List of participants.....	XIII
F. TROYON - Introduction.....	XXI
IDEAL AND RESISTIVE MHD EQUILIBRIUM AND STABILITY	
J. NÜHRENBURG and R. ZILLE - On the transition from quasi-helical to helical symmetry.....	3
T. HAYASHI - Ergodization of magnetic surfaces due to finite β effect in a helical system.....	11
E. MINARDI - Privileged magnetic equilibria of the plasma based on the entropy principle.....	25
V. V. MIRNOV - Equilibrium and stability of axisymmet- ric open traps.....	41
A. BONDESON and R. IACONO - Plasma stability in the presence of mass flow.....	57
A. SYKES and T. N. TODD - Studies of the small-aspect- ratio torus concept.....	77
C. SCHWAB - Non-local test functions in MHD unstable 3D stellarators.....	85
D. V. ANDERSON, A. COOPER, U. SCHWENN and R. GRUBER - Linear MHD stability analysis of toroidal 3D equilib- ria with TERPSICHORE.....	93
H. WOBIG and R. A. SCARDOVELLI - Resistive ballooning modes in stellarator geometry.....	103
J. MORROS TOSAS and E. K. MASCHKE - Properties of non- linear solution branches of reduced MHD equations....	113
R. D. PARKER and R. L. DEWAR - Nonlinear dynamics and saturation of a resistively unstable current sheet...	123
G. VLAD and A. BONDESON - Numerical simulations of saw- tooth activity in tokamaks.....	141
H. J. DE BLANK and T. J. SCHEP - Flow patterns of the internal $m=1$ mode in toroidal plasmas with a low shear $q=1$ region.....	159

R. FITZPATRICK - On the stability of equilibria with unorthodox $q(r)$ profiles to the resistive internal kink mode.....	167
A. ROY and F. TROYON - Ideal MHD stability of a circular cross-section tokamak. Optimisation of the current profile.....	175
R. IACONO, A. BONDESON, F. TROYON and R. GRUBER - Axisymmetric toroidal equilibrium with flow and anisotropic pressure.....	191
L. C. WOODS - Density limits in tokamaks: theory and observation.....	203
C. G. GIMBLETT, T. C. HENDER and R. PACCAGNELLA - MHD stability of the RFP with a resistive wall.....	211
K. KUSANO and T. SATO - Simulation study of self-sustainment mechanism for the reversed-field pinch configuration.....	217
MICROINSTABILITIES	
R. B. WHITE, M. N. BUSSAC and F. ROMANELLI - High beta, sawtooth-free tokamak operation using energetic trapped particles.....	227
S. BRIGUGLIO - Semicollisional microinstabilities in the presence of a magnetic separatrix.....	241
C. Z. CHENG, G. Y. FU and J. W. VAN DAM - Toroidal Alfvén wave stability in ignited tokamaks.....	259
F. ROMANELLI and S. BRIGUGLIO - Toroidal semi-collisional microinstabilities and anomalous electron and ion transport.....	271
W. M. TANG and T.S. HAHM - Microinstability theory for high confinement tokamak plasmas.....	281
K. ELSASSER - Thermal-resistive instability of a low-plasma.....	289
A. JARMEN - Dissipative trapped electron effects on toroidal ion temperature gradient driven modes.....	301
X. GARBET, L. LAURENT, F. MOURGUES, J. P. ROUBIN and A. SAMAIN - Non linear microtearing modes.....	309
D. V. ANDERSON, D. E. SHUMAKER and E. J. HOROWITZ - Plasma simulation in 3D from parallel computing-modeling of the tilt instability.....	319
LIU CHEN - On resonant excitations of high-n magnetohydrodynamic modes by energetic/alpha particles in tokamaks.....	327

THEORIES OF TRANSPORT	
T. E. STRINGER - Comparison of predicted and measured heat transport in JET.....	341
L. M. KOVRIZHNYKH - The simplest self-consistent model of anomalous electron transport on toroidal systems..	363
H. E. MYNICK and R. B. WHITE - Alpha particle losses in tokamaks.....	385
L. M. KOVRIZHNYKH, S. G. SHASHARINA and YU. A. VOLKOV - Monte-Carlo simulation of ripple transport in stellarator.....	401
W. KERNER, D. PFIRSCH and H. WEITZNER - Tokamak transport based on the Braginskii model.....	409
G. W. HULBERT and F. W. PERKINS - Nonambipolarity, orthogonal conductivity, poloidal flow, and torque.....	417
R. ALBANESE and O. DE BARBIERI - On the modelling of tokamak discharges.....	427
C. D. BEIDLER - Analytic solution of the bounce-averaged Fokker-Planck equation for Wendelstein VII-X....	435
A. NOCENTINI, H. L. BERK and J. E. SEDLAK - Short mean-free-path tokamak transport theory near the separatrix.....	443
J. WEILAND and H. NORDMAN - Transport due to fully toroidal drift waves.....	451
H. NORDMAN and J. WEILAND - Numerical simulation of η_i mode turbulence in tokamaks.....	459
S. GASEK, L. KRLIN and Z. TLUCHOR - On the stochastic interaction of toroidally trapped alpha-particles with LHW in tokamak-reactor regime.....	467
P. N. GUZDAR, C. S. LIU and J. Q. DONG - Thermal equilibria of detached plasmas and density limits.....	475
W. HORTON, B.-G. HONG, T. TAJIMA and N. BEKKI - Short wavelength temperature gradient driven drift wave turbulence in tokamaks.....	483
M. OTTAVIANI, F. ROMANELLI, R. BENZI, M. BRISCOLINI, P. SANTANGELO and S. SUCCI - Numerical simulation of ion temperature gradient driven turbulence.....	489
J. F. DRAKE, A. B. HASSAM, A. M. DIMITS and P. N. GUZDAR - Temperature gradient modes, streamers, and anomalous transport.....	497
A. BHATTACHARJEE and E. HAMEIRI - Turbulent magnetic diffusion in tokamaks and reversed - field pinches...	505

RF HEATING AND CURRENT DRIVE

M. TANAKA - Macroscale particle simulation and its application to plasma heating by kinetic Alfvén waves..	519
D. J. GAMBIER, A. SAMAIN and A. BECOULET - Numerical study of RF fields in tokamaks in the ion cyclotron frequency range.....	537
C. N. LASHMORE-DAVIES and R. O. DENDY - The gyrokinetic approach to radio frequency heating.....	557
E. BARBATO - Propagation and absorption of lower hybrid waves in tokamaks.....	577
B. I. COHEN, R. H. COHEN, W. M. NEVINS, T. D. ROGNLIEN, P. T. BONOLI and M. PORKOLAB - Plasma heating and current drive using intense, pulsed microwaves.....	597
A. M. RUBENCHIK - Nonlinear effects associated with low-hybrid plasma heating and current drive.....	617
I. J. DONNELLY and P. A. WATTERSON - Rotating magnetic field current drive in hot plasmas.....	631
D. FARINA and R. POZZOLI - Up shifted and down shifted electron cyclotron resonances in the lower hybrid current drive regime.....	639
V. PETRILLO, C. MAROLI, C. RICCARDI and G. LAMPIS - Bernstein modes in the E.C. second harmonic range in a wave dynamical approach.....	647
D. VAN EESTER - ICRH study using a 3-D ray-tracing code in combination with a 1-D full wave solution to account for mode conversion.....	655
X. LLOBET, T. HELLSTEN and L. VILLARD - A warm plasma model for ICRF wave propagation in a torus.....	663
M. SPADA and M. BORNATICI - Absorption of lower hybrid waves by fusion generated alpha particles.....	673
D. FARINA and R. POZZOLI - Emission in nonlinear electron cyclotron heating.....	683
D. B. BATCHELOR, E. F. JAEGER and H. WEITZNER - 2D full wave modeling of ICRF with finite $E_{\parallel}$	691
P. U. LAMALLE - Finite element discretization of the ICRF wave equation.....	699
YU. F. BARANOV, E. Z. GUSAKOV and A. D. PILIYA - Resonant slowing-down of lower hybrid waves in tokamak plasmas.....	707
APPENDIX	
List of Authors.....	717
