<b>1. Motion of a Particle</b> . . . . .	<b>1</b>
1.1 Equations of Motion . . . . .	1
1.2 Particle Drifts . . . . .	3
a. Electric field . . . . .	3
b. Gravitational field . . . . .	5
c. Inhomogeneous magnetic field . . . . .	6
d. Confinement in axial fields . . . . .	7
1.3 Magnetic Moment. . . . .	9
1.4 Acceleration of Particles. . . . .	15
<b>2. Macroscopic Behaviour of a Plasma</b> . . . . .	<b>20</b>
2.1 Electrical Neutrality . . . . .	21
2.2 Basic Equations . . . . .	23
2.3 Relation between Macroscopic and Microscopic Velocities . . . . .	30
2.4 Electric Currents . . . . .	35
2.5 Motion of Material Across Lines of Force . . . . .	40
a. Change of flux through a moving surface . . . . .	40
b. Diffusion across a strong magnetic field . . . . .	42
<b>3. Waves in a Plasma</b> . . . . .	<b>49</b>
3.1 Electromagnetic Waves with No Magnetic Field . . . . .	52
3.2 Electrostatic Waves with No Magnetic Field . . . . .	55
3.3 Hydromagnetic Waves . . . . .	61
3.4 Waves in a Cold Uniform Plasma . . . . .	67
a. Propagation across $\mathbf{B}$ . . . . .	68
b. Propagation parallel to $\mathbf{B}$ . . . . .	77
c. Propagation in an arbitrary direction . . . . .	79
3.5 Damping and Excitation of Waves . . . . .	81
a. Landau damping . . . . .	82
b. Cyclotron damping . . . . .	86
c. Excitation, two-stream instability . . . . .	88

<b>4. Equilibria and Their Stability</b> . . . . .	95
4.1 Principles of Stable Equilibrium . . . . .	95
4.2 Plane System . . . . .	100
a. Equilibrium . . . . .	100
b. Stability, isotropic pressure . . . . .	102
c. Stability, anisotropic pressure . . . . .	105
4.3 Cylindrical System . . . . .	108
a. Equilibrium . . . . .	108
b. Stability . . . . .	112
4.4 Axisymmetric System . . . . .	116
<b>5. Encounters between Charged Particles</b> . . . . .	120
5.1 Distant Encounters . . . . .	121
5.2 Diffusion Coefficients . . . . .	123
5.3 Relaxation Times . . . . .	131
5.4 Electrical Resistivity . . . . .	136
5.5 Thermal Conductivity and Viscosity . . . . .	143
5.6 Radiation. . . . .	147
a. Photon scattering by free electrons . . . . .	147
b. Photon emission in electron-ion collisions . . . . .	148
c. Synchrotron radiation . . . . .	152
<b>Appendix. The Boltzmann Equation</b> . . . . .	155
<b>Symbols</b> . . . . .	160
<b>Index</b> . . . . .	165
