

## Contents

Preface	<i>Clifford Mannal and Norman W. Mather</i>	v
List of Contributors		xiii
 <i>PART I. FLIGHT APPLICATIONS</i>		 1
Introduction	<i>G. Sargent Janes</i>	3
A Magnetic Annular Arc	<i>W. E. Powers and R. M. Patrick</i>	5
Experimental Magnetogasdynamic Engine for Argon, Nitrogen, and Air	<i>Sterge T. Demetriades</i>	19
Experiments in Steady-State High-Density Plasma Acceleration	<i>Arlen F. Carter, George P. Wood, Alexander P. Sabol, and Richard H. Weinstein</i>	45
Experimental Results with a Direct Current Electromagnetic Plasma Accelerator	<i>Domenico Ragusa and Jerome Baker</i>	56
Plasma Acceleration Studies	<i>G. J. Rausa and L. M. Gearhart</i>	64
The Design, Fabrication, and Test of a Pulsed-Pinch Plasma Engine for Space Applications	<i>James J. Pearson, Charles C. Cavalconte, William J. Guman, and Irving Granet</i>	81
Stagnation-Point Flow of a Magnetized Blunt Body in Hypersonic Flow	<i>S. I. Pai and E. T. Kornowski</i>	97
Magnetogasdynamic Shock Layer Flow	<i>C. A. Andrade</i>	107
 <i>PART II. POWER CONVERSION</i>		 121
Introduction	<i>George W. Sutton</i>	123
MHD Power Research in the United Kingdom	<i>B. C. Lindley</i>	127

Progress in MHD Power Generation	<i>T. R. Brogan, A. R. Kantrowitz, R. J. Rosa, and Z. J. J. Stekly</i>	147
Comparison of Theoretical and Experimental Results in an MHD Generator	<i>S. Way</i>	166
MHD Power-Generation Studies in Rectangular Channels	<i>Vernon H. Blackman, Malcolm S. Jones, Jr., and Anthony Demetriades</i>	180
MHD for Power Stations	<i>Stuart Hamilton</i>	211
The Magnetohydrodynamic Vortex Power Generator: Basic Principles and Practical Problems	<i>Coleman duP. Donaldson</i>	228
An Electrodeless MHD Generator	<i>I. B. Bernstein, J. B. Fanucci, K. H. Fischbeck, J. Jarem, N. I. Korman, R. M. Kulsrud, M. Lessen, and N. Ness</i>	255
Some Requirements for the Operation of Magnetohydrodynamic Induction Generators	<i>H. H. Woodson and A. T. Lewis</i>	277
A Magnetohydrodynamic Power Converter	<i>W. D. Jackson, E. S. Pierson, and D. A. East</i>	294
Electrical Conductivity of Flame Gases Seeded with Alkali Metals and Application to MHD Power Plant Design	<i>N. R. Dibelius, E. A. Luebke, and G. J. Mullaney</i>	307
Conduction in Gases with Elevated Electron Temperature	<i>Jack L. Kerrebrock</i>	327
<i>PART III. COMMUNICATIONS AND DIAGNOSTICS</i>		347
Introduction	<i>Charles B. Wharton</i>	349
Plane-Magnetoacoustic-Wave Propagation through a Stratified Medium	<i>Norman C. Jen</i>	355
Microwave Reflection and Absorption by a Nonuniform Plasma Sheath	<i>Leonard S. Taylor</i>	360
Shock-Tube-Microwave Propagation Measurements Using the Dielectric-Slab Approximation	<i>F. L. Tevelow and H. D. Curchack</i>	375

CONTENTS	xi
Reradiation Spectrum Broadening of Harmonically Driven Plasma Electrons <i>Srbislav Zivanovic</i>	390
Some Aspects of a Nonlinear Electrical Conductivity on Propagation of Electromagnetic Waves <i>Melvin Epstein</i>	405
Space-Charge Waves and Plasma Diagnostics <i>A. W. Trivelpiece</i>	419
Diagnostic Measurements of a Highly Ionized, Steady-State Plasma <i>Andrew L. Gardner</i>	438
On Spectroscopic Information from a Plasma <i>G. R. Peacock and G. Lanza</i>	458
 <i>PART IV. FUSION</i>	 465
Introduction <i>C. W. Little, Jr.</i>	467
Some Aspects of the Economics of Fusion Reactors <i>Richard F. Post</i>	469
Thermonuclear Power and Superconductivity <i>R. G. Mills</i>	515
Magnetohydrodynamic Shear Heating <i>Meredith C. Gourdine</i>	521
Production of a Plasma with High-Power, Pulsed Micro- waves <i>Thomas Fessenden</i>	529
Switching of High Currents in Fast and Slow Plasma- Compression Systems <i>W. F. Westendorp</i>	542
Feasibility Study of a Transient Version of the Astron Thermonuclear Reactor <i>Chieh C. Chang</i>	554
 <i>APPENDIXES</i>	
I. First Symposium on the Engineering Aspects of Mag- netohydrodynamics: Steering Committee and Program	571
II. Second Symposium on the Engineering Aspects of Mag- netohydrodynamics: Steering Committee and Program	575
