Preface	<i>page xi</i>
<b>1 Introduction</b>	<b>1</b>
<b>2 Mathematical structure</b>	<b>4</b>
2.0 Introduction	4
2.1 Quasi-linear hyperbolic systems in conservation form	5
2.2 The equations of relativistic nondissipative fluid dynamics	9
2.3 Test relativistic fluid dynamics as a quasi-linear hyperbolic system	17
2.4 Test relativistic magneto-fluid dynamics as a quasi-linear hyperbolic system	23
2.5 Supplementary conservation laws and symmetrization	43
2.6 Main field for relativistic fluid dynamics	46
2.7 Main field for relativistic magneto-fluid dynamics	52
<b>3 Singular hypersurfaces in space-time</b>	<b>57</b>
3.0 Introduction	57
3.1 Regularly discontinuous tensor fields across a hypersurface	59
<b>4 Propagation of weak discontinuities</b>	<b>71</b>
4.0 Introduction	71
4.1 Characteristic hypersurfaces	73
4.2 Weak discontinuities	80
4.3 Weak discontinuities in relativistic fluid dynamics	89
4.4 Weak discontinuities in relativistic magneto-fluid dynamics	92
4.5 Electromagnetic and gravitational discontinuities	94
<b>5 Relativistic simple waves</b>	<b>103</b>
5.0 Introduction	103
5.1 General formalism	105

5.2	Simple waves in relativistic fluid dynamics: Eulerian treatment	109
5.3	One dimensional relativistic fluid dynamics in Lagrangian coordinates	112
5.4	Simple waves in Lagrangian coordinates	117
5.5	Evaluation of the Riemann invariants for relativistic acoustic simple waves	120
5.6	General properties of isentropic flow	130
5.7	Unsteady one dimensional and isentropic flow in special relativity	132
5.8	Stationary potential two dimensional flow in special relativity	134
5.9	Simple waves in relativistic magneto-fluid dynamics	137
<b>6</b>	<b>Relativistic geometrical optics</b>	<b>157</b>
6.0	Introduction	157
6.1	Geometrical optics in general relativity	160
6.2	Geometrical optics in general relativistic refractive media	165
6.3	Electromagnetic waves in a cold relativistic plasma: linear theory	170
6.4	Electromagnetic waves in a cold relativistic plasma: weakly nonlinear analysis	176
<b>7</b>	<b>Relativistic asymptotic waves</b>	<b>188</b>
7.0	Introduction	188
7.1	Asymptotic waves for quasi-linear systems	189
7.2	Asymptotic waves in relativistic fluid dynamics	196
7.3	Asymptotic waves in relativistic magneto-fluid dynamics	199
7.4	Asymptotic and approximate waves for Einstein's equations in vacuo	202
<b>8</b>	<b>Relativistic shock waves</b>	<b>211</b>
8.0	Introduction	211
8.1	The jump conditions in relativistic fluid dynamics	215
8.2	Solutions of the jump conditions	228
8.3	Relativistic detonation and deflagration waves	244
8.4	The jump conditions in relativistic magneto-fluid dynamics	258
8.5	Evolutionary conditions for relativistic shock waves	273

<b>9</b>	<b>Propagation of relativistic shock waves</b>	<b>276</b>
9.0	Introduction	276
9.1	Damping of plane one dimensional shock waves in a relativistic fluid	277
9.2	Propagation of weak shock waves	285
<b>10</b>	<b>Stability of relativistic shock waves</b>	<b>289</b>
10.0	Introduction	289
10.1	Linear stability of a relativistic shock	291
10.2	Corrugation stability of a relativistic shock	301
10.3	Further stability considerations	311
10.4	Examples	315
	References	325
	Index	335
