

TABLE OF CONTENTS

Session I: ELECTRODE AND WALL PHENOMENA

- I.1 JOINT TEST OF A U.S. ELECTRODE SYSTEM IN THE U.S.S.R. U-02 MHD FACILITY, W. D. Jackson, Energy Research Development Administration, Washington, D. C.; S. J. Schneider, National Bureau of Standards, Washington, D. C.; W. E. Young, Westinghouse Electric Corporation, Pittsburgh, Pennsylvania; L. Bates, Battelle Northwest, Seattle, Washington, A. E. Sheindlin, G. P. Telegin, and D. K. Burenkov, Institute of High Temperatures, Moscow, U.S.S.R.
- I.1A A U.S. ELECTRODE WALL FOR TESTING IN THE U.S.S.R. U-02 MHD FACILITY, R. J. Wright, B. R. Rossing, W. E. Young, Westinghouse Research Laboratories, Pittsburgh, Pennsylvania
- I.2 RECENT MHD GENERATOR STUDIES AT WESTINGHOUSE, A. B. Turner, S. Way, J. Lempert, W. E. Young, J. A. Dilmore, and B. R. Rossing, Westinghouse Research Laboratory Pittsburgh, Pennsylvania
- I.2A SLAG - REFRACTORY BEHAVIOR UNDER HOT WALL GENERATOR CONDITIONS, B. R. Rossing, J. A. Dilmore, H. D. Smith, W. E. Young, Westinghouse Research Laboratories, Pittsburgh, Pennsylvania
- I.3 AXIAL FIELD LIMITATIONS IN MHD GENERATORS, W. Unkel and C. H. Kruger, Stanford University, Stanford, California
- I.4 INVESTIGATION OF PHYSICAL PROCESSES IN THE NEAR-ELECTRODE REGION OF MHD GENERATORS, N. N. Baranov, V. I. Molotkov, L. P. Poberezhsky, I. I. Beilis, V. I. Zalkind, M. P. Zekzer and A. S. Tichotsky Institute of High Temperatures, Moscow, U.S.S.R.
- I.5 BOUNDARY LAYER CALCULATIONS FOR THE MHD INSULATOR WALL, R. R. Rankin and R. H. Eustis, Stanford University, Stanford, California
- I.6 IN-CHANNEL OBSERVATIONS ON COAL SLAG, J. K. Koester, R. H. Eustis and M. E. Rodgers, Stanford University, Stanford, California
- I.7 REPLENISHMENT PROCESSES AND FLOW TRAIN INTERACTION, D. B. Stickler and R. DeSaro, AVCO Everett Research Laboratory, Everett, Massachusetts
- I.8 SLAG LAYERS IN DIRECT COAL-FIRED MHD POWER GENERATION, L. W. Crawford, J. B. Dicks, M. S. Beaton, J. Whiteford, and J. W. Muehlhauser, The University of Tennessee Space Institute, Tullahoma, Tennessee

Session II: ELECTRODE MATERIALS AND SLAG PROPERTIES

- II.1 IMPROVED LANTHANUM CHROMITE CERAMICS FOR HIGH TEMPERATURE ELECTRODES IN OPEN CYCLE MHD SYSTEM, A. M. George, J. R. Pai, and V. K. Rohatgi, Bhabha Atomic Research Centre, Bombay, India
- II.2 SPINELS FOR MHD-ELECTRODES, H.P. R. Frederikse, A. J. Armstrong and W. R. Hosler, National Bureau of Standards, Washington, D. C.
- II.3 TEST RESULTS OF THE SPINEL ELECTRODE MODULE IN LABORATORY AND SIMULATED MHD ENVIRONMENT, J. L. Nash-Webber, R. L. Pober, M. Yoshimura and H. K. Owen, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- II.4 CRYSTALLIZATION AND VAPORIZATION STUDIES ON SYNTHETIC COAL SLAG COMPOSITIONS L. Cook, E. Plante, T. Negas and R. Roth, National Bureau of Standards, Washington, D. C.
- II.5 THERMIONIC EMISSION CHARACTERISTICS OF SEEDED COAL-SLAGS, C. K. Peterson, R. W. Ure, Jr., and I. B. Cutler, University of Utah, Salt Lake City, Utah

Session III: MHD SYSTEMS

- III.1 UTILIZATION OF WESTERN COAL FOR MHD ENERGY CONVERSION, P. D. Bergman and D. Bienstock, Pittsburgh Energy Research Center, Pittsburgh, Pennsylvania
- III.2 INFLUENCE OF COAL TYPE AND DRYING UPON MHD POWER PLANTS AND COMPONENTS, N. J. Patel, W. A. Updike and J. C. Cutting, STD Research Corporation, Arcadia, California
- III.3 DEVELOPMENT OF A BASELINE REFERENCE DESIGN FOR AN OPEN CYCLE MHD POWER PLANT FOR COMMERCIAL SERVICE, W. D. Jackson and R. V. Shanklin, III, Energy Research and Development Administration, Washington, D. C.; R. L. Lawit, R. A. Stoudt and D. C. Burton, Gilbert Associates, Inc., Reading, Pennsylvania, S. T. Demetriades, J. C. Cutting and C. D. Maxwell, STD Research Corporation Arcadia, California
- \*III.4 A SUMMARY OF THE ECAS PERFORMANCE AND COST RESULTS FOR MHD SYSTEMS, G. R. Seikel, R. J. Sovie, R. K. Burns, G. J. Barna, J. A. Burkhart, J. J. Nainiger and J. M. Smith, NASA Lewis Research Center, Cleveland, Ohio
- \*III.5 SYSTEMS STUDIES OF COAL FIRED CLOSED CYCLE MHD FOR CENTRAL STATION POWER, B. Zauderer, General Electric Company, King of Prussia, Pennsylvania
- \*III.6 ECAS MHD SYSTEM STUDIES, D. Q Hoover, T. E. Lippert, T. C. Tsu, W. E. Young, Westinghouse Research Laboratories, Pittsburgh, Pennsylvania
- \*III.7 RESULTS FROM STUDY OF COAL BURNING OPEN CYCLE ADVANCED MHD ENERGY CONVERSION SYSTEMS, F. A. Hals, Avco Everett Research Laboratory, Everett, Massachusetts.
- \*III.8 LIQUID-METAL MHD COUPLED TO COAL-FIRED FLUIDIZED-BED COMBUSTORS, A. R. Bruns-vold and E. S. Pierson, Argonne National Laboratory, Argonne, Illinois
- III.9 THE TECHNOLOGY BASE FOR LARGE MHD SUPERCONDUCTING MAGNETS, Bruce Montgomery and John Williams, Massachusetts Institute of Technology, Cambridge, Massachusetts

Session IV: COMBUSTION GAS GENERATORS

- IV.1 INVESTIGATION OF DIAGONAL-CONDUCTING WALL CHANNEL FOR U-25 POWER PLANT, A. E. Sheindlin, A. E. Barshak, V. A. Bityurin, V. I. Kovbasiuk, V. I. Maksimenko, S. A. Medin, D. S. Pinkhasik, S. I. Pishchikov and S. A. Pashkov, Institute for High Temperatures, Moscow, U.S.S.R.
- IV.2 RESULTS OF MHD GENERATOR TESTING, D. J. Gimerin, V. A. Bashilov, U. V. Makarov and V. V. Tour, Krizhanovski Power Institute, Moscow, U.S.S.R.
- IV.3 DEVELOPMENT OF A HIGH PERFORMANCE, COMPACT COMBUSTION DRIVEN MHD GENERATOR CHANNEL AND DIFFUSER AND STUDY OF TRANSPORTABLE MHD GENERATOR SYSTEMS, O. K. Sonju, J. Teno and D. E. Meader, Maxwell Laboratories, Woburn, Massachusetts.
- IV.4 EXPERIMENT ON MHD GENERATOR WITH A LARGE-SCALE SUPERCONDUCTING MAGNET (ETL MARK V), S. Ikeda, T. Masuda, Y. Kusaka and T. Honda, Electrotechnical Laboratory, Tokyo, Japan
- IV.5 PROGRESS ON THE MARK VI LONG-DURATION MHD GENERATOR, S. Petty, A. Solbes, G. Enos and A. Dunton, Avco Everett Research Laboratory, Everett, Massachusetts
- IV.6 EXPERIMENTAL INVESTIGATION ON A DIRECT COAL-FIRED MHD GENERATOR, Y. C. L. Wu, J. B. Dicks, J. W. Muehlhauser, M. H. Scott, G. Kroeger, and Tran My, The University of Tennessee Space Institute, Tullahoma, Tennessee

\*These papers are published at the end of the proceedings.

Session V: LIQUID METAL MHD GENERATORS

- V.1 ON THE USE OF FLOWS IN AZIMUTHAL FIELDS FOR LAMINARIZATION STUDIES AND FOR POWER GENERATION, H. Branover, BenGurion University of the Negev, Beer-Sheva, Israel
- V.2 COMPARISON OF THREE TYPES OF FREE JET MHD INDUCTION GENERATORS-THREE DIMENSIONAL FIELD DISTRIBUTIONS, PERFORMANCE, T. Huhns and D. Djamali-Schahni, Technische Universitat, Berlin Germany
- V.3 PRELIMINARY EXPERIMENTAL RESULTS FROM THE MHD STAUSTRAHLROHR, R. D. Radebold, Technische Universitat, Berlin, Germany
- V.4 THE INFLUENCE OF WALL JET GAS INJECTION OF LIQUID-METAL MHD GENERATOR PERFORMANCE, G. Fabris, R. L. Cole, R. G. Hantman and E. S. Pierson, Argonne National Laboratory, Argonne, Illinois

Session VI: INERT GAS MHD GENERATORS

- VI.1 CLOSED CYCLE MHD POWER GENERATION EXPERIMENTS USING A HELIUM-CESIUM WORKING FLUID IN THE NASA LEWIS FACILITY, R. J. Sovie, NASA Lewis Research Center, Cleveland, Ohio
- VI.2 DESIGN OF 50 MW CLOSED CYCLE MHD BLOWDOWN EXPERIMENT, C. H. Marston, C. S. Cook, B. Zauderer, General Electric Company, King of Prussia, Pennsylvania, D. Hagford, Fluidyne Engineering Corporation, Minneapolis, Minnesota, and R. D. Hay, Magnetic Engineering Associates, Cambridge, Massachusetts
- VI.3 MHD POWER GENERATION EXPERIMENTS WITH A LARGE DISK CHANNEL: VERIFICATION OF DISK SCALING LAWS, J. Klepeis and V. Hruby, Avco Everett Research Laboratory, Everett, Massachusetts
- VI.4 DETAILED STUDIES IN A DISK GENERATOR WITH INLET SWIRL DRIVEN BY ARGON, W. J. Loubsky, V. J. Hruby and J. F. Louis, Massachusetts Institute of Technology, Cambridge, Massachusetts
- VI.5 ENTHALPY EXTRACTION EXPERIMENTS AT VARIOUS STAGNATION TEMPERATURES IN A SHOCK TUNNEL MHD GENERATOR, J. H. Blom, A. Veefkind and L. H. Th. Rietjens, Eindhoven University of Technology, Eindhoven, The Netherlands
- VI.6 HALL FIELD IN A NONEQUILIBRIUM MHD GENERATOR, F. Negrini and V. Zampaglione, C.N.E.N., Centro Gas Ionizzati, Frascati, Rome, Italy

Session VII: AUXILIARY COMPONENTS

- VII.1 EFFECTS OF DEVOLITIZATION KINETICS AND ASH BEHAVIOR ON COAL FIRED MHD COMBUSTOR DESIGN, H. Kobayashi, A. Padia, and J. Chomiak, Massachusetts Institute of Technology, Cambridge, Massachusetts.
- VII.2 APPLICATIONS OF THE RAPID DEVOLATILIZATION OF COAL IN MHD POWER CYCLES, R. E. Gannon, S. K. Ubhayakar, C. W. vonRosenberg, D. B. Stickler and F. A. Hals, Avco Everett Research Laboratory, Everett, Massachusetts
- VII.3 RECENT EXPERIMENTAL STUDIES OF THE INTERACTION OF POTASSIUM SEED WITH COAL SLAG IN A DIRECT COAL-FIRED MHD GENERATOR, K. E. Tempelmeyer, E. Hamlett, L. Becker and J. Martin, University of Tennessee Space Institute, Tullahoma, Tennessee
- VII.4 KINETICS OF REGENERATION OF SPEND SEED FROM MHD POWER GENERATION SYSTEMS, J. I. Joubert, P. F. Mossbauer, T. C. Ruppel and D. Bienstock Pittsburgh Energy Research Center, Pittsburgh, Pennsylvania

- VII.5 VOLTAGE CONSOLIDATION AND CONTROL CIRCUITS FOR MULTI-ELECTRODE MHD GENERATORS, R. J. Rosa, Montana State University, Bozeman, Montana
- VII.6 CURRENT CURVE DELIVERED FROM MHD GENERATOR TO A CONVENTIONAL POWER GRID BY INVERTER SYSTEM, E. Mitkowski, A Kordus, J. Stiller and A. Grzybowski, Technical University of Poznan, Poland

Session VIII: HEAT EXCHANGERS

- VIII.1 PROGRESS ON THE TESTING OF REFRACTORIES FOR DIRECTLY-FIRED MHD-AIR HEATER SERVICE, J. E. Fenstermacher, D. G. DeCoursin and R. R. Smyth, FluidDyne Engineering Corporation, Minneapolis, Minnesota
- VIII.2 CORROSION OF MHD PREHEATER MATERIALS IN LIQUID SEED SLAG, L. N. Shen, R. E. Mason, Tae-il Oh, I. B. Cutler and R. W. Ure, Jr., University of Utah, Salt Lake City, Utah
- VIII.3 DEVELOPMENT OF HIGH TEMPERATURE AIR PREHEATERS FOR OPEN CYCLE MHD ENERGY CONVERSION SYSTEMS, F. A. Hals, R. E. Gannon, F. E. Becker, and H. F. Steinle, Avco Everett Research Laboratory, Everett, Massachusetts
- VIII.4 CURRENT EXPERIMENTAL RESULTS FROM OPERATION OF A CLOSED CYCLE CERAMIC REGENERATIVE HEAT EXCHANGER, C. S. Cook, General Electric Company, King of Prussia, Pennsylvania

Session IX: PLASMA AND FLOW PHENOMENA

- IX.1 JOINT US-USSR EXPERIMENTAL STUDIES OF THE DEPENDENCE OF PLASMA ELECTRICAL CONDUCTIVITY ON PLASMA TEMPERATURE PERFORMED IN THE AVCO MARK VI MHD FACILITY, I. Vasil'eva, G. P. Malyuzhonok, A. P. Nefedov and A. I. Poberezhsky, Institute of High Temperatures, Moscow, USSR; W. Smith and S. Petty, Avco Everett Research Laboratory, Everett, Massachusetts; W. D. Jackson, Energy Research and Development Administration, Washington, D.C.
- IX.2 RESULTS AND PROGRESS ON THE NASA LEWIS H<sub>2</sub>-O<sub>2</sub> MHD PROGRAM, J. M. Smith, NASA Lewis Research Center, Cleveland, Ohio
- IX.3 ELECTRICAL NON-UNIFORMITIES AND THEIR CONTROL IN LINEAR MHD CHANNELS, A. Lowenstein and A. Solbes, Avco Everett Research Laboratory, Everett, Massachusetts
- IX.4 A CONSTRICTED DISCHARGE IN MAGNETOHYDRODYNAMIC PLASMA, D. A. Oliver, Massachusetts Institute of Technology, Cambridge, Massachusetts
- IX.5 FREE-JET ELECTRICAL CONDUCTIVITY PROFILES OF A SEEDED MHD COMBUSTION PLASMA, E. W. Vendell, Utah State University, Logan, Utah
- IX.6 CONSIDERATION OF THREE-DIMENSIONAL EFFECTS IN MHD POWER GENERATORS, C. D. Maxwell, E. D. Doss, B. P. Curry, D. A. Oliver, STD Research Corporation, Arcadia, California
- IX.7 INVESTIGATION OF ENERGY EXCHANGE PROCESS BETWEEN PLASMA AND DRIVER GAS IN MAGNETIC FIELD, E. I. Asinovskii, Yu. A. Kuznetsov, E. F. Lebedev, V. I. Maksimenko, V. E. Ostashev, S. A. Pashkov, V. I. Sakharov, Yu. M. Faresov and E. M. Shelkov, Institute of High Temperatures, Moscow, USSR.
- IX.8 THERMODYNAMIC PROPERTIES OF SOME NEGATIVE IONS AND GASEOUS K-COMPOUNDS FROM THE COMBUSTION OF COAL IMPURITIES, W. J. Miller, AeroChem Research Laboratories, Princeton, New Jersey
- IX.9 MOMENTUM TRANSFER CROSS-SECTIONS AND CONDUCTIVITY INTEGRALS FOR GASES OF MHD INTEREST, F. E. Spencer, Jr., Pittsburgh Energy Research Center, Pittsburgh, Pennsylvania and A. V. Phelps, University of Colorado and National Bureau of Standards, Boulder, Colorado

LATE PAPER SESSION

- LPS-1 INVESTIGATION OF HEAT AND MASS TRANSFER OF ELECTRODES IN THE LOW TEMPERATURE PLASMA JET, D. G. Jimerin, Gudkov, Motalevich, Chakalev, Krzhizhanovsky Institute.
- LPS-2 ALL-ROUND TECHNICAL AND ECONOMIC INVESTIGATIONS OF OPEN CYCLE INDUSTRIAL AND GENERATOR CHANNELS AND SUPERCONDUCTING MAGNET SYSTEMS, L. S. Popyrin and N. N. Pshenichnov, Siberian Power Institute, Siberian Div. of Academy of Science, Irkutsh, USSR.
