
CONTENTS

Foreword	ix
Preface	xi
1 INTRODUCTION	1
1.1 Production of Magnetic Fluids	1
1.2 Properties of Magnetic Fluids	3
1.3 Thermomechanics of Magnetic Fluids	5
1.4 Basic Applications of Magnetic Fluids	8
 PART I. EQUILIBRIUM MAGNETIZATION	
2 THERMOMECHANIC EQUATIONS FOR MAGNETIC FLUIDS OF EQUILIBRIUM MAGNETIZATION	17
2.1 Magnetic Fluid as Homogeneous Isotropic Continuum	17
2.2 Equilibrium Magnetization Equations	24
2.3 Thermodynamic Relations. Magnetocaloric Effect	30
2.4 Closed System of Equations	32
2.5 Boundary Conditions. Magnetic Pressure Jump	35
3 STATICS OF MAGNETIC FLUIDS	43
3.1 Mechanical Equilibrium Condition. Thermomagnetic Convection Mechanism	43
3.2 Pressure Distribution and Floating of Bodies in Magnetic Fluid	45
3.3 Equilibrium Form of the Surface of Magnetic Fluid at Rest	52

4	THERMOCONVECTIVE PHENOMENA	63
4.1	Thermomagnetic Convection	63
4.2	Thermoconvective Instability	69
4.3	Internal Magnetic Waves	76
5	SURFACE PHENOMENA	79
5.1	Film Flows	79
5.2	Surface Instability	85
5.3	Tangential Field Effect and Hydrodynamic Discontinuity Stability	93
5.4	Surface Convective Instability	97
5.5	Capillary Disintegration of Magnetic Fluid Jets	102
5.6	Destruction of Equilibrium Magnetic Fluid Forms in a Uniform Magnetic Field	108
5.7	Resonance Phenomena	111
 PART II. NONEQUILIBRIUM MAGNETIZATION		
6	EQUATIONS OF THERMOMECHANICS OF MAGNETIC FLUIDS WITH RELAXING MAGNETIZATION IN LOW-FREQUENCY APPROXIMATION	121
6.1	Microscopic Concepts of Magnetization Relaxation	121
6.2	Magnetization Equation for Magnetization in Low-Frequency Approximation	127
6.3	Formulation of a Closed Set of Equations	130
7	MAIN EFFECTS OF VOLUME MAGNETIC COUPLES IN A UNIFORM FIELD	137
7.1	Equation of Motion for Magnetic Fluid in a Uniform Field	137
7.2	Viscous Stresses in Fluid Resting or Rotating as Solid	140
7.3	Effects of Magnetic Couples at Simple Shear	143
7.4	The Couette Flow in an Annular Gap	149
7.5	Poiseuille Flow in an Elliptical Channel	153
7.6	Propagation of Viscous Perturbations	156
8	THE EFFECT OF TRANSVERSE STRESSES ON THE STRUCTURE OF TWO-DIMENSIONAL FLOWS IN A UNIFORM FIELD	161
8.1	Two-Dimensional Equations	162
8.2	Simple Shear Instability	168
8.3	Instability of a Plane-Parallel Poiseuille Flow	173
8.4	Swirled Rectangular Channel Flow Due to Pressure Drop	180

9	DYNAMIC INTERACTION BETWEEN MAGNETIC FLUIDS AND A NONUNIFORM FIELD	189
9.1	Equilibrium of a Magnetic Fluid Acted upon a Dynamic Force	189
9.2	Interaction between Magnetic Fluid and One-Sided Inductor Field	191
9.3	The Couette Flow in Radial and Azimuthal Fields	199
9.4	The Couette Flow in the Field of a Cylindrical Magnetic Dipole	200
Nomenclature		209
References		213
