

Contents

<i>Preface</i>	7
1 The Electrical Probe Method	1
2 Kinetic Theory of Ionised Gases	16
3 Spatial Distribution of Carriers in an Electric Field	36
4 Electron Current Characteristics	62
5 Dynamic Probe Current Characteristics	86
6 Positive Ion Current Characteristics	103
7 Floating Probe Methods	137
8 Plasma Resonance Probes	156
9 Introduction to Probes in High Pressure Plasmas	172
10 Probes at an Arbitrary Potential in High Pressure Plasmas	184
11 Probe and Plasma Perturbations	220
12 Experimental Considerations in the Use of Electrical Probes	246
13 Probes in More Complex Plasmas	264
14 Other Plasma Diagnostic Techniques	279
APPENDIX 1 Table of Physical Constants and Conversion Factors	312
APPENDIX 2 Mathematical Functions	313

6 Contents

APPENDIX 3	Mathematical Tables	316
APPENDIX 4	Theories of Positive Ion Current Characteristics in Low Pressure Plasmas where $r_p/l \ll 1$	318
APPENDIX 5	Theories of Probe Current Characteristics in High Pressure Plasmas where $r_p/l \gg 1$	320
<i>Index</i>		323
