The Pellet-Plasma Interaction Associated with Fueling, G. D. Kerbel, D.G.McAless, and D. J. Strickler..... 58
2D2	Laser Implosion and Fusion with DT Filled Glass Microshell Targets, E. K. Storm and H. G. Ahlstrom..... 58
2D3	Peristalsis Reduction of Axial Power Loss From Plasma Confined by a Straight Magnetic Field, R. J. Burke..... 59
2D4	End Losses from a Hot Linear Theta Pinch, M. Naraghi and H. Azodi..... 60
2D5	Migma Program of Controlled Fusion, B. Maglich and R. A. Miller..... 60
2D6	Joint European Effort in Plasma Focus Research, Ch.Maisonier and J. P. Rager. (Title Only)..... 61
2D7	A Large Plasma Focus Facility: Design, Performance, and Target Experiments, J. Luce, R. Barlett, W. Bostick, Woo Gee, R. Gullickson, J. Long, G. McFarland, J.Held, H. Sahlin, E. Teller and O. Zucker..... 61
2D8	Operation of a Plasma Focus Device with Deuterium + Helium 3, R.L. Gullickson, J. S. Luce and H. L. Sahlin..... 62
2D9	Fusion Microexplosions Driven by a Dense Plasma Focus, H. Sahlin and R. White..... 62
2D10	Neutron Production in a Hypocycloidal Pinch, J. H. Lee, D. R. McFarland and F. Hohl..... 63
2D11	Applications of the Plasma Focus as an Opening Inductive Switch, J. Wyatt, O. Zucker, H. Sahlin and J. Luce..... 64
2D12	Studies of High Energy Density Plasma Generation by Cylindrical Gas Shell Implosion, J. H. Degnan, R. E. Reinovsky and W. L. Baker..... 65
2D13	Electromagnetic Implosions of a Hollow, Cylindrical Thin Foil Plasma Sheath, C. R. McClenahan, W. L. Baker, R.E. Reinovsky, R. A. Lindstrand, M. C. Clark, J.C.Glowienka E. J. T. Burns and J. H. Goforth..... 65
SESSION 3A--LASER-PLASMA INTERACTIONS II	
3A1	X-Ray Diagnostics for Laser Fusion Targets, V. W. Slivinsky..... 66
3A2	Time Resolved X-Ray Measurements of Laser-Produced Plasmas, A. J. Lieber, H. D. Sutphin and C. B. Webb..... 66
3A3	Laser Fusion Measurements of Neutron Production and Pellet Compression, R.R. Johnson, G. Charatis and F. J. Mayer..... 67
3A4	Alpha and Proton Measurements in Laser-Driven Fusion Experiments at KMSF, R. R. Goforth, F. J. Mayer, H. Brysk, and R. A. Cover..... 67
3A5	Analysis of Laser Fusion Experiments Determining the Ion Temperature of Burning DT Thermonuclear Fuel, H. D. Shay, J.Larsen, G. B. Zimmerman, and J. H. Nuckolls..... 68
3A6	Plastic Bubble Calorimetry for Laser-Target Interaction Experiments, F. J. Mayer, L.D. Siebert and J. Simpson..... 68

TABLE OF CONTENTS (Cont'd)

3A7	Light Scattering and Energy Measurements for Laser Fusion Targets, D. W. Phillion, R. A. Lerche, V. C. Rupert and S.R. Gunn.....	69
3A8	Irradiation of Planar Targets with a 1.06 μm Laser, R. A. Haas, D. W. Phillion, V. C. Rupert, H. N. Kornblum, L. N. Koppel and K. G. Tirsell.....	70
3A9	Comparison of LASNEX Calculations with Experimental Results of Parylene Disc Irradiations at 1.06 μm , W. C. Mead, W.L.Kruer, J. D. Lindl and H. D. Shay.....	70
3A10	Plasma-Focus Produced in a Novel Laser Target Geometry, G. Saint-Hilaire and Z. Szili.....	71

SESSION 3B--PLASMA WAVES AND INSTABILITIES

3B1	Stability of Localized Langmuir Standing-Waves, Ting-wei Tang and S. Eliezer.....	72
3B2	Nonlinear Splitting of Ion-Acoustic Rarefaction Waves, P. I. John, Y. C. Saxena and Igor Alexeff.....	72
3B3	Reflection of Ion-Acoustic Waves, Osamu Ishihara and Igor Alexeff.....	73
3B4	Observation of Ion Wave Refraction in a Thermal Gradient Plasma, Y. Nishida and A. Hirose.....	74
3B5	Critical Review of Ion Wave Experiments, I. Alexeff (Title Only).....	75
3B6	Propagation of Transient Surface Waves Along a Plasma Column Excited by High Amplitude Pulses, E. E. Kunhardt and B.R. Cheo...	75
3B7	Experimental Study of Finite-Beta Waves and Instabilities, J. Hartlove and N. C. Luhmann, Jr.....	76
3B8	Ion-Ion Hybrid Resonances in Light Gases, W. Kaesler, H. Schlueter and G. Schürger.....	76
3B9	Simultaneous Enhancement of Ion Velocity Space Diffusion and Ion Cyclotron Oscillations in a Mirror Confined Plasma, W. C. Turner, T. C. Simonen and E. J. Powers.....	77
3B10	Kinetic Theory for Drift Instabilities of a Magnetized Plasma in the Presence of a High-Frequency Electric Field, R. Aghevli.....	77
3B11	Bispectral Wave Analysis of Nonlinear Wave-Wave Interactions in Plasmas, Y. C. Kim and E. J. Powers.....	78
3B12	Collisional Excitation of Modulational Instability in Langmuir and in Ion-Acoustic Turbulence, B.Buti and A. S. Sharma.....	78

SESSION 3C--FISSION INDUCED PLASMAS I

3C1	Gaseous Fuel Nuclear Reactor Research, Karlheinz Thom (Title Only).....	79
3C2	Gaseous Nuclear Reactors with Uranium Hexafluoride Fuel, R. J. Rodgers and T. S. Latham.....	79
3C3	The Emission and Absorption Spectra of Uranium Hexafluoride and its Thermal Decomposition Products, N. L. Krascella.....	80
3C4	Laboratory Scale UF ₆ Plasma Confinement Experiments Applicable to Plasma Core Reactors, W. C. Roman.....	81
3C5	Evaluation of the Electron Energy Distribution and Radiative Transport in a Uranium Plasma, C. Choi, G. Miley, C. Bathke and E. Maceda.....	82
3C6	Electron Energy Distribution in Radiation-Induced U-He Plasmas, M. Makowski, C.Chi and G. Miley.....	83
3C7	Development of an Experiment for the Generation of a Fissioning High Pressure Gas, D. E. Sterritt, G.T.Lalos and R.T.Schneider.	84
3C8	Kinetics of FF Interaction with Ar and Ar-N ₂ Mixtures, J. F. Davis and R.N. Davie.....	84
3C9	Direct Conversion of Nuclear Energy into Laser Light, R. T. Schneider.....	85
3C10	Charge Exchange Phenomena in a Nuclear Radiation Produced He-Hg Plasma, M. A. Akerman, W. E. Wells and G. H. Miley.....	86
3C11	Delayed Coincidence Spectroscopy of Fission Fragment Excited N ₂ , G. R. Shipman, E. E. Carroll and H. D. Campbell.....	87

SESSION 3D--ENGINEERING ASPECTS OF CONTROLLED FUSION RESEARCH I

3D1	A Tokamak Toroidal Field Coil System for use with a Homopolar Generator Power Source, P. Wildi, G. L. Cardwell and D.F. Brower....	88
3D2	Proposed Power Supply System for the Texas Fusion Plasma Research Tokamak, H. S. Hutchins and D. F. Brower.....	89
3D3	The Design and the Design Formalism for the OH and VF Coil Systems for the Proposed Text Iron Core Tokamak, G. L. Cardwell.....	90
3D4	A Fast Crowbar System for the TTF; Analysis and Test Results, M. Ehsani, D. F. Brower and Paul Wildi.....	91
3D5	A Magnet Design Module for Fusion Reactor System Design Studies, J. W. Butler.....	92

TABLE OF CONTENTS (Cont'd.)

3D6	The Interaction and Protection of Superconducting Pulsed Coils and Toroidal Coils in Large Tokamak Devices, H. T. Yeh and J. W. Lue.....	92	SESSION 4B-- ANTENNAS IN PLASMAS, AND SPACE PLASMAS	
3D7	Burn Cycle Dynamics Calculations for a Tokamak Experimental Power Reactor, W. M. Stacey, Jr. and J. N. Brooks.....	93	4B1 Electromagnetic Fields Near an Antenna in a Plasma, D. H. Preis, M.A.V. Ward and R. W. P. King.....	101
3D8	Engineering Tests of the Princeton Large Torus, J. Frankenberg.....	93	4B2 Current Distribution and Impedance of Antenna of Revolution in Plasmas, C.H. Ma...	101
3D9	Engineering Design of the Tokamak Fusion Test Reactor, P. Bonanos, G. V. Sheffield and K. E. Wakefield.....	94	4B3 The Tethered Balloon Current Generator - A Space Shuttle-Tethered Subsatellite for Plasma Studies and Power Generation, P. R. Williamson and P. M. Banks.....	102
SESSION 4A--LASER-PLASMA INTERACTIONS III				
4A1	High Energy Charged Particle Measurements from Laser-Produced Plasmas, Tai Ho Tan, D. V. Giovanelli, G. H. McCall and A. H. Williams.....	95	4B4 Current Collection by a Long Wire in Near-Earth Orbit, P. J. Morrison, Jr., W. B. Thompson and P. R. Williamson.....	102
4A2	Numerical Modeling of Laser Imploded Glass Microspheres, E. I. Thorsos and E. B. Goldman.....	95	4B5 Electrical Charging of Shuttle Orbiter, H. B. Liemohn.....	103
4A3	Suprathermal Electron Effects Observed in the Interpretation of Recent Experimental Data, J. Delettrez and E.B. Goldman.....	96	4B6 Laboratory Observations of RF Emissions at ω_{pe} and $(n+1/2)\omega_{ce}$ in Electron Beam-Plasma and Beam-Beam Interactions, H. Leinbach and W. Bernstein.....	104
4A4	Electron Thermal Conduction in Laser Heat Plasmas, G. A. Moses and J.J. Duderstadt....	96	4B7 Hydromagnetic Wave Energy in the Magnetosphere, H. B. Liemohn and C.A. Oster.....	105
4A5	Wavelength Scaling Experiments Using CO ₂ and Glass Laser-Produced Plasmas, D. V. Giovanelli, J.F. Kephart and G.H.McCall....	97		
4A6	Laser Energy Transport Through Plastic Films, R.R. Whitlock, F.C. Young, R.Decoste, B.H. Ripin, D.J. Nagel, J.A. Stamper and J. M. McMahon.....	97	SESSION 4C--FISSION INDUCED PLASMAS II; AND ELECTRON, ION AND PLASMA SOURCES	
4A7	Symmetry and Stability Studies of Thermally Generated Magnetic Field in Laser Produced Plasmas, R. L. McCrory, C. W. Cranfill, and Richard L. Morse.....	98	4C1 Optical Radiation from a Fissioning Gas, R. N. Davie, Jr., G. Albrecht, E. E. Carroll, Jr. and R. T. Schneider.....	106
4A8	Laser Radiation Forces in Magnetized Plasmas, J. A. Stamper.....	98	4C2 The Role of Heavy Particles in Direct Nuclear Pumping, J. C. Hill and H. A. Hassan..	106
4A9	Laser Light Absorption with Self-Generated Magnetic Fields, W. L. Kruer and K. G. Estabrook.....	99	4C3 Kinetic Modeling of Plasma Generated by Fission Products, J. E. Deese and H. A. Hassan.....	107
4A10	Simultaneous Measurements of Current and Magnetic Field in Laser-Produced Plasmas, M.G.Drouet, R.Bolton, G.Saint-Hilaire, P.Kieffer, Z.Szili, H.Pepin, B. Grek, A. Thibaudeau and K. Trepanier.....	99	4C4 Electron Distribution Function in a Plasma Generated by Fission Fragments, H. A. Hassan and J. E. Deese.....	107
4A11	Laser Beam Trapping and Propagation in Cylindrical Plasma Columns, M. D. Feit and J. A. Fleck, Jr.....	100	4C5 Stable Extraction of Intense Electron Beam from Plasma, J. Uramoto.....	108
			4C6 Lili, A Long Pulse Electron Beam Accelerator, D. L. Johnson, J. C. Bagg and R. S. Clark.....	109
			4C7 Recent Experiments in Collective Field Acceleration, J. S. Luce.....	109
			4C8 Nuclide Activation with Ions Accelerated by the LLL Collective-Field Accelerator, R. J. Howerton and J. S. Luce.....	110
			4C9 Deuterium Ion Mass, Energy, and Current Density Distributions from a Duoplasmatron Ion Source, F. M. Bacon.....	111

TABLE OF CONTENTS (Cont'd.)

4C10	Studies of Processes in Direct Extraction H ⁻ Sources, M. Grossman, K. Prelec, and Th. Sluyters.....	112
4C11	Plasma Source for CTR Neutral-Beam Injectors, K. W. Ehlers, W. R. Baker, K. H. Berkner, W. S. Cooper, W. B. Kunkel, R. V. Pyle and J. W. Stearns.....	112
4C12	The Influence of Negative Ions on the Characteristics of Plasma Arc Jets, P. C. Zachariah.....	113
 SESSION 4D--ENGINEERING ASPECTS OF CONTROLLED FUSION RESEARCH II		
4D1	Passive Notch Circuit for Pulsed-Off Compression Fields, W. C. Nunnally.....	114
4D2	Engineering Aspects of the Marshall Implosion Coil, L. D. Hansborough, J. M. Dickenson, R. K. Linford, J. G. Melton, and W. C. Nunnally.....	114
4D3	Engineering Aspects of On-Line Operation of the Scyllac Sector Feedback Stabilization Experiment, K. J. Kutac, R. W. Kewish, Jr., R. F. Gribble, R. R. Bartsch and G. Miller.....	115
4D4	The Potential for Fast Feedback Stabilization of the Reference Theta-Pinch Reactor (RTPR), R. R. Bartsch, R. A. Krakowski, and F. L. Ribe.....	116
4D5	The Conceptual Design of a 20 Tesla Pulsed Solenoid for a Laser Heated Fusion Reactor, J. J. Nolan and R. J. Averill.....	117
4D6	Comparison of Series vs Shunt Regulation for Large Neutral Beam Source Power Supplies, W. R. Baker, D. B. Hopkins, B. H. Smith and W. L. Dexter.....	118
4D7	Lifetime of Solid Hydrogen Pellets in a Plasma, P. B. Parks, C. A. Foster and R. J. Turnbull.....	119
4D8	A 500 MHz Modulation System for the 5 MeV, 400 A Astron Accelerator, L. L. Reginato and B. H. Smith.....	120
4D9	Magnetic Effects on Insulator Flashover in High Voltage Vacuum Transmission Lines, K. D. Bergeron.....	120
4D10	Thermonuclear Erosion of Wall Materials in a Dense Plasma Focus, L. Raymond, G. M. Molen and G. G. Comisar.....	121
4D11	Rotationally Stabilized Liquid Liner Implosions, P. J. Turchi, A. L. Cooper, R. Ford, and D. J. Jenkins.....	121
4D12	A High Repetition Rate - High Average Power Spark Gap Switch, W. Clark and V. Fargo.....	122
 SESSION 5A--ELECTRON AND ION BEAMS I		
5A1	Generation of Intense Ion Beams and Application to Controlled Thermonuclear Research, Stanley Humphries, Jr. (Title Only).....	123
5A2	Generation of Megavolt, 20 kA Proton Beams, J. Golden, C. A. Kapetanakos, W. M. Black and V. L. Granatstein.....	123
5A3	Collective Ion Acceleration in Relativistic Electron Beams, J. A. Nation, M. E. Read and R. Williams.....	124
5A4	Theory of Efficient Generation and Focusing of Mega-Ampere Ion Beams, S. A. Goldstein, R. Lee and G. Cooperstein.....	125
5A5	Production and Focusing of Intense Ion Beams from Self-Pinched Relativistic Electron Beams, G. Cooperstein, S. J. Stephanakis, J. R. Boller and R. Lee.....	126
5A6	Time Dependent Theory and Computer Simulation of Electron and Ion Flow in a Symmetric Double Diode, R. Lee, C. A. Kapetanakos, J. Golden and S. A. Goldstein.....	126
5A7	An Investigation of Mechanisms which Influence the Pinch Profile of Low Impedance REB Diodes, D. J. Johnson and S. A. Goldstein.....	127
5A8	Potential Use of Strong Rings of High-Energy Ions for Electronuclear Power Generation, H. H. Fleischmann.....	128
5A9	Computer Simulation of the Auto-Resonant Ion Acceleration Concept, B. B. Godfrey, W. R. Shanahan and L. E. Thode.....	129
5A10	Energy Dependence of Collectively Accelerated Ions on Electron Beam v/y, D. C. Straw and R. B. Miller.....	130
5A11	Collective Ion Acceleration by the Controlled Motion of the Virtual Cathode, R. B. Miller.....	130
 SESSION 5B--PLASMA HEATING I		
5B1	Time Resolution of Turbulent Heating in a Magnetic Mirror, B. J. Patch and C. B. Wharton.....	131
5B2	Observation of Enhanced Ion Heating via Spatial Magnetic Field Variations, A Catalytic Heating Scheme, A. Lee, N. L. Oleson, S. M. Gleman and W. D. Jones.....	131
5B3	R.F. Plasma Heating in Toroidal Machines, T. Consoli (Title Only).....	132
5B4	Wave Excitation in a Toroidal Cavity Partially Filled with Anisotropic, Dissipative Plasma, Y. S. Kwon and D. G. Swanson.....	132

TABLE OF CONTENTS (Cont'd.)

5B5	High Power Ion Cyclotron Resonance Heating in a Multiple Mirror Machine, T. L. White.....	133
5B6	Electron Heating and Ionization in an R.F. Discharge, S. G. Sanders.....	133
5B7	Field Penetration into a Plasma with Current Saturating Conductivity, K. E. Lonngren, G. Ahmadi and A. Hirose.....	134
5B8	Optimization and Scaling of Ion Heating in the NASA Lewis Bumpy Torus Plasma, J. R. Roth.....	135
SESSION 5C--THERMIONICS AND PLASMA DIODES		
5C1	ERDA's Bicentennial Thermionic Research and Technology Program, O. S. Merrill.....	136
5C2	NASA Research and Technology Program in Thermionic Energy Conversion, J. G. Lundholm and J. F. Morris.....	137
5C3	System Design for a Nuclear Electric Space- craft Utilizing Out-of-Core Thermionic Conversion, W. C. Estabrook, W.M.Phillips and Teh-Ming Hsieh.....	137
5C4	A Simple Wall-to-Wall Theory of Thermionic Energy Converters, S. H. Lam.....	138
5C5	Analysis of a Thermionic Diode Operating in the Ignited Mode, Chi-Chung Wang, Peter Oettinger, and J. C. Keck.....	138
5C6	Advanced Thermionic Converter Operating Modes, L. K. Hansen and N. S. Rasor.....	139
5C7	Hybrid Mode Thermionic Converter Experi- ments, K. Shimada.....	139
5C8	Characteristics of a Triode Thermionic Converter, P. E. Oettinger and Chi-Chung Wang.....	140
5C9	Electrode Development for Thermionic Converters, F. N. Huffman, D. Lieb, A. H. Sommer, T.R. Briere and F. Rufeh.....	140
5C10	Evaluation of Some Promising Electrode Materials for Thermionic Energy Converters, D.L. Jacobson, T. Kouts, J. Jaskie, E. K. Storms and S. R. Skaggs.....	141
5C11	Low Work Function Silicon Collector for Thermionic Converter, K. H. Chang and K. Shimada.....	141
5C12	Single Crystal Work Function and Evapora- tion Measurements of LaB ₆ and CeB ₆ , L. W. Swanson.....	142
5C13	Low Vapor Pressure Braze Alloys for Ther- mionic Energy Converters, V. L. Bair.....	142
5C14	Advanced Thermionic Converters with Auxiliary Ionization, D. T. Shaw and C. N. Manikopoulos.....	143
SESSION 5D--PLASMA SCIENCE OF CIRCUIT INTERRUPTION		
5D1	Arc and Breakdown Measurements on Chromium Electrodes in Vacuum, G. A. Farrall and R. H. Johnston.....	144
5D2	Current Commutation Using Magnetic Fields to Force Instability of Vacuum Arcs, C. W. Kimblin, P. G. Slade, R.E. Voshall, F. A. Holmes, J.G. Gorman and P.R.Emtage....	145
5D3	Vacuum Arc Anode Phenomena, H. Craig Miller (Title Only).....	145
5D4	Parametric Study of the Current Density Distribution at the Electrode, of a Moving Arc, M. G. Drouet, D. Bhattacharyya and R. Bolton.....	146
5D5	Temperature Diagnostics in Turbulent Alter- nating Current Arcs, D. M. Benenson and P. A. Reiser.....	147
5D6	Equilibrium Composition and Transport Pro- perties of SF ₆ and SF ₆ + H ₂ Mixtures Between 300° and 15000°K, R. W. Liebermann and C. L. Chen.....	148
5D7	An Analytic Aid to Understand Core Forma- tion of Electric Arcs, H. M. Pflanz and M. Hudis.....	148
5D8	Interruption Criteria for Variable Property Electric Arcs, A. M. Whitman, P.S. Ayyaswamy and Ira M. Cohen.....	149
5D9	Controlling Parameters of Arcs in Power Cir- cuit Breakers, Ruben D. Garzon.....	149
5D10	Dynamic Circuit Breaker Test Analysis and Its Use in the Generalized Specification of Short-Line Fault Performance, L. S. Frost.....	150
5D11	Critical Factors in the Dielectric Recovery of Silver Sand Arc Limit, M. Hudis and D. Wycklendt.....	150
SESSION 6A--ELECTRON AND ION BEAMS II		
6A1	Results from the SEEBIE Electron Beam- Neutral Gas Interaction Experiment, K. A. Gerber, D.A. Hammer and D.N. Spector.....	151
6A2	Electron Beam Interactions with a Toroidal Plasma Column, B. R. Kusse and T. R. Lockner.....	151

TABLE OF CONTENTS (Cont'd.)

6A3	E-Beam Pinch Formation in High Current Diodes, A. J. Toepfer (Title Only).....	152
6A4	Electron Beam Requirements for Target Implosion Experiments, M. J. Clauser, M.A. Sweeney and A. V. Farnsworth, Jr.....	152
6A5	Pulsed Power Requirements for Electron Beam Fusion, T. H. Martin.....	153
6A6	Holographic Interferometry of Electron Beam Irradiated Pellets, L. P. Mix.....	153
6A7	The Electrostatic Trapping of an Intense Relativistic Electron Beam in a Magnetic Mirror, D. A. Phelps, J. E. Rauch and P. Korn.....	154
6A8	Generation of Field-Reversing Electron Rings with Millisecond Lifetimes, R. A. Meger, H. A. Davis and H.H.Fleischmann.....	155
6A9	Stabilization of the Precessional Mode of High-Energy Ion Rings Using General Magnetic Multipole Fields, S. C. Luckhardt and H. H. Fleischmann.....	156
6A10	Intense Relativistic Electron Beam Focusing Experiments, R. D. Genuario and K. Triebes.....	157
6A11	Stability of a Nonneutral Electron Propagating in an Inhomogeneous Magnetic Field, W. R. Shanahan and B. B. Godfrey.....	157
SESSION 6B--PLASMA HEATING II AND COMPUTER APPLICATIONS TO PLASMA SCIENCE, COMPUTER CONTROL OF FUSION DEVICES		
6B1	Effect of Anode-Cathode Geometry on Performance Characteristics of the HIP-1 Hot Ion Plasma, M. R. Lauver.....	158
6B2	Heating of an Electromagnetic Shock Tube Plasma with a CO ₂ Laser, J. S. C. Box, W. W. Byszewski and P. K. John.....	158
6B3	Production of Strong Ion Rings Using Long Pulse Ion Accelerators, J. E. Maenchen, S. Humphries, Jr., and R. N. Sudan.....	159
6B4	A Stable Hot-Electron Plasma in a Simple Mirror, M. Sailors and Igor Alexeff.....	159
6B5	Influence of a High Frequency Pump on Trapped Particle Modes, A. K. Sundaram and A. Sen.....	160
6B6	Boundary Conditions for Wave-Plasma Interactions, Erick L. Lindman.....	161
6B7	Probable Errors Associated with Mini-Computer Analysis of Multidipole Plasma Langmuir Probe Characteristics, G. R. Taylor and K. N. Leung.....	162
6B8	Proposed Data Acquisition System for Text, D. M. Patterson, G.S. Caldwell, A.B. Macmahon and H. S. Hutchins.....	162
6B9	Computer Simulation of Radio Frequency Confinement of a Plasma Near Critical Density, S.J. Gitomer and J.L. Shohet.....	163
6B10	Acceleration of Monte Carlo Techniques for Fusion Blanket Neutronics, K. A. Hansborough, D. H. Rowland, and J. L. Macdonald.....	163
6B11	Conceptual Computer Control Systems for TFTR, J. M. Walsh.....	164
6B12	Solutions to Common Problems in CTR Control Systems Software Design, R.Belshe, V. Elischer, V. Jacobson, D. Rondeau and K. Wiley.....	165
SESSION 6C--POSTDEADLINE PAPERS		
SESSION 6D--INERTIAL AND INDUCTIVE ENERGY STORAGE, AND SWITCHING		
6D1	Engineering Design of a Fast Discharging Homopolar Demonstration Model, J.H. Gully, M. D. Driga, W. L. Bird, K. M. Tolk, W.F. Weldon, C. H. Ramage, H. H. Woodson and H. G. Rylander.....	166
6D2	Inertial and Inductive Energy Storage Programs at the Los Alamos Scientific Laboratory (LASL), J. D. Rogers, K.I. Thomassen, D. M. Weldon and K.D.Williamson, Jr.....	166
6D3	Review of Inverter Control of Inductively Stored Energy, E. D. Simon, G. Bronner and J. G. Murray.....	167
6D4	Progress in Switching Technology for METS Systems, E. M. Honig, C. E. Swannack, R. W. Warren, and D. H. Whitaker.....	167
6D5	Pulsed Homopolar Power Supply for an Experimental Tokamak, W. L. Bird, H. S. Hutchins, P. Wildi, H. G. Rylander, W. F. Weldon, and H. H. Woodson.....	168
6D6	Design of a High Speed Controlled Atmosphere Test System for Sliding Electrical Contacts Conducting Large Power Pulses, J. M. Weldon, W. F. Weldon, W. Muston and P. Wildi.....	168
6D7	Pulsed Energy Systems for Fusion Devices, A. E. Robson (Title Only).....	168
6D8	Abstract Withdrawn.....	169

TABLE OF CONTENTS (Cont'd.)

6D9 Circuit Interruption Using a Vacuum Arc Switch, A. S. Gilmour, Jr.....	169	6D11 Calculation of Magnetic Fields in Homo- polar Machines for Fusion Experiments, E. B. Becker, R. D. Pillsbury and M. D. Driga.....	170
6D10 Alignment Considerations in Pulsed Homo- polar Devices, K. M. Tolk, M. D. Driga, H. G. Rylander, H. H. Woodson and M. Brennan.....	169	6D12 High Energy CU Foil Fuse Experiment, J.H. Goforth, J.A. Justice, J. H. Degnan and R. E. Reinovsky.....	170
AUTHOR INDEX.....		171
