

## CONTENTS

|  |     |
|--|-----|
| I. FUNDAMENTAL PROCESSES IN ELECTRICAL DISCHARGES          | 1   |
| II. BREAKDOWN AT LOW GAS PRESSURES                         | 80  |
| III. CORONA DISCHARGES                                     | 148 |
| IV. EXPERIMENTAL STUDIES OF THE GROWTH OF SPARK DISCHARGES | 177 |
| V. THE LIGHTNING DISCHARGE                                 | 223 |
| VI. THEORY OF THE SPARK MECHANISM                          | 251 |
| VII. BREAKDOWN VOLTAGE CHARACTERISTICS                     | 291 |
| VIII. IRRADIATION AND TIME LAGS                            | 348 |
| IX. HIGH-FREQUENCY BREAKDOWN OF GASES                      | 374 |
| X. THE SPARK CHANNEL                                       | 390 |
| XI. ELECTRODE EFFECTS                                      | 433 |
| XII. GLOW-TO-ARC TRANSITIONS                               | 446 |
| APPENDIX: RECENT DEVELOPMENTS                              | 472 |
| INDEX OF AUTHORS   | 493 |
| INDEX OF SUBJECTS  | 501 |

Plates 1-8 are to be found between pp. 176 and 177, 9-15 between pp. 432 and 433.
