

CONTENTS

Foreword	v
Preliminary Report on the FN Dense Plasma Focus <i>F. Castillo & J.J. Herrera</i>	3
BATAN PFFF <i>W. Usada & Suryadi</i>	15
Numerical Design of Plasma Focus Optimization <i>M. Zakauallah, T.J. Baig & G. Murtaza</i>	23
A Small Plasma Focus Device for Neutron, X-Ray and Electron Beam Studies <i>T.Y. Tou, K.H. Kwek, Y.C. Yong & S. Lee</i>	46
A TEA Nitrogen Laser for Optical Diagnostics of the Plasma Focus <i>K.H. Kwek, T.Y. Tou & S. Lee</i>	55
Neutron Yield Scaling Laws for Plasma Focus Devices <i>Maria Milanese & Jorge Pouzo</i>	66
Limits of Deuterium Pressure Range with Neutron Production in Plasma Focus Devices <i>J. Pouzo, D. Cortázar, M. Milanese, R. Moroso & R. Piriz</i>	80
Design of a Small Plasma Focus Facility <i>M. Zakauallah, S.A.H. Rizvi, F.N. Baig & S. Beg</i>	101
Intensity of Focus in Various Gases <i>A.J. Smith & A.V. Gholap</i>	105
The Design, Construction and Performance Studies of a Linear Z-Pinch for Current-Stepping Experiments <i>S.H. Saw, C.S. Wong & S. Lee</i>	116
Spectroscopic Temperature Measurements in Theta-Pinch <i>M.A. Eissa, W. Sharkawy & A.H. Saudy</i>	129
Study of the Dark Pause Phenomenon in a Low Cost Exploding Wire Experiment <i>R. Bressa, G. Chatelain, M. Lester & J. Pouzo</i>	139
Experimental Investigation of Electron Beam Formation in High-Voltage Low-Pressure Linear Discharges <i>M. Favre, L. Arroyo, P. Choi, H. Chuaqui & E. Wyndham</i>	157

A DC Magnetron Plasma Sputtering Experiment <i>Chaivitya Silawatshananai</i>	173
Development of a Simple DC Plasmatron for Plasma Arc Metallurgy <i>Chaivitya Silawatshananai</i>	186
Design and Construction of a High Current Ion Source for Basic Plasma Studies <i>Henry J. Ramos</i>	202
A Study of the Dissociation of CO ₂ by Electron Impact <i>Muhammad Shafiq</i>	223
The Electron Quenching of Re-Formation of CO ₂ in a DC Glow Discharge <i>Muhammad Shafiq</i>	240
Effects of the Imposed Pressure Differential Conditions on Duoplasmatron Performance <i>Ahmet Ostarhan</i>	247
Measurements of the Electron Temperature, Density and the Plasma Potential by Probe Techniques <i>Ahmet Ostarhan</i>	264
Study of Inhomogeneous Structures in Laser-Produced Plasmas <i>Jiang Zhiming, Xu Zhizhan, Meng Shaonian, Zhang Weiqing, Lin Lihuang, Cheng Shisheng & Bi Wuji</i>	278
Measurement of Anomalous Electron Thermal Conductivity on CT-6B Tokamak <i>Li Weiqiang, Qi Xiaozhi & Wang Long</i>	293
Lower Hybrid Current Drive Experiment in Linear LISA Machine <i>R.Y. Honda, C. da C. Rapozo, N.L.P. Mansur, A.S. Assis, & P.H. Sakanaka</i>	300
Lower Hybrid Resonance Heating in the Linear Machine - LISA <i>C. da C. Rapozo, J.C. Xavier & R.Y. Honda</i>	308
Radio Frequency Current Drive Project in the Toroidal Machine Dinnamare <i>Altair S. de Assis & Cândido C. Rapozo</i>	322
Two Fluid Model with Reflected Ion for Theta Pinch <i>A.C.J. Paes & J. Busnardo-Neto</i>	334

Motion of Charged Particles in a Hard-Core Theta-Pinch <i>A.M. Hussein, E.A. El-Warraki & K.E. Zayed</i>	344
Magnetohydrodynamic Stability of Tokamak Plasmas with Poloidal Mode Coupling <i>Hisataki Shigueoka & Paulo Hiroshi Sakanaka</i>	353
Nonlinear Rayleigh-Taylor Stability of a Fluid Layer between Homogeneous Magnetic Fields <i>D.K. Callebaut, M.H. Obied Allah & A.H. Khater</i>	363
