

SESSION: 1A -- PLASMA DIAGNOSTICS I					
1A1	Reference Temperature Method of Determining Particle Densities and Temperatures in Plasmas Containing Negative Ions, P.C. Zachariah	1	1B6 External Ionization Mechanisms for the Plasma of the Advanced Thermionic Converter, C.N. Manikopoulos and D.T. Shaw 13		
1A2	Ion Temperature Measurement in a Rarefied Drifting Plasma, H. Mecure, J. H. deLeeuw	2	1B7 Heat Flux Across Plasma Diode, K. Lee and E. L. Lindman 14		
1A3	Implementation of the Heavy Ion Beam Probe Diagnostic System for EBT, P. L. Colestock, K. A. Connor, R. L. Hickok, and F. M. Bieniosek	3	SESSION: 1C -- ADVANCED FUEL FUSION TECHNOLOGY I		
1A4	Heavy Ion Beam Probe Measurements on the EBT Device, F. M. Bieniosek, P. L. Colestock, K. A. Connor, R.L. Hickok, and R. A. Dandl	4	1C1-2 Physics Requirements for Advanced Fuel Fusion, J. R. McNally, Jr. 15		
1A5-6	Nuclear Activation Techniques for Pulsed Ion Beams, F.C. Young	5	1C3 Studies of Advanced-Fuel Reactors, G. H. Miley, F. Southworth, G. Gerding, and C. Choi 16		
1A7	The Effect of Negative Ion Current and Derivatives on the Amplitude Modulation of Two Audio-Signals, R. M. Ragab	5	1C4 Reactor Considerations Based on $^6\text{Li}(p,\alpha)^3\text{He}$, J. L. Hirshfield 17		
1A8	Spatially Resolved Electrical Probe Diagnostic of a Wall Stabilized Arc at Atmospheric Pressure, K. JayaRam	6	1C5 Surmacs for Advanced Fuel Fusion, A. Y. Wong, S. R. Baker, R. A. Breun and R. W. Schumacher 17		
1A9	The Anisotropic Plasma Temperature Effect on the Frequency Shift in Resonant Cavities, R.R.J. Gagne and M. M. Shoucri	7	1C6 Advanced Fuels for Inertial Confinement Fusion, G. A. Moses 18		
1A10	Gyromagnetic Properties of Cold Plasma, K. I. Denno	8	1C7 On the Possibility of Breeding and Burning Tritium in situ for Inertially Confined Fusion, S. Skupsky 19		
SESSION: 1B -- THERMIONICS AND PLASMA DIODES					
1B1	Hybrid Mode Thermionic Converter Characteristics, K. Shimada	9	1C8 $T_{n\ell}$ of Migmaell III Exceeds that of all Other Fusion Devices Except Alcator, B.C. Maglich, J. Ferrer, R. Ho, M. Mazarakis, S. Menasian, J. Nering, C. Powell, J. Sandberg, J. Treglio 20		
1B2	The Plasmatron as a Thermionic Energy Converter, G. L. Hatch, L.K. Hansen and N.S. Rasor	10	1C9 Preliminary Studies of an Advanced Fuel Bumpy Torus Reactor, G. Gerding and F. H. Southworth 21		
1B3	Experiments with Enhanced Mode Thermionic Converters, P.E. Oettinger and F. N. Huffman	11	SESSION: 1D -- MAGNETOFLUIDDYNAMICS AND GASEOUS ELECTRONICS		
1B4	Emitter and Collector Development for Thermionic Converters, D. Lieb, A. Sommer, T. Briere, C. Balestra and D. Goodale	12	1D1 MHD Equilibrium and Classical Diffusion of Toroidal Plasma with Non-Planar Magnetic Axis, H. M. Rizk 22		
1B5	Thermionic Converter Plasma Analyses, C. C. Wang and P. E. Oettinger	12	1D2 Effect of Modulation of the Curvature of the Magnetic Axis on MHD Toroidal Plasma Stability, H. M. Rizk 23		
			1D3 Effects of Gaseous Electrode on MHD Channel Performance, D. W. Cott 24		
			1D4 The Dynamic, Non-Adiabatic Behavior of a Z-Pinch Plasma Under Liner Implosion Conditions, I. R. Lindemuth, and T. R. Jarboe 25		

1D5	Interaction of an Ionizing Shock Wave with a Transverse Magnetic Field, A.I. Bertinov, D. A. Bout, B. A. Sluchack	26	SESSION: 2A -- PLASMA DIAGNOSTICS I	
1D6	Power Absorption Characteristics of a Microwave Plasma Source, R.Mallavarpu, J. Asmussen, M.C. Hawley	27	2A1 Interpretation of X-Ray Line Spectra from Single- and Multiple- Exploded Wires, P. Burkhalter and J. Davis, and R. Schneider	37
1D7	Space Charge Neutralization on Space-craft, K.I. Denno	28	2A2 Strong Optical Attenuation (15 dB) by a Dense Hydrogen Z-Pinch Plasma, G. Saint-Hilaire, C. R. Neufeld, P. Noel, A. Robert	38
1D8	A Penning-Type Ion Source for Collision Experiments, D. W. Hughes, R.K. Feeney, and W. E. Sayle	29	2A3 Neutrons from the Electrodisintegration of Deuterium in the Princeton Large Tokamak, J. D. Strachan and D. L. Jassby	39
POSTER SESSION: MONDAY				
M1	Production of a 100 keV Negative Deuterium Ion Beam, O. A. Anderson, D. H. Birdsall, D. R. Branum, E. B. Hooper, Jr., T. J. Orzechowski and P. Poulsen	30	2A4-5 High-Resolution Diagnostics for Laser Fusion Experiments, L.W. Coleman	
M2	Rectangular Large Area Plasma Source, K. W. Ehlers	31	2A6 Laser-Produced Plasma Diagnostics from High Resolution EUV and X-Ray Spectra U. Feldman, G. A. Doschek, W. E. Behring and L. Cohen	40
M3	A Prototype Ion Accelerator for TFTR-Type Neutral-Beam Systems, J. M. Haughian, J. A. Paterson, and L. A. Biagi	32	2A7 Plasma Cross Section Reconstruction: A Diagnostic Approach for the Topolotron Experiment, L. V. Knight, H.R.P. Ferguson, G. Cook and R. Wilson	41
M4	An Update on the Design and Development of Multi-Megawatt Beam Dumps, W. S. Cooper, J. M. Haughian, and J. A. Paterson	32	2A8 A Frequency Stabilized 2 mm Microwave Interferometer, A. H. Futch	42
M5	Spectroscopic Diagnostics for Neutral-Beam Injectors, C. F. Burrell, W. S. Cooper, and W. F. Steele	33	2A9 Scanning Infrared Heterodyne Interferometry, R. Kristal	43
M6	Preliminary Investigation of Anomalous Relativistic Electron Beam Deposition into Dense (10^{17} - 10^{20} cm $^{-3}$) Plasma, L. E. Thode	33	2A10 Proposed Submillimeter Laser Thomson Scattering for Plasma Diagnostics, H. C. Praddaude, P. Woskoboinikow, and D. Cohn	44
M7	High Power Millimeter Wave Generation from Planar and Annular Relativistic Electron Beams, G. Providakis, J. A. Nation and M. E. Read	34	SESSION: 2B -- THERMIONICS AND PLASMA DIODES II	
M8	Plasma Confinement with a Rotating Relativistic Electron Beam, K. A. Gerber, J. D. Sethian, D. A. Hammer, D. N. Spector, and A.E. Robson	35	2B1 Cesium Thermionic Converter Ion Species, D. E. Sutliff and L. M. Chanin	45
M9	Status Report on LITE Beam Probe System, T. R. Price, F.J. Bresnock, W. C. Jennings and R. L. Hickok	36	2B2 Coadsorption of Cesium and Oxygen on W(110) in the Submonolayer Range, J.-L. Desplat	46
			2B3 Work Function Measurements for Single Crystal Hexaborides of Ba, La, Ce and Sm, L. W. Swanson	47
			2B4 Evaluation of Lanthanum Boride Compounds for Thermionics, D. Jacobson and J. Jaskie	48

2B5	Electron Emission for Nickel-Alloy Surfaces in Cesium Vapor, M. Manda and D. Jacobson	49	2D4	High Energy Ions from a Nd-Laser Plasma, R. Decoste and B. H. Ripin	59
2B6	Some Properties of Low Vapor Pressure Braze Alloys for Thermionic Converters, V.L. Bair	49	2D5	Multiwave Picosecond Interferometry of CO ₂ -Laser Produced Plasmas, R. L. Carman, A. G. Engelhardt, and N. Clabo	60
2B7	The NASA Thermionic-Conversion (TECART) Program, J. F. Morris	50	2D6	Anisotropy of Intensity and Polarization of Free-Free X-Ray Bremsstrahlung from Flat Targets, J. L. Shohet, D. B. vanHulsteyn, S. J. Gitomer, J. F. Kephart and R. P. Godwin	61
SESSION: 2C -- ADVANCED FUEL FUSION TECHNOLOGY II					
2C1	Results and Problems Relating to the Attachment of Direct Energy Converters to Catalyzed-D Tokamak Reactors, A. S. Blum, J.R. Reed, and R.W. Moir	51	2D7	A Study of the Plasma Produced by Staged Laser Heating of Solid Targets, J. R. Greig, R.E. Pechacek, A. W. Desilva, and D.W. Koopman	62
2C2	Start-up of Advanced Fuel Tokamaks, R. Stark and G. A. Gerdin	52	2D8	Characteristics of Laser-Initiated Ionization Channels in Air, R. Fernsler, I.M. Vitkovitsky, A. W. Ali, J. R. Greig, R. E. Pechacek and M. Raleigh	63
2C3	Catalyzed D-D and D- ³ He Fusion Reactor Blanket Designs, J.A. Fillo, J.R. Powell and O. Lazareth	53	2D9	Interaction of Laser Pulses with Targets: Prepulse Effects, D. J. Nagel, J. R. Greig and R.R. Whitlock	64
2C4	Conceptual Demountable TF Magnet Design for Catalyzed D-D and D- ³ He Fusion Reactors, S. Y. Hsieh, J. Lehner, J. Powell	54	2D10	CO ₂ Laser-Target Experiments at 10 ⁶ W/cm ² to 10 ⁸ W/cm ² , R. Bleach	65
2C5	Revised Neutral Ablation Model for Pellet-Tokamak Plasma Interactions, S. L. Milora,	55	2D11	Breakdown at the Laser-Plasma Target Interface, M. G. Drouet	66
2C6-7	Energy Conversion for Advanced Fusion Fuels, G. H. Miley	56	2D12-13	Scattered Light and Critical Surface Roughness Studies, B. H. Ripin	66
2C8	Ablation Rates of Spherical Polystyrene Pellets in a Theta Pinch, D. L. Smith, M. Kristiansen and M. O. Hagler	56	SESSION: 3A -- PLASMA FOR CONTROLLED FUSION RESEARCH AND PLASMA HEATING I		
2C9	Numerical Simulation of the Negative Mass Instability, M. Emery	57	3A1	Systematic End Loss Measurements on a Hot Linear Theta Pinch, H. Azodi, A. Torabi-Fard, M. Naraghi	67
SESSION: 2D -- LASER- PLASMA INTERACTIONS I					
2D1-2	Interaction of HF Lasers with Gaseous and Solid Target, B. Deka, P. E. Dyer, S. A. Ramsden and J. Sayers	58	3A2	Initial Noise and Quiet Start in Electromagnetic Particle Simulation Codes, A. Sternlieb	68
2D3	D-T Fuel Temperature of Laser-Fusion Targets Determined from Neutron Energy Spectra, R. A. Lerche L. W. Coleman, J. W. Houghton, D.R. Speck and E. K. Storm	58	3A3	Plasma Parameters and End-Loss Measurements in the Scylla IV-P Linear Theta Pinch, K. F. McKenna, R. J. Commisso, C. A. Ekdahl, K.B. Freese, R. Kristal, R. E. Siemon and W. E. Quinn	69

3A4	Reduction of Plasma End Loss with Solid End Plugs in the Scylla IV-P Linear Theta Pinch, C. A. Ekdahl, R. J. Comisso, K.B. Freese, R. Kristal, K.F. McKenna, R.E. Siemon and W. E. Quinn	70	3B7	Conversion of REB Kinetic Energy into Useful Electromagnetic Energy, L.J. Demeter, C. Stallings and I. Smith	80
3A5	Solid Material End Plugging of Straight θ-Pinches, R. Malone and R. L. Morse	71	3B8	Electron Beam Transport Using Z-Pinch Plasma, J. Benford	80
3A6	Straight θ-Pinch Fusion Reactors with Solid End Plugs, R. C. Malone and R. L. Morse	71	3B9	Propagation of High Beams Using Exploding Wire Discharges, D. P. Bacon, S.A. Goldstein, G. Cooperstein, I.M. Vitkovitsky and J. R. Boller	81
3A7	Numerical Techniques for Simulating Straight θ-Pinch End Losses, R. C. Malone and R. L. Morse	72	3B10	Theory of Short Pulses in Long Magnetically Insulated Transmission Lines, K.D. Bergeron and J. W. Poukey	82
3A8	Computer Modeling of Linear Theta Pinch Machines, E. Stover, E. H. Klevans and T. York	73	3B11	Magnetic Compression of High Current Electron Beams, D.R. Dakin	83
3A9	Evaluation and Scaling of Plasma Loss from a Very Short Theta Pinch, T. M. York, R. Freeman, R. Mollo	74	3B12	The Translation and Successful Stacking of Relativistic Electron Rings, H. A. Davis, D.J. Rej and H. H. Fleischmann	84
3A10-11	High Beta Ring Stabilization of a Bumpy Torus, R. A. Dandl	74	3B13	Anomalous E-Layer Decays Induced By Multipole Fields, S.C. Luckhardt and H. H. Fleischmann	85
3A12	Fluctuation Induced Particle Transport in the NASA Lewis Bumpy Torus, C. M. Singh, W. M. Krawczonk, J.R. Roth, E. J. Powers and J.Y. Hong	75	3B14	Millimeter Wave Generation Through Stimulated Scattering With an Intense Relativistic Electron Beam and Zero Frequency Pump, S. Talmadge P. Efthimion, T. C. Marshall	86
3A13	An Unusually Stable Hot Electron Ring in a Simple Mirror Plasma, M. Sailors and I. Alexeff	76	SESSION: 3C -- FUSION REACTOR TECHNOLOGY I		
SESSION: 3B -- INTENSE ELECTRON AND ION BEAMS I					
3B1	Time-Dependent Effects in REB Diodes, J. P. Quintenz and J. W. Poukey	77	3C1	Thermonuclear Instabilities and Their Application to Fueling of a Tokamak Reactor, D.K. Bhadra and K. Matsuda	87
3B2	Computer Simulations of Time Dependent Ion and Pinched Electron Flow in Relativistic Diodes, R. Lee and S. A. Goldstein	78	3C2	Pellet Ablation in a Thermonuclear Plasma and its Implications on the Refueling Problem I, D. F. Vaslow, P. H. Miller, Jr., and P.B. Parks	88
3B3	Closure Velocities and Bipolar Flow for Intense REB Diodes in B_z Fields, D. R. Dakin and J. Benford	78	3C3	Pellet Ablation in a Thermonuclear Plasma and its Implications on the Refueling Problem II, P.B. Parks, P.H. Miller, Jr., and D.F. Vaslow	89
3B4-5	Computer Simulation of Relativistic Electron Beam Diodes, J.W. Poukey	79	3C4	Effect of Fusion-Product Transport and Losses, G. H. Miley, T. Petrie, L. Hively and M-Y Wang	90
3B6	Spatially Resolved VUV-Emission From Focused REB Discharges into Thin Targets, D. J. Johnson, G.A. Doschek U. Feldman and W. F. Oliphant	79	3C5-6	Temperature Control of Ignited Tokamak Plasmas by Vertically Asymmetric Toroidal-Field Ripple, D.L. Jassby,	91

3C7	Energy Spectra of Fusion Neutrons from Beam-Driven Toroidal Plasmas, H.H. Towner,	92	3D12	Gas-Fueled Plasma Core Reactor Applications, J. S. Kendall and R. J. Rodgers	106
3C8-9	Status of Tokamak Research, S. Dean	92	3D13	Plasma Core Reactor Experiments, D. M. Barton, J. F. Davis, H.H. Helmick, G. A. Jarvis, L.L. Lowry and R. H. White	107
3C10	Plasma Characteristics of a High Field Compact Tokamak Reactor (HFCTR), D.R. Cohn, D. Cook D. Kaplan, and K. Kreischer, D. L. Jassby	93	3D14	Ballistic Piston Fissioning Plasma Experiment, J. F. Davis, C. R. Mansfield, P. Bird and H. H. Helmick and D. E. Sterritt	108
3C11	A Flux Conserving Tokamak Reactor, F. B. Marcus	94	3D15	UF ₆ Plasma Experiments Related to Plasma Core Reactors, W. C. Roman, N. L. Krascella, M.F. Zabielski and S. Russell	109
3C12	Position Control and Sensor Requirements for Tokamak Power Reactors, P. Madden, R. Var	95			
SESSION: 3D -- FISSION INDUCED PLASMA AND NUCLEAR PUMPED LASERS					
3D1-2	Scale-Up and Potential Applications of Direct Nuclear Pumped Lasers, G. H. Miley	96	T1	Measurement of Ion Acoustic Test Waves by Means of a 30 GHz Lecher Wire Interferometer of High Spatial Resolution, P. J. Paris, M. Bitter, and Ch. Hollenstein	110
3D3	Direct Nuclear Pumped Gain at 7945 A° of HGII in a Helium-Mercury Mixture, M.A. Akerman, F.P. Boody, G. H. Miley	97	T2	Diagnostics for Surface H ⁻ Ion Sources, M. W. Grossman	111
3D4	Volumetric Nuclear Pumped Lasers, R. J. DeYoung, N.W. Jalufka and F. Hohl	98	T3	Thomson Scattering System for the Rensselaer Tokamak, S. R. Golub, D. G. Biron, H. G. Parks, R. D. Mathison, and W. C. Jennings	112
3D5	³ He-Xe Laser Pumped by Protons and Tritons, P.F. Bird, J.F. Davis, C.R. Mansfield, H. H. Helmick, T. F. Wimett	99	T4	Mechanism of Anomalous Thermal Transport, A. Hirose	113
3D6	Population Processes in Direct Nuclear Pumped Lasers, W. E. Wells and S. D. Marcum	100	T5	Heavy Ion Beam Probe Measurements on the Rensselaer Tokamak, C. L. Fiore, C. Stanziola, W. Kostenko and W. C. Jennings	114
3D7	Power Density in Direct Nuclear Pumped ³ He Lasers, J. W. Wilson, R. J. DeYoung	101	T6	A One Kilojoule, U-V Preionized, CO ₂ Laser System, R. E. Pechacek, J. R. Greig and M. Raleigh	115
3D8	Nuclear Pumped Actinide and Lanthanide Lasers, C. R. Mansfield, P.F. Bird, H. H. Helmick, and G. Radda	102	T7	Ultra High Speed Photography of Internal Arcing in Pin-Bar T.E.A. Lasers, O. K. McDaniel	116
3D9	Nuclear Laser Optimization Experiments, T. G. Miller	103	T8	Current-Limiting Fuses and Electric Circuit Theory, J. S. Withers	116
3D10	Energy Pathways of Pure Gases and Gas Mixtures by Proton Excitation, C.H. Chen	104	T9	Acoustic Noise Exited by Electric Arcs, H. Dadgar, A. Pilorget and M. Fitaike	117
3D11	Energy Feedback by the DNP Laser for a Laser-Fusion Reactor, G.H. Miley, S. Sutherland, C. Choi, and J. Glowienka	105			

SESSION: 4A -- PLASMA FOR CONTROLLED FUSION RESEARCH AND PLASMA HEATING II				
4A1	Construction of ALVAND 2 Diagnostic Tokamak, R. Aghevi, M. Avakian, J. Katzenstein, M. Naraghi, A. Partovi and S. M. Tabatabai	118	4B3 Two Electrode Ion Beam Formation System, C. C. Tsai, L. R. Grisham, W. L. Stirling and J.H. Whealton 131	
4A2	Equilibrium and Radial Stability of a Tokamak Plasma, H. Hsuan	119	4B4 An Investigation of Ion Beam Optics in a Two-Stage 150 keV Accelerator, J. Kim, W. L. Gardner, M. M. Menon and G. Schilling 132	
4A3	Neutral Beam System for the Princeton Large Torus, H. H. Haselton	120	4B5 Separation of Charge Particles from Neutral Beam by Means of Space-Charge Blowup, G. G. Kelley, J. Kim, O. B. Morgan, G. Schilling and J. H. Whealton 133	
4A4	MHD Equilibria of a Non-Circular Cross Section Toroidal Stellarator, J. N. Talmadge, J. L. Shohet, and D. T. Anderson	121	4B6-7 Neutral Beam System for the Princeton Large Torus, H. H. Haselton 134	
4A5	Using Ohmic Heating to Ignite Fusion in A Stellarator, I. Alexeff, J. L. Shohet and D. T. Anderson	122	4B8 Space Charge Ion Optical Systems -- Experiment and Theory, J. H. Whealton, L. R. Grisham, J. Kim, W. L. Stirling, and C. C. Tsai 135	
4A6	Plasma Heating by Alfvén Waves in the Proto-Cleo Stellarator, S. N. Golovato and J. L. Shohet	123	4B9 A Negative Deuterium Ion Source, J. E. Graf, K-H Chang, R. Goldstein, and A. G. Owens 136	
4A7	Field-Reversal Theta-Pinch Experiments, R. K. Linford, D.A. Platts and E. G. Sherwood	124	SESSION 4C: FUSION REACTOR TECHNOLOGY II	
4A8	Field-Reversed Mirrors as Fusion Power Reactors, W. C. Condit, G.A. Carlson, R. S. Devoto, J.D. Hanson and W. Neef	125	4C1 An Improved Treatment of Plasma Build-up in a Mirror Fusion Device, M. Campbell, C. Choi, and G. H. Miley 137	
4A9	Hydride Targets for Relativistic Electron Beams, W. P. Gula	126	4C2 DT and DD Tandem Mirror Reactors, B.G. Logan, 138	
4A10-11	Heating of Plasmas by Current-Driven Turbulence, H. de Kluiver	127	4C3 Reactor Parameters of a Field-Reversed Mirror, T. Kammash and D. L. Galbraith 138	
4A12	The Generation of a Hot (~ 5 eV), Dense ($\gtrsim 3 \times 10^{20}/m^3$) Plasma that is Suitable for Fast Wave Propagation, R. Dollinger	128	4C4-5 The Elmo Bumpy Torus Reactor (EBTR) Study, N.A. Uckan, 139	
SESSION 4B: INTENSE BEAMS FOR FUSION RESEARCH I				
4B1	Effect of Insulator Coated Grid with PreceI Voltage Upon Ion Optics, L. R. Grisham, C. C. Tsai, J. H. Whealton and W.L. Stirling	129	4C6 Inertial Confinement Fusion by High Energy Heavy Ions, R. L. Martin 140	
4B2	Effect of Decel Voltage on Neutral Beam Injector, W. L. Stirling, C. C. Tsai, L. Bromberg, L. R. Grisham, and J. H. Whealton	130	4C7 Nuclear-Pumped Laser Concepts for Laser Fusion or Laser-Heated Solenoid Reactors, D.A. McArthur and J.V. Walker 141	
			4C8-9 New Concepts for High Density Fusion Reactors, F. L. Ribe and R.A. Krakowski 142	
			4C10 Electron Beam Heated Linear Solenoids as Fusion Sources, R. Cooper and J. Benford 143	

	SESSION 4D: LASER-PLASMA INTERACTIONS II	
4D1-2	Laser Fusion Experiments at 10.6 μ m at LASL, R. Perkins	144
4D3	Re-examination of Strongly Flux-Limited Thermal Conduction in Laser Produced Plasmas, S. J. Gitomer, D. B. Henderson and R. N. Remund	144
4D4	Hydrodynamic Stability of Laser-Driven Ablative Implosions, S. J. Gitomer and B. S. Newberger	145
4D5	The Magnetic Radiative Force, J.A. Stamper	146
4D6	Suprathermal Electrons and Self-Generated Magnetic Fields in Laser-Produced Plasmas, D. A. Colombant and D. A. Tidman	147
4D7	Stability at High Laser Intensity D. W. Forslund, J. M. Kindel, K. Lee, and E. L. Lindman	148
4D8	2-D Simulations of CO ₂ Laser Breakdown and Propagation in Hydrogen Gas, L. J. Suter and I. R. Lindemuth	149
4D9	Computational Study of High Compression Pulses for Uniform Spherical Laser Targets, S. Bertke and E. Goldman	150
4D10	Theory and Interpretation of Laser Compression Studies at the University of Rochester, E. I. Thoros, J. Delettrez, and E. B. Goldman	151
4D11	Stability of Laser Imploded Spherical Targets, R. L. McCrory, and R. L. Morse	152
4D12	Experimental and Predicted Trajectories for Laser Irradiated Microshells T. A. Leonard, R. A. Cover, P. M. Campbell and R. A. Grandey	152
4D13	Structure of the Vacuum Interface Sheath of Isothermal Laser Produced Plasmas, R. L. Morse and J. Pearlman	153
	SESSION 5A: PLASMA WAVES, INSTABILITIES, AND ANTENNAS I	
5A1	Experimental Determination of Harmonic Generation Coupling Coefficients Using Bispectral Analysis, Y. C. Kim and E.J. Powers	154
	SESSION 5B: INTENSE ELECTRON AND ION BEAMS II	
5A2	Time- and Frequency-Resolved Spectra of Ion Acoustic Instability, D. B. Illic	155
5A3	Antenna Properties of Probes Used in Ion Acoustic Wave Experiments, T. Christensen, N. Hershkowitz, A. Scheller, and K.E. Lonngren	156
5A4	Mechanism of Reflection and Absorption of Ion-Acoustic Waves in a Density Gradient, O. Ishihara and I. Alexeff	157
5A5	Diffusion Coefficient for Turbulent Plasmas, K. J. Harker	158
5A6	Magnetoacoustic Wave Resonance in a Cylindrical Plasma Column, R. C. Cross and B. D. Blackwell	159
5A7	Evolution of Transverse Instability in a Hollow Cylindrical Weakly-Ionized Plasma Column, H. Kudyan and K. Chung	160
5A8	Nonlinear Aspects of the Electromagnetic Ion-Cyclotron Instability, A. Sternlieb	161
5A9-10	Application of Digital Time Series Analysis Techniques to Plasma Fluctuation Diagnostics, E. J. Powers	162
5A11	Inhomogeneous Beam-Plasma Instability in One and Two Dimensions, W. R. Shanahan	162
5B1	High Power Microwave Emission from a Reflex Triode, R. A. Mahaffey, P. Sprangle, J. Golden and C. A. Kapetanakos	163
5B2	Radially Convergent Proton Beams from a Cylindrical Double Diode, J. Golden R. A. Mahaffey, S. J. Marsh and C.A. Kapetanakos	164
5B3	Computer Simulation of Trapping of a Strong Proton Beam in a Magnetic Mirror Field, S. J. Marsh, A. Drobot, J. Golden, and C.A. Kapetanakos	165
5B4	Design of Magnetically Insulated Intense Ion Diodes, P. Dreike, S. Humphries	166

5B5	Focusing of Ion Beams from a Magnetically Insulated Diode, M. Greenspan, S. Humphries Jr., J. Maenchen and R. N. Sudan	167	5C5	Instabilities of Columnar Metal Vapor Arcs at Current Levels up to 67kA, J. V. R. Heberlein and J. G. Gorman	178
5B6-7	Transport and Focusing of Hot Neutralized Ion Beams, D. Mosher	167	5C6	Diffuse Vacuum Arcs, J. A. Rich and C. P. Goody,	179
5B8	Ballistic Focusing of Intense Ion Beams, S. J. Stephanakis, G. Cooperstein, S. A. Goldstein, D. Mosher, and W. F. Oliphant	168	5C7	Temperature in Vacuum Arc Plasmas, D. M. Benenson and W. H. Crompton, Jr.	180
5B9	Pinching, Rotating and Reflexing Phenomena in REB Diodes Using Annular Cathodes Immersed in Axial Magnetic Fields, G. Cooperstein, S. A. Goldstein, J. J. Condon, and S. J. Stephanakis	169	5C8	Computer Analysis of the Anode Region of High Intensity Arcs, C. H. Liu, S. V. Patankar and E. Pfender	181
5B10	Intense Relativistic Electron Beam Oscillations in a Converging Magnetic Gradient, D. A. Phelps, R. W. Clark, J. E. Rauch, and P. Korn	170	5C9	Initiation and Performance Characteristics of a Transferred Arc, H. Mercure, K. Dimoff, and B. Jean	182
5B11	Operation of Reflex Triodes Without Impedance Collapse, S. A. Goldstein, J. Golden, R. A. Mahaffey, and R. Lee	171	5C10	Magnetic-Helical-Arc Gaseous Electrode for MHD Generators, E. P. Scannell and M. T. Dooley	183
5B12	Generation of an Intense Slow Space Charge Wave on a Relativistic Electron Beam and its Application to Collective Ion Acceleration, G. Gammel, J. A. Nation and M.E. Read	172	SESSION 5D: LASER-PLASMA INTERACTIONS III		
5B13	Collective Ion Acceleration in Intense Relativistic Electron Beams, R. Williams, J. A. Nation and M. E. Read	173	5D1-2	Recent High Power CO ₂ Laser-Plasma Investigations, M. C. Richardson,	184
5B14	Computer Simulation of the Localized Pinch Model of Collective Ion Acceleration, B. B. Godfrey, R.J. Faehl, W. R. Shanahan and L. E. Thode	174	5D3	Angular Dependence of Laser Energy Absorption in Planar Geometries, J. S. Pearlman	184
SESSION 5C: PLASMA SCIENCE OF CIRCUIT INTERRUPTION AND ARC TECHNOLOGY					
5C1	Explosively Actuated 100 kA Opening Switch for High Voltage Applications, R. D. Ford and I.M. Vitkovitsky	175	5D4	Laser-Related Spatial Distribution of Plasma Expansions, M. K. Matzen and J. S. Pearlman	185
5C2	The Dielectric Recovery Strength of Vacuum Gaps Following High Current A.C. Arcing, J. G. Gorman	176	5D5	Experimental Results from Various Cryogenic Spherical Shell Targets, R. R. Johnson, T. M. Henderson and D. L. Musinski	186
5C3	Current Zero Model Calculations of Gas Blast Arcs, R. E. Kinsinger,	176	5D6	Anomalous Interaction of Laser with Plasma, M. Matoba, N. Yamaguchi, J. Mizui, K. Yoshida, T. Sasaki, Y. Kato, T. Yamanaka, S. Nakai and C. Yamanaka	187
5C4	Liquid-Metal Plasma Valves for High-Power Conversion and Switching, W. O. Eckhardt	177	5D7	Polymer Shells in Laser Fusion, R.L. Nolen, Jr., L. B. Kook, and M. A. Ebner	188
			5D8	An Apparatus for Producing Cryogenic Fuel Configurations in Polymeric Laser Fusion Targets, D. L. Musinski, T.M. Henderson and R. J. Simms	189
			5D9	CO ₂ Laser Irradiation of Solid Targets in High Magnetic Fields, W. Halverson, N. G. Loter, W. W. Ma, and R. W. Morrison	190
			5D10	Layered Target Experiments from 10 μm Laser Produced Plasmas, K. B. Mitchell	191

5D11	An Edge Effect in Laser Beam Thermal Coupling Due to Plasma Growth, W.E. Maher and R. B. Hall	192	6A6	Investigation of Possible Lower Hybrid Emission from the NASA Lewis Bumpy Torus Plasma, R. Mallavarpu and J. R. Roth	206
5D12-13	Generation of Short Pulses for Laser Fusion in an Actively Mode-Locked Nd:YAG Laser, D. J. Kuizenga	193	6A7	On the Stability and Breaking of Plasma Bunches, S. V. Temko	207
POSTER SESSION: WEDNESDAY					
W1	Steady State Ablation Model of Laser Target Slabs, F. S. Felber	194	6A8	Experimental Study of Time-Evolution of Parametrically Excited Instabilities in a Magneto Plasma, T. Q. Yip, S.P. Kuo and B. R. Cheo	208
W2	Quiescent Magnetized Penning Discharge S. Friedman, L. Jerde, W. Carr, M. Seidl	194	6A9	Parametric Decay Instabilities in a Uniform Magnetoplasma, S. P. Kuo and B. R. Cheo	209
W3	Radiofrequency Ionization of Helium with Flow at Intermediate Pressures, M. E. Talaat	195	6A10	Saturation of Parametric Instability Due to Anomalous Diffusion Process, S. P. Kuo and B. R. Cheo	210
W4	Optimization of Confinement in a Toroidal Plasma with Strong Applied Radial Electric Fields, J. R. Roth	196	6A11	Landau Damping for Students, I. Alexeff	211
W5	The Effects of Surface Contamination on the Plasma Density in an Electromagnetic Trap, B. Bergevin, J. M. Larsen, and B.L. Stansfield	197	SESSION 6B: INTENSE NEUTRAL BEAMS FOR FUSION RESEARCH I		
W6	Nonneutral Plasma Expansion, K.E. Lonngren	198	6B1	Experimental Results of Beam Direct Conversion, W. L. Barr, R. W. Moir, G. W. Hamilton, and J. D. Kinney	212
W7	Resistivity Enhancement by Low Frequency Self-Modulation of Electron Plasma Modes, A. Hirose	199	6B2	Beam Direct Conversion for Fusion Injection at Energies Above 100 keV, G. W. Hamilton, W. L. Barr and R. W. Moir	213
W8	2D MHD Calculations of the LLL Plasma Focus, S. Maxon	200	6B3-4	Development of a Neutral-Beam System for TFTR, K. H. Berkner	214
W9	Numerical Studies of the LLL Plasma Focus, J. L. Eddleman	201	6B5	Theoretical Model of the Berkeley Multifilament Source, L. Bromberg and L. D. Smullin	214
SESSION 6A: PLASMA WAVES, INSTABILITIES, AND ANTENNAS II					
6A1-2	Absorption and Mode Conversion of Lower Hybrid Waves in Inhomogeneous Magnetic Fields, T-W.Tang,	202	6B6	The Neutral Beam Power Supply Development Program at the Lawrence Berkeley Laboratory, D. B. Hopkins, W. R. Baker and H. M. Owren	215
6A3	Ray Tracing for Electrostatic Wave Propagation in Toroidal Geometry, W.D. Getty and J. E. Stevens	203	6B7	Arc Snubbers for Very Large Steady State, Neutral Beam Injectors as Required by Mirror Reactors, J. H. Fink	216
6A4	Finite-Sized Source Focusing of Lower-Hybrid Waves in Tokamak Plasmas, P. L. Colestock and K.A. Connor	204	6B8	Neutral Beam Line Upgrade on LITE, T. L. Churchill	217
6A5	Stabilization of Drift Instabilities by Radio Frequency Electric Fields at the Lower Hybrid Frequency, R. Gore and H. Lashinsky	205			

**SESSION 6C: PLASMA FOCUS AND
EXPLODING WIRES**

6C1	Experimental Results from the AFWL SHIVA Pulsed Radiation Source Experiment, W. L. Baker, M. C. Clark, J.H. Degnan, G. F. Kiuttu, T. C. May, C. R. McClenahan and R.E. Reinovsky	218	6D4	Conceptual Design Studies for Radially Stacked Drum-Type Homopolar Generators for Tokamak Ohmic Heating Coils, R. L. Kustom, R. E. Fuja, R. P. Smith, and R. B. Wehrle	230
6C2	Numerical Simulation of the Non-linear Evolution of an Exploded Wire Plasma, T. W. Hussey, N. F. Roderick, and R. J. Faehl	219	6D5	Active Control of Energy Transfer Rates Between Superconducting Coils Using Inductor-Convertor(I-C) Bridges, R. L. Kustom, R. P. Smith, R. E. Fuja, T. J. Bauer, J. M. De Olivares and A. G. Kellman	230
6C3	Non Linear Diffusion in Exploding Wires, O.S.F. Zucker and P. Koert	2	6D6	Fast Switching of Magnetically Stored Energy Into External Loads, L. Demeter, J. Benford, and V. Bailey	231
6C4	Energy Spectrum of Deuteron-Ion Beams from a Plasma Focus Discharge, W. H. Bostick, V. Nardi and W. Prior	220	6D7	Inductively Charged Pulse Lines, D. Conte, R. Ford, W. H. Lupton, J. D. Shipman, Jr., P. Turchi and I. M. Vitkovitsky	232
6C5	X-Ray Emission from Plasma Focus in Puffed Gas, D. C. Gates	221	6D8	Measurement of Energy Losses in Superconducting Magnetic Energy Storage Coils, J. D. G. Linday, J. D. Rogers, C. E. Swannack, and D. M. Weldon	233
6C6	Operating Characteristics of Argon Filled Plasma Focus, K. Liu, P.C. Wang and M. Eisner	222	6D9-10	Pulsed Power Conversion with Inductive Storage, M. Cowan, E. C. Cnary, W. B. Leisher, W. K. Tucker, and D. L. Wesenberg	233
6C7-8	Plasma Focus Experiments at the University of Stuttgart, G. Decker	222	6D11	Design Considerations for Large Superconducting Energy Storage Magnets, S. W. Van Sciver and R. W. Boom	234
6C9	A Staged Plasma Focus, J. H. Lee, D. R. McFarland, and W. L. Harries	223	6D12	Vacuum Arc Experiments Associated with Fusion Switch Development, J. G. Gorman, J. V. R. Heberlein, C. W. Kimblin and P. G. Slade	235
6C10	Formation of Current Sheets in a Staged Plasma Focus, W. L. Harries, J. H. Lee, and D. R. McFarland	224	6D13	Interruption of High DC Currents, R. W. Warren	236
6C11	X-Ray and Neutron Emission from a Staged Plasma Focus, D. R. McFarland J. H. Lee, and W. L. Harries	225			
6C12	A Proposed Mechanism of Filament Formation in Plasma Focus Systems, D. Y. Cheng, C. N. Chang, and P. P. Tripathi	226			

SESSION 6D: ENERGY STORAGE

6D1	Optimization of Inertial-Inductive Stores, A. E. Robson	227
6D2	10 MJ Model Fast Discharging Homopolar Machine, R. E. Stillwagon, D. C. Litz and L. N. Wedman	228
6D3	1.5 MA, 10-MJ Load Coil for a Pulsed Homopolar Machine, H. F. Vogel, P. Thullen and K. D. Williamson, Jr.	229
