

INDEX

Session A Vacuum Arcs/Plasma

- A1 ANGULAR DISTRIBUTION OF ION CURRENT IN DC COPPER VACUUM ARC
J. Kutzner, Technical University of Poznań
- A2 INTERACTION BETWEEN A VACUUM ARC AND AN AXIAL MAGNETIC FIELD
H. C. W. Gundlach, Research Department of the Switchgear Division of
Holec B. V. , Hengelo
- A3 AN ATTEMPT AT DETERMINATION AND MUTUAL COMBINATION OF SOME PARAMETERS
OF THE CATHODE REGION OF THE VACUUM ARC IN THE AXIAL MAGNETIC FIELD
K. Stefaniak, R. Batura, D. Broekere, Technical University of Poznań
- A4 PLASMA SHUTTER FOR HIGH POWER GLASS LASER
L. P. Bradley and Peter Koert, Lawrence Livermore Laboratory

Session B Plasma and Electrode Effects

- B1 Invited - PHENOMENA OF OPENING CONTACT ELECTRODES IN VACUUM - THE
MICRO-ARC.
Prof. F. Llewellyn-Jones, University of Wales, Swansea, UK
- B2 INFLUENCE OF ELECTRODE CURVATURE ON BREAKDOWN VOLTAGE OF HIGH VACUUM
GAPS
Bernd-D Schmidt, High Voltage Institute, Technische Universitat, Germany
- B3 A COMPARISON OF THE ELECTRON ENERGY SPECTRA OBTAINED FROM HIGH- β
EMISSION SITES ON BROAD-AREA HIGH-VOLTAGE ELECTRODES OF Cu, Ti and
St-St
N. K. Allen and R. V. Latham, University of Aston in Birmingham, UK
- B4 FORMATION OF EXPLOSIVE EMISSION CURRENT FLASHES
G. P. Bazhenov, S. P. Bougaev, S. M. Chesnokov, O. B. Ladyzhensky,
E. A. Litvinov, USSR Academy of Sciences Siberian Branch, High Current
Electronics Inst.
- B5 ON THE DROP FRACTION OF THE CATHODE EROSION AT THE EXPLOSIVE ELECTRON
EMISSION
B. A. Koval, D. I. Proskourovsky, E. B. Yankelevitch
USSR Academy of Sciences Siberian Branch, High Current Electronics Inst.
- B6 MEASUREMENTS OF PLASMA PARAMETERS IN DIODE WITH EXPLOSIVE ELECTRON
EMISSION BY THOMSON SCATTERING METHOD
R. B. Baksh, B. A. Kablambayev, G. T. Razdobarin, N. A. Ratakhin
USSR Academy of Sciences Siberian Branch, High Current Electronics
Inst. and Physico-Technical Inst.

B7 AC AND DC ION PUMPING UP TO 30 KV
Elizabeth E. Ames and M. B. Silevitch, Northeastern University
Peter Graneau, Francis Bitter National Magnet Laboratory

Session C Electrode Surface Effects

- C1 Invited - REVIEW OF SURFACE ANALYSIS TECHNIQUES
A. van Oostrom, Philips Research Laboratories, Eindhoven
- C2 GAS DESORPTION FROM ELECTRODES AND ELECTRICAL BREAKDOWN IN VACUUM
V. A. Nevrovskiy, V. I. Rakhovskiy, V. G. Zhurbenko, V. A. Zernaev
All-Union Research Institute of Metrological Service, Moscow
- C3 LOWERING OF THE SECONDARY ELECTRON EMISSION COEFFICIENT OF REAL SURFACES DUE TO THE PRIMARY ELECTRON BOMBARDMENT
M. Lavarec, Institut d'Electronique Fondamentale, Universite Paris-XI
G. Boquet and A. Septier, Laboratoire de Physique du Vide, Paris
- C4 ON EFFECTS RESULTING IN APPEARANCE OF NEW EMISSION CENTERS AT EXPLOSIVE ELECTRON EMISSION
G. A. Mesyats, D. I. Proskourovsky, V. F. Puchkarev
USSR Academy of Sciences Siberian Branch, High Current Electronics Inst.
- C5 ORIGIN OF FIELD EMISSION SITES AND MICROPARTICLES ON STAINLESS STEEL AND MOLYBDENUM ELECTRODE SURFACES IN ULTRA-HIGH VACUUM
M. K. Sinha and Yee-Gee Ku, North Dakota State University
- C6 MICROPARTICLE BOUNCING BEHAVIOR FROM OXIDISED AND ATOMICALLY CLEAN ELECTRODE SURFACES
A. S. Brah, S. Mohindra and R. V. Latham, University of Aston, UK

Session D Plasma and Surface Effects/Applications

- D1 Invited - ELECTRON AND ION PROCESSES IN HIGH CURRENT DIODES,
G. A. Mesyats
USSR Academy of Sciences Siberian Branch, High Current Electronics Inst.
- D2 SECONDARY ELECTRON EMISSION CHARACTERISTICS OF INSULATOR SURFACES BEFORE AND AFTER IMPULSE FLASHOVER
P. A. Chatterton and D. K. Davies, Westinghouse R&D Center
- D3 APPLICATION OF THE ELECTRON EXPLOSIVE EMISSION MODEL TO THE CATHODE PROCESSES OF VACUUM DISCHARGES
E. A. Litvinov, G. A. Mesyats, A. A. Starobinets
USSR Academy of Sciences
- D4 SURFACE FLASHOVER MODEL BASED ON ELECTRON-STIMULATED DESORPTION
R. A. Anderson and J. P. Brainard
Sandia Laboratoris

- D5 FLASHOVER SPEED AND SURFACE CHARACTERISTICS OF DIELECTRIC CATHODES IN A RELATIVISTIC ELECTRON BEAM ACCELERATOR
Ray M. Stringfield, Jr., Physics International Company
W. O. Doggett and W. H. Bennett, North Carolina State University
- D6 IMPROVING THE VOLTAGE HOLDOFF OF ALUMINA INSULATORS BY Mn/Ti TREATMENTS
H. Craig Miller and E. J. Furno, General Electric Company
- D7 THE ESTIMATION OF VACUUM VALUE IN THE CLOSED CHAMBER OF VACUUM SWITCHES
K. Stefaniak, R. Batura, D. Broekere, Technical University of Poznań
- D8 MICRODISCHARGES IN DC ACCELERATOR TUBES
D. A. Eastham and R. Thorn, Daresbury Laboratory, UK

Session E Applications

- E1 Invited - ADVANCED POWER FLOW TECHNOLOGIES FOR HIGH CURRENT ICF ACCELERATORS
J. P. VanDevender, D. H. McDaniel, Sandia Laboratories
- E2 MAGNETIC INSULATION OF HIGH VOLTAGES IN VACUUM: COMPARISON OF EXPERIMENT WITH SIMULATIONS
K. D. Bergeron and J. W. Poukey, Sandia Laboratories
M. S. DiCapua and D. G. Pellinen, Physics International
- E3 ON CHARACTERISTICS OF THE HOLLOW ELECTRON BEAM FORMED IN DIODES WITH MAGNETIC INSULATION
A. Ya. Belomytsev, S. P. Bougaev, V. I. Koshelev, G. A. Mesyats, G. S. Popova, V. M. Sveshnikov, K. N. Sukhushin, M. N. Timofeev, USSR Academy of Sciences Siberian Branch, High Current Electronics Institute and Computing Centre
- E4 HIGH-VOLTAGE ASPECTS OF ELECTROSTATIC SEPTA FOR THE CERN-SPS
Y. Baconnier, K. Bätzner, R. Dubois, CERN, Geneva
- E5 DC SWITCHING AND IMPEDANCE MODULATION OF THE VACUUM ARC THROUGH MAGNETIC CONTROL
R. Dethlefsen and J. Mylius, Gould Inc.
- E6 ON THE STEADY STATE BREAKDOWN VOLTAGE OF A VACUUM INTERRUPTER
K. Fröhlich, Technical University Vienna

Session F Applications

- F1 Invited - A MATHEMATICAL MODEL FOR CATHODE SPOT OPERATION
L. P. Harris, General Electric Research Center
- F2 PULSE SPACE DISCHARGE IN VACUUM
Yu. E. Kreindel, N. N. Koval, P. M. Shchanin
USSR Academy of Sciences Siberian Branch, High Current Electronics Inst. and Inst. of Automatic Control Systems

- F3 HINDSIGHT ON DESIGNING A HIGH-GRADIENT ACCELERATION TUBE
J. L. McKibben, Los Alamos Scientific Laboratory
- F4 THE BEAM SEPARATOR AT LAMPF
D. Liska and J. McKibben, Los Alamos Scientific Laboratory
- F5 LARGE AREA SINGLE GAP ELECTRON ACCELERATORS AND THEIR VOLTAGE PERFORMANCE
A. S. Denholm, W. A. Frutiger, and S. V. Nablo, Energy Sciences, Inc.
- F6 THE APPEARANCE OF MICROPARTICLES IN ACCELERATOR TUBES
G. L. Griffith, Muskingum College, Ohio
D. A. Eastham and F. J. Kivlin, Daresbury Laboratory, UK
- F7 BREAKDOWN AND PREBREAKDOWN PHENOMENON IN SF₆-N₂ GAS MIXTURES
N. H. Malik, A. H. Qureshi and G. D. Theophilus, University of Windsor, Canada

Post Deadline Papers - To Be Scheduled

- PD-1 INFLUENCE OF PUMPING TECHNIQUE AND ELECTRODE HEATING ON MICROPARTICLES
R. Haug, C. Texier, Institute de Physique de l'Université de Nantes, France
- PD-2 VARIATIONS OF THE OVERCHARGE FACTOR OF MICROPARTICLES
C. Texier, R. Haug, Institute de Physique de l'Université de Nantes, France
- PD-3 INFLUENCE OF LIGHT AND ITS POLARIZATION ON FIELD EMISSION OF METAL TIPS
Y. Teisseyre, R. Haug and R. Coelho, Laboratoire de Physique des Décharges (CNRS), France
