

CONTENTS

Chapter 1 Elastic-Collision Cross Sections	1
1. Probability of Elastic Collision Between Electrons and Gas Atoms	1
2. Probability of Elastic Collision for Ions with Gas Atoms	31
Chapter 2 Charge-Transfer Cross Sections	36
Chapter 3 Diffusion and Mobility	47
1. Diffusion	47
2. Electron Mobility	50
3. Ionic Mobility	61
4. Average Energy of Electrons	79
5. Ambipolar Diffusion	86
6. Transition Diffusion	91
7. Ambipolar Diffusion with Variable Ion Mobility	95
Chapter 4 Inelastic Collisions of Electrons	99
1. Currents at Low Fields	99
2. Probability of Excitation	101
3. Probability of Ionization	103
4. The First Ionization Coefficient	122
Chapter 5 Diffusion-Controlled Breakdown	142
1. High-Frequency Breakdown	142
2. Effects of a Superimposed Magnetic Field	155
3. Cyclotron Resonance Method for Determining Collision Cross Sections	160
Chapter 6 Electron Attachment	164
1. Attachment Coefficients	165
2. Attachment to Impurities	180
3. Diffusion and Attachment Combined	180
Chapter 7 Breakdown Controlled by Electron Attachment	185
Chapter 8 Recombination	188
1. Ion-Ion Recombination	188
2. Electron-Ion Recombination	192
3. Experimental Determinations of Recombination	197
Chapter 9 Secondary Electron Emission by Electrons	202
1. Metal Surfaces	202
2. Insulators	205
Chapter 10 Breakdown Controlled by Secondary Electron Emission	209
1. Secondary Electron Resonance Breakdown	209
2. Secondary Electron Resonance Breakdown in Magnetic Fields	214

Chapter 11 The Second Townsend Coefficient	222
Chapter 12 D-C Breakdown	247
1. Space-Charge Effects	248
2. The Streamer (γ - σ - β process)	249
3. Townsend Discharge (α - γ process)	254
4. Space-Charge-Controlled Townsend Discharge (α - γ - σ process)	256
Chapter 13 The Corona Discharge	258
1. The Geiger-Müller Counter	259
2. Current and Voltage Characteristics	266
3. The Negative Corona	270
4. The Absence of Positive Corona	272
Chapter 14 Glow Discharges	275
1. General Features of the Glow Discharge	275
2. Crookes Dark Space and the Cathode Fall of Potential	279
3. The Negative Glow	286
4. The Positive Column	286
5. The Positive Column in a Longitudinal Magnetic Field	293
6. The Anode Fall	297
Chapter 15 Steady-State Microwave Discharges	302
1. Comparison of Steady-State and Breakdown Fields	304
2. Plasma Resonance	308
Chapter 16 Arc Discharges	310
1. Glow-to-Arc Transition	310
2. Arc Classification	311
3. Low-Pressure Arcs	311
4. High-Pressure Arcs	318
5. Metal Arcs	321
Author Index	327
Subject Index	331
