

CONTENTS

| | |
|--|-----|
| PREFACE | v |
| PAUL S. LYKOURDIS: <i>Some Classical Flows in Magnetofluid-mechanics</i> | 3 |
| MEREDITH C. GOURDINE: <i>Magnetohydrodynamic Channel Flow of a Rotating Fluid</i> | 19 |
| NORMAN C. JEN: <i>Anisotropic Properties of Magneto-Acoustic Wave in a Nonuniform Field of Exponential Form</i> | 25 |
| SIGI ZIERING and SHELDON L. KAHALAS: <i>Review of Moment Methods in Transport Theory</i> | 33 |
| WILLIAM A. JANOS: <i>An Approximation Theory for Classes of Linear Boltzmann Equations with Application to the Lorentz Gas Case</i> | 55 |
| TZY-CHENG PENG and ALBERT L. PINDROH: <i>An Improved Calculation of Gas Properties at High Temperatures—Air</i> | 67 |
| MITCHELL THOMAS, JR.: <i>Transport Properties of High Temperature Gases</i> | 89 |
| BRUNO W. WAHL, ROBERT J. GOULD and J. W. MCKEE: <i>Radiative Properties of Hydrogen and Radiative Transfer to the Environment at Elevated Temperatures</i> | 109 |
| DANIEL BERSHADER and R. W. RUTOWSKI: <i>Studies of an Argon Shock-Layer Plasma</i> | 129 |
| ALAN W. DESILVA, JOHN M. WILCOX, WILLIAM S. COOPER III, and FORREST I. BOLEY: <i>Experiments on Alfvén-Wave Propagation</i> | 141 |
| THOMAS H. DIMMOCK: <i>The Electrical Properties of Ionized Flames</i> | 159 |
| ARTHUR SHERMAN and GEORGE W. SUTTON: <i>The Combined Effect of Tensor Conductivity and Viscosity on an MHD Generator With Segmented Electrodes</i> | 173 |
| STERGE T. DEMETRIADES and RICHARD W. ZIEMER: <i>Energy Transfer to Plasmas by Continuous Lorentz Forces</i> | 185 |
| GORDON C. OATES, J. KENNETH RICHMOND, YOSHIO AOKI, and GERHARD GROHS: <i>Loss Mechanisms of a Low Temperature Plasma Accelerator</i> | 207 |
| HAROLD M. DEGROFF and ROGER A. HOLMES: <i>Transient Behavior of Planar Ion Beams</i> | 231 |

| | |
|---|-----|
| GEORGE W. SUTTON and PER GLOERSEN: <i>Magnetohydrodynamic Power and Propulsion</i> | 243 |
| WILLIAM H. REID: <i>The Stability of Viscous Flow Between Rotating Cylinders in the Presence of a Strong Axial Magnetic Field</i> | 269 |
| MARION W. WILCOX: <i>The Magneto-fluid-dynamical Viscous Compressible Flow About Wedges and Flat Plates</i> | 277 |
| RAY N. HASKELL: <i>Magnetohydrodynamic Flow Past a Family of Blunt Axisymmetric Bodies</i> | 299 |
| KEN-ICHI KUSUKAWA: <i>The Flow of an Inviscid Compressible Conducting Fluid Past a Slender Body of an Arbitrary Cross-section</i> | 309 |
| JAMES A. FAY: <i>Plasma Boundary Layers</i> | 337 |
| MARCEL VINOKUR: <i>Kinematic Formulation of Rotational Flow in Magnetogas-dynamics</i> | 349 |
| J. CONRAD CROWN: <i>Quasi-One-Dimensional Magnetogas-dynamic Flows</i> | 361 |
| INGE L. RYHMING: <i>An Example of Highly Rarefied Plasma Flow About a Thin Airfoil</i> | 381 |
