- Page No. 512 D. R. Airey and P. M. Abbott*
A direct comparison of the interrupter and arc properties of SF₆ and N₂
- 488 D. R. Airey, P. H. Richards and J. D. Swift*
Spectroscopic analysis and core formation in high current, gas flow stabilised SF₆ arcs
- 220 M. Akazaki and I. Tsuneyasu*
Breakdown mechanisms of the positive point to plane gap in air under impulse voltages
- 228 W. Altenburg, J. Freisinger, H. W. Loeb and R. J. Walther*
Beam and plasma diagnostics of a radio-frequency ion source for electric propulsion
- 578 C. Ambasankaran, N. Venkatramani, A. S. Paithankar and V. K. Rohatgi*
Underwater plasma cutting torch
- 559 D. Andersson*
Determination of potential distribution in a TIG welding arc by means of emitting probes
- 554 J. M. Baronnet, P. Fauchais, C. Serre and E. Bourdin*
Study, from nitrogen molecular spectra, of the plasma jet temperatures produced by an arc generator free burning in the air
- 366 R. G. Baumgartner*
Dielectric characteristics of mixtures of sulfurhexafluoride (SF₆) and nitrogen (N₂)

Contents

- Page No.* 279 *J. E. Beattie and J. D. Cross*
Hermstein glow corona in a quasi-uniform field
- 224 *H. Beerwald, G. Böhm and B. Schweer*
Anomalous absorption in a plasma generated by microwave power
- 566 *S. I. Beljuk, V. A. Gruzdev, Iu. E. Kreindel and J. M. Larin*
High-voltage regulated beam discharge electron gun
- 294 *G. Berger*
Influence of a corona discharge on the subsequent one in atmospheric air
- 380 *S. K. Berger*
Reduction of breakdown voltage in uniform and coaxial fields in atmospheric air through moving conducting spheres
- 596 *V. Bergmann, G. Petzold and W. Rother*
Electric probe measurements in a high current arc at atmospheric pressure
- 258 *L. Biborosch, Gh. Popa and M. Sanduloviciu*
Experimental verification of the interference of the waves of stratification
- 243 *A. M. Bishaev, V. P. Gerasimov, V. Kim, L. A. Latishev and G. G. Shishkin*
High frequency plasma oscillations in a cross-field discharge (E-H)
- 68 *D. T. A. Blair, N. M. Macleod and J. S. Orr*
Radiation from gases in the vacuum ultra-violet range

Contents

- Page No. 315 N. B. Bogdanova and V. I. Popkov*
Some means of discharge characteristics' control in air gaps
- 493 I. R. Bothwell, M. D. Cowley and B. Grycz*
High current dc arc in uniform air flow
- 474 I. R. Bothwell, M. D. Cowley and B. Grycz*
Investigation of high-current arcs in nozzle geometry
- 78 A. Bouwknegt, P. J. M. v. d. Burgt, H. Nienhuis and R. M. de Vos Burchart*
Sputtering and evaporation from oxide cathodes in low pressure arcs
- 187 E. Bregnsbo, J. M. Christensen, G. C. Crichton, I. W. McAllister and A. Pedersen*
A study of the initial corona development in long point/plane gaps
- 353 A. Brunet*
Influence of the cathode material on the characteristics of a hollow cathode discharge
- 201 P. Callegaro and G. Pesavento*
Effects of fields distribution on discharge development
- 625 A. Cantin and R. R. J. Gagné*
The behaviour and correct use of electrostatic probes in radio-frequency plasmas
- 375 I. D. Chalmers and J. Thom*
Energy conditioning of high pressure discharge gaps
- 394 J. Charrier, R. Le Ny and A. Boulloud*
Influence of a spherical protrusion on one of the electrodes on the breakdown voltage in room air

Contents

- Page No. 448 J. N. Chubb*
Radio signals from low energy electrostatic sparks
- 247 G. Cicconi, V. Molinari and C. Rosatelli*
Measurements of striation frequency spectra by microwaves
- 262 P. F. Clancy, J. L. Clark and R. G. Earl*
Electrodeless R.F. discharges in argon-nitrogen gas mixtures
- 403 R. Coates, J. Dutton and F. M. Harris*
The role of the electrode surfaces in the breakdown of gases in high uniform fields
- 385 A. H. Cookson and R. E. Wootton*
Particle movement and gas breakdown in high pressure nitrogen and sulphur hexafluoride
- 459 M. D. Cowley*
A radiation-dominated model of arcs in flow
- 463 M. D. Cowley*
Integral methods of arc analysis
- 100 B. H. Crichton, D. J. Tedford and P. Chalmers*
The temporal growth of ionization in long uniform field gaps in air and sulphur hexafluoride
- 192 S. J. Dale and A. Aked*
Effects of gap configuration on the breakdown probability and on the discharge development in long point/plane gaps

Contents

- Page No. 173 S. J. Dale and A. Aked*
Observations of the development of the final arc in long positive point/
plane gaps with switching surges
- 119 A. J. Davies, C. J. Evans and P. M. Woodison*
Calculation of discharge development in nitrogen, oxygen and air at near
atmospheric pressure
- 95 J. Dutton, F. M. Harris and D. B. Hughes*
The dielectric strength of N_2O/SF_6 and N_2O/O_2 mixtures
- 1 M. T. C. Fang and S. K. Chan*
The ac self-similar arc in a steady laminar flow
- 361 O. Farish and R. C. Davidson*
Electric discharges in flowing gases
- 141 R. L. Farquhar, J. D. Swift and B. Ray*
The determination of electron emission by statistical lag measurements
applied to cold cathode discharge tubes used as flame detectors
- 206 H. N. Garcia and B. Hutzler*
Electrical breakdown in long air gaps – the final jump
- 59 J.-F. Genat, M. M. Popović, S. S. Popović, M. Skowronek and
J. Blandin*
Measurements of the electrical conductivity of the plasma column in a
flashtube
- 453 Zh. D. Genchev*
On the stability of two-dimensional Poiseuille plasma arc in an axial
magnetic field
