

CONTENTS

Preface	ix
List of Participants	xiii

Part I. INERTIAL CONFINEMENT FUSION

A. PARTICLE BEAM FUSION

**Chairman: T. W. Mark (Lawrence Livermore National Laboratory,
Livermore, California)**

Heavy Ion Two Stream	3
K. A. Brueckner	
Inertial Confinement Fusion Using Light Ion Beams	7
D. L. Cook, J. E. Bailey, K. W. Bieg, D. D. Bloomquist, R. S. Coats, G. C. Chandler, M. E. Cuneo, M. S. Derzon, M. P. Desjarlais, P. L. Dreike, R. J. Dukart, R. A. Gerber, D. J. Johnson, R. J. Leeper, T. R. Lockner, D. H. McDaniel, J. E. Maenchen, M. K. Matzen, T. A. Mehlhorn, L. P. Mix, A. R. Moats, W. E. Nelson, T. D. Pointon, A. L. Pregoner, J. P. Quintenz, T. J. Renk, S. E. Rosenthal, C. L. Ruiz, S. A. Slutz, R. W. Stinnett, W. A. Stygar, G. C. Tisone, J. R. Woodworth, and J. P. VanDevender	
Impedance Characteristics of Terawatt Ion Diodes	18
C. W. Mendel, Jr., M. P. Desjarlais, T. D. Pointon, J. P. Quintenz, S. E. Rosenthal, D. B. Seidel, and S. A. Slutz	

B. LASER-DRIVEN FUSION

**Chairman: K. A. Brueckner (University of California, San Diego,
La Jolla, California)**

Relativistic Plasma Physics with Ultra-High-Brightness Lasers	35
C. B. Darrow, E. M. Campbell, M. D. Perry, C. Joshi, C. Clayton, T. Katsouleas, W. B. Mori, and K. Marsh	
Electron Kinetics in Laser-Driven Inertial Confinement Fusion	43
E. M. Epperlein	
Laser-Driven Instabilities in Inertial Confinement Fusion	54
W. L. Kruer	
Recent Trends in Inertial Confinement Fusion (Abstract and Viewgraph Material).....	69
R. L. McCrory, Jr.	
The LLNL ICF Program: Recent Progress Toward Inertial Confinement Fusion (Extended Abstract).....	99
E. Storm	

Part II. MAGNETIC FUSION

Chairman: R. C. Davidson (Massachusetts Institute of Technology,
Cambridge, Massachusetts and Princeton University,
Princeton, New Jersey)

A. TOROIDAL MAGNETIC CONFINEMENT

Radiation from Mildly Relativistic Electrons in Tokamaks	103
N. J. Fisch	
Status of Magnetic Fusion.....	111
D. M. Meade	

B. ALTERNATIVE MAGNETIC CONFINEMENT

A D-He³ Fusion Reactor Based on a Dipole Magnetic Field (Abstract)	115
A. Hasegawa	
Large Orbit Confinement for Aneutronic Systems	116
N. Rostoker and H. Rahman	

C. MHD TURBULENCE AND TRANSPORT

Effect of the Equilibrium Magnetic Field on Plasma Edge Fluctuations	137
B. A. Carreras, J. N. Leboeuf, D. K. Lee, J. A. Holmes, and V. E. Lynch	
Gyrokinetic Simulation Studies of Nonlinear Drift Wave Behavior	147
A. M. Dimits and W. W. Lee	
Ideal and Resistive MHD Equilibria and States of Minimum Dissipation	168
X. Shan, H. Chen, and D. Montgomery	
Three-Dimensional Simulations of Simple Electron Drift Wave Turbulence in Tokamak Geometry	198
R. E. Waltz	

Part III. RELATIVISTIC PARTICLE BEAMS

Chairman: A. M. Sessler (Lawrence Berkeley Laboratory,
Berkeley, California)

Plasma Focusing and Diagnosis of High Energy Particle Beams	219
P. Chen	
The Physics and Applications of Modulated Intense Relativistic Electron Beams	234
M. Friedman, V. Serlin, Y. Y. Lau, and J. Krall	
Test-Particle Motion in a Relativistic Plasma	242
Ph. de Gottal and J. Gariel	
Remarks on Short Wavelength Free Electron Lasers	256
C. Pellegrini	
Intense Electron Beam and Free Electron Lasers (Abstract)	268
D. Prosnitz	
The Beam-Beam Interaction (Abstract)	269
J. S. Wurtele	

Part IV. COHERENT RADIATION GENERATION AND PARTICLE ACCELERATORS

**Chairmen: S. L. Ossakow (Naval Research Laboratory, Washington, D.C.)
C. Pellegrini (University of California, Los Angeles,
Los Angeles, California)**

Chaotic Electron Motion Induced by Transverse Field Inhomogeneities in Free Electron Lasers.....	273
C. Chen and R. C. Davidson	
Nonlinear Wakefields and Optical Guiding of Intense Laser Pulses in Plasmas.....	298
E. Esarey, P. Sprangle, and A. Ting	
Rapid Heating of Solids by Ultra-Short Pulse Lasers	311
R. W. Falcone, M. M. Murnane, and H. C. Kapteyn	
Two-Laser Approach to Shorter Wavelength X-Ray Lasing	314
N. Fisch, W. Tighe, E. Valeo, and S. Suckewer	
Theory of Generation of Radiation by a Beam-Plasma System (Extended Abstract).....	325
N. A. Krall and M. Rosenberg	
On the Eulerian Analysis of Large Amplitude Relativistic Plasma Waves	327
W. P. Leemans and C. Joshi	
Mode Competition Effects in Free Electron Lasers and Gyrotrons	340
B. Levush and T. M. Antonsen	
Optical Guiding in a High Brightness Limit (Abstract).....	350
J. M. J. Madey	
Nonlinear Plasma and Beam Physics in Plasma Wake-Fields.....	351
J. B. Rosenzweig	
A Continuous Plasma Final Focus.....	387
D. H. Whittum	
Novel Plasma-Based Frequency Upshift Methods for Short Pulse Lasers	402
S. C. Wilks, J. M. Dawson, and W. B. Mori	

Part V. NONNEUTRAL PLASMAS

**Chairman: T. M. O'Neil (University of California, San Diego,
La Jolla, California)**

Large-Amplitude Coherent Structures in Nonneutral Plasmas with Circulating Electron Flow	425
R. C. Davidson, H. W. Chan, C. Chen, and S. Lund	
Wave and Vortex Dynamics in Pure Electron Plasmas	454
C. F. Driscoll	
Pure Ion Plasmas, Liquids and Crystals	460
D. H. E. Dubin and T. M. O'Neil	
Use of the Positron as a Plasma Particle	465
C. M. Surko and T. J. Murphy	

**Part VI. UPPER ATMOSPHERIC, SPACE
AND ASTROPHYSICAL PLASMAS**

Chairman: V. Patel (Naval Research Laboratory, Washington, D.C.)

Theory and Simulation of Discrete Packets $F_s(t)$ of Waves of Pc-1	
Micropulsations Generated in the Magnetosphere	485
Ya. L. Alpert	
Hamiltonian Test Particle Dynamics in a Perturbed Magnetic Dipole Field	526
A. A. Chan, A. Brizard, and L. Chen	
Dynamo Activity and Turbulent Viscosity in Accretion Disks (Abstract)	536
P. H. Diamond, E. T. Vishniac, and L. Jin	
Chaos in Driven Alfvén Systems	537
T. Hada, C. F. Kennel, B. Buti, and E. Mjølhus	
Nonlinear Dynamic Phenomena in the Magnetosphere and Ionosphere	
Involving Interactions Between Large and Small Scale Processes (Abstract)	543
P. J. Palmadesso	
Recent Developments in Ionospheric Modifications by Radio Waves.....	544
K. Papadopoulos	
Ion Dynamics and Ozone.....	586
A. Y. Wong, R. F. Wuerker, J. Sabutis, R. Suchannek, C. D. Hendricks, and P. Gottlieb	

**Part VII. NONLINEAR ELECTROMAGNETIC
WAVE-PLASMA INTERACTION**

**Chairman: N. J. Fisch (Princeton Plasma Physics Laboratory,
Princeton, New Jersey)**

Recent Applications of Bifurcation Theory to Nonlinear Waves in Collisionless Plasmas	601
M. Buchanan, J. P. Holloway, and J. J. Dorning	
Dynamics of Cavitons in Strong Langmuir Turbulence	627
D. F. DuBois, H. A. Rose, and D. Russell	
Guiding Center Stochasticity and Transport Induced by Electrostatic Waves	670
K. Kupfer, A. Bers, and A. K. Ram	
Solitons and Chaos in Resonance Absorption of EM Waves in Inhomogeneous Plasmas	716
C. S. Liu, W. Shyu, P. N. Guzdar, H. H. Chen, and Y. C. Lee	
Kinetic Nonlinearities in Nonuniform Plasmas	731
G. J. Morales and J. E. Maggs	
Index of Contributors	753
Key Word Index.....	755
