

CONTENTS

BASIC DISCHARGE PROCESSES

The Development of Theories of the Electrical Breakdown of Gases.	1
F. Llewellyn-Jones	
Basic Processes of Electrical Discharges.	73
J. A. Rees	
Transport Data for the Modeling of Electrical Breakdown and Discharges.	109
A. V. Phelps	
Electronegative Gases	133
L. G. Christophorou	

KINETIC THEORY

Kinetic Theory of Ion Transport in Gases.	177
H. R. Skullerud	
On the Divergence of the Legendre Expansion of the Electron Velocity Distribution	187
W. P. Allis	

BREAKDOWN IN UNIFORM FIELDS

Prebreakdown Ionization in Gases Under Steady-State and Pulsed Conditions in Uniform Fields	207
J. Dutton	
Nanosecond Pulse Breakdown of Gas Insulated Gaps.	241
E. E. Kunhardt	

BREAKDOWN IN NONUNIFORM FIELDS

Physical Models of Long Air Gap	
Breakdown Processes.	265
I. Gallimberti	
Spark-Over Characteristics of Long	
Gaps	291
G. Baldo	

SEMINARS

A Numerical Solution of the Boltzmann	
Equation	313
L. C. Pitchford	
The Microscopic Treatment of Nonequilibrium	
Regions in a Weakly Ionized Gas.	331
P. Segur, M. Yousfi, J. P. Boeuf, E. Marode,	
A. J. Davies, and J. G. Evans	
Current Research Topics in Low-Pressure	
Glow Discharges in Rare Gases	
and in Pure Nitrogen	395
C. M. Ferreira	
Contributions to Continuous Leader Channel	
Development.	419
M. M. Kekez and P. Savic	
PARTICIPANTS	455
INDEX	463
