

## *Contents*

|  |    |
|--|----|
| <b>Chapter 1. General Introduction</b>   |    |
| Early days . . . . .   | 1  |
| Atoms and radicals in reactions . . . . .  | 2  |
| Atoms in discharges . . . . .  | 4  |
| Radicals in discharges . . . . .   | 6  |
| Other work on atoms . . . . .  | 7  |
| Nomenclature. . . . .  | 7  |
| Types of discharges . . . . .  | 8  |
| Modern apparatus. . . . .  | 10 |
| References . . . . .   | 12 |
| <br><b>Chapter 2. The Nature of the Plasma</b>   |    |
| Plasma from gaseous elements . . . . .   | 15 |
| Radicals in plasma . . . . .   | 18 |
| Lifetime and recombination of species . . . . .  | 21 |
| (a) Recombination of atoms, 21 – (b) Recombination of ions, 24 – (c) Re-<br>combination of radicals, 25                        |    |
| Complexity of reactions . . . . .  | 26 |
| Plasma temperature . . . . .   | 26 |
| Other methods for producing plasma. . . . .  | 27 |
| References . . . . .   | 28 |
| <br><b>Chapter 3. Direct Current, Low Frequency and Radio-Frequency Discharges</b>   |    |
| Electrode discharges . . . . .   | 31 |
| (a) General, 31 – (b) Point plate discharge, 36 – (c) Corona, 36 – (d)<br>Ozonizers, 36, – (e) Glow discharge electrolysis, 38 |    |
| Electrodeless discharges . . . . .   | 38 |
| (a) Generation of high frequency power for electrodeless discharges,<br>40 – (b) Electron-tube generators, 41                  |    |
| The plasma torch . . . . .   | 45 |
| Electrons of controlled energy. . . . .  | 46 |
| References . . . . .   | 48 |
| <br><b>Chapter 4. Microwave Apparatus</b>  |    |
| The range 150–500 Mc. . . . .  | 50 |
| Microwaves. . . . .  | 52 |
| (a) Magnetrons, 52 – (b) Klystrons or velocity modulated tubes, 54 – (c)<br>Other types of tubes, 56                           |    |
| Power adjustment . . . . .   | 57 |
| Waveguide and waveguide resonators . . . . .   | 57 |

|  |     |
|--|-----|
| Other resonator configurations . . . . .   | 63  |
| Coupling to waveguides and cavities . . . . .  | 66  |
| Protection of generators . . . . .   | 68  |
| Power measurement . . . . .  | 68  |
| Operational apparatus . . . . .  | 69  |
| Microwave plasma torch . . . . .   | 71  |
| References . . . . .   | 73  |
| Chapter 5. <i>Identification and Estimation of Atomic and Free Radical Species</i>   |     |
| Pressure change . . . . .  | 74  |
| Diffusion: the Wrede gauge . . . . .   | 76  |
| Calorimetry . . . . .  | 77  |
| (a) The catalytic probe, 78 – (b) The isothermal calorimeter, 78 – (c) Continuous flow calorimetry, 79   |     |
| Chemical methods . . . . .   | 80  |
| (a) Reactions with solids, 80 – (b) Reaction with gases—Titration, 81 – (c) Nature and yield of products, 84   |     |
| Mass spectrometry . . . . .  | 84  |
| (a) General, 84 – (b) "Time of flight" mass spectrometer, 89 – (c) Quadrupole and monopole spectrometers, 90   |     |
| Electron spin resonance spectroscopy . . . . .   | 90  |
| Emission spectroscopy . . . . .  | 95  |
| (a) General, 95 – (b) Spectroscopy and measurement of intensity of afterglows, 97 – (c) Spectra of trapped radicals, 98  |     |
| Absorption spectroscopy . . . . .  | 98  |
| (a) Atoms, 98 – (b) Radicals, 100  |     |
| Para-ortho hydrogen conversion. Exchange reactions, etc. . . . .   | 100 |
| (a) Para-ortho hydrogen conversion, 100 – (b) Paramagnetic effect of radicals, 101 – (c) Exchange reactions, 101   |     |
| References . . . . .   | 102 |
| Chapter 6. <i>Reactions of Hydrogen Atoms</i>  |     |
| Introduction . . . . .   | 105 |
| Recombination . . . . .  | 106 |
| Transfer of metathetical reactions . . . . .   | 107 |
| Unsaturated hydrocarbons . . . . .   | 108 |
| Reactions with compounds of carbon, hydrogen and oxygen . . . . .  | 109 |
| Reduction . . . . .  | 110 |
| (a) Oxides, 110 – (b) Halocarbons and alkyl halides, 110 – (c) Carbon monoxide, 111 – (d) Inorganic halides, 111   |     |
| Formation of hydrides . . . . .  | 113 |
| (a) Elements, 113 – (b) Halogens and hydrogen halides, 114 – (c) Carbon, 115 – (d) Formation of boranes, 115   |     |
| Miscellaneous reactions . . . . .  | 116 |
| (a) With oxygen, 116 – (b) With dimethylmercury, 117 – (c) With nitrogen, ammonia and hydrazine, 117 – (d) With HCN, 118 – (e) With SO <sub>2</sub> , 118 – (f) With NO <sub>2</sub> and NO, 118 – (g) In solution, 119 – (h) Tritium labelling, 119 |     |

|   |     |
|---|-----|
| Plasma jet reactions . . . . .  | 120 |
| References . . . . .  | 120 |
| Chapter 7. <i>Reactions of Atomic Oxygen</i>  |     |
| Introduction . . . . .  | 123 |
| Recombination of O atoms . . . . .  | 124 |
| (a) The ozone mechanism, 125 – (b) Direct recombination reaction, 125   |     |
| Formation of ozone . . . . .  | 126 |
| Reactions with hydrocarbons . . . . .   | 127 |
| (a) Hydrogen abstraction, 127 – (b) Addition to a double bond, 127 – (c) Insertion of O atoms into C-H and C-C bonds, 129 |     |
| Reactions with compounds of hydrogen, carbon and oxygen . . . . .   | 130 |
| Reaction with carbon tetrachloride . . . . .  | 130 |
| Reactions with oxides of nitrogen . . . . .   | 131 |
| Reactions with hydrogen . . . . .   | 132 |
| Reactions with sulphur and its oxides . . . . .   | 133 |
| Reactions with halogens . . . . .   | 135 |
| Reactions with metals . . . . .   | 137 |
| Reactions with carbon monoxide and carbon . . . . .   | 138 |
| Reaction with silicon . . . . .   | 139 |
| Reactions with other compounds . . . . .  | 140 |
| Reactions in aqueous solutions . . . . .  | 140 |
| References . . . . .  | 141 |
| Chapter 8. <i>Reactions of Nitrogen Atoms</i>   |     |
| Introduction . . . . .  | 143 |
| Recombination of nitrogen atoms . . . . .   | 145 |
| Reaction with nitrogen oxides, oxygen and ozone . . . . .   | 146 |
| Reaction of N <sub>2</sub> and O <sub>2</sub> in discharges, 148  |     |
| Reactions with organic compounds . . . . .  | 149 |
| Reactions with NH <sub>3</sub> and N <sub>2</sub> H <sub>4</sub> . . . . .  | 151 |
| Reaction with phosphine . . . . .   | 153 |
| Reactions with silicon compounds . . . . .  | 153 |
| (a) Silane and methylsilanes, 153 – (b) Silicon tetrachloride, 154  |     |
| Reactions with germanium compounds . . . . .  | 154 |
| (a) Germanium hydride, 154 – (b) Germanium tetrachloride, 155   |     |
| Reaction with boron trichloride . . . . .   | 155 |
| Reaction with hydrogen bromide and hydrogen chloride . . . . .  | 155 |
| Reaction with fluorine . . . . .  | 155 |
| Reactions with carbon monoxide and carbon . . . . .   | 156 |
| Reaction with hydrogen molecules . . . . .  | 157 |
| Reactions with sulphur and sulphur-containing compounds . . . . .   | 158 |
| Reaction with cyanogen . . . . .  | 160 |
| <i>Excited Nitrogen Molecules in Chemical Reactions</i> . . . . . 160   |     |
| <i>Plasma Jet Reactions</i>   |     |
| Formation of cyanogen . . . . .   | 162 |

|  |     |
|--|-----|
| Formation of hydrogen cyanide . . . . .  | 162 |
| Nitrogen-hydrogen reaction . . . . .   | 163 |
| Nitride formation . . . . .  | 163 |
| Nitrogen-oxygen reaction . . . . .   | 163 |
| References . . . . .   | 164 |
| Chapter 9. <i>Reactions of Halogens and Other Atoms</i>  |     |
| Halogen atoms . . . . .  | 167 |
| Recombination of halogen atoms . . . . .   | 169 |
| Reactions of halogens with hydrocarbons and other organic compounds . . . . .  | 170 |
| Reactions of halogens with inorganic materials . . . . .   | 176 |
| (a) Molybdenum and nickel, 176 – (b) Carbon monoxide, 177 – (c) NOCl, 177 – (d) Xenon, 177 – (e) Krypton, 178  |     |
| Reactions of other atoms . . . . .   | 178 |
| (a) Phosphorus atoms, 178 – (b) Sulphur atoms, 179   |     |
| References . . . . .   | 180 |
| Chapter 10. <i>Reactions of Radicals</i>   |     |
| Introduction . . . . .   | 182 |
| <i>Specific Reactions</i>  |     |
| Alkyl radicals . . . . .   | 183 |
| (a) Combination, 183 – (b) Disproportionation, 184 – (c) Hydrogen abstraction, 184 – (d) Halogen abstraction, 186 – (e) Addition to unsaturated compounds, 186 – (f) Decomposition, 187 – (g) Other reactions, 187   |     |
| Methylene radicals . . . . .   | 188 |
| (a) Addition, 188 – (b) Insertion, 189   |     |
| CH radicals . . . . .  | 190 |
| CCl <sub>3</sub> radicals . . . . .  | 191 |
| (a) Combination, 191 – (b) Hydrogen abstraction, 191 – (c) Halogen abstraction, 191  |     |
| CF <sub>3</sub> , C <sub>2</sub> F <sub>5</sub> and C <sub>3</sub> F <sub>7</sub> radicals . . . . .   | 192 |
| (a) Combination, 192 – (b) Hydrogen abstraction, 192 – (c) Addition, 192 – (d) Reaction with NaO, 193  |     |
| OH radicals . . . . .  | 193 |
| (a) Combination, 193 – (b) Other reactions of OH radicals, 195   |     |
| <i>Breakdown and Regrouping Reactions</i>  |     |
| Rearrangement and polymerization of hydrocarbons and compounds of carbon, hydrogen and oxygen . . . . .  | 196 |
| Hydrazine formation from ammonia . . . . .   | 199 |
| Formation of other N-H compounds . . . . .   | 202 |
| Formation of hydrides . . . . .  | 202 |
| (a) Boron hydrides, 202 – (b) Boron-carbon hydrides, 203 – (c) Arsenic hydrides, 203 – (d) Germanium hydrides, 203 – (e) Germanium-phosphorus and germanium-arsenic hydrides, 204 – (f) Germanium-silicon hydrides, 204 – (g) Silicon hydrides, 204 – (h) Silicon-phosphorus and silicon-arsenic hydrides, 205 |     |

|  |     |
|--|-----|
| Formation of halides . . . . .   | 206 |
| (a) Silicon halides, 206 – (b) Organo-silicon halides, 207 – (c) Phosphorus halides, 208 – (d) Boron halides, 209 – (e) Germanium halides, 210             |     |
| Nitrogen-fluorine compounds . . . . .  | 211 |
| Carbon monosulphide . . . . .  | 212 |
| References . . . . .   | 212 |
| Chapter 11. <i>Other Dissociations and Reactions</i>   |     |
| Dissociation of CO <sub>2</sub> . . . . .  | 216 |
| Dissociation of CO . . . . .   | 216 |
| Dissociation of OH . . . . .   | 217 |
| Dissociation of sulphur fluorides . . . . .  | 218 |
| Dissociation of SO <sub>2</sub> . . . . .  | 218 |
| Dissociation of Group I, II and III halides . . . . .  | 219 |
| (a) Alkali-metal halides, 219 – (b) Alkaline earth metal halides, 220 – (c) Group III halides, 221   |     |
| Reduction of SiO <sub>2</sub> . . . . .  | 221 |
| Formation of amino acids etc. . . . .  | 222 |
| Formation of hydrogen bronzes . . . . .  | 224 |
| Formation of BCl <sub>3</sub> ·2CO . . . . .   | 224 |
| <i>Plasma Jet Reactions</i> . . . . .  |     |
| References . . . . .   | 225 |
| Chapter 12. <i>Miscellaneous Topics</i>  |     |
| Trapping of free radicals . . . . .  | 227 |
| Ion-molecule reactions . . . . .   | 229 |
| (a) Positive atomic ion and neutral atom transfer, 230 – (b) Hydride ion transfer, 230 – (c) Condensation reactions, 231 – (d) Negative ion reactions, 231 |     |
| Measurement of radical combination rates . . . . .   | 231 |
| Reaction mechanisms . . . . .  | 233 |
| Activation energies . . . . .  | 237 |
| Electrons of controlled energy. Electric fields . . . . .  | 238 |
| References . . . . .   | 239 |
| Index . . . . .  | 241 |
