CONTENTS

CHAPTER 1 INTRODUCTION, 1

1-1 Qualitative Description of the Motion of Slow Ions in Gases, 1
1-2 The Parameters E/N and E/p, 4
1-3 General Facts about Mobilities and Diffusion Coefficients, 5
1-4 Ion-Ion Interactions and the Effect of Space Charge, 6
1-5 The Importance of Data on Ionic Mobilities and Diffusion Coefficients, 8
1-6 The Differences in Behavior of Ions and Electrons, 9
1-7 The Spreading of a Cloud of Ions by Diffusion Through an Unbounded Gas, 10
1-8 The Spreading of an Ion Cloud during Its Drift in an Electric Field, 12
1-9 The Diffusion Equation, 13
1-10 Boundary Conditions, 14
1-11 Solution of the Time-Independent Diffusion Equation for Various Geometries, 16
1-12 Ambipolar Diffusion, 24
References, 27

CHAPTER 2 THE MEASUREMENT OF DRIFT VELOCITIES AND LONGITUDINAL DIFFUSION COEFFICIENTS, 29

2-1 General Considerations in Drift-Tube Experiments, 30
2-2 Basic Aspects of Drift Velocity Measurements, 35
2-3 The Determination of Longitudinal Diffusion Coefficients, 44
2-4 The Determination of Reaction Rate Coefficients from Arrival-Time Spectra, 46
2-5 Description of Drift Tubes, 50
2-6 The Mathematical Analysis of Ionic Motion in Drift Tubes, 75
References, 82

CHAPTER 3 THE MEASUREMENT OF TRANSVERSE DIFFUSION COEFFICIENTS, 85

3-1 The Attenuation Method, 85
3-2 The Townsend Method, 92
References, 98

CHAPTER 4 AFTERGLOW TECHNIQUES, 99

4-1 The Technique of Lineberger and Puckett, 100
4-2 The Technique of Smith and His Colleagues, 107
4-3 Microwave Techniques, 114
References, 116

CHAPTER 5 KINETIC THEORY OF DIFFUSION AND MOBILITY, 118

5-1 Definitions and General Results, 118
5-2 Elementary Theories and Qualitative Arguments, 120
5-3 Low-Field Theory, 136
5-4 Medium-Field Theory, 165
5-5 High-Field Theory, 187
5-6 Connection Formulas, 204
5-7 Resonant Charge Transfer, 209
5-8 Ion Transfer, 229
References, 232

CHAPTER 6 INTERACTION POTENTIALS AND MOBILITIES, 236

6-1 Mobilities from Interaction Potentials, 236
6-2 Theory of Ion-Atom and Ion-Molecule Interactions, 248
6-3 Determination of Interaction Potentials, 257
6-4 Estimation of Mobilities from Meager Data, 260
References, 263

CHAPTER 7 EXPERIMENTAL DATA ON MOBILITIES AND DIFFUSION COEFFICIENTS, 266

7-1 The Mobility of Ions in Pure Gases at or Near Room Temperature; the Mobility of Ions in Vapors, 267
7-2 The Mobility of Ions in Mixtures of Gases—Blanc's Law, 304
7-3 The Variation of Ionic Mobilities with Gas Temperature, 306
7-4 The Diffusion of Ions in Gases, 313

APPENDIX I TABLES OF TRANSPORT CROSS SECTIONS AND COLLISION INTEGRALS, 327
APPENDIX II TABLES OF PROPERTIES USEFUL IN THE ESTIMATION OF ION-NEUTRAL INTERACTION ENERGIES, 343

AUTHOR INDEX, 361

SUBJECT INDEX, 367
