

CONTENTS

Preface	ix
List of Participants	xiv

Part I. TARGETS, DRIVERS, AND REACTORS

Chairmen: K. A. Brueckner

University of California, San Diego,
La Jolla, California

S. W. Haan

Lawrence Livermore National Laboratory,
Livermore, California

Y. Kitagawa

Institute of Laser Engineering, Osaka, Japan

N. A. Krall

Krall Associates, Del Mar, California

W. B. Thompson

University of California, San Diego,
La Jolla, California

Reasons that Laser Fusion Provides a Physics Solution for Clean Energy Production which is Less Expensive than Light Water Reactors	3
M. Aydin, L. Cicchitelli, H. Hora, G. Kasotakis, R. Khoda-Bakhsh, E. Kuhn, G. H. Miley, P. Pieruschka, and R. J. Stening	
Laser Driver for Inertial Confinement Fusion	24
N. G. Basov, L. P. Feoktistov, and Yu. V. Senatsky	
Distribution of the Power Flux on a Capsule Enclosed in a Radiating Cavity	38
A. Caruso and C. Strangio	
Modeling of Weakly Nonlinear Hydrodynamic Instabilities in Inertial Fusion	47
S. W. Haan	
Large Growth Rayleigh-Taylor Experiments on Nova	65
B. A. Remington, S. W. Haan, S. G. Glendinning, J. D. Kilkenny, D. H. Munro, and R. J. Wallace	
Brief Summary of the International Symposium on Heavy Ion Inertial Fusion	77
T. J. Fessenden	
Target Development and Laser Fusion Experiments	78
R. R. Johnson	
High-Density Compression Experiments and Reactor Design at ILE, Osaka	94
Y. Kitagawa, K. Mima, H. Azechi, H. Takabe, S. Nakai, C. Yamanaka, and M and GOD Groups	
The Effect of Beam Instabilities on Ion Diode Behavior	108
N. A. Krall	
Longitudinal Instability of Induction Linac Drivers	138
E. P. Lee	
On Aspects of Advanced Fuel Fusion for ICF	145
George H. Miley	

Proton Beam Fusion: Beam Propagation and Focusing	175
K. Niu	
High Gain Targets for Heavy Ions; Direct Drive Approach and Considerations on Reactor Chamber	185
G. Velarde, J. M. Martínez-Val, and J. M. Perlado	
Recirculating Induction Accelerator as a Low-Cost Driver for Heavy Ion Fusion	205
J. J. Barnard, M. A. Newton, L. L. Reginato, W. M. Sharp, H. D. Shay, and S. S. Yu	
 Part II. DRIVER-PLASMA INTERACTION: DRIVER ENERGY ABSORPTION AND SCATTERING. GENERATION OF SUPRATHERMAL PARTICLES, HARMONICS, AND QUASISTATIONARY MAGNETIC FIELDS	
 Chairmen: M. G. Haines	
Blackett Laboratory, Imperial College, London, U.K.	
T. W. Johnston	
INRS Énergie, Québec, Canada	
V. P. Silin	
P. N. Lebedev Physics Institute, Moscow, Russia	
 Parametric Instabilities with Laser Beam Smoothing	 217
H. A. Baldis	
Stimulated Raman Scattering from Density Cavities in Laser-Produced Plasmas	224
H. C. Barr, T. J. M. Boyd, and A. P. Mackwood	
Stimulated Raman Scattering: Collisional Damping and the Long Wavelength Spectral Gap	235
H. C. Barr, T. J. M. Boyd, and A. P. Mackwood	
Trends in Laser-Plasma-Instability Experiments for Laser Fusion	249
R. P. Drake	
Laser Filamentation in Plasmas	262
E. M. Epperlein	
Challenges to Our Understanding of the Scattering Instabilities of Laser Fusion	277
T. W. Johnston	
 Investigation of the Stimulated Raman Scattering and the Two Plasmon Decay Instabilities and Their Impact on (3/2) Harmonic Generation	 303
J. Meyer	
Laser Plasma Interaction Studies Relevant for Inertial Confinement Fusion	311
O. Willi, T. Afshar-rad, V. Barrow, M. Desselberger, J. Edwards, L. Gizzi, F. Khattak, and S. Viana	
The Transient Behaviour of Stimulated Brillouin Scattering	325
Edward A. Williams and Rebecca R. McGowan	

Part III. TRANSPORT IN LASER FUSION

Chairman: J. M. Perlado

Instituto de Fusión Nuclear, Madrid, Spain

Nonlinear Transport and Magnetic Field Generation	333
M. G. Haines	
Theory of Transport in Laser Plasma	348
V. P. Silin and S. A. Uryupin	

Part IV. ICF DIAGNOSTICS

Chairman: H. Hora

University of New South Wales, Kensington, Australia

Neutral Particle Diagnostics in Laser Plasma Research	369
Y. A. Zakharenkov, A. S. Shikanov, I. G. Lebo, V. B. Rozanov, T. V. Mishchenko, G. V. Shpatakovskaya, Z. Ahmad, and T. A. Hall	
Nonequilibrium Atomic Physics in Laser Fusion	389
Takashi Yabe and Takayasu Mochizuki	

Part V. ABSTRACTS

Rayleigh-Taylor Instability in ICF-Targets	397
S. I. Anisimov	
The NIKE Laser Program and its Test of the Direct-Drive Concept	398
S. Bodner, J. Gardner, R. Lehmberg, and S. Obenschain	
Linear and Nonlinear Evolution of Instabilities in Applied-B Ion Diodes	399
M. P. Desjarlais	
The Design of 200 kJ Nd: Glass Laser System for ICF	400
N. G. Kovalsky and M. I. Pergament	
ICF Reactor Design for KrF and HIB Drivers	401
M. J. Monsler	
Index of Contributors	403
Index of Names	405
Key Word Index	407
