

## TABLE OF CONTENTS

### Session I: Nonequilibrium Generators

- I.1 PERFORMANCE OF A NON-EQUILIBRIUM MHD GENERATOR WITH SLANTED ELECTRODE WALLS, M.S.S. Hsu, A. Solbes, and J. L. Kerrebrock, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- I.2 ELECTRICAL INSULATION PROBLEMS IN DESIGN AND TESTS OF CLOSED CYCLE MHD GENERATORS, M. Gasparotto, Comitato Nazionale per l'Energia Nucleare, Frascati, Italy.
- I.3 THE EFFECTS OF ELECTRODE CONFIGURATION ON THE PERFORMANCE OF A FARADAY TYPE MHD GENERATOR, J.W.M.A. Houben, J. H. Blom, and L.H.Th. Rietjens, Technische Hogeschool te Eindhoven, Eindhoven, Netherlands.
- I.4 INFLUENCE OF IONIZATION TURBULENCE ON THE PERFORMANCE OF NONEQUILIBRIUM PLASMA MHD GENERATORS, V. Zampaglione, Comitato Nazionale per l'Energia Nucleare, Frascati, Italy.
- I.5 PROGRESS IN ANALYTICAL MODELING OF MHD POWER GENERATORS, S. T. Demetriades, G. S. Argyropoulos, and C. D. Maxwell, STD Research Corporation, Pasadena, California.
- I.6 ELECTRODE EFFECTS AND GAS DYNAMIC CHARACTERISTICS OF A LARGE, NON-EQUILIBRIUM MHD GENERATOR WITH CESIUM SEEDING, NOBLE GASES, B. Zauderer and E. Tate, General Electric Company, King of Prussia, Pennsylvania.
- I.7 EXPERIMENTS IN A FARADAY MHD GENERATOR WITH A SUPERSONIC SEEDING HELIUM FLOW WITHIN A RELAXATION REGION, S. Shioda and I. Osada, Tokyo Institute of Technology, Tokyo, Japan, and I. Yamashita, Government Mechanical Laboratory, Tokyo, Japan.
- I.8 EMISSION CHARACTERISTICS OF CATHODES FOR MHD-GENERATOR, N. M. Maslennikov, Lenin All-Union Electrotechnical Institute, Moscow, USSR.
- I.9 INVESTIGATION OF THE DISCHARGE STRUCTURE IN A RARE GAS ALKALI MHD GENERATOR, G. Brederlow and K. J. Witte, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- I.10 CURRENT AND POTENTIAL DISTRIBUTIONS IN MHD ENTRANCE FLOWS, J. H. Blom, C. J. Sielhorst, J.W.M.A. Houben, and L.H.Th. Rietjens, Technische Hogeschool te Eindhoven, Eindhoven, Netherlands.

### Session II: Combustion Generators

- II.1 THEORETICAL AND EXPERIMENTAL STUDIES OF MAGNETOHYDRODYNAMIC POWER GENERATION WITH CHAR, Y.C.L. Wu, J. B. Dicks, Jr., L. W. Crawford, J. W. Muehlhauser, M. A. Scott, and N. Sood, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- II.2 COMPARATIVE ENGINEERING ASPECTS OF DISK AND LINEAR MHD GENERATORS APPLIED TO OPEN CYCLE POWER GENERATION, J. E. Klepeis and J. F. Louis, Avco Everett Research Laboratory, Everett, Massachusetts.
- II.3 FURTHER ANALYTICAL INVESTIGATIONS OF MHD GENERATOR PERFORMANCE, O. K. Sonju and J. Teno, Avco Everett Research Laboratory, Everett, Massachusetts.
- II.4 MHD ENERGY CONVERSION USING DETONATION CONDITIONS, D. G. Jimerin, E. A. Mironov, V. A. Popov, A. A. Valaiev, and V. N. Bogachev, Krzhizhanovskiy Power Institute, Moscow, USSR.
- II.5 HOT CERAMIC ELECTRODES FOR OPEN-CYCLE MHD POWER GENERATION, D. B. Meadowcroft, P. G. Meier, and A. C. Warren, Central Electricity Research Laboratories, Leatherhead, England.
- II.6 THREE-DIMENSIONAL CURRENT DISTRIBUTIONS AND ELECTRODE CONFIGURATION EFFECTS IN DIAGONAL WALL GENERATORS, J. K. Koester and M. K. Nicholson, The University of Tennessee, Tullahoma, Tennessee.
- II.7 A TWO MEGAWATT HIGH PERFORMANCE COMBUSTION-DRIVEN MHD GENERATOR EXPERIMENT, O. K. Sonju and J. Teno, Avco Everett Research Laboratory, Everett, Massachusetts.

## TABLE OF CONTENTS

### Session II: Combustion Generators (Contd.)

- II.8 HEAT TRANSFER OF COMBUSTION GAS PLASMA IN ELECTRIC FIELDS, Y. Mori, K. Ohtake, and K. Ogasawara, Tokyo Institute of Technology, Tokyo, Japan.
- II.9 A ONE-HALF MEGAWATT LONG DURATION GENERATOR MODELING EXPERIMENT, S. W. Petty, R. J. Rosa, O. K. Sonju, and W. D. Jackson, Avco Everett Research Laboratory, Everett, Massachusetts.
- II.10 INVESTIGATION OF HEAT FLUXES AND EROSION OF COOLED ELECTRODES IN A CONDUCTING GAS FLOW, D. G. Jimerin, V. P. Motulevich, and E. K. Chakalin, Krzhizhanovsky Power Institute, Moscow, USSR.
- II.11 EXPERIENCES WITH THE OPEN CYCLE MHD FACILITY VEGAS, T. Bohn, K. Grawatsch, M.S.S. Hsu, G. Kolb, P. Kupschus, W.-D. Kühne, H. Lang, G. Noack, and P. Schabel, Institut für Technische Physik, Jülich, Germany.

### Session III: Plasma Flows, Properties, and Diagnostics

- III.1 THE INFLUENCE OF VARIOUS LOSS MECHANISMS ON THE FLOW PARAMETERS OF A SEEDED COMBUSTION PLASMA, G. Zankl, J. Raeder, and R. Bünde, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- III.2 NON-LINEAR ANALYSIS OF MHD PLASMA TURBULENCE, D. Wisnivesky, Observatorio Nacional de Fisica Cosmica, San Miguel, Argentina.
- III.3 COMBUSTION OF COAL AND CHAR FOR MHD POWER GENERATION, L. W. Crawford, J. B. Dicks, Jr., R. W. Crowl, and J. W. Muehlhauser, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- III.4 LASER DOPPLER VELOCIMETER FOR MHD BOUNDARY LAYER STUDIES, S. A. Self, Stanford, California.
- III.5 ELECTRICAL BREAKDOWN OF ELECTRODE BOUNDARY LAYERS, H. K. Messerle, N. L. Ho, and L. P. Heffernan, University of Sydney, Sydney, Australia.
- III.6 CONTRIBUTION TO THE DETERMINATION OF THE ELECTRIC CONDUCTIVITY OF COMBUSTION PLASMA FROM DIFFERENT TYPES OF RUHR COAL, K. Wissel, H.-D. Schilling, E. Niesert, and W. Peters, Bergbau-Forschung GMBH, Essen, Germany.
- III.7 SELF CONSISTENT CALCULATION OF THE GASDYNAMIC AND ELECTRICAL PROPERTIES OF A TWO DIMENSIONAL MHD FLOW, P. Fritzer, L. L. Lengyel, and K. J. Witte, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- III.8 NONEQUILIBRIUM GASDYNAMIC AND IONIZATION PHENOMENA IN A GAS-PARTICLE PLASMA, R. V. Shanklin III and L. W. Crawford, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- III.9 CHANNEL FLOW CHARACTERIZATION OF SOLID MHD FUEL COMBUSTION PRODUCTS, C. D. Bangerter, Hercules Inc., Magna, Utah, and T. R. Brogan, MEPPSCO, Inc., Malden, Massachusetts.

### Session IV: Liquid-Metal MHD

- IV.1 ANALYSIS OF LIQUID-METAL MHD POWER CYCLES FOR CENTRAL STATION POWER GENERATION, W. E. Amend and M. Petrick, Argonne National Laboratory, Argonne, Illinois, and J. C. Cutting, University of Illinois at Chicago Circle, Chicago, Illinois.
- IV.2 RECENT EXPERIMENTAL RESULTS FROM A ONE-WAVELENGTH MHD INDUCTION GENERATOR, E. S. Pierson, University of Illinois at Chicago Circle, Chicago, Illinois.
- IV.3 NUMERICAL ANALYSIS METHOD FOR LINEAR INDUCTION MACHINES, D. G. Elliott, Jet Propulsion Laboratory, Pasadena, California.
- IV.4 EXPERIMENTAL INVESTIGATION OF A CONSTANT VELOCITY, TWO-PHASE D.C., LIQUID-METAL MHD GENERATOR, L. C. Pittenger and R. L. Cole, Argonne National Laboratory, Argonne, Illinois, and E. S. Pierson, University of Illinois at Chicago Circle, Chicago, Illinois.

## TABLE OF CONTENTS

### Session IV: Liquid-Metal MHD (Contd.)

- IV.5 RECENT RESULTS FROM THE LIQUID-METAL MHD STUDIES AT THE KRZHIZHANOVSKY POWER INSTITUTE, I. T. Aladiev, E. I. Goltsova, V. B. Kozlov, and E. I. Yantovsky, Krzhanovsky Power Institute, Moscow, USSR.

### Session V: Plasma Instabilities

- V.1 ELECTROTHERMAL INSTABILITY WITH EFFECTS OF ELECTRON THERMAL CONDUCTION AND WALL BOUNDARIES, S. Shioda, Tokyo Institute of Technology, Tokyo, Japan, and I. Huruya, Keio University, Yokohama, Japan.
- V.2 IONIZATION INSTABILITIES AND DISCHARGE CHARACTERISTICS OF AN MHD LASER, D. A. Oliver, A. Solbes, J. L. Kerrebrock, A. Lowenstein, and R. Grove, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- V.3 STABILITY OF THE NONEQUILIBRIUM MHD PLASMA IN THE REGIME OF FULLY IONIZED SEED, T. Nakamura, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- V.4 MAGNETO-ACOUSTIC INSTABILITIES IN THEIR RELATION TO MAGNETIC INTERACTION, A. Veefkind, Stanford University, Stanford, California.
- V.5 FEEDBACK CONTROL OF IONIZATION INSTABILITY, A. Y. Sen, Technische Hogeschool te Eindhoven, Eindhoven, Netherlands.
- V.6 INSTABILITY OF NONEQUILIBRIUM PLASMA INCLUDING INDUCED FLUCTUATING MAGNETIC FIELD, J. F. Coakley and R. W. Porter, Illinois Institute of Technology, Chicago, Illinois.
- V.7 THE EFFECTS OF CHANNEL SIZE ON THE IONIZATION INSTABILITY IN MHD GENERATORS, R. M. Evans, Naval Postgraduate School, Monterey, California, and C. H. Kruger, Stanford University, Stanford, California.
- V.8 THE IONIZATION INSTABILITY IN THE NONLINEAR REGIME, M. Mitchner and V. Zampaglione, Comitato Nazionale per l'Energia Nucleare, Frascati, Italy.
- V.9 TWO-DIMENSIONAL CALCULATIONS OF IONIZATIONAL FLUCTUATIONS IN A HELIUM-CESIUM GAS AT REST, G. Kolb, Institut für Technische Physik, Jülich, Germany.
- V.10 DISPERSIVE WAVES IN A SEEDED MHD GENERATOR, K. Harstad, Jet Propulsion Laboratory, Pasadena, California.
- V.11 A TWO-POINT CORRELATION DESCRIPTION OF THE PROPERTIES OF A PLASMA SUBJECTED TO THE ELECTROTHERMAL INSTABILITY, C. S. Kim and S. J. Townsend, University of Toronto, Toronto, Canada.

### Session VI: MHD Components and System Studies

- VI.1 THE COMBUSTION MHD GENERATOR AS A RESERVE PLANT IN ELECTRICITY SUPPLY SYSTEMS, R. Bunde, Max-Planck-Institut für Plasmaphysik, Garching, Germany, S. Helm, M.A.N., Munich, Germany, and H. Munttenbruch, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- VI.2 PRODUCTION OF A CLEAN WORKING FLUID FOR COAL-BURNING, OPEN-CYCLE MHD POWER GENERATION, J. J. Lacey, J. J. Demeter, and D. Bienstock, U. S. Bureau of Mines, Pittsburgh, Pennsylvania.
- VI.3 AN APPRAISAL OF COAL-GASIFICATION SCHEMES FOR MHD POWER GENERATION, P. D. Bergman, K. D. Plants, J. J. Demeter, and D. Bienstock, U. S. Bureau of Mines, Pittsburgh, Pennsylvania.
- VI.4 CAPITAL AND GENERATION COSTS OF OPEN-CYCLE FOSSIL-FUEL MHD/STEAM CENTRAL POWER STATIONS, F. H. Morse, University of Maryland, College Park, Maryland.
- VI.5 CONTROL TECHNIQUES FOR NITROGEN OXIDES IN MHD POWER PLANTS, F. A. Hals and P. F. Lewis, Avco Everett Research Laboratory, Everett, Massachusetts.

## TABLE OF CONTENTS

### Session VI: MHD Components and System Studies (Contd.)

- VI.6 NO CONCENTRATIONS IN MHD STEAM POWER PLANT SYSTEMS, J. W. Pepper, R. H. Eustis, and C. H. Kruger, Stanford University, Stanford, California.
- VI.7 KINETIC STUDY OF OXIDES OF NITROGEN IN MHD POWER PLANTS, Y. Mori and K. Ohtake, Tokyo Institute of Technology, Tokyo, Japan, and T. Taira, Ishikawajima-Harima Heavy Industries Co., Ltd., Tokyo, Japan.
- VI.8 SUPERCONDUCTING MHD SADDLE MAGNET DESIGN CONSIDERATIONS, Z. J. J. Stekly and R. J. Thome, Magnetic Corporation of America, Cambridge, Massachusetts.
- VI.9 DESIGN STUDY OF SUPERCONDUCTING DIPOLE MAGNETS FOR MHD GENERATORS, W. Elsel, Siemens Forschungslaboratorien, Erlangen, Germany, and H. Munttenbruch, Max-Planck-Institut für Plasmaphysik, Garching, Germany.

### LATE PAPER SESSION

- LPS-1 THERMODYNAMIC ANALYSIS OF THE CYCLES OF A DOUBLE-PHASE-FLOW MHD GENERATOR IN MHD PLANTS, A. E. Morozov, I. N. Pastnikova, Yu. M. Syaskin, E. E. Shpielrain, and K. A. Yakimovitch, Institute for High Temperatures of the Academy of Sciences, Moscow, USSR.
- LPS-2 FLUCTUATION OF PARAMETERS IN MHD GENERATOR "ENIN-2", D. G. Zhimerin, V. A. Bashilov, Y. V. Makarov, and E. P. Shimchuk, Krzhizhanovskiy Power Institute, Moscow, USSR.
- LPS-3 INVESTIGATION OF OPERATION OF DUCT OF MHD GENERATOR OF U-02 PLANT WITH "HOT" CERAMIC WALLS, V. A. Kirillin, A. E. Sheindlin, B. Y. Shumyatsky, V. V. Kirillov, D. K. Burenkov, G. A. Lubimov, S. I. Pischikov, and Y. N. Sokolov, Institute for High Temperatures of the Academy of Sciences, Moscow, USSR.
- LPS-4 START-UP OF A STEAM-WATER INJECTOR BY MEANS OF A MOVING DIFFUSER AND OUTER PERFORMANCES THEREOF, S. I. Vainshtein, A. F. Gandelsman, V. A. Ryabtzev, A. P. Sevastyanov, A. P. Shadeev, E. E. Shpielrain, and K. A. Yakimovitch, Institute for High Temperatures of the Academy of Sciences, Moscow, USSR.
- LPS-5 INFLUENCE OF DEGREE OF EXTENSION OF ELECTRODES INTO FLUX ON LOCAL CHARACTERISTICS OF MHD GENERATORS, V. E. Vanin, V. V. Kirillov, G. I. Maslennikov, and Yu. N. Sokolov, Institute for High Temperatures of the Academy of Sciences, Moscow, USSR.
