

PROCEEDINGS OF THE WORKSHOP ON
SPUTTERING CAUSED BY PLASMA (NEUTRAL BEAM)-SURFACE INTERACTION

Argonne National Laboratory

July 9-10, 1979

List of Contents

	<u>Page</u>
Introductory Remarks, C. Finfgeld, US-DOE	1
Foreword, J. N. Smith, Jr. and M. Kaminsky	2
Workshop Objectives	4
Summary of Workshop Discussions Regarding Gaps in the Experimental and Theoretical Data Base, and of Priorities of Work to be Done, M. Kaminsky	5
 <u>Summary Reports</u>	
<u>Need for Sputtering Data</u>	
1. Sputtering Data Requirements for Tokamak Transport Codes, C. E. Singer and D. E. Post.....	1-1
2. Sputtering Data Needs for Modeling Tokamak Transport in High Beta Experiments, J. T. Hogan	2-1
3. Plasma Impurity and Buildup in Mirror Devices, R. S. Devoto	3-1
4. Needs for Sputtering Data in Fusion Reactor Design, G. A. Emmert	4-1
 <u>Experimental Observations in Existing Plasma Devices</u>	
5. Experimental Observations of Sputtering in Tokamaks, H. F. Dylla	5-1
6. Surface Erosion Due to Sputtering, Joseph L. Cecchi	6-1

Existing Experimental Data Base

7. Light Ion Sputtering Yields,
J. B. Roberto 7-1
8. Sputtering by Plasma Impurity Ions ($Z > 2$),
J. N. Smith, Jr. 8-1
9. Energy and Mass Distribution of Sputtered Particles,
A. R. Krauss and R. B. Wright 9-1
10. Angular Distribution of Sputtered Particles,
M. Kaminsky 10-1
11. Reactive Sputtering and Chemical Erosion,
R. R. Rye 11-1
12. Synergisms in Sputtering and Blistering of Surfaces,
K. C. Wilson and W. Bauer 12-1
13. Neutron Sputtering, M. Kaminsky 13-1

Status of Sputtering Theory - Modeling

14. Transport Theory, Computer Simulation, and Monte Carlo,
L. G. Haggmark 14-1
15. Analytical Expressions: Physical Sputtering,
Dale L. Smith 15-1
16. TRIM-Neutron-Sputtering Calculations, J. P. Biersack,
A. Riccato and W. Kaczerowski 16-1
