

# TABLE OF CONTENTS

## **0.1-1 Compendium of MHD-Related Terminology**

A.T. Hart, D.A. Lofftus, and D.A. Rudberg, *MSE, Inc*; R.A. Green, *Mississippi State University*

## **Session I: Facility and Proof-of-Concept Status Reports**

### **I.1-1 Coal-Fired MHD Test Progress at the Component Development and Integration Facility**

I. Stepan, A.T. Hart, T.J. Rivers, and R.J. Glovan, *MSE, Inc.*

### **I.2-1 Status of Proof-of-Concept Testing at the CFFF**

R.C. Attig, J. Muehlhauser, N.R. Johanson, and J.N. Chapman, *University of Tennessee Space Institute*

### **I.3-1 The Econoseed Process for MHD Seed Regeneration: Progress and New Developments**

L.C. McClanathan, R.A. Meyers, E.M. Barrish, and J.L. Anastasi, *TRW Applied Technology Division*

### **I.4-1 Proof-of-Concept (POC) Program Integration**

B.M. Pote, *TRW Applied Technology Division*

## **Session II: Status Reports on International Program**

### **II.1-1 Indian MHD Programme - 1989 Status Review**

S.A. Arunachalam, V.R. Malghan, and K. Thiagarajan, *Bharat Heavy Electricals, Ltd.*

### **II.2-1 Research Activities of MHD Power Generation in Japan**

M. Ishikawa and J. Umoto, *Kyoto University*

## **Session III: DOD Applications**

### **III.1-1 Development of MHD Thrusters for Shipboard and Submarine Propulsion (Invited Paper)**

Lt. Commander Richard Martin, *Defense Advanced Research Projects Agency*

### **III.2-1 Comparative Three-Dimensional Flow Analysis of MHD Generators and Seawater Thrusters**

E.D. Doss, *Argonne National Laboratory*; G.D. Roy, *Office of Naval Research*

### **III.3-1 Fluid Mechanics of Seawater MHD Thrusters**

M. Brouillette, G.S. Winckelmans, C.D. Maxwell, and S.T. Demetriades, *STD Research Corporation*

- III.4-1 Performance Analysis of Seawater MHD Thruster Propulsion Systems within a Test Loop**  
 J.X. Bouillard and G.F. Berry, *Argonne National Laboratory*; E.S. Pierson, *Purdue University*
- III.5-1 Initial Experiments on a Chemically Heated, Non-Equilibrium MHD Generator**  
 B. Zauderer and B. Borck, *Coal Tech Corporation*; F. Rodgers, *Atlantic Research Corporation*
- III.6-1 Self-Excited MHD Power Generators for Space Applications**  
 C.D. Maxwell and S.T. Demetriades, *STD Research Corporation*

## Session IV: Poster Session

- IV.1-1 Effects of Friction and End Losses on MHD Thruster Efficiency**  
 E.D. Doss and H.K. Geyer, *Argonne National Laboratory*
- IV.2-1 The Application of MHD Accelerators to Hypersonic Ground Test Facilities**  
 J.N. Chapman, J.T. Lineberry, and H.J. Schmidt, *University of Tennessee Space Institute*
- IV.3-1 Initial Testing of a Ten-Megawatt Rocket-Driven Disk MHD Generator**  
 A. Solbes, J. Weede, J. Stewart and D. Prodan, *TRW Applied Technology Division*
- IV.4-1 Investigations on Insulator Initiated Breakdown**  
 A. Chandra and R. Panwar, *Indian Institute of Technology, India*
- IV.5-1 Near-Electrode Phenomena of Supersonic MHD Generator**  
 M. Ishikawa, M. Honda, and J. Umoto, *Kyoto University, Japan*
- IV.6-1 Analysis of Coal-Fired Generator Experiments at the CDIF**  
 J.T. Lineberry and Y.C.L. Wu, *Engineering Research & Consulting, Inc.*; G.L. Nelson, *MSE, Inc.*
- IV.7-1 Investigations of Boundary Layer Profiles in "K-1" MHD Plant Channels**  
 M. Nekhamin and A. Odarchenko, *Academy of Sciences of the Ukrainian SSR, USSR*
- IV.8-1 Effects of Electric Field Pulses on Electric Strength of MHD Channel Walls**  
 R.V. Ganefeld, V.V. Naletov, V.V. Shtefan, and V.S. Yakovlev, *Academy of Sciences of the Ukrainian SSR, USSR*
- IV.9-1 Effect of Jet Injection on the Characteristics of Metal Electrodes of MHD Generators**  
 O.Y. Kazakevich, A.K. Kachurin, and V.S. Yakovlev, *Academy of Sciences of the Ukrainian SSR, USSR*
- IV.10-1 Electrical Nonuniformities in Slagging MHD Channels**  
 S.M. Marty, J.D. Scott, and S.W. Simpson, *University of Sydney, Australia*

- IV.11-1 Electrophysical Characteristics of Cermet Electrode Modules of the MHD Generator Channel**  
 S.V. Grabowski, A.H. Dvoryaninov, D.Y. Dudko, and S.N. Halabuda, *Academy of Sciences of the Ukrainian SSR, USSR*
- IV.12-1 Complex Electrode Tests at the K-1 MHD Plant**  
 Y.D. Boiko, R.V. Ganefeld, O.Y. Kazakevich, V.B. Redkin, and L.S. Simonenko, *Academy of Sciences of the Ukrainian SSR, USSR*
- IV.13-1 Faraday Multi-Pole MHD Generators**  
 L.K. Kovalyev, A.E. Larionoff, and V.N. Poltavetz, *Moscow Aviation Institute, USSR*
- IV.14-1 Post Operational Analysis of Indian MHD Regenerative Air Preheaters**  
 K. Thiagarajan, A.B. Datta, P. Pari, and N.R. Mohan, *Bharat Heavy Electricals, Ltd., India*
- IV.15-1 EPA Performance Tests for Particulate and SO<sub>2</sub> Conducted at the DOE Coal-Fired Flow Facility**  
 D.G. Rasnake, J.R. Douglas, T.P. Lynch, and J.K. Holt, *University of Tennessee Space Institute*
- IV.16-1 Scada System and Diagnostics for the Indian MHD Retrofit Scheme - An Approach**  
 R. Jayapal, *Bharat Heavy Electricals, Ltd., India*
- IV.17-1 MHD Retrofit: A World Perspective**  
 R.L. Labrie and N.S. Egan, *MHD Development Corporation*
- IV.18-1 An Economic Comparison of the Advanced Coal Gasification-Combined Cycle Versus the Coal-Fired MHD Cycle**  
 J. Lohrasbi, *MSE, Inc.*
- IV.19-1 Component Development and Integration Facility Reliability Program**  
 S. Aguirre, A.T. Hart, and R.J. Glovan, *MSE, Inc.*
- IV.20-1 KDD-2 MHD Combustor**  
 Y. Chen, G. Zhang, Z. Ju, C. Dong and C. Sha, *Institute of Electrical Engineering, Academia Sinica, China*
- IV.21-1 Experimental Research and Theoretical Analysis of the Coal-Fired MHD Burner Characteristics**  
 W. Zheng, *Southeast University*; G. Wu, *Jiaotong University*; Z. Chang, *Southeast University, China*
- IV.22-1 Prototypical Spool Section Design and Performance**  
 S. Myrick, G. Listvinsky, and B. Pote, *TRW Applied Technology Division*
- IV.23-1 Coal Mass-Flow Measurement and Control Developments at the CDIF**  
 S.K. Lundberg, J.E. Joyce, and R.T. Burkhart, *MSE, Inc.*

**IV.24-1 Three-Dimensional Computer Simulation of Non-Reacting Jet Gas Flow Mixing in an MHD Second-Stage Combustor**

S.L. Chang, S.A. Lottes, and G.F. Berry, *Argonne National Laboratory*

**IV.25-1 50-MWt Combustor Performance Summary**

A. Grove, T. Koyama, M. McAllister, J. Richard, and H. Thom, *TRW Applied Technology Division*

## **Session V: Combustion Systems**

**V.1-1 Prototypical MHD Coal Combustor Design Status**

G. Listvinsky, A. Eglitis, A. Grove, B. Hession, P. Mitchell, and S. Myrick, *TRW Applied Technology Division*

**V.2-1 Cold Flow Mixing Study of an MHD Combustor Model Using Laser Velocimetry and Concentration Measurements**

W.W. Wilson and D.V. Srikantiah, *Mississippi State University*; A. Grove, *TRW Applied Technology Division*

**V.3-1 Two-Dimensional Non-Reacting Jet Flow Mixing in an MHD Second Stage Combustor**

S.L. Chang, S.A. Lottes, and G.F. Berry, *Argonne National Laboratory*

**V.4-1 Corrosion Test Results and Materials Options for a Prototypical MHD Coal Combustor**

K. Natesan, D.Y. Wang and W.K. Soppet, *Argonne National Laboratory*

**V.5-1 The Experimental Research of Pre-Blow Pulverized Coal in the Blast-Furnace**

Q. Wei, A. Chen, and C. Jiang, *Southeast University, China*

## **Session VI: Generators A**

**VI.1-1 Generator Performance Experiments Supporting the Prototypic MHD Channel Design**

C.C.P. Pian, E.W. Schmitt, L.C. Farrar, and S.W. Petty, *Avco Research Laboratory*

**VI.2-1 Continued Investigations on the Effects of the TRW Two-Stage Coal Combustor on the Performance of the AVCO MK VI MHD Generator**

A. Grove, T. Koyama, and B. Pote, *TRW Applied Technology Division*; A.W. McClaine and J. Reich, *Avco Research Laboratory*

**VI.3-1 Coal-Fired 1A<sub>1</sub> Channel Gas-Side Element Design and Materials Test Results from the CDIF**

L.C. Farrar, *Montec Associates, Inc.*

**VI.4-1 Leakage Resistance and Current Inferred from CDIF Operating Data**

R.J. Rosa, *Montana State University*

**VI.5-1 Engineering Design and Performance Calculations for a 50-MWt Coal-Fired MHD Generator**

E.W. Schmitt, A.W. McClaine, C.C.P. Pian, R.J. Pollina, and J. Reich, *Avco Research Laboratory*;  
L.C. Farrar, *Montec Associates, Inc.*

**VI.6-1 MHD Channel Element Erosion-Corrosion Studies**

R.J. Pollina and W. Simpson, *Avco Research Laboratory*; L.C. Farrar, *Montec Associates, Inc.*;  
R.J. Rosa, *Montana State University*; D.L. Douglass, *University of California at Los Angeles*

## **Session VII: Downstream Components**

**VII.1-1 Priority Pollutant Analysis of MHD-Derived Combustion Products**

K.D. Parks, *University of Tennessee Space Institute*

**VII.2-1 Analysis of Slag from the Coal-Fired Flow Facility**

C. Jiang, M. Li, C.F. Martin, and J.T. Lineberry, *University of Tennessee Space Institute*

**VII.3-1 Seed Recovery for Inert Gas MHD Power Generation**

E. Shimabukuro, K. Yoshikawa, and S. Shioda, *Tokyo Institute of Technology, Japan*

**VII.4-1 Characterization of Flow Disturbances in a Coal-Fired Combustion Flow Train**

B.C. Winkleman, T.V. Giel, J.T. Lineberry, and D.J. Yang, *University of Tennessee Space Institute*

**VII.5-1 500-Hour Superheater/ITAH Tube Corrosion in the CFFF**

M.K. White and M. Li, *University of Tennessee Space Institute*

**VII.6-1 Electric Properties Research of NHTEP**

A. Chen, X. Guo, Y. Wu, and Q. Wei, *Southeast University, China*

## **Session VIII: Open Forum**

## **Session IX: Generators B**

**IX.1-1 An Inductive MHD Pump/Generator**

I. Alexeff and J.T. Lineberry, *University of Tennessee*; S. Mitchell and J. Brichey, *U.S. Air Force*

**IX.2-1 One- and Two-Dimensional Models for a Linear MHD Generator Channel Design**

C.A. Borghi, A. Massarini, G. Mazzanti, and P.L. Ribani, *University of Bologna, Italy*

**IX.3-1 High-Enthalpy Extraction Demonstration with Closed-Cycle Disk MHD Generators**

N. Harada, Y. Saito, K. Yoshikawa, H. Yamasaki, S. Kabashima, K. Tsunoda, and S. Shioda, *Tokyo Institute of Technology*; Y. Hasegawa, *Mechanical Engineering Laboratory, Tsukuba*; T. Yokota, M. Ishimura, Y. Duozone, and T. Sasaki, *Toshiba Corporation, Japan*

**IX.4-1 Performance Analysis and Optimization of the CDIF Coal-Fired Generator**

V.W. Daniel, *MSE, Inc.*

**IX.5-1 Stability of Open-Cycle Radial-Inflow Disk Generators**

S.M. Marty, S.W. Simpson, and H.K. Messerle, *University of Sydney, Australia*

**IX.6-1 Quasi-Two-Dimensional Calculation of Nonequilibrium Faraday MHD Generator**

Y. Inui, T. Hara, M. Ishikawa, and J. Umoto, *Kyoto University, Japan*

## **Session X: Plant Engineering and Economics**

**X.1-1 Separately-Fired Air Heaters for MHD/Steam Power Plants**

R.B. Boulay, M.R. Hyre, and T.L. Buchanan, *Gilbert/Commonwealth, Inc.*

**X.2-1 Concept of the Development of the MHD Retrofit Power Plants in India**

S.A. Arunachalam, S.K. Somasundaram, K.V.S. Sundaram, B.R. Rao, K.S. Bhaskar, *Bharat Heavy Electricals, Ltd., India*; M. Ya. Batsyn, A.S. Prokop, V.D. Semenov, Yu. N. Sokolov, and V.A. Yurkin, *IVTAN, Moscow*

**X.3-1 NO<sub>x</sub> Emissions: Recent CFFF Results and Estimates for MHD Retrofit Scenarios**

L.W. Crawford, R.C. Attig, T.P. Lynch, and D.G. Rasnake, *University of Tennessee Space Institute*

**X.4-1 The Beijing No. 3 Thermal Power Plant MHD Retrofit: Systems Analysis and Design Status**

C. Sha and K. Zhou, *Institute of Electrical Engineering, Academia Sinica, China*; N. Cai and J. Lan, *Southeast University, China*; T. Cai and M. Jin, *Shanghai Power Equipment Research Institute, China*; N. Johanson and J. Chapman, *University of Tennessee Space Institute*

**X.5-1 Seed Regeneration Integration Options for Commercial MHD/Steam Power Plants**

R.B. Boulay, M.R. Hyre, and T.L. Buchanan, *Gilbert/Commonwealth, Inc.*

## **Session XI: Generators C**

**XI.1-1 Secondary Flows in a Faraday MHD Channel**

R.C. Goforth and C.H. Kruger, *Stanford University*

**XI.2-1 Investigation of Slag Corrosion Mechanism for Alumina Ceramics**

X. Guo and Y. Wu, *Southeast University, China*

- XI.3-1 A Feasibility Demonstration Experimental Facility Simulation of a PASC Consolidation/Inversion System for Faraday Connected MHD Generators**  
R. Johnson, K. Marcotte, and M. Donnelly, *Montana State University*
- XI.4-1 Experiments of a New Conceptual Electrode for Coal-Fired MHD Generator Channels**  
T. Okuo, *Electrotechnical Laboratory*; A. Aoki, S. Yatsu, S. Oikawa, H. Kitagawa, N. Kayukawa, B. Tuchida, R. Nishimura, M. Yagi, and K. Yoshizaki, *Hokkaido University, Japan*
- XI.5-1 Fundamental Study of Arcing Behavior in Boundary Layer of MHD Generator**  
I. Inoue, *Yatsushiro National College of Technology*; M. Ishikawa and J. Umoto, *Kyoto University, Japan*
- XI.6-1 Performance of Ceramic Electrodes and Insulators in Indian MHD Generator**  
N.R. Mohan, K. Thiagarajan, R. Balachandran, and A.B. Datta, *Bharat Heavy Electricals, Ltd., India*

## **Session XII: Diagnostics**

- XII.1-1 Field Operations of the Diagnostic Instrumentation and Analysis Laboratory in Support of MHD Development**  
R.D. Benton, L.E. Bauman, R.A. Green, P.R. Jang, J.S. Lindner, D.V. Srikantiah, W.W. Wilson, W.S. Shepard, and R.L. Cook, *Mississippi State University*
- XII.2-1 Development of an Intrusive Gas Temperature Sensor**  
L.R. Hester and R.A. Green, *Mississippi State University*
- XII.3-1 Laser-Induced Fluorescence Imaging of Rubidium in Combustion Systems**  
R.K. Lengel and J.S. Lindner, *Mississippi State University*
