CONTENTS	
List of participants.....	XI
D. PALUMBO - Welcome address.....	XV
F. TROYON - Introduction.....	XIX
<u>INVITED PAPERS</u>	
=====	
P. R. THOMAS and the JET Team - Tritium experiments in JET.....	3
W. LOTZ and J. NÜHRENBERG - $\alpha$ -particle confinement in stellarators.....	17
Ya. I. KOLESNICHENKO - Behaviour of alpha particles and other fast ions in the plasma with sawteeth.....	27
R. O. DENDY - High frequency radiative instabilities of fusion products - Theory and experiment.....	41
T. E. STRINGER - Neoclassical impurity flux in the presence of anomalous transport.....	55
J. B. TAYLOR - Relaxation in plasmas and natural profiles in Tokamaks.....	69
L. M. KOVRIZHNYKH - Some consequence of stationary solution for transport equations.....	83
W. HORTON, D. LINDBERG, X. SU, J. LIU and P. J. MORRISON - Numerical simulations of turbulence-problem of self-organization.....	107
X. GARBET, L. LAURENT, J. P. ROUBIN and A. SAMAIN - Non linear electrostatic turbulence.....	119
Z. YOSHIDA - Anomalous dissipations associated with the magnetohydrodynamic relaxation.....	133
R. FITZPATRICK - Non-linear theories of interacting magnetic islands.....	147
F. PORCELLI - Collisionless magnetic reconnection in laboratory plasmas.....	161
C. F. F. KARNEY - Neutral gas modeling in divertors....	183

B. SCOTT - Self-organized edge fluid turbulence and issues in tokamak transport.....	191
J. KILLEEN - Magnetic fusion computing: a personal retrospective view.....	203
D. D. SCHNACK - Computational methods for long time-scale, dissipative magnetohydrodynamics.....	217
T. HAYASHI - 3D MHD equilibria of helical systems and islands formation.....	231
R. R. METT and S. M. MAHAJAN - Kinetic theory of toroidicity and ellipticity induced Alfvén eigenmodes.....	243
A. BONDESON, G. VLAD and H. LÜTJENS - Ideal and resistive MHD stability of internal kink modes in circular and shaped tokamaks.....	257

CONTRIBUTED PAPERS

=====

A. H. GLASSER - Exact analytical solution of the toroidal singular mode equations.....	273
K. HAMAMATSU, A. FUKUYAMA, K. TANI and M. AZUMI - Profile control of alpha particle by ICRF waves.....	279
D. BORBA, M. F. F. NAVE and F. PORCELLI - The non linear behavior of fishbones.....	285
S. C. GUO and F. ROMANELLI - Stability analysis of the ion temperature gradient mode in non-circular tokamak geometry.....	291
E. K. MASCHKE, J. MORROS TOSAS and G. URQUIJO - Bifurcation theory for toroidal MHD instabilities.....	299
E. LAZZARO, F. LUCCA and E. MINARDI - Temperature pedestal sustenance and poloidal rotation at the H mode transition.....	305
W. A. COOPER - MHD stability in 3D anisotropic pressure plasmas.....	311
D. FARINA, R. POZZOLI and M. ROMÉ - Electron energy diffusion in a stochastic regime induced by a cyclotron wave.....	317
L. VILLARD and G. Y. FU - Damping of gap modes: geometrical and profile effects.....	323

J. C. ZENOUDA and J. BARBARO - Calculation of electrons-photons energy exchange through inverse Compton scattering in high energy range.....	331
S. SEN, M. G. RUSBRIDGE and R. J. HASTIE - Role of L and H-mode type velocity profile on collisionless drift wave.....	337
H. J. DE BLANK, M. F. F. NAVE, W. KERNER and G. T. A. HUYSMANS - Resistive ballooning analysis for edge localized modes in jet discharges.....	343
G. FOGACCIA and F. ROMANELLI - Kinetic theory of the fishbone mode.....	351
G. VLAD, S. BRIGUGLIO, C. KAR, F. ZONCA and F. ROMANELLI - Linear and nonlinear stability of toroidal Alfvén eigenmodes.....	361
C. SCHWAB - Ideal MHD in stellarators: global modes and local theory.....	383
M. BORNATICI - Relativistic Fokker-Planck equation for cyclotron radiation.....	393
R. D. PARKER - Nonlinear response of the tearing mode to external field perturbations in a flowing plasma...	399
D. FARINA and R. POZZOLI - Ponderomotive effects on the electron dynamics by an electromagnetic wave.....	407
A. PLETZER and R. L. DEWAR - Linear resistive stability: toroidal computation of the outer matching-data in PEST 3.4.....	413
R. G. STORER and J. A. STAINES - Transient effects for current drive in spherical plasmas.....	421
