

## CONTENTS

ACKNOWLEDGMENTS.....	ii
TECHNICAL PROGRAM.....	1
SESSIONS	
AA    Discharge Modeling.....	24
AB    Novel Sources: Clusters and Excited States.....	28
BA    Models of RF and Microwave Plasmas .....	31
BB    Basic Processes in Collision Physics.....	36
CA    Heavy-Particle Collisions.....	39
CB    Plasma Surface Interactions .....	43
D      Posters .....	48
E      Posters .....	67
GA    Plasma Chemistry .....	81
GB    Modeling and Diagnostics of Lamp-Like Discharges .....	86
H      Allis Prize Lecture .....	90
K      Posters .....	92
LA    Alternative Configurations for Plasma Processing .....	112
LB    Lamps and High Pressure Discharges .....	116
NA    High Density Plasma Processing.....	121
NB    Electron Excitation and Dissociation .....	125
PA    High Density Plasma Processing and Diagnostics .....	129
PB    Electron Impact and Heavy Particle Collisions .....	133
QA    Plasma Diagnostics .....	137
QB    Atomic Xe and Other Lasers.....	142
R      Posters .....	147
S      Cross Section Workshop .....	164
TA    Sheaths, Glows and Chemistry.....	168
TB    Novel Techniques in Collision Physics.....	172
VA    Lasers and Photophysics .....	175
VB    Simulations.....	180
INDEX OF AUTHORS .....	185
