- Page No. 220 *M. H. Aints, A. J. Haljaste, H. J. Korge, K. F. Kudu and M. R. Laan*
Formation of the HF point-discharge
- 8 *D. R. Airey, P. H. Richards and J. D. Swift*
Anomalous electrical conductivity enhancement in very high current SF₆ arcs
- 63 *D. R. Airey and R. J. Urwin*
Energy balance of a high current SF₆ interrupter arc
- 212 *T. E. Allibone and D. Dring*
Impulse corona development in a rod/plane gap
- 264 *R. B. Anderson, A. J. Eriksson and H. Kröninger*
Lightning and tall structures : some preliminary observations
- 352 *D. Andersson*
The first derivative method—a probe method which seems to have been overlooked
- 372 *E. I. Asinovsky, A. A. Afanasjev and E. P. Pakhomov*
Experimental investigation of instability of wall-stabilized high pressure arc column in magnetic field
- 376 *E. I. Asinovsky, E. P. Pakhomov and I. M. Yartsev*
Argon plasma viscosity measurements
- 354 *J. M. Baronnet, J. Rakowitz, P. Fauchais and J. F. Coudert*
Selective excitation of nitrogen by argon atomic metastable
- 303 *G. J. Bauer and R. Holmes*
Ion energy distributions in high current vacuum arcs
- 279 *E. M. Bazelyan, M. V. Burmistrov, V. I. Levitov and O. V. Volkova*
Electric discharge in long air gaps with slightly non-uniform electric field
- 268 *G. Berger*
Electrode phenomena during the final jump of long sparks
- 105 *G. Berger and M. Goldman*
Dielectrics degradation under corona discharges
- 98 *S. Berger*
Breakdown field gradients in compressed air
