Preface	i
Contents	iii
List of Participants.....	vi
Invited Papers	1
<u>M.A.Raadu</u> , Global Effects of Double Layers	3(I-1)
<u>J.E.Borovsky et al.</u> , A Review of Plasma Double Layer Simulations	33(I-2)
<u>N.Hershkowitz</u> , Thermal Barriers in Tandem Mirrors	55(I-3)
<u>H.L.Pécseli</u> , Electron and Ion Phase Space Vortices	81(I-4)
<u>M.Temerin, F.S.Mozer</u> , Double Layers above the Aurora	119(I-5)
<u>H.Hora</u> , Hydrodynamic Derivation of Double Layers and Electric Fields in Plasmas	129(I-6)
Contributed Papers	153
Experiments	153
<u>L.Biborosch, G.Popa, M.Sanduloviciu</u> , About Anode Double Layers in a Helium Glow Discharge	154(O-1)
<u>R.T.Carpenter, S.Torvén, L.Lindberg</u> , Potential Oscillations of Double Layers in Inductive Current Circuits	159(O-2)
<u>H.S.Maciel, J.E.Allen</u> , The Formation of a Current Driven Double Layer in a Low Pressure Arc Discharge	165(O-3)
<u>M.Nakamura, R.Hatakeyama, N.Sato</u> , U-Shaped Double Layers and Associated Ion Cyclotron Instability	171(O-4)
<u>G.Popa, V.Sahleanu, M.Sanduloviciu</u> , Feedback Mechanism in a Nonstationary Anode Glow Double Layer	176(O-5)
<u>D.Alexandroaei, M.Sanduloviciu</u> , Plasma Double Layer Formed at the Transition Region between Two Independent Negative Glow Plasmas	182(P-1)
<u>H.Amemiya, Y.Nakamura</u> , Characteristics of Double Layers Formed by Ionization	188(P-2)
<u>R.J.Armstrong, H.Fujita</u> , A Negative Potential Dip Close to an Electron Collecting Electrode in a Plasma	194(P-3)

<u>C.Chan, M.H.Cho, T.Intrator, N.Hershkowitz</u> , Small Amplitude and Large Amplitude Double Layers in Laboratory Plasmas	200(P-4)
<u>H.Fujita, S.Yagura</u> , Creation of Negative Potential Depression on a Low Potential Tail of Double Layer Due to a Current Disruption	206(P-5)
<u>S.Iizuka, H.Tanaca</u> , Electron Hole Dynamics During Double Layer Formations	212(P-6)
<u>H.S.Maciel, J.E.Allen</u> , A BGK Solution for a Triple Layer Formed in a Low Pressure Arc Discharge	218(P-7)
<u>R.Merlino, S.Cartier, M.Alport, G.Knorr</u> , Observations of V-Shaped Double Layers and Ion-Cyclotron Waves Along Diverging Magnetic Field Lines	224(P-8)
<u>M.Sanduloviciu, E.Loizneanu</u> , Experimental Studies About Some Properties of Plasma Double Layers ...	231(P-9)
<u>A.N.Sekar, Y.C.Saxena</u> , Strong Double Layers in a Double Plasma Machine	238(P-10)
<u>Y.Suzuki, R.Hatakeyama, N.Sato</u> , Electrostatic Potential of Plasma Flow Along a Magnetic Mirror	243(P-11)
<u>Y.Takeda, K.Yamaqiva</u> , Investigations of Spatial Evolution of a Potential Hump into a Strong Double Layer in a High-Voltage Straight Plasma Discharge	252(P-12)
<u>S.J.Talaşman, M.Sanduloviciu</u> , On a Reflection Behaviour of a Plasma Double Layer	258(P-13)
Simulations	265
<u>P.Gray, S.Kuhn, T.L.Crystal, C.K.Birdsall</u> , Particle Simulations of the Unstable States of a Collisionless Single-Ended Plasma Device	266(O-6)
<u>N.Singh, R.W.Schunk</u> , The Relationship Between the Electric Fields Associated with Plasma Expansion and Double Layers	272(O-7)
<u>N.Singh, H.Thiemann, R.W.Schunk</u> , Current Fluctuations and Dynamical Features of Double Layer Potential Profiles	278(O-8)
<u>C.Barnes, M.K.Hudson, W.Lotko</u> , The Evolution of Weak Double Layers in One and Two Dimensions	284(O-10)
<u>K.Y.Kim, T.L.Crystal</u> , Theory and Simulation of Ion Acoustic Double Layers	290(P-26)

<u>N.F.Otani</u> , Evolution of Ion Holes and Large Potential Structures in Simulations of Bounded Current-Driven Magnetized Plasma Systems	296 (P-27)
<u>H.Schamel</u> , Identification of Electrostatic Structures in Plasma Simulations	302 (P-28)
<u>Å.Sköelv</u> , <u>J.J.Rasmussen</u> , A Numerical Investigation of Wall-Sheath Stability in a One-Dimensional Plasma	309 (P-30)
<u>H.Thiemann</u> , <u>N.Singh</u> , <u>R.W.Schunk</u> , High Frequency Turbulence in a Plasma Driven by a Current Sheet	315 (P-31)
<u>B.L.Smith</u> , <u>H.Okuda</u> , Aurora: Particle Simulation in a Dipole Field	321 (P-32)
<u>S.V.Bulanov</u> , <u>A.S.Sakharov</u> , <u>S.Kuhn</u> , Plasma Double Layer in the Presence of HF Field	327 (PD)
Theory	333
<u>M.A.Raadu</u> , <u>J.J.Rasmussen</u> , On the Dynamics of Double Layers	334 (O-11)
<u>P.Carlqvist</u> , On the Expansion of Electrostatic Double Layers	340 (P-22)
<u>G.Knorr</u> , <u>M.Alport</u> , <u>R.L.Merlino</u> , Conditions Conducive to the Existence of a Double Layers	346 (P-24)
<u>H.Schamel</u> , On the Stability of Localized Electrostatic Structures	352 (P-29)
Space	363
<u>N.Singh</u> , <u>R.W.Schunk</u> , Can Buneman Double Layers Be Driven in Auroral Plasmas?	364 (O-9)
<u>D.K.Callebaut</u> , <u>A.M.Van den Buys</u> , Additional Drifts in the Magnetospheric Double Current Layer	370 (PD)
<u>D.K.Callebaut</u> , <u>A.M.Van den Buys</u> , Effect of Geometry in Magnetospheric Double Current Layer	377 (PD)
Others	387
<u>R.Deutsch</u> , Double Layer Formation in the Plasma Focus Discharge	388 (O-12)
<u>S.Mercurio</u> , Electric Double Layer at Plasma Driven Solid Ablation Front	394 (O-13)
<u>P.-J.Clause</u> , <u>J.Wallenborn</u> , Collisionless Heat Transport in a Stationary Bounded Two-Component Plasma: Effect of Non-Local Electroneutrality	399 (P-23)
<u>R.L.Dewar</u> , New Oscillation-Centre Coordinates for Trapped Particles	404 (PD)
Author Index	409
