

# TABLE OF CONTENTS

## Session I: Overview of Proof-of-Concept Program

- I.1.1 **Coal-Fired MHD Test Progress at the Component Development and Integration Facility**  
A.T. Hart, C. Alsberg, *MSE, Inc.*
- I.2.1 **2004 Hours of Proof-of-Concept Testing at the CFFF**  
N.R. Johanson, R.C. Attig, J.W. Muehlhauser, J.N. Chapman, M. Sanders, *The University of Tennessee Space Institute*
- I.3.1 **Econoseed Process for Regeneration of Spent Seed from Magnetohydrodynamics Power Generation**  
J.L. Anastasi, E.M. Barrish, L.C. McClanathan, R.A. Meyers, *TRW Applied Technology Division*
- I.4.1 **Progress Report on MHD Research in 1990 in the People's Republic of China**  
J. Zixiang, *Institute of Electrical Engineering Academia, China*

## Session II: Generators - A

- II.1.1. **IA<sub>4</sub> Channel Design and Fabrication**  
S.W. Petty, A. Dunton, J. Reich, W. Simpson, *Textron Defense Systems*; L.C. Farrar, *Montec Associates*
- II.2.1 **Electrical Characteristics of MHD Generator Sidewalls with Straight - and Z-Bar Designs**  
C.C.P. Pian, S.W. Petty, E.W. Schmitt, D.J. Morrison, *Textron Defense Systems*; L.C. Farrar, *Montec Associates*
- II.3.1 **1A<sub>4</sub> Materials Corrosion and Confirmation Test Results**  
R.J. Pollina, S.W. Petty, C.C.P. Pian, E.W. Schmitt, J. Reich, A. Dunton, *Textron Defense Systems*; L.C. Farrar, *Montec Associates*
- II.4.1 **Operational Plans for the Integrated Topping Cycle MHD Generator**  
E.W. Schmitt, C.C.P. Pian, S.W. Petty, *Textron Defense Systems*; L.C. Farrar, *Montec Associates*
- II.5.1 **Slagging MHD Generators: A New Wall Design Philosophy for Improved Lifetime & Performance**  
D.W. Cott, J. Lohrasbi, *MSE, Inc.*
- II.6.1 **Experimental Studies on Hot Ceramic Electrodes for MHD Generator**  
N.Ram Mohan, K. Thiagarajan, *Bharat Heavy Electricals Limited*
- II.7.1 **The Corrosion of Alumina Ceramics in Melting Slag**  
G. Xianzhao, W. Yanhuo, *Thermoenergy Engineering Research Institute, China*
- II.8.1 **Effect of Iron Oxide on Electrical Nonuniformities in Slagging MHD Channels**  
S.M. Marty, S.W. Simpson, *University of Sydney*

## Session III: Combustion Systems

- III.1.1 **Prototypical Combustor Manufacturing Development Activities**  
J. Albright, R. Braswell, G. Listvinsky, S. Myrick, H. Thom, *TRW Applied Technology Division*

- III.2.1** **Prototypical Combustor Panel Confirmation Testing**  
 S. Myrick, G. Listvinsky, *TRW Space and Technology Group*; J. Lineberry, *University of Tennessee Space Institute*
- III.3.1** **Design Study of MHD Coal-Fired Combustor Second Stage**  
 Andrew Grove, *TRW Applied Technology Division*
- III.4.1** **Simulation of Combustion Processes in an MHD Second Stage Combustor**  
 S.A. Lottes, S.L. Chang, *Argonne National Laboratory*
- III.5.1** **Comparison of Experimental and Numerical Velocity Profiles in the Slagging Stage of an MHD Combustor**  
 O.P. Norton, A. Skaggs, C.W. Bouchillon, *Diagnostic Instrumentation and Analysis Laboratory*
- III.6.1** **Dynamics of the CFFF Coal Feed System**  
 B.C. Winkleman, H.J. Schmidt, T.V. Giel, Jr., *The University of Tennessee Space Institute*
- III.7.1** **Design and Initial Testing of a High Temperature Feedwater Isolator for MHD Applications**  
 J. Weede, L. Hill, J. Stewart, A. Solbes, *TRW Applied Technology Division*
- III.8.1** **Development of Slagging Coal Combustor for High Ash Indian Coals**  
 S.A. Arunachalam, G.V.S. Rao, K. Venkataraman, M. Selvakumar, V. Ramesh, M. Madhappan, *Bharat Heavy Electricals Limited, India*
- III.9.1** **Measuring Massflow of Pulverized Coal with Sensor Suited on Pipe Elbow**  
 X. Chen, X. Du, *Southeast University, China*

## Session IV: MHD Facilities

- IV.1.1** **Preparing the Component Development and Integration Facility for Proof-of-Concept Hardware Testing**  
 A. D. Miller, *MSE, Inc.*
- IV.2.1** **The 1 MWt "MIDA" Test Facility Channel: Design, Construction and First Test Programme**  
 M. Capra, *ENEA IMPE, Italy*; D. Diaz, F. Farina, C. Luzzatto, C. Mao, F. Repetto, M.L. Pelizza, *Ansaldo Divisione Nuove Tecnologie, Italy*
- IV.3.1** **Indian MHD Programme - 1990 Status Review**  
 S.A. Arunachalam, V.R. Malghan, K. Thiagarajan, *Bharat Heavy Electricals Limited, India*
- IV.4.1** **Effects of Inlet Swirl on Flow Mixing in an MHD Second Stage Combustor**  
 S.L. Chang, S.A. Lottes, *Argonne National Laboratory*
- IV.5.1** **Next Test Facility For CCMHD (FUJI-2)**  
 T. Okamura, N. Harada, K. Yoshikawa, H. Yamasaki, S. Kabashima, S. Shioda, *Tokyo Institute of Technology*; H. Hasegawa, *Mechanical Engineering Laboratory, Japan*; M. Ishimura, Y. Douzono, H. Mukaida, S. Ikeda, *Toshiba Corporation*
- IV.6.1** **Conceptual Design of an MHD Retrofit of the Beijing No. 3 Power Plant**  
 S. Ciwen, Z. Kuo, *Institute of Electrical Engineering Academia, China*; C. Ningsheng, *Thermo-energy Engineering Research Institute, China*; J. Ming, *Shanghai Power Equipment Research Institute*; N.R. Johanson, J.N. Chapman, *University of Tennessee Space Institute*

## **Session V: Downstream Components**

- V.1.1 **Status of Pollution Control and Environmental Monitoring at the Coal Fired Flow Facility**  
D.G. Rasnake, J.L. Casey, L.W. Crawford, J.R. Douglas, J.K. Holt, K.D. Parks, P.A. Sherrill,  
*The University of Tennessee Space Institute*
- V.2.1 **Furnace Design for MHD Steam Generator**  
K.V.S. Sundaram, *Bharat Heavy Electricals Limited*
- V.3.1 **Numerical Analysis of the Conceptual Design of the Retrofit Scholz MHD Radiant Boiler**  
J.J. Lee and J.T. Lineberry, *The University of Tennessee Space Institute*
- V.4.1 **Effect of Molten Potassium Sulfate on Refractory Performance in a Coal Fired Magneto-hydrodynamic Pilot Plant**  
T.C. Shaver, M.L. Languell, *The University of Tennessee Space Institute*
- V.5.1 **Potassium and Sulfur Interactions Modeling in a Coal-Fired MHD System**  
J. Li, D.G. Rasnake, A.C. Sheth, *The University of Tennessee Space Institute*
- V.6.1 **Emission Control and Its Cost Aspects in MHD System**  
R. Nagalakshmi, V. Balasubramanian, S.K. Pandey, S.A. Arunachalam, *Bharat Heavy Electricals Limited*
- V.7.1 **Disposition of Chlorine-Containing Species in CFFF and Possible Impact on Coal-Fired MHD System**  
A.C. Sheth, J.R. Douglas, J.K. Holt, S.Y. Wang, *The University of Tennessee Space Institute*

## **Session VI: Diagnostics**

- VI.1.1 **Hydroxyl Concentration Profiles in the Boundary Layer of Combustion Products**  
A.P. Nefedov, A.V. Mokhov, M.G. Kasparov, *Institute for High Temperatures; A.A. Vanin, Moscow Institute of Physics & Technology*
- VI.2.1 **Comparison of CARS Temperature Profile Measurements with Flow Field Model Calculations at the CFFF Diffuser**  
J.P. Singh, F.Y. Yueh, R.L. Cook, *Diagnostic Instrumentation and Analysis Laboratory; J.J. Lee, J.T. Lineberry, The University of Tennessee Space Institute*
- VI.3.1 **The Usage of Probe Methods for Measurements of Concentrations of Positive Ions and Electrons in the Flow of Combustion-Product Plasma**  
A.P. Nefedov, V.I. Molotkov, V.F. Kosov, *Institute for High Temperatures*
- VI.4.1 **Comparison of Faraday Rotation and Emission Absorption Measurements of Electron Density and Conductivity**  
L.E. Bauman, W. Wang, *Diagnostic Instrumentation and Analysis Laboratory*
- VI.5.1 **Application of Aspirated Thermocouple Probe to High-Temperature, Particle-Laden Exhaust Streams**  
R.J. Schulz, J.P. Foote, B.C. Winkleman, T.V. Giel, Jr. *The University of Tennessee Space Institute; W.J. Robinson, McDonnell Douglas Space Systems*
- VI.6.1 **A Hydrogen/Oxygen/Potassium Burner for Calibration of Potassium Emission/Absorption Instruments**  
C.W. Bouchillon, *Diagnostic Instrumentation and Analysis Laboratory*

- VI.7.1 **The Optimal Design Selection for Optical Arrangement of Line Reversal Temperature Measurements in Field Conditions**, Yu. A. Gorshkov, V.I. Vladimirov, *Institute for High Temperatures*
- VI.8.1 **The Two-Color Method of Particle Diagnostics in High-Temperature Two-Phase Flow**  
A.P. Nefedov, O.F. Petrov, A.M. Lipaev, *Institute for High Temperatures*
- VI.9.1 **The Account of Light Scattered by Macroscopic Particles in the Spectral Diagnostics of Particle Laden MHD Flow**  
I.A. Vasilieva, L.V. Deputatova, V.I. Vladimirov, Yu. Z. Rastegaeva, *Institute for High Temperatures*
- VI.10.1 **The Role of Advanced Optical Diagnostics in Monitoring and Controlling an MHD Power Plant**  
R. Arun Kumar, R.L. Cook, *Diagnostic Instrumentation and Analysis Laboratory*

## Session VII: MHD Analysis

- VII.1.1 **Transient Modeling and Analysis of MHD Plants**  
W.D. Jackson, *HMJ Corporation*; G.R. Seikel, *Seitec, Inc.*; O.S. Mazzoni, *Systems Research Int.*; F.E. Bernard, *Westinghouse Corporation*; R.J. Harrington, *The George Washington University*
- VII.2.1 **Consideration of Electrical Power Output for a MHD Generator with Superconducting Magnet Coil**  
R. Nishimura, S. Oikawa, Y. Aoki, N. Kayukawa, *Advanced MHD Research Inst., Japan*
- VII.3.1 **High Temperature Pebble Bed Regenerative Airpreheaters - Optimization Studies**  
V.R. Malghan, *Bharat Heavy Electricals Limited*
- VII.4.1 **Quick Magnetic Field Solutions for MHD Magnets**  
M.P. Lakshminarayanan, S. Thyagarajan, R. Rajaram, *Bharat Heavy Electricals Limited*
- VII.5.1 **The Analysis of the Efficiency of the MHD Generator with Space and Time Depended Current Carrying Non-Uniformities**  
V.A. Bityurin, A.P. Likhachev, *Institute for High Temperatures*
- VII.6.1 **Gas Fired MHD Generator Channel Design Analysis**  
P.L. Ribani, I. Montanari, C.A. Borghi, *The University of Bologna*
- VII.7.1 **Mathematical Physics About Bases of Thermodynamics and Fluid Dynamics in Energy Transfer Processes**  
A. Volokovik, *Institute for High Temperatures*
- VII.8.1 **Analytical Study of Pollutants and Their Control in MHD Generators**  
B.K. Sawhney, S.S. Verma, S. Kumar, *Indian Institute of Technology*

## Session VIII: Generators - B

- VIII.1.1 **Leakage Current and Electrode Wear Processes**  
R.J. Rosa, *Montana State University*
- VIII.2.1 **High Explosive MHD Pulsed Power**  
D.W. Cott, D.A. Rudberg, *MSE, Inc.*; R.L. Williamson, *Idaho National Engineering Laboratory*

- VIII.3.1 **Results of FUJI-I Power Extraction Experiment Driven by Helium**  
 N. Harada, T. Suekane, K. Tsunoda, K. Yoshikawa, H. Yamasaki, S. Kabashima, S. Shiota,  
*Tokyo Institute of Technology; Y. Hasegawa, Mechanical Engineering Laboratory, Japan; M.*  
*Ishimura, Y. Douzono, S. Ikeda, Toshiba Corporation*
- VIII.4.1 **Characterization of Electrical Anomalies and Channel Performance in the CDIF MHD Generator**  
 C. Whitworth, D. Lofftus, D. Shoop, *MSE, Inc.*
- VIII.5.1 **MHD "Retrofit" Magnet Using Quasi-Momentless Support**  
 P.G. Marston, J. Chen, A.M. Dawson, J.R. Hale, *Plasma Fusion Center, MIT*

## **Session IX: Power Conditioning and Controls**

- IX.1.1 **Behavior of Coal-Fired Supersonic Diagonal Type MHD Generator with External Control Circuit**  
 M. Ishikawa, T. Suemura, M. Fujita, J. Umoto, *Kyoto University*
- IX.2.1 **Active and Reactive Power Control of Faraday MHD Generator Using New Power Consolidation-Inversion-Control System**  
 Y. Inui, M. Kato, K. Morimoto, M. Ishikawa, J. Umoto, *Kyoto University*
- IX.3.1 **Design Verification Testing at the CDIF and MK-VII of the Avco Current Controls and Consolidators**  
 J. Reich, *Textron Defense Systems; V.J. Hruby, J. Busek Co. Inc.; L.C. Farrar, Montec Associates*
- IX.4.1 **Test Results of a Current Consolidation System on the Avco Mark VII**  
 L.J. Kovalsky, *Westinghouse Science and Technology Center*
- IX.5.1 **Interanode Fault Prevention and Voltage Control**  
 V.J. Hruby, *J. Busek Co., Inc.*
- IX.6.1 **Power Management System for Indian MHD Retrofit Programme**  
 P. Arumugam, *Bharat Heavy Electricals Limited*
- IX.7.1 **Developments in Channel Power at the Component Development and Integration Facility**  
 D. Lofftus, D. Verbael, R. Harned, *MSE, Inc.*
- IX.8.1 **The Parameters Selecting and Experiment Facility of Capacitive Consolidation Circuit**  
 L. Youchang, Z. Yiyu, Z. Bin, *Thermoenergy Engineering Research Institute, China*

## **Session X: MHD Plasmas**

- X.1.1 **CDIF Plasma/Slag Calculations**  
 V. W. Daniel, *MSE, Inc.*
- X.2.1 **Time Dependent Quasi-Onedimensional Flow Models for Linear MHD Generator Channels**  
 A. Massarini, C.A. Borghi, *University of Bologna*
- X.3.1 **Mathematical Models of the Processes of Energy Conversion in MHD Generator**  
 B. Zaporowski, *Technical University of Poznan'*

- X.4.1 **On Possibility of Use of Ionizationally Unstable Pure Argon Plasma in the Closed-Cycle MHD Generator**  
A.V. Erofeev, R.V. Vasil'eva, A.D. Zuev, *A.F. Ioffe Physiotechnical Institute*
- X.5.1 **The Peculiarities of the Chemical Processes in the Boundary Layer of the Combustion Plasma Flow with Alkaline Seed**  
P.A. Pozdeev, B.V. Rogov, V.A. Sinelshikov, *Institute for High Temperatures*
- X.6.1 **Steady State Twodimensional Model for Linear MHD Generator Channel Analysis**  
G. Mazzanti, C.A. Borghi, *University of Bologna*
- X.7.1 **Influence of Plasma Ionization Nonuniformities on the Efficiency of a Closed Cycle MHD Power Plant**  
A.L. Ovsyannikov, O.N. Safronova, V.M. Zubtsov, *Siberian Energy Institute*
- X.8.1 **Voltage-Current Characteristics of a Closed Cycle MHD Generator**  
A.L. Ovsyannikov, V.M. Zubtsov, *Siberian Energy Institute*
- X.9.1 **Numerical and Experimental Investigations of the Metallic Fuels for Pulsed MHD Generators**  
Y.G. Degtev, V.P. Panchenko, *I.V. Kurchatov Institute of Atomic Energy*

## **Session XI: Plant Engineering and Economics**

- XI.1.1 **MHD Demonstration Project - A Strategic Plan**  
R. Labrie, *MHD Development Corporation*; F. Walter, *Montana Power Company*
- XI.2.1 **Economics of MHD Retrofits and New Plants**  
J. Lohrasbi, G. Ashby, *MSE, Inc*; F. Walter, *Montana Power Co.*
- XI.3.1 **Retrofit of MHD Plant to a 200 MW Steam Power Plant**  
S.M. Marty, H.K. Messerle, S.W. Simpson, R. Hunwick, B. Campbell, M. Rados, *University of Sydney*
- XI.4.1 **System Study for a Scale of Tens of MWe Coal-Fired MHD/Steam Combined Cycle Pilot Power Plant**  
C. Ningsheng, X. Yiqian, *Thermoenergy Engineering Research Institute, China*; J.N. Chapman, *University of Tennessee Space Institute*; S. Ciwen, *Institute of Electrical Engineering Academia, China*
- XI.5.1 **Comparison of Integrated Coal Gasification Combined-Cycle (IGCC) with Magneto Hydro Dynamic (MHD) Cycle**  
S.A. Arunachalam, K. Thirumalai, B.R. Rao, *Bharat Heavy Electricals Limited*
- XI.6.1 **High Common Mode Potential (HALL) Isolation Techniques in Indian MHD Pilot Plant**  
R. Jayapal, R. Uttamadoss, *Bharat Heavy Electricals Limited*
- XI.7.1 **An Economic Comparison of an MHD-Steam Power Plant and a Conventional Coal Power Plant**  
H. Kapron, *The Technical University of Lublin*; J.N. Chapman, *The University of Tennessee Space Institute*

## Addenda

- VII.2.1    **Consideration of Electrical Power Output for a MHD Generator with Superconducting Magnet Coil**  
R. Nishimura, Y. Aoki, S. Oikawa, T. Okuo, N. Kayukawa, H. Usami, Y. Yamazaki, *Hokkaido University*
- X.3.1    **Mathematical Models of the Processes of Energy Conversion in MHD Generator**  
B. Zaporowski, *Technical University of Poznan', Poland*
