PREFACE	ix
1 <i>The Plasma State</i>	1
<i>Suggested Reading</i>	12
2 <i>Collisions and Collisional Processes</i>	
A. <i>Elementary Concepts</i>	14
B. <i>Conservation of Energy, Momentum, and Angular Momentum</i>	17
C. <i>The Collision Cross Section</i>	21
D. <i>Rutherford Scattering</i>	23
E. <i>Diffusion and Mobility</i>	27
<i>Suggested Reading</i>	36
<i>Problems</i>	36
3 <i>The Motion of Isolated Charged Particles</i>	
A. <i>The Motion of a Charged Particle in a Magnetic Field</i>	39
B. <i>Crossed Electric and Magnetic Fields</i>	41
C. <i>Gravitational Fields</i>	43
D. <i>Magnetic Field Gradients—Magnetic Mirrors and Cusps</i>	44
E. <i>The Effects of AC Electric Fields</i>	52
<i>Suggested Reading</i>	65
<i>Problems</i>	66

4 *The Beginnings of Collective Phenomena—Plasma Statistical Mechanics*

A. <i>Fundamental Definitions</i>	69
B. <i>Conservation Laws for Systems</i>	75
C. <i>Density and Distribution Functions and Averages</i>	77
D. <i>Liouville's Theorem</i>	80
E. <i>The Microcanonical Ensemble</i>	83
F. <i>Development of the Distribution Laws</i>	84
G. <i>Velocity, Speed, and Energy Distribution Functions</i>	93
H. <i>Application of Ensemble Theory to a Plasma</i>	96
<i>Suggested Reading</i>	98
<i>Problems</i>	99

5 *Further Aspects of Collective Phenomena: Statistics of Collisions and Fluid Behavior*

A. <i>Adiabatic Invariants and Constants of the Motion</i>	101
B. <i>Hamilton–Jacobi Theory</i>	111
C. <i>Collisions in the Boltzmann Equation: Fokker–Planck Methods</i>	115
D. <i>Diffusion and Mobility from the Boltzmann Equation</i>	119
E. <i>The Moments of the Boltzmann Equation</i>	124
<i>Suggested Reading</i>	130
<i>Problems</i>	130

6 *Simple Applications of the Fluid and Statistical Models of a Plasma*

A. <i>Hydromagnetics (Magnetohydrodynamics)</i>	134
B. <i>Hydromagnetic Equilibrium</i>	138
C. <i>Plasma Diamagnetism</i>	141
D. <i>Magnetic Confinement</i>	143
E. <i>Hydromagnetic Wave Motion and Diffusion</i>	146
F. <i>Plasma Parameters</i>	149
G. <i>Wave Propagation in Plasmas—Introductory Remarks</i>	157
<i>Suggested Reading</i>	163
<i>Problems</i>	164

7 *Waves in Cold Plasmas*

A. <i>Waves and the Wave Equation</i>	167
B. <i>Eigenvalues of the RLC Circuit (Ordinary Differential Equations)</i>	169

C. <i>Eigenvalues of the Wave Equation (Partial Differential Equations)</i>	170
D. <i>Eigenvalues of Waves in Cold Plasmas—The Dispersion Relation</i>	173
E. <i>Representations of the Eigenvalues</i>	179
F. <i>Nonzero Temperature Effects</i>	193
<i>Suggested Reading</i>	199
<i>Problems</i>	200

8 *Waves (Stable and Unstable) in Hot Plasmas*

A. <i>Transform Theory</i>	203
B. <i>Applications of Transform Theory to the Wave Equation and Boltzmann Equation</i>	208
C. <i>The Electrostatic and Long-Wavelength Approximation</i>	211
D. <i>The Dispersion Relation for Longitudinal Electrostatic Waves, I</i>	213
E. <i>Complex Contour Integration and Analytic Continuation</i>	217
F. <i>The Dispersion Relation for Longitudinal Electrostatic Waves, II</i>	222
G. <i>The Nature of the Eigenmodes—Landau Damping</i>	227
H. <i>Waves and Instabilities—Criteria</i>	230
I. <i>Branch Lines</i>	234
J. <i>Position-Space Damping</i>	236
K. <i>Confinement and Equilibrium of a Plasma—Hydrodynamic and Microinstabilities</i>	242
<i>Suggested Reading</i>	244
<i>Problems</i>	245

9 *Plasma Kinetic Theory—Nonequilibrium Statistical Mechanics*

A. <i>Collisional Velocity Averages</i>	249
B. <i>Validity of Collisional Models</i>	263
C. <i>Development of the Bogoliubov, Born, Green, Kirkwood, Yvon (BBGKY) Hierarchy</i>	265
D. <i>Cluster Expansion</i>	274
<i>Suggested Reading</i>	284
<i>Problems</i>	285

10 *Radiation Processes and Correlation Functions*

A. <i>Generalized Emission and Absorption Processes</i>	286
B. <i>Radiation Fields from a Charged Particle</i>	291
C. <i>The Radiation Spectra</i>	297
D. <i>Bremsstrahlung</i>	300
E. <i>Cyclotron Emission</i>	306
F. <i>Fluctuations and Correlations in Plasmas</i>	311
<i>Suggested Reading</i>	318
<i>Problems</i>	319

Appendix

A. <i>Frequently Used Physical Constants</i>	321
B. <i>Useful Vector Identities</i>	322
C. <i>Units and Dimensions</i>	323
INDEX	324
