

42688 196.1.家備  
 PC-STE  
 (1986)i

Contents

Session I (Reviews)

1. Recent Experiments of Heliotron E	O. Motojima (Kyoto Univ.)	... 9
2. Overview on W VII-A experimental results and status of W VII-AS.	H. Renner (IPP, F.R.G.)	... 23
3. Stellarator Research in the General Physics Institute	L. Kovriznykh (Levedev, U.S.S.R.)	... 43
4. Status of ATF Program	J. Lyon (ORNL, U.S.A.)	... 50
5. Report on 'Progress in Stellarator/Heliotron Research: 1981-1986 document'	J. Lyon (ORNL, U.S.A.)	... 69

Session II (Experiments)

6. Experimental Results from Heliac SHEILA	S.M. Hamberger (Australia National Univ., Australia)	... 83
7. Recent Progress in the IMS Device	D. Anderson (Univ. of Wisconsin, U.S.A.)	... 91
8. ECRH Experiments with O and X mode	V. Erckmann (IPP, F.R.G.)	...104
9. Measuremet of orbit losses during NI in WV II-A and quantitative comparison withcode calculations	H. Ringler (IPP, F.R.G.)	...111
10. Experimental results with W VII-A in Torsatron modeof operation	H. Renner (IPP, F.R.G.)	...120
11. ICRF Experiment of Heliotron E	T. Mutoh (Kyoto Univ.)	...131
12. NBI Experiment of Heliotron E	F. Sano (Kyoto Univ.)	...140
13. Scaling of Heliotron E currentless plasmas	M. Murakami (ORNL, U.S.A.)	...148
14. Impurity Transport Study in Heliotron E	H. Kaneko (Kyoto Univ.)	...155
15. Pellet Injection Experiment in Heliotron E	S. Sudo (Kyoto Univ.)	...161
16. Density Fluctuations in Heliotron E	H. Zushi (Kyoto Univ.)	...170
17. ECRH Experiment of Heliotron E	M. Sato (Kyoto Univ.)	...177
18. Particle Confinement Studies in	K. Muraoka (Kyushu Univ.)	...188

Heliotron E Using Balmer Laser  
Fluorescence Spectroscopy Tuned at  
Balmer Alpha

Section III (Experiments)

1. H-DR Experiment	S. Morimoto (Kyoto Univ.)	...197
2. SHATLET-M experiment	H. Ohsaki (Tokyo Univ.)	...205
3. Carbonization of Heliotron E	N. Noda (Kyoto Univ.)	...213
4. Measurements of Magnetic Surface of Heliotron E	R. Takahashi (Kyoto Univ.)	...220
5. A Novel Technique for Studying Stellarator Magnetic Surfaces	O.S. Pavlichenko (Kharkov, U.S.S.R.)	...233
6. Magnetic Surface Mapping with an Emissive Diode Technique in the Auburn Torsatron	D.G. Swanson (Auburn Univ., U.S.A.)	...238
7. Tokamak-Stellarator Hybrid Configurations in CLEO	T.N. Todd (Culham Lab., U.K.)	...246
Section IV (Near term experiments)		
8. Flexible Heliac Configuration Studies	T.C. Hender (Culham Lab., U.K.)	...255
9. Status of TJ-II Device	J. Guasp (TJ-II Group) (JEN, Spain)	...263
10. Design and Construction of the Heliac H-1	S.M. Hamberger (Australiana National University, Austraria)	...271
11. Optimization of the Magnetic Geometry of Heliac H-1	L.E. Sharp (Australiana National University, Austraria)	...278
12. Design studies of Compact Helical System	M. Fujiwara (Nagoya Univ.)	...288
13. $\ell=2$ Torsatron with an additional Toroidal Field	O.S. Pavlichenko (Kharkov, U.S.S.R.)	...300
14. GA Stellarator Studies	T. Ohkawa (GA Technologies, U.S.A.)	...305
