Contents

INTRODUCTION v

PAPERS

Covariant Dispersion Theory for a Collisionless Plasma in a Uniform Field
O. Buneman, Stanford University, Stanford, California **1**

Symmetries of a Relativistic Plasma
B. Kursunoglu, University of Miami, Coral Gables, Florida **25**

Causality and Relativistic Plasma
R. M. Santilli, University of Miami, Coral Gables, Florida **33**

Energy and Momentum of Waves in Non-Uniform Plasmas
O. Buneman, Stanford University, Stanford, California **41**

Supra-Luminous Plasma Waves and Radiation from Density Inhomogeneities
I. Lerche, University of Chicago, Chicago, Illinois **101**

Resonant Wave Particle Effects and the Isotropy of the Galactic Cosmic Ray Gas

I. Lerche, University of Chicago, Chicago, Illinois **155**

Electron-Cyclotron Heating by 8mm Microwave Power in the Magnetic Facility ELMO
R. Dandl, Oak Ridge National Laboratory, Oak Ridge, Tennessee **181**

Fast Numerical Procedures for Computer Experiments on Relativistic Plasmas
O. Buneman, Stanford University, Stanford, California **205**

The Injection of Relativistic Electrons into Astron
P. B. Weiss, University of California, Livermore, California **221**

REVIEW SESSIONS **235**

SYMPOSIUM PARTICIPANTS **237**

REFERENCES **239**
