

CONTENTS

INTRODUCTION

I.	Plasma diagnostics using lasers	1
1.	Determination of the main plasma parameters	1
2.	Laser interferometry	2
3.	Holographic methods for plasma diagnostics	7
4.	The schlieren method	10
5.	The shadowgraph method	11
6.	Faraday rotation measurement as a diagnostic method ...	12
7.	Scattering of laser radiation by plasma particles	13
II.	Development of high power lasers	18
III.	Plasma production by lasers	21
1.	Breakdown of gases	21
2.	Absorption of laser radiation and the heating of gases ...	25
3.	Plasma production by laser irradiation of solids	27
