CONTENTS

Preface ix

1 INTRODUCTION 1
1.1 Introduction 1
1.2 Magnetofluid-Dynamic Parameters 4
1.3 Magnetofluid-Dynamic Effects 6
1.4 Periscope 7
References 8

2 THE MAGNETOFLUID-DYNAMIC EQUATIONS 11
2.1 Introduction 11
2.2 Electrostatics 12
2.3 Electrostatic Energy 17
2.4 Electrodynamics 19
2.5 Ampère's Law 23
2.6 Ampère's Force Law 27
2.7 Magnetostatic Energy 29
2.8 Faraday's Law of Electromagnetic Induction 31
2.9 Poynting Vector 33
2.10 Ohm's Law 34
2.11 Maxwell Stresses 35
2.12 Electromagnetic Equations Summary 38
2.13 Electromagnetic Boundary Conditions 40
2.14 Electromagnetic Waves 46
2.15 Magnetic Field Diffusion 47
2.16 Fluid Kinematics 50
2.17 Continuity Equation 54
2.18 The Stress Tensor 55
2.19 Equations of Equilibrium of Linear and Angular Momentum 57
2.20 The Navier-Stokes Equations 59
2.21 The Energy Equation 63
2.22 Fluid-Dynamic Boundary Conditions 68
2.23 The Magnetofluid-Dynamic Equations 68

2.24 The Magnetofluid-Dynamic Approximations 72
2.25 Properties of Magnetofluid-Dynamic Equations 75
2.26 Magnetofluid-Dynamic Equations—Special Cases 77
References 79

3 MAGNETOFLUID-DYNAMIC ONE-DIMENSIONAL FLOWS ... 81
3.1 Introduction 81
3.2 Quasi-One-Dimensional Assumptions 82
3.3 Equation of Continuity 84
3.4 Equation of State 86
3.5 Equation for Average Electric Current Density 87
3.6 Equation for Average Electric Field 89
3.7 Equation for Average Magnetic Field 89
3.8 Equation of Motion 91
3.9 Equation of Energy 93
3.10 Summary and Comparisons 95
3.11 Solutions for Steady Flow of Inviscid Fluids 98
3.12 Solutions for Steady Flow of Viscous and Heat-Conducting Fluid 106
3.13 General Discussions 110
References 112

4 MAGNETOFLUID-DYNAMIC VISCOUS FLOWS 113
4.1 Introduction 113
4.2 Generalized Hartmann-Couette Flow 114
4.3 Unsteady Hartmann Flow 132
4.4 Magnetofluid-Dynamic Pipe Flow 134
4.5 Magnetofluid-Dynamic Boundary-Layer Assumptions 141
4.6 Magnetofluid-Dynamic Stagnation Point Flow 144
4.7 Magnetofluid-Dynamic Flat Plate Flows 148
4.8 Unsteady Magnetofluid-Dynamic Flat Plate Flow 156
4.9 Magnetofluid-Dynamic Wakes 161
4.10 Magnetofluid-Dynamic Free-Connection Flow 164
4.11 Relaxed Assumptions 172
References 178

5 MAGNETOFLUID-DYNAMIC WAVE PHENOMENA 181
5.1 Introduction 181
5.2 Waves of Small Amplitude in Magnetogas Dynamics 183
5.3 Electromagnetic Waves 185
5.4 Gas-Dynamic Waves 187
5.5 Magnetogas-Dynamic Waves 188
5.6 Friedrichs Diagrams—Sub- and Super-Alfvén Waves 191

5.7 Waves of Finite Amplitude 195
5.8 Shock Waves 199
5.9 Other Wave Phenomena in Magnetogas Dynamics 203
References 204

6 APPLICATIONS OF MAGNETOFLUID DYNAMICS 205
6.1 Introduction 205
6.2 Astrophysical Applications 206
6.3 Geophysical Applications 211
6.4 Engineering Applications 217
References 270

7 ADVANCED TOPICS OF MAGNETOFLUID DYNAMICS 273
7.1 Introduction 273
7.2 Tensor Electrical Conductivity, Hall Current, and Ion Slip 275
7.3 Some Flow Problems With Tensor Electrical Conductivity 279
7.4 Multifluid Theory of Magnetofluid Dynamics 284
7.5 Wave Motions Based on Multifluid Theory 288
7.6 Rarefied Plasma Dynamics, Kinetic Theory 301
7.7 Particle Motions of a Plasma 309
7.8 Thermal Radiation Effects of Magnetofluid Dynamics 311
References 323

Appendix A SYMBOLS, UNITS, AND DIMENSIONS 325
Appendix B MAGNETOFLUID-DYNAMIC PARAMETERS 327
Appendix C PROPERTY DATA 329
Appendix D DIFFERENTIAL OPERATORS IN ORTHOGONAL COORDINATES 331
Appendix E ADDITIONAL REFERENCES 333
PROBLEMS 335
AUTHOR INDEX 341
SUBJECT INDEX 345
