

# CONTENTS

## **The Physics of Low-Entropy Compression of Thermonuclear Targets by Longwave Laser Emission Pulse**

N.G. Basov, S. Yu. Gus'kov, V.B. Rozanov ..... 1  
Bibliography

## **Simple Models of Fast Electron Generation in Laser Plasma**

V.B. Rozanov, S.A. Shumskiy ..... 8  
Introduction  
1. Single Event Interaction of Electrons and Localized Fields  
2. Multiple Interaction of Fast Electrons with Localized Fields  
at Plasma Resonance  
Bibliography

## **An Operator Method of Solving the Problem of Particle Interaction with an Oscillating Field**

V.N. Timoshkin, S.A. Shumskiy ..... 42  
Introduction  
**Chapter 1 Operator Solution of the Problem of Particle  
Scattering by an Oscillating Field**  
1. Formulation of the Problem 2. The Operator  
Solution of Infinite System (1.12)  
2. Use of the Feynman Formalism  
**Chapter 2 Use of the Operator Method to Formulate the  
Fast Electron Distribution Function**  
1. Born's Approximation  
2. Approximation of First Harmonics

## **Energy Transfer By Fast Electrons in Spherical Laser Targets**

S. Yu. Gus'kov, V.V. Zverev ..... 57  
Introduction  
1. The Physical Processes of the Interaction of Fast  
Electrons with Laser Target Plasmas  
2. Stationary Solutions of the Kinetic Equation Ignoring  
Self-Consistent Electrical Fields

3. Fast Electron Transfer in a Self-Consistent Electrical Field
  4. Nonstationary Energy Transfer by Fast Electrons
  5. Energy Transfer from Fast Electrons to Laser Plasma
- Bibliography

### **Numerical Modeling of Fast Electron Energy Transfer**

M.I. Bakirova, V.V. Zverev, V.Ya. Karpov, T.V. Mishchenko . . . . . 93

Introduction

1. Multigroup Approximation
2. The UW-Method of Solving the Transport Equation

Bibliography

### **The Acceleration and Compression of Spherical Targets by Longwave Laser Emission**

S.Yu. Gus'kov, V.V. Zverev, V.Ya. Karpov, T.V. Mishchenko, V.B. Rozanov . . . . . 117

**Chapter 1 Hydrodynamic Models of the Corona of Spherical Laser Targets**

**Chapter 2 The Acceleration and Compression of Shell Targets by Longwave Laser Emission Pulse**

**Chapter 3 Self-Similar Solution of Hydrodynamic Equations of a Laser Plasma Corona with Fast Electron Energy Transfer**

Bibliography

### **Numerical Calculations of the Heating and Compression of Thermonuclear Targets at a CO<sub>2</sub>-Laser Energy Level of 3 kJ**

S.Yu. Gus'kov, N.N. Demchenko, V.V. Zverev, N.V. Zmitrenko, V.Ya. Karpov, T.V. Mishchenko, V.B. Rozanov . . . . . 149

Introduction

1. The Effective Spectrum of Fast Electrons
2. A Comparison of Numerical and Experimental Results
3. Discussion of Results

Bibliography

**Subject Index** . . . . . 164
