

TABLE OF CONTENTS

Session I: Combustion Gas Generators

- I.1 RESULTS OF THE IPP TEST GENERATOR AND THE DESIGN OF A 10 MW_{el} SHORT-TIME COMBUSTION MHD GENERATOR, G. Zankl, J. Raeder, R. Bünde, H. Munttenbruch, Ch. Dorn, R. Volk, Max-Planck-Institut für Plasmaphysik, Garching, Germany.
- I.2 ON DIRECT COAL FIRED MHD GENERATOR, Y. C. L. Wu, J. B. Dicks, K. E. Tempelmeyer, L. W. Crawford, J. W. Muehlhauser, J. F. Martin, G. Roy and G. Rajagopal, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- I.3 EXPERIMENTAL AND ANALYTICAL RESEARCH ON A TWO-MEGAWATT, HIGH PERFORMANCE MHD GENERATOR, O. K. Sonju and J. Teno, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- I.4 EXPERIMENT ON MHD GENERATOR WITH A LARGE-SCALE SUPERCONDUCTING MAGNET (ETL Mark V), ETL Mark V Research Group (K. Fushimi), Electrotechnical Laboratory, Tokyo, Japan.
- I.5 LONG DURATION TESTING IN THE MARK VI FACILITY, R. J. Rosa, S. W. Petty and G. R. Enos, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- I.6 PERFORMANCE AND HALL FIELD LIMITATION STUDIES IN THE STANFORD M-8 MHD GENERATOR, J. K. Koester and W. Unkel, Stanford University, Stanford, California.
- I.7 DESIGN AND MODELING OF THE GAS FLOW SYSTEM FOR A COMPACT 10 MW GENERATOR SYSTEM, O. K. Sonju, J. Teno, R. Kessler, and D. Meader, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- I.8 REPORT ON THE STATUS AND RESULTS OF THE KIVA-1 OPEN CYCLE MHD GENERATOR SYSTEM, Richard V. Shanklin, III, and Robert A. Nimmo, Systems Research Laboratories, Inc., Dayton, Ohio.

Session II: Components

- II.1 THE DIRECT-COAL-FIRED MHD GENERATOR SYSTEM, J. B. Dicks, L. W. Crawford, J. Muehlhauser, J. Martin, N. Loeffler, and B. S. Arora, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- II.2 COAL PROCESSING EMPLOYING RAPID DEVOLATILIZATION REACTIONS IN AN MHD POWER CYCLE, R. E. Gannon, D. B. Stickler and H. Kobayashi, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- II.3 AUXILIARY COMPONENT DEVELOPMENT WORK AT AVCO EVERETT RESEARCH LABORATORY, INC., F. A. Hals, R. E. Gannon and B. Kivel, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- II.4 A SUPERCONDUCTING MAGNET FOR LONG DURATION TESTING OF MHD CHANNELS, A. M. Hatch, F. E. Becker, P. G. Marston, J. J. Nolan and D. Hay, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- II.5 DESIGN STUDY FOR A HIGH FIELD SUPERCONDUCTING MAGNET FOR MHD, J. R. Purcell and S. Wang, Argonne National Laboratory, Argonne, Illinois, and S. A. Self, Stanford University, Stanford, California.

Session III: Systems and Optimization

- III.1 A TWO-DIMENSIONAL DYNAMIC PROGRAMMING METHOD FOR THE OPTIMIZATION OF DCW MHD GENERATORS, K. Y. Chang, W. D. Jackson, and Y. C. L. Wu, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- III.2 TWO-DIMENSIONAL ELECTRIC FIELDS IN MHD-GENERATOR CHANNELS. OPTIMUM LOADING CIRCUITS, V. A. Bityurin, B. M. Burakhanov, S. A. Medin, V. M. Ponomarev, Institute of High Temperatures, Moscow, USSR.

- III.3 THE EFFECT OF MAGNETIC FIELD UPON THE OUTPUT PERFORMANCE OF SEGMENTED-OPEN TYPE MHD GENERATOR, Y. Ozawa and N. Kayukawa, Laboratory for Energy Conversion Processes, Faculty of Engineering, Hokkaido-University, Sapporo, Japan.
- III.4 OPTIMIZATION OF OPEN CYCLE POWER PLANT MHD GENERATOR, A. E. Sheindlin, B. Ya. Shumyatsky, V. I. Kovbasyuk, P. P. Ivanov and G. M. Koryagina, Institute of High Temperatures, Academy of Sciences of the USSR, Moscow, USSR.
- III.5 NO CONCENTRATIONS IN MHD STEAM POWER PLANT SYSTEMS, J. Pepper, R. H. Eustis, and C. H. Kruger, Stanford University, Stanford, California.
- III.6 HYDROGEN-OXYGEN CLOSED CYCLE MHD POWER GENERATION SYSTEM BASED UPON THERMOCHEMICAL DECOMPOSITION OF WATER, T. Nakamura and W. Riedmüller, Max-Planck-Institut für Plasmaphysik, Garching, FRG.
- III.7 NASA LEWIS H₂-O₂ MHD PROGRAM, J. Marlin Smith, L. D. Nichols and G. R. Seikel, NASA Lewis Research Center, Cleveland, Ohio.
- III.8 THE MODULATED MHD PLANT FOR GENERATING ALTERNATING CURRENT, USED AS AN EMERGENCY, F. Negrini, Università di Bologna, Bologna, Italy.

Session IV: Materials

- IV.1 CHEMICAL STABILITY AND DEGRADATION OF MHD ELECTRODES, H. K. Bowen, J. W. Halloran, W. T. Petuskey, J. B. See, and D. Lynch, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- IV.2 ELECTRICAL CONDUCTIVITY OF MHD-CHANNEL MATERIALS, H. P. R. Frederikse and W. R. Hosler, National Bureau of Standards, Washington, D. C.
- IV.3 PREPARATION OF CERAMIC MHD ELECTRODE MATERIAL La_{1-x}Sr_xCrO₃, Michael Berberian, I. B. Cutler, and R. W. Ure, University of Utah, Salt Lake City, Utah.
- IV.4 SOME OPTICAL AND ELECTRICAL PROPERTIES OF UNDOPED AND SR-DOPED LaCrO₃, L. H. Grabner, W. R. Hosler, and H. P. R. Frederikse, National Bureau of Standards, Washington, D. C.
- IV.5 MAGNETIC SUSCEPTIBILITY OF LANTHANUM CHROMITE DOPED WITH STRONTIUM, G. A. Candela, R. A. Forman, and A. H. Kahn, National Bureau of Standards, Washington, D. C. and D. B. Meadowcroft and J. Wimmer, Aerospace Research Laboratory, Wright-Patterson Air Force Base, Ohio.
- IV.6 PHASE RELATIONS INVOLVING SEED-ELECTRODE-INSULATOR MATERIALS IN MHD, C. L. McDaniel and E. R. Plante, National Bureau of Standards, Washington, D. C.
- IV.7 SOME PHYSICAL AND CHEMICAL PROPERTIES OF COAL SLAGS, W. R. Hosler, W. Capps and E. R. Plante, National Bureau of Standards, Washington, D. C.
- IV.8 CORROSION OF MHD PREHEATER MATERIALS IN COAL SLAG-SEED MIXTURES, W. D. Callister, Jr., M. Fishler, I. B. Cutler and R. W. Ure, Jr., University of Utah, Salt Lake City, Utah.
- IV.9 THERMAL SHOCK RESISTANCE OF AIR PREHEATER MATERIALS, R. Goodof and D. R. Uhlmann, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- IV.10 MATERIALS STUDIES IN SUPPORT OF LIQUID METAL MHD SYSTEMS, W. D. Tuohig, J. T. A. Roberts and R. N. Singh, Argonne National Laboratory, Argonne, Illinois.

Session V: Plasma Flows, Properties And Diagnostics

- V.1 ELECTRON VIBRATIONAL ENERGY TRANSFER UNDER MHD COMBUSTION GENERATOR CONDITIONS, C. D. Hawley and M. Mitchner, Stanford University, Stanford, California.
- V.2 MHD EFFECTS ON VISCOUS AND THERMAL WAKES AND THEIR INFLUENCE ON THE PERFORMANCE OF MHD GENERATORS, S. J. Schneider and J. F. Louis, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- V.3 ON SOME IMPORTANT EFFECTS IN LABORATORY MHD FLOWS IN RECTANGULAR DUCTS IN TRANSVERSE MAGNETIC FIELDS, H. Branover, Ben-Gurion University of the Negev, Israel.

- V.4 INFLUENCE OF HALL CURRENTS ON FLOW SEPARATION AND ASYMMETRY IN MHD CHANNELS, E. D. Doss, G. S. Argyropoulos, and S. T. Demetriades, STD Research Corporation, Arcadia, California.
- V.5 THE TIME DEPENDENT MAGNETOHYDRODYNAMIC GENERATOR, David A. Oliver, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- V.6 WALL ROUGHNESS AND AREA VARIATION EFFECTS IN HIGH SUBSONIC MHD GENERATOR CHANNELS, E. D. Doss and G. S. Argyropoulos, STD Research Corporation, Arcadia, California.
- V.7 DIAGNOSTIC INSTRUMENTATION IN COAL FIRED MHD, M. H. Scott, K. Kornstett, and L. Barnett, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- V.8 LASER DOPPLER VELOCIMETRY IN MHD BOUNDARY LAYERS, S. A. Self, Stanford University, Stanford, California.

Session VI: Liquid Metal Generators

- VI.1 STUDY OF A BI-PHASE D.C. MHD GENERATOR USING A NEW MOTION SYSTEM, A. Charon, R. Lagoutte, J. Robert, Laboratoire de Génie Electrique de Paris - L.C.I.E., - Fontenay-aux-Roses, France.
- VI.2 THE EFFECTS OF GEOMETRY AND LOSS MECHANISMS ON THE PERFORMANCE OF TWO-PHASE LIQUID-METAL MHD GENERATORS, W. E. Amend, R. L. Cole, and J. C. Cutting, Argonne National Laboratory, Argonne, Illinois.
- VI.3 BOUNDARY LAYER CONTROL IN TWO-PHASE LIQUID-METAL MHD GENERATORS, J. C. Cutting, R. L. Cole, W. E. Amend, and M. Petrick, Argonne National Laboratory, Argonne, Illinois.
- VI.4 COMPARISON OF DIFFERENT MODELS FOR THE MHD INDUCTION GENERATOR, T. Hühns and E. S. Pierson, Sonderforschungsbereich Magnetohydrodynamik, Technische Universität Berlin.
- VI.5 FINITE-WIDTH EFFECTS IN THE MHD INDUCTION GENERATOR, E. S. Pierson, Sonderforschungsbereich Magnetohydrodynamik, Technische Universität Berlin, and H. Mosebach, University of Illinois at Chicago Circle.

Session VII: Nonequilibrium Generators and MHD Lasers

- VII.1 EXPERIMENTAL STUDIES ON A DISK GENERATOR, James E. Klepeis and Jean F. Louis, Avco Everett Research Laboratory, Inc., Everett, Massachusetts.
- VII.2 EFFECTS OF THE DEVELOPMENT OF BOUNDARY LAYERS ON A FARADAY MHD GENERATOR, S. Shioda, I. Yamashita, and H. Yamamoto, Tokyo Institute of Technology, Meguro, Tokyo, Japan, Mechanical Engineering Lab., Suginami, Tokyo, Japan.
- VII.3 IONISATION, RECOMBINATION AND VOLTAGE DROP MEASUREMENTS IN A CLOSED CYCLE MPD GENERATOR, I. R. McNab, IRD Co. Ltd., Newcastle upon Tyne, England, J. S. Dolby and M. G. Haines, Imperial College, London, England.
- VII.4 RESULTS OF THE EINDHOVEN MHD SHOCKTUNNEL EXPERIMENT, J. W. M. A. Houben, A. Veefkind, J. H. Blom and L. H. Th. Rietjens, Eindhoven University of Technology, Eindhoven, Netherlands.
- VII.5 ELECTRODE STUDIES AND RECENT RESULTS OF NONEQUILIBRIUM MHD GENERATOR EXPERIMENTS, B. Zauderer, E. Tate and C. H. Marston, General Electric Company, King of Prussia, Pennsylvania.
- VII.6 CLOSED CYCLE MHD POWER GENERATION EXPERIMENTS IN THE NASA LEWIS FACILITY, R. J. Sovie, and L. D. Nichols, National Aeronautics and Space Administration, Lewis Research Center, Cleveland, Ohio.
- VII.7 THE INFLUENCE OF ALKALI SEED QUENCHING BY CO₂ ON THE PERFORMANCE OF AN MHD LASER, Andrew Lowenstein, STD Research Corp., Arcadia, California, and David A. Oliver, Massachusetts Institute of Technology, Cambridge, Massachusetts.

- VII.8 CO₂ MHD LASER; ANALYSIS, DESIGN AND SHOCK TUNNEL EXPERIMENTS, B. Zauderer, E. Tate and C. H. Marston, General Electric Company, King of Prussia, Pa.

Session VIII: Electrode Surface Phenomena

- VIII.1 VOLTAGE PROFILES IN THE VICINITY OF NON-EMITTING ELECTRODES, Oscar Biblarz and Richard C. Dolson, Naval Postgraduate School, Monterey, California.
- VIII.2 ARC SPOTS AND VOLTAGE LOSSES IN A HALL GENERATOR, J. W. Muehlhauser and J. B. Dicks, The University of Tennessee Space Institute, Tullahoma, Tennessee.
- VIII.3 PROPERTIES OF NON-STATIONARY CATHODE SPOTS ON THE SURFACE OF COOLED ELECTRODES, E. K. Chekalin, V. M. Gribkov, and V. P. Motulevich, The Krzhizhanovsky Power Institute, Moscow, U.S.S.R.
- VIII.4 VISUAL OBSERVATIONS ON THE HIGH CURRENT TRANSITION FROM THE CONSTRICTED TO THE DIFFUSE MPD ARC MODE, D. L. Murphree and R. P. Carter, Mississippi State University, Mississippi State, Mississippi.
- VIII.5 RESISTIVE COATING OVER MHD ELECTRODES - THEORETICAL AND EXPERIMENTAL STUDIES, C. D. Maxwell, S. T. Demetriades, and S. R. Davis, STD Research Corporation, Arcadia, California.
- VIII.6 THE PREDICTION OF INTER-ELECTRODE BREAKDOWN IN MAGNETOHYDRODYNAMIC GENERATORS, David A. Oliver, Massachusetts Institute of Technology, Cambridge, Massachusetts
- VIII.7 INVESTIGATION OF ELECTRODE PHENOMENA ON SLIT ELECTRODES FOR MGD GENERATORS, D. G. Jimerin, A. V. Bagdonas, V. A. Bashilov, Ju. V. Makarov, The Krzhizkanovsky Institute, Moscow, U.S.S.R.
