

Contents

<i>List of Contributors</i>	vii
<i>List of Participants</i>	ix
<i>Foreword</i>	xi
<i>Preface</i>	xiii
<i>A Short Biography of Professor Johannes Martinus Burgers</i>	xv
<i>A List of Publications by Professor Burgers</i>	xviii
<i>After Dinner Speech</i>	xxi

Section I. Biomechanics and Other Problems of Living Organisms

Edited by T. L. Lincoln

The Nature of Biological Movement ROBERT D. ALLEN	3
Physical Principles of Flagellar Motion ROBERT RIKMENSPOEL	9
Microcinematographic, Electron Microscopic, and Electrophysiological Studies on Shuttle Streaming in the Slime Mold <i>Physarum polycephalum</i> ROBERT P. RHEA	35
Movements within the Mitotic Spindle A. BAJER	59

Section II. Special Lectures on Rheology and Stellar Dynamics

Edited by G. N. Trytten

The Fundamental Equations of Nonlinear Continuum Mechanics R. S. RIVLIN	83
Stellar Dynamics and Galactic Spirals C. C. LIN	127

Section III. Kinetic Theory and Flow with Chemical Reaction

Edited by S. I. Pai

Chemical Studies Using Gasdynamic Wave Interactions E. L. RESLER, JR.	135
Gas Kinetic Equations and Their Applications to Nonequilibrium Flows with Diffusion and Chemical Reaction TING YI LI	155
Nonequilibrium Effects on Energy Transfer in an Ionized Fluid Flow JOHN O. POWERS AND S. I. PAI	179
Transport Coefficients for Dense Gases J. R. DORFMAN	199

Section IV. Turbulence and Stability

Edited by Alan J. Faller

Introduction to the Kraichnan Theory of Turbulence R. BETCHOV	215
Invariance Principles and Approximation in Turbulence Dynamics ROBERT H. KRAICHNAN	239
Space-Time Correlations in Turbulence FRANÇOIS N. FRENKIEL AND PHILIP S. KLEBANOFF	257
Computer Experiments on Random Walks and Both Eulerian and Lagrangian Statistics G. S. PATTERSON, JR., AND S. CORRSIN	275
Investigations of Stability and Transition in Rotating Boundary Layers ALAN J. FALLER AND ROBERT E. KAYLOR	309

Section V. Theoretical Plasma Physics

Edited by D. A. Tidman

Resistive Instabilities in Toroidal Hydromagnetic Systems RUSSELL M. KULSRUD	333
The Physical Foundations of Modern Kinetic Theory G. SANDRI	341
Enhanced Fluctuations in Plasmas D. A. TIDMAN	399
Dynamics of a Gyroviscous Plasma WILLIAM A. NEWCOMB	405

Section VI. Experimental Plasma Physics

Edited by T. D. Wilkerson

Solar System Magnetic Fields and Plasmas	
JOHN M. WILCOX	433
Satellite Measurements of Magnetic Fields in Space	
NORMAN F. NESS	451
Nonlinear Mechanics of Plasma-Like Distributed Media	
HERBERT LASHINSKY	473
Atomic Processes in Plasmas	
T. D. WILKERSON	487
High-Current Gas Discharges	
ALAN C. KOLB	505
<i>Subject Index.</i>	507
